# Heacock's

There's a Lively Palm Business Ahead for You—Are You Ready?

# Palms

DON'T let this queer weather deceive you into thinking that there won't be any spring. Spring is right at your front door—and summer is crowding close behind; along with it is coming a lively demand for things to help to make homes and verandas and lawns beautiful.

There is nothing ahead of Palms for this—as a lot of your customers know! Many others are learning, and the result is a fast-increasing demand, which we are prepared to meet. These things about Heacock's Palms are worth remembering:—

They're home grown—produced here in our own houses right from the seed. It takes time, patience, and skill, and greenhouse room to develop a six foot Kentia, but we do it—we have scores of fine specimens that large, and many thousands of small sizes ranging down to those in two inch pots. All are clean, healthy, vigorous, good-looking—they commend themselves at first glance even to people who aren't as well-posted in Palms as you are.

Our prices are no higher than you'd have to pay for inferior stock but hundreds of our regular customers say our palms are the best they can get. Come and see us, or write; better do one or the other quick though, and get the early trade—which is the best trade, you know.

# Heacock's

Our Choice Cattleyas Are in Demand

# Orchids

THIS is the season of the year when the very best in flowers are needed. You cannot do better than to be prepared to meet the demands of your trade with the choicest Orchid blooms.

We make a specialty of Orchids and have an extra fine lot of Cattleyas in flower now. They are produced on clean healthy stock. We've been cutting large quantities of Cattleyas all season, shipping them to New York and Chicago besides meeting the demands of the home trade.

The flowers are not "soft," but last their full time and bring good prices because they're large and fresh cut. Write us today for prices. It pays to lead with the best Cattleyas.

When in Philadelphia, be sure to look us up

## Now is the Time to Plant ROSES

### Has Your Order of Rose Stock Been Placed?

If not, it should be at once; and we are in the  
market to supply it. Remember that we are head-  
quarters for Grafted Roses, and are especially strong  
on Standard Commercial Varieties.

We are ready to supply in quantity  
as well as quality:

**Killarney, White Killarney,  
Richmond, My Maryland,  
Kaiserin, Bride and  
Bridesmaid.**

These varieties from 2¼-in. pots.

**\$15.00 per 100, \$120.00 per 1000.**

Special price on 5,000 or more plants.

The Newer Roses we have called to your attention  
before. We hope you saw them at The National  
Flower Show:

**Double Pink Killarney, Prince de  
Bulgarie, Mrs. Aaron Ward,  
Dark Pink Killarney  
and Radiance.**

Let us know your wants

# Dreer's Offer of New Dahlias.

## New German Giant CACTUS DAHLIAS

**Nerthus.** Flowers fully 6 inches in diameter, of splendid form, borne on stout, stiff stems, held well above the foliage. The centre of the flower is a rich, glowing bronzy orange-yellow, passing to a carmine-rose at the tips, the whole suffused with a glowing golden color, which gives it an iridescence which it is not possible to describe. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Rheinkönig.** In this we believe we are offering the ideal white Cactus Dahlia which has been a desiderata for a long time. In habit of growth it is robust, similar to the varieties *Lavine* and *Flora*; in color a pure snow-white, with flowers 5 to 6 inches in diameter. These are of great substance, lasting splendidly when cut; they are borne on long, stiff stems held well above the foliage, making it as valuable for garden decoration as for cutting. Our own representative had the opportunity of comparing this variety with many other sorts which were planted for comparison at the trials which during the past summer were made at the *Palmen Garten* at Frankfurt, Germany, where it showed up in such superior form over all others that we at once secured all available stock. We offer it, believing it to be the most desirable acquisition in Dahlias offered in many years. Strong plants, ready April 15th. 50 cts. each; \$5.00 per doz.; \$35.00 per 100.

**Vater Rhein.** Flowers frequently 7 inches in diameter, raised well above the foliage on stout stems; the petals are broad, curled and twisted, forming an ideal flower, the color of which is yellow suffused with salmon-rose; a beautiful, attractive and imposing flower. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Wodan.** This is the strongest-growing variety in the collection, the plant being exceptionally robust and growing fully 6 feet high, with large, bold flowers, frequently over 7 inches in diameter; but with this large size there is no coarseness, the flowers being a graceful arrangement of semi-incurved tubular petals of a most pleasing, delicate salmon-rose color shading to old gold in the centre. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Wolfgang von Goethe.** A splendid large, free-flowering variety, with gracefully arranged, perfect flowers of a rich apricot with carmine shadings; a splendid cut flower. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100. One each of the above 5 new sorts for \$1.75.

NEW GERMAN GIANT CACTUS DAHLIA RHEINKÖNIG.

## Decorative Dahlias of Recent Introduction

**Belolt.** Particularly effective on account of its very large flowers, borne on stems 18 to 20 inches long and held well above the foliage; these are full double, of splendid form, of a rich purplish-garnet, shading deeper towards the centre. Plants ready April 15th. 35 cts. each; \$3.50 per doz.

**Delce.** Its beautiful soft, yet lively color, a glowing rose-pink, together with its perfect shape, stout, stiff stems which hold the flowers well above the foliage, and the fact that when cut it retains its freshness longer than any variety we know of, makes this one of the most valuable for cutting, and one of the most decorative sorts in the garden. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

**Le Grand Manitou.** The first variegated Dahlia of the decorative type introduced, and which attracted much attention in our trial ground the past season. The flowers are from 5 to 6 inches across, the ground color being white, prettily spotted, striped, blotched and suffused with deep reddish-violet; these are borne on stout, stiff stems and held well above the foliage. Plants ready April 15th. 35 cts. each; \$3.50 per doz.

**Perle de Lyon.** The most valuable white Decorative Dahlia yet introduced, and which is certain to become a leader as a cut flower, perfect in form, pure in color, and produced on long, stiff stems, and very free-flowering. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

**Yellow Colosse.** Flowers of very large size, of perfect form, pure primrose-yellow; the best of its color and valuable for all purposes. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

One each of the above 5 new Decorative Dahlias for \$1.00.

See our Current Wholesale List for other varieties of Dahlias, Seasonable Plants, Seeds, Bulbs, etc.

DECORATIVE DAHLIA, PERLE DE LYON.

The above prices are intended for the Trade only.

HENRY A. DREER, Inc.,

714 Chestnut Street,

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Grand Rapids, Mich., Vice-President;  
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, April 8.—Mushrooms, 60 cents per pound; cucumbers, 15 cents each; lettuce, \$1.25 per dozen heads; tomatoes, 35 cents per pound; radishes, 50 cents per dozen bunches; rhubarb, \$1.25 per dozen bunches; grapes, \$1.10 per pound.

Chicago, April 10.—Mushrooms, 30 cents per pound; cucumbers, \$1.25 to \$1.50 per box, small; lettuce, 17½ cents to 20 cents per pound; radishes, 25 cents to 50 cents per dozen bunches.

### Celery Notes.

This is a good time of the year to consider the celery crop. The marketing is just behind us and a new start before us and plans must be laid soon. We have had a most trying season and finally landed the entire crop on the market in excellent shape and at good prices. The quality has been so good that our trade will remember our celery until the new crop comes in. We do not grow any early celery, expecting to enter the market at Christmas and continue until sold out. Two years ago the month of October was a cold one and all celery in this vicinity was completely banked and ready for winter the last of the month; but November came in warm—so warm that it is conceded to be the warmest November on record. The result was that all celery was bleached to a point that it could not be held any longer and in the attempt to unload the crops the prices went all to pieces. The month of December rushed in with a severe cold wave, so much so that about one-half the crops were frozen outright. Thus from a glut one week the market was bare of home-grown celery the next. Last year we had just the reverse, a warm October, hence everyone held back hilling. November came in cold, so much so that no further growth was possible and most celery went into winter grass-green. There was a great scarcity of bleached celery in December, and later a flood of green stuff looking for a market. Our own crop was as green as the rest, but being all benched and easily accessible, we decided to try bleaching it in heat. Accordingly we made a number of deep hotbeds and after the rank heat had subsided, we removed the celery from the benches and packed them closely in the hot beds, covered by sash and plant bed cloth shutters. The result was a complete success. In ten days to two weeks the hearts developed amazingly, the crop resembling a fine lot of White Plume bleached between boards in September. The only drawback was a slight damage to quality. This rapid growth is at the expense of substance and while ten days was a success, three weeks would have exhausted and ruined them. Thus we entered a fresh lot every other day, to be able to supply our market more regularly and to hold no one lot too

long. The final result is as aforesaid, we sold the entire crop without loss at top prices and the trade calling for more. Another year we shall rather err on the green side than have our crop too ripe in the early fall. We had only two varieties in this lot, Winter King and Winter Queen. King is a selection of Paschal, being of very short and stout growth. The growers in our vicinity start celery too late. The plants should go into permanent rows in June; to this end the seed must be started in March. However the bulk here is sown out of doors and transplanted late in July or early in August as a second crop, which method produces small stuff that winters poorly and is unattractive on the market. To meet southern competition, the northern man must aim for size as well as quality. MARKETMAN.

### The New London Horticultural Society.

It is very possible that it is not known there is a horticultural society in New London. Well, there is, and a very healthy society it is, too. It was born about 18 months ago, and is now a strong and healthy child. It is now walking alone, and is actually beginning to show its wisdom teeth. About this time last year it caught a very severe cold—you know we have a very changeable climate here—and we were afraid that something serious might happen. At this time, too, another baby was born in our old whaling town. This baby, No. 2, was a plump little fellow, and was given a long and lovely name. There was one drawback, however, its mother did not have sufficient milk for it. Of course, the child could not be allowed to starve, and so, the nourishment that should have been given to our baby was given to it. For a little while it did very well on this food, but as the season advanced it seemed to require stronger nourishment, so at last its

health broke down completely, and it died in the early summer.

Our infant, while it caught the severe cold I have already mentioned, was blessed with a stronger constitution than baby No. 2, and through the skilful treatment of three specialists it was brought back to a state of perfect health. Then we gave it several outings during the summer and fall months—you know there is nothing like plenty of sunshine and fresh air to impart health to the invalid. Last year we had three flower shows, which would have done credit to a society of greater pretensions and more mature years. Since then our society has increased in membership and enthusiasm. At our last meeting there was some talk of incorporating our New London Horticultural Society.

Secretary Humphrey, who is an enthusiastic member, composed the following verses:

The artist sits before a plain white canvas, and  
He will in fancy see  
Green hills and valleys, running waters, singing  
birds,  
Children playing round their homes, the herds  
Of cattle in the fields—in full detail the picture  
That's to be.

We too are artists, and in fancy see,  
Far in advance, each season's harmony:  
What floral groupings blend, when each is best,  
When each must fade—  
We strive for true adjustment everywhere; in  
color, form, proportion, light and shade.

Our canvas is a plot of plain old Mother earth;  
Our background is greensward, the foliage of  
trees, or rugged rock in part;  
Our paints, the buds and flowers that ever  
changing from their birth  
Each day retouch our work with Nature's  
matchless art.

DONALD MILLER.

## A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100-class for the best dark pink at the A.C.S. meeting, Pittsburg, January 1909, also at the Chicago Flower Show, November, 1909. It is a pure bright dark pink of even shade, size 3 1/4 inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per 5000, \$400.00. 25 at 100 250 at 1000 rates. Place your order now to be in on early deliveries.

## The Nursery Trade

### American Association of Nurserymen

W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shepandoah, Ia., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Twenty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

FREDERICK LAW OLMSTEAD, one of the foremost landscape architects of the country, was married to Miss Sarah H. Sharpless, at Cambridge, Mass., March 30.

CHICAGO.—Myron H. West has resigned his position as superintendent of Lincoln park, to enter business on his own account. Mr. West has been identified with the park for five and one-half years.

### Conifers in the Arnold Arboretum.

In the five-barred group of pines to which our native white pine belongs, is *Pinus Armandi* from central China, a new species, which has been growing for a few years in the arboretum. It seems to be quite hardy, and in a small state it somewhat resembles *Pinus Strobus*.

*Pinus Koraiensis* is a remarkably handsome white pine from Korea and northern China. It is very slow growing and is doing very well in the arboretum. The largest specimens I have seen are growing on the Dana estate at Glen Cove, Long Island. It forms a pyramidal outline with a dense thick habit. *Pinus Koraiensis* was introduced to this country from Japan about 43 years ago, and so far it gives promise of being a valuable pine for the decoration of parks and gardens.

The timber pine, *Pinus flexilis*, a native of the Rocky Mountains, does not appear in the arboretum, or anywhere else in the east, to give much promise of attaining the size or vigor in cultivation that it does in its native state. In its wild condition this is said to be a beautiful pine and it is widely distributed over the mountain regions of the interior of the continent. It is therefore unfortunate that it does not show some of its native vigor in the eastern side of the continent. It is said, however, to do well in Great Britain.

*Pinus monticola* is a native of the western slopes of the northern Rocky Mountains, and over a large part of the high regions of the west. It does remarkably well in the arboretum and is producing cones freely. Some years ago I noticed a very good specimen of it in the Cambridge Botanic Gardens, Harvard University. It grows very slowly in the pinetum at Highland Park, Rochester, N. Y.

*Pinus parviflora* is a most distinct and picturesque white pine from Japan, and grows remarkably well in the arboretum and has fruited freely for a number of years. The branches clothed with the tufts of blue green leaves, which are much shorter than the leaves of most other white pines, give it a strongly individualistic appearance. It is one of the coniferous evergreens that the Japanese have used largely in the dwarfing process, which is so much in vogue in Japanese ornamental gardening.

The Wm. H. Moon Co.,  
MORRISVILLE, PA.

Mention the American Florist when writing

*Pinus pentaphylla* bears a partial resemblance to *P. parviflora* and was for some time, we believe, confounded with this pine botanically. It is said to be a rare inhabitant of the mountains of southern Yezo in Japan. It is quite hardy and healthy in the arboretum. It is rare in cultivation, and I have never seen it elsewhere.

*Pinus Peuce* is a native of Montenegro and adjoining regions in southeastern Europe. Its relationship to the white pine group is evident at a glance. The habit is distinctly pyramidal, with dense branching. It is doing well in the Arnold Arboretum. Most of the plants of this pine in this country are grafted. Two or three years since Dr. Sargent procured a good supply of the seeds of *Pinus Peuce* from its native habitat, and a considerable number of seedlings have been raised and these will undoubtedly succeed better than the grafted stock.

There is a remarkably good dwarf form of *Pinus strobus* in the arboretum. There is a dwarf variety of the white pine sold in European nurseries, but the form in the arboretum is a much superior plant for garden decoration. The dwarf varieties of all the coniferous evergreens are all extremely useful in garden decoration.

JOHN DUNBAR.

American Florist Co., 440 S. Dearborn St., Chicago

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department "N"

Detroit, Mich.

## What the Users say

## The Kroeschell a Coal Saver---Heats Up Quick.

The No. 4 boiler I purchased of you in 1909 has given the very best satisfaction—would wish no better. Have taken out return tubular boiler this fall, which used one half more coal than your present boiler. Your boiler is so easy to regulate that in a few minutes I can run up the temperature by opening drafts. The flow and return connections with Generator all work the way the best thing I have seen. We cannot give your boiler enough praise: so far as I have given it a test, my old boiler would not be in it comparing to how much more attention the old one took.

FRANK A. WAGNER, Tiffin, O.

### HARDY CARNATIONS.

The new hardy ever-blooming CARNATION "CRIMSON KING." Everybody has asked for a carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long, never a day that you cannot cut blossoms. By putting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy CARNATION CRIMSON KING. Per dozen, \$1.25; per 100, \$5; per 1,000, \$50. 25 plants sold at 100 rates; 250 plants at 1,000 rates. Our new Trade List of everything you need now ready, mailed on application. Write today. THE GOOD & REESE CO., The Largest Rose Growers in the world, Springfield, Ohio.

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

ERECTED FOR THOMAS SPERRY, CRANFORD, N. J. JAMES BELL, GARDENER.

**H**ERE is a greenhouse plan and design that makes everybody sit up and take notice. It hasn't a duplicate anywhere. It is the first time, to our knowledge, that a nine sided palm house has ever been built.

Five firms were competing for the order. Each firm submitted at least two designs—some more. We submitted one—that one won. That one is this one.

## Greenhouse Material

### Hot Bed Sash

Do you wish to have a perfect gutter, lasting, not leaking, not sweating? Use our Cedar Gutter.

Brampton, Ont.

Two degrees below zero in the middle of March makes a rather bad record for this part of Canada, and with the days still dull and cloudy the prospects of a sufficiency of stock at Easter are not as glorious as growers might wish. Some very fine sweet peas are coming in and this simple flower seems to be more in demand as each season passes. What a future it has, since out of the 360 known varieties hardly more than a dozen kinds have been exploited in this country so far.

#### NOTES.

Easter lilies are a source of trouble to the growers here, and exhibit a backward tendency that is somewhat difficult to explain. The bulbs have not proved quite up to last year's standard, but although they have rooted well, the slowness of growth is already beginning to cause some anxiety.

W. E. J. Bell-Smith, wire designer, who has been with the Dale Estate during the last seven years, has succumbed to the lure of the west, and leaves for Victoria, B. C., at the end of the month, where he will probably establish a business of his own.

The Dale Estate has now between nineteen and twenty thousand orchid plants, and the Cattleya Schroederae are putting forth some of the most beautiful blooms ever seen at the greenhouses.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

**J. G. MASTIN CO.**

3124 W. LAKE STREET, CHICAGO, ILL.

Cleveland.

AN INCREASING VARIETY.

An ever increasing variety of good stock is arriving daily, which gives the retailer a choice selection from which to choose. The past week has been a busy one with funeral work, which kept the market free from any accumulation of stock. Killarney roses are plentiful and of excellent quality. American Beauties are received in large quantities, some very extra special stock with perfect blooms being a feature. Bulbous stock is having a good demand, hyacinths and narcissus in pots and pans being ordered quite freely for Easter. Boston and Whitman ferns are also meeting with good sale. Carnations are plentiful and the stock good. Sweet peas, swainsona, sweet alyssum, freesias, pansies, caudulas and lupines help to make up a good variety of small flowers. Violets and lily of the valley are good with fair demand. Asparagus, adiantum and smilax are more plentiful. The last shipment of boxwood for the season has arrived and the stock is exceptionally fine.

NOTES.

At the last meeting of the Florists' Club, the flower show to be held in the fall, was discussed. Some of the party who made the trip to Boston entertained those present with good speeches of what they saw and about the stock seen at eastern greenhouses, and reported a good sociable time. Watch for the date of the next meeting, which every retailer and grower should attend.

Miss Nettie Heiderman, of the Cleveland Florists' Exchange, is at the St.

## Our Supplements.

Subscribers should see that they get copies of  
the fine supplementary illustrations showing  
high grade design and decorative work. These  
fine supplements should be carefully pre-  
served, as they mean much to the retail florists  
in dealing with their customers, illustrating  
as they do the various kinds of work that the  
everyday florist is called upon to perform.

The papers in which the supplements appear  
should be likewise preserved, as they contain  
much valuable data with regard to these special  
illustrations. Subscribers should see that they  
get every issue as otherwise they may miss  
some of this high grade work.

## SUGGESTIONS FOR PLANT GROWERS.

### Peonies.

The herbaceous garden will need at-  
tention as soon as the frost comes out  
of the ground and as the peonies start  
very early they should be taken care of  
as soon as possible. While the best  
time to divide and transplant peonies  
is in the autumn yet, if it was neglect-  
ed, or it is necessary to remove them  
in the spring, it can be done but must  
be finished as early as possible and be-  
fore the growths appear above the  
ground. These young shoots are very  
soft and brittle and easily broken and  
if above the surface will not stand  
transplanting. If the plants were pro-  
tected during the winter or the old  
leaves allowed to remain, all the litter  
should be removed and the ground  
forked or spaded, preferably the former,  
in order to loosen it up, care being  
taken not to break the growing eyes or  
the roots when spading closely to the  
plant. In case the plants were pro-  
vided with a mulch of manure last fall  
this may be spaded in and if not a  
generous coating of rotted manure  
should be spread before the spading is  
begun. Keep the ground free from  
weeds by constant cultivation until the  
foliage grows large enough to shade the  
ground, when they will need but little  
attention for the shade is so heavy  
that weeds cannot grow. To have fine  
specimen flowers the plants should be  
disbudded as soon as the buds spread  
away from the terminal flower.

### Uses for Cold Frames.

A set of cold frames is a valuable  
and necessary adjunct to a range of  
greenhouses, especially in the spring  
when the houses begin to take on such  
high temperatures during the middle  
of the day. Much of the stock is better  
outside, where it can be covered dur-  
ing severe weather and nights, than  
in the houses. Nearly all of the bed-  
ding stock, except that which requires  
a very warm temperature such as  
coleus, can be now moved into the cold  
frames and if water pipes are arranged  
can be much more easily cared for  
than in the warmer house, and will  
make a much stockier growth and be  
in far better shape for early planting.  
Geraniums will be greatly improved  
by being grown in frames, and they

can be hardened off so that they can  
be planted out early without any fear  
of loss. And besides, if in frames, they  
can be given bright sunlight, which  
they so badly need to have them in  
flower at the bedding season. In fact,  
nearly all the young stock will make a  
more satisfactory growth in frames  
than in the greenhouses at this sea-  
son of the year. After the stock that  
is grown for outdoor culture is re-  
moved the frames make a suitable  
place in which to grow cyclamens,  
primulas, bouvardias, begonias and all  
the winter blooming plants that do not  
like warm growing quarters, and for  
summer propagation a mild hotbed is  
very easily made which will insure suc-  
cess in this undertaking. The grower  
of miscellaneous stock cannot well get  
along without a number of cold frames.

### Hybrid Perpetual Roses.

The roses planted outside will now  
have to be looked after, and if they  
have been covered with soil or litter  
during the winter should have the cov-  
ering removed and prepared for prun-  
ing. If an effect of large masses is de-  
sired, four or five large canes may be  
left about three feet high. This will  
give a quantity of short-stemmed  
flowers, making a fine show but not of  
much use as cut flowers. If, however,  
quality is wanted, the canes should be  
cut back to six or eight inches, leaving  
two or three strong eyes, always cut-  
ting just above an outside bud. All  
the small wood should in either case be  
cut away. After the litter has been  
removed, the soil should be forked over  
and levelled off. This forking should  
not be done too deeply unless the  
ground has become packed down very  
hard, for there is danger in breaking  
the small roots. If the plants are on  
budded stock, all growths that come  
from the old stock should be removed.  
To do this dig the soil away from the  
plant carefully, until the shoot is un-  
covered where it branches from the  
stock and it should then be cut or  
broken out as close to the stem as pos-  
sible. If there was no manure mulch  
placed on the bushes last autumn when  
they were prepared for winter, a good  
generous supply should be worked in  
when the bed is forked over. Roses ex-  
haust the soil very rapidly and should

have a generous top-dressing of manure every fall. A sprinkling of wood ashes after the spring cultivation will restore the potash to the soil and materially increase the vigor of the wood and flowers. In case a new bed is to be planted the ground should be forked or spaded very deep and a generous supply of manure worked in, and if budded stock is to be planted, set the bushes firmly with the bud from two to six inches under the ground.

#### Poinsettias.

The stock plants of poinsettias, if they have been under a bench all winter, should now be taken out and potted in a good compost and be given a good light location in a warm house. The poinsettia is a native of Mexico and Central America and throughout its growing season should have an abundance of heat. If there is a place of bench that can be spared upon which there is good soil, the plants can be planted in it quite closely together while being grown for the purpose of obtaining the cuttings. The plants should be pruned back to the live wood, cutting off all the dead ends, and if the cut is made too low and the stem begins to bleed, a little dry soil or sand placed on the cut will quickly stop the flow of sap. The cuttings should be taken as soon as they are two inches long and preferably with a heel, and inserted in the propagating bench where there is good bottom heat. The top eyes will start first and as they are taken off the one below them will break out and a succession of cuttings may be obtained until August, when the propagating of the low plants for pans should be done. These plants propagate very readily under favorable conditions, but unless proper care is taken and the right method practiced, the percentage of loss is very great. They must not be over-watered at any time, and will root easily if placed in bottom heat. It is better during the summer, when there are no fires in the greenhouses, to prepare hotbeds with a gentle heat, covering them with shaded sash, for they cannot be rooted successfully in the propagating bed of the greenhouses after the firing has ceased, the loss from cold in these damp quarters sometimes being very large. The plants that are rooted during April will make fine tall plants with large heads, and with proper treatment beautiful specimens with large leaves clear to the pot.

#### Bouvardias.

The young plants should be planted in the open ground as early as possible. If the soil outside is light and friable it will be well adapted to the growth of these plants, but if the conditions are not such it is far preferable to make up a frame adding leaf mold and sand to the soil to make it light enough for their culture. The young stock should not be allowed to get hard but if it is found necessary should be shifted into larger pots. Keep the shoots well pinched back, so as to produce a short bushy plant for lifting in the fall. They grow very rapidly and when well taken care of make plenty of soft shoots. The plants are much better in a cool temperature for at no time after they are rooted do they require much heat, even at the time of blooming, when they do much better in a cool location. They are subject to attacks of green aphid and mealy bug and sometimes when in dry locations to red spider. They should be sprayed with an insecticide to keep down the first

two and if attacked by red spider frequently syringed and keep the atmosphere and quarters damp.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### Table Decorations.

SEE SUPPLEMENT WITH THIS ISSUE.

The season of social functions and entertainments is now at its height, and the florist will have demands for the decorating of these festive occasions, which gives him the greatest opportunity to not only display all the artistic ability which he possesses, but also to attract the attention of a large number of the flower buyers of his city to the manner in which he is able to execute his work. There are sure to be parties attending these occasions who are not customers of his, and an artistic dinner table decoration will elicit inquiries as to the workman, and he is thus enabled to practically put up an advertisement for himself that will redound to his benefit. The baskets of roses or other flowers, or the tall vases of cut flowers, with the cloth suitably arranged, with the conventional corsages and boutonnières are, of course, always in demand, but the best trade is always on the lookout for some novel effects, and as a rule, are willing to pay the price for something striking that is entirely different than has been before seen. It is therefore necessary that the progressive retailer should be continually on the watch for new ideas, and also endeavor to originate something for his customer, that will not only please her, but also add to his reputation. Care should be taken not to approach the ridiculous, however, and also that everything should be in keeping with the surroundings. The room in which the table is to stand, and the decorations that are in place are to be considered, as well as the personality of the hostess and guests. A table decoration that would be fitting in the house of one customer, would be entirely out of place in the residence of another; the surroundings are entirely different,

There is no limit to the variety of flowers that can be used, for the subject can be treated in so many different ways that everything that is produced by the growers can be employed at some one of the functions, the only thing to be kept in mind is that the flowers selected should be in harmony with the surroundings and the occasion. Roses are, of course, the flowers most popular, and the most often used, carnations are generally second choice, for expensive and select decorations orchids and lily of the valley, with gardenias for boutonnières are the choicest products. But beautiful decorations can be made of the bulbous flowers, sweet peas, marguerites and other cheaper flowers when they particularly fit the occasions. If the party is to be seated, care should be taken that the arrangement does not obstruct the view across the table, being made high enough that the guests may look under, or low enough to look over, and converse with the person across the table. If the parties are not to be seated, no notice will be required of this, and the decorator will have full scope to carry out his ideas without limitations. The beautiful illustration, which is published as a supplement with this issue, is an arrangement of orchids and adiantum in a series of vases, fastened to a rod, which is concealed with ferns, and is a striking example of the beautiful effect which can be produced by thought and artistic ability. The height is about three feet, the width about twelve inches, the two smaller side pieces were eighteen inches in height and nine inches in width. This vase was used for a buffet luncheon, to be seen from only the front. We commend, for such purposes, this style of decoration, as it is attractive and if executed in a clever manner is very appropriate.

### New York Flower Shops at Easter.

Easter was somewhat late this year, and, as all our holidays have now become regular plant festivals it is generally conceded by plant producers

TABLE DECORATION BY A. LANGE, CHICAGO.

Center Plant, Begonia Glorie de Lorraine; Corsage Bouquets, Violets; Boutonnieres, Gardenias.

the corsages at one should be large and heavy, and at the other small and of a much lighter and select flower. The decorations for a young debutante should not be the same as for a reception of older mesdames. These are matters that should all be considered, and the successful decorator will always have them in his mind when carrying out the best ideas.

that an early Easter is far better than a late one, because stock can then be had in better shape for delivery, the few warm days that usually overtake us in April easily upsets the best calculations in the timing of flowering plants; however, there was plenty of stock for everybody. Storekeepers who realized the possible expense of flowering plants by the middle of April were

quite chary about making their displays early in the week, in fact, it was not until Thursday and Friday preceding Easter Sunday that some of the larger stores would receive some of their stock from the growers; rather hard on the latter perhaps, but it insured the storeman of having plants for Easter delivery that were not past their prime.

One grand feature about the Easter displays was the absence of spectacular effects usually produced by artificial stock and farm yard accessories. There is, nowadays, such an abundance of good plants available that retail merchants can afford to rely upon them exclusively almost for window attraction. We might also add that the using of elaborate accessories is becoming more and more obsolete each year. With such a similarity of material used it is mere waste of good space to tell what each retailer used for his Easter window effects. Every store was beautifully adorned with flowering plants and this applies to all quarters and sections of the city. The little east side stores had their windows tastefully arranged with plants suitable in value to the needs of their particular class of customers, just as much so as had the large Fifth avenue stores that cater only to the wealthy.

The lily still retains its hold as an Easter favorite, in spite of the many other kinds of plants that claim some attention. Mixed arrangements were not used so much, but for big effects, the grouping of seven or eight plants into a high handle basket with a spray of asparagus or fern entwined around the handle, was one of the popular ways of handling the lilies, and they were among the best sellers when so treated.

The specimen Rambler roses were so fine that a gilt or green wicker pot cover was almost the only embellishment the retailers added. The varieties Dorothy Perkins and Tausendschon were most in evidence, the old Crimson Rambler rarely being seen in large sizes. Among the hybrid perpetual roses, Frau Karl Druschki and Ulrich Brunner seemed to be about the only varieties grown, and these were only seen in limited numbers, and they were sold chiefly as individuals with some simple cover to hide the pot. Many splendid rhododendrons were used, and with these in addition to enclosing the pot in some suitable receptacle, bows of chiffon of a harmonious color, were introduced here and there among the flower trusses. Large sized azaleas were also treated similarly, in fact, the stores that went in for massive specimens had to rely chiefly upon the lilies, treated as mentioned, the roses, rhododendrons and larger sized azaleas. That one-time favorite, metrosideros, more often called bottle brush, were more in evidence than has been the rule for several years and when well grown specimens are available, as was the case this year, they are very acceptable and are among the best sellers.

Yellow was a favorite color in many stores, acacias, genistas and Erica Cavendishii were all used plentifully, and naturally made very showy effects. With the ericas, a little yellow ribbon was seen occasionally, though it is questionable whether this color really needs the emphasis that ribbon usually

gives. Bougainvilleas were quite a feature, not so many of the large specimens, but plenty of small and medium size. They were often used in combination baskets and hampers. Hydrangeas, both blue and white, were fine and used very freely, both as individuals and in combination for boxes and baskets. Pans of hyacinths and lily of the valley were used extensively, but of other bulbous stock very little was seen. Lilies were not so much in evidence, neither were the flowering cerasus and prunus, the lateness of Easter, no doubt, having much to do

### Easter at Chicago.

Easter, the great flower day of the year, was the occasion of the retailers of the city having the finest of stock and making the most beautiful displays, there being a great wealth of magnificent plants at all the stores. While there was a large quantity of cut flowers, magnificent roses, large vases of lilies and callas, quantities of beautiful carnations, bunches of splendid antirrhinums and a full supply of sweet peas, violets, orchids and other flowers, yet these were entirely overshadowed by the beautiful plants to be

TABLE DECORATION BY THE ERNST WIENHOEBER CO., CHICAGO.

with this. Of small stock there was almost everything imaginable. Candytuft, phlox subulata, hyacinths, cinerarias, Primula obconica, spiraeas, geraniums, marigolds, etc., stock of all grades so plentiful that no store, no matter how small or how large went without an elaborate display of flowering plants.

It is in the tastefully arranged baskets of mixed plants that the retailers' work stands out the best, perhaps, and many fine examples of such work can always be seen at any of our leading stores. In some of this made-up work, a white, light wooden crate with trellis at the back was used and proved very attractive. Upon the trellis was tied the shoots of a small rambler rose, the body of the crate being filled with an assortment of dwarf plants. This crate was one of the novelties and Mr. Hunter of J. W. Small & Sons, assured us that twenty years ago he introduced the self-same crate for plant arrangements and it proved a flat failure. The New York Sun, April 15, said, "the city seems like one huge florists' shop." Certainly there was never before such a gigantic flower show, and all the stores were marvels of beauty.

NEW YORK.—Joseph G. Leikens has leased the property at 20 West Fifty-seventh street for 10 years at an aggregate rental of \$250,000.

seen on every hand. Lilies were in great quantity and some very finely grown stock was to be found everywhere. The Rambler roses were a great feature, and were to be seen in different forms and all the varieties. All the shades of red, pink and white and beautifully grown specimens fan shaped and arched as well as fantastic forms in umbrella shapes and trained to look like ships were displayed in the windows and stores. The leading varieties of these beautiful roses were noted. Crimson and Baby Rambler, Tausendschon (the thousand beauties), Dorothy Perkins, Lady Gay, Hiawatha, and Newport Fairy. This array of bright colored roses added greatly to the beautiful display of flowering plants. Beautifully arranged plant baskets were to be found at all the prominent stores and some very costly combinations were seen. No attempt at artificiality was seen, the only decorative features that were used to adorn the plants were harmonious colored bows of chiffon and the covering of the pots, and in the majority of cases the pot covers were the crepe papers fluted and wrapped around the pot, tied with a small bow of ribbon.

Hydrangeas were in fine condition and splendidly grown plants bearing large heads of beautiful, color made a great display. Magnificent specimens of rhododendrons in red, white, pink and lavender were to be seen and were

greatly admired, for the plants were loaded with blooms and in excellent shape. Azaleas made a great addition to the gorgeous color scheme and some extra large plants of Mme. Van der Cruyssen were very conspicuous, completing the beautiful picture with their mass of color. Hyacinths, tulips and narcissi were in great quantity, adding to the brilliancy and with the genistas adding the yellow to complete the colors of the spectrum. Lily of the valley was done in splendid shape and large pans of this flower were a prominent feature in many of the stores.

Fleischman's store was transformed into a plant house, a staging was erected on both sides of the store and tier over tier of splendid specimens of the different plants were arranged. The Rambler roses were superb and their arrangement and decorations with harmonious chiffon were especially attractive. Large rhododendrons in full bloom and handsome azaleas added a wealth of color. Elegant hydrangeas, spiraeas and splendid pots of lily of the valley were also seen, and plant baskets of different assortments were very attractive features. A novelty seen here were Easter hat hampers, boxes made in the form of hats the top of which lifted like a cover and were filled with choice flowers. At John Mangel's there was a splendid assortment of plants and flowers, especially fine hydrangeas and azaleas, as well as Rambler roses, and the windows were attractively arranged with a fine assortment of plants and flowers. A large cross of lilies in one window was nicely arranged and was greatly admired by the passers by.

H. C. Rowe's enlarged store was filled with nicely grown stock. The window was beautifully arranged. In the center was a miniature automobile, with a dolly lady driver, loaded with blooming plants and flowers ready for delivery. Behind this was a magnificent Dorothy Perkins trained like a ship and well bloomed. Every inch of the store was occupied by beautifully grown plants, rhododendrons in many colors, azaleas, spiraeas pink and white, lilies, bougainvilleas and lily of the valley, beside some fine specimens of ferns and decorative plants. At Lange's there was a fine display of plants and a great assortment of cut flowers. Roses were to be seen in quantity and every kind of flower in the market up to the best quality were on hand. Bohanon's store was full of superb stock, some especially fine plants of rhododendrons and Rambler roses being seen. The Rambler roses grown in round arched form, in the center of which was a cage containing a canary, were a novel attraction. Friedman's two stores were full of splendid plants of azaleas, hydrangeas and roses.

On the south side the stores revealed the downtown stores. C. A. Samuelson had a beautiful line and one of the prettiest windows in the city. This was arranged in garden form with two pillars making a gateway in the background and in the front were beautifully grown plants of roses, rhododendrons, azaleas and bulbous plants with some extra well grown lilies completing a beautiful show in the window. The store was filled with fine specimen plants and the white china dishes holding nice plants of *Erica cypripedium* were striking features. W. J. Smyth had as

usual a fine collection of plants of all the leading varieties and the plant baskets were very attractively put together. The hydrangeas at Muir's were simply grand and the window banked with the magnificent plants was a sight worth looking at. Plant baskets well put up and some extra fine lilies were features in this well-appointed store. Andrew McAdam was well supplied with splendid stock. The lilies were of good quality and the pans of bulb stock were exceptionally fine.

On the west side Hughes had one of his usually characteristic windows which have become noted. A tall white cross twined with chiffon and banked with lilies was a very striking feature and beyond a garden of lilies and spring plants in front of a house scene with portico adorned with flowers and plants was a beautiful scene. At Schiller's there was a grand display of splendidly grown lilies; a pyramid of these plants at the left of the door was an especially beautiful sight. This contained hundreds of plants that extended clear to the ceiling. The greenhouse was also full of well grown stock and extra fine spiraeas and pans of tulips, hyacinths and narcissus were displayed, as well as a quantity of nicely grown ferns.

On the north side at the Ernst Weinhoeber Co.'s there was a beautiful display of nicely grown plants and a great assortment of flowers of the highest quality. The rhododendrons were especially fine and some very well bloomed dwarf apple trees were a pleasing novelty. In the cut flowers the pink antirrhinum and the Spanish iris were a great addition to the beautiful roses and other flowers. Canger & Gormley on North State street had a very fine line of blooming plants and their store was filled with beautiful azaleas, rhododendrons and hydrangeas. Some very well put up combinations of plants, some of which were very elaborate, were a handsome feature.

The weather during the days preceding Easter was exceptionally fine as was the day itself, and the business done was very satisfactory, nearly every store being cleaned out of the fine stock on Sunday morning. The boys and teams and automobiles were delivering all the day after a long hard night's work by the store hands, getting the plants and flowers in shape for transit.

## THE PERENNIALS.

### Early Spring Work.

With the many who have sown seeds of hardy plants early in the year, it is the time of transplanting either in flats or in frames for the further care of same until sufficiently large enough to risk outdoors. At this particular time a word as to "hardiness" will be in season, for there is no other more ambiguous term in the vocabulary of the horticulturist. To speak first of such as seedlings raised under glass of ironclad kinds when established outside, we must remember that at this risky time of year they are no more fitted to stand frost than a common geranium. This is all due to their indoor treatment and easily explained, but many seem to think that because of inherent hardy qualifications, tender young seedlings are able to stand hard treatment as soon as they are large enough. They need, and should have, as good a chance as seedlings of plants of known inability to stand frost in late spring. The protection of sash will be necessary for weeks to come in the case of seedlings, even after pansies are in full bloom, for these have been wintered in cold frames and are in the nature of things injured to cold.

The line of hardiness between north and south is pretty well understood, it having been exploited by individuals by repeated trials of all things that grow outside, but as between east and west there is not, and will not be any certainty, because of the unequal distribution of snowfall each winter. If we could be sure of a good blanket of this best of all covering, the matter of wintering many things would be simplified, when we protect borders in fall with straw manure it is not to keep out frost; this will penetrate anyhow, but to avoid the freezing and thawing which is the hardest of all on plants of herbaceous nature, and especially those that have no underground root-buds. It is never safe to uncover borders until the earth has dried up nicely in the vicinity, and even then it is best to do it partially at first. The past winter has been very peculiar in the "Middle West." We could dig shrubs or trees any day we wished, and

SHIPPING VIOLETS AT EASTER, RHINEBECK, N. Y.

we moved a lot. The temperature has not been down to zero at any time, and the soil was so dry last fall it could not have frozen deep, but it is hard on many things because of the lack of snow.

Plants that were wintered in cold frames came out well, and are being set out as fast as possible before they make too much growth. Hollyhocks are an example of so-called hardy plant that needs protection the first winter, and after flowering it is usually

thrive even in very sandy soil, make a good green covering where grass will not grow, and in early spring make the prettiest mantle of color, usually about Memorial Day. I have in mind an old cemetery where this phlox has escaped bounds, and now covers the whole area with a pretty pink tint through the fresh green grass each year. Those who put it there may be resting under it today.

The tritomas wintered inside must now be taken out and planted. They

## THE GLADIOLUS.

N. B.—The price of the new book, "The Gladiolus," by M. Crawford and Dr. W. Van Fleet, is \$1.25, postpaid.

### Gladiolus Bulb Disease.

It is well known to dealers and florists who keep these bulbs over winter in storage that there are frequently scabby looking spots, which appear on the sides or bottoms of the bulbs, and which continue to enlarge and often involve one-third or more of the bulb and practically destroy it.

We have tried a solution of one part of formaldehyde to five parts of water on such diseased bulbs, using it in two different ways. First, the diseased parts and spots were brushed with a solution; second, the whole bulb was soaked in it for about two minutes. Twelve bulbs of each lot were tried and were planted in the greenhouse with a result, so far, rather more favorable to those dipped than to the others.

The effect on the disease by the use of the solution shows immediately; the spots on the bulbs which are beginning their growth are soft so they may easily be scraped off; they become hardened and the growth of the same is checked. The soaking of the bulbs is recommended as the quickest and surest treatment. It may be well to use this treatment as a preventive, soaking the bulbs at planting time in the spring.

COLLECTOR.

### Gladiolus Scab.

ED. AMERICAN FLORIST:

Under separate cover I am sending you a diseased gladiolus bulb. Any information you can give me as to the nature of the disease, prevention, and remedy will be thankfully received.

GROWER.

This form of scab or dry rot is apparently caused by a fungus, *Myriococcus fusan*, that infects most varieties of gladiolus and allied bulbs, such as *Watsonias*, *antholyzas*, *ixias* and *freesias*, where they are grown in soil too rich and moist. The best practical method of controlling it is to plant in fresh and not over rich soil, using

DISEASED GLADIOLUS BULBS.

best to save seed if the strain is good. Sow as soon as ripe in frames, these to flower the following year. Hollyhocks come reasonably true from seed, and a good strain for double ones is worth perpetuating. There are now others that if sown early will bloom from seed the same year. The colors, however, do not yet include as much variety as could be desired, and the plants behave much as an annual.

At this season it is possible to increase many plants by division, waiting, however, until signs of growth are seen, the better to divide the roots intelligently. All the *lychnis*, *campanulas*, *hemerocallis*, *funkias*, hybrid *delphiniums* and hardy pinks may be increased in this way with safety and profit, likewise the perennial sunflowers and asters. It does not take long for the novice to see what is capable of division by the habit of growth. *Anemone Japonica* which is so fine some seasons in the autumn, can be best increased by root cuttings, but it is too late at this time to attempt it now. In localities where there is danger of early frost in the fall, it is wise to plant where a measure of protection may be afforded. It is one of the best of all late blooming plants, and pays well to grow in pots or frames, or may be lifted at the approach of flowering time to bloom under cover. The varieties of it now are numerous; white and pink, single and double, and all are good, but it is one of the hardest things to do really well of the plants that are considered hardy, but in sheltered situations, rich soil, with plenty of moisture, we can get fine returns at a time when white flowers are scarce and valuable.

The various forms of *Phlox subulata* are invaluable for cemetery work and should be added to any collection of hardy plants. The white forms and those that vary through the shades of lavender and pink are all good,

are not regarded as hardy as a rule. The moisture in the center of the plants will rot them when the cold is not to be feared. When planting them outside, give plenty of manure as they are great feeders and a good crop of bloom will result. When this is done, the lifting process is a benefit rather than otherwise. We used to hear of and see many varieties of tritoma, but today it is either *T. Pfitzeri* or *T. corallina*. By the process of elimination the others have fallen by the wayside. The originals under both the above names were certainly very fine plants, but did not come true from seed. *T. corallina* was the best ever sent out, but it is doubtful if it is in cultivation now as named originally.

Dr. W. Van Fleet.

Authors of New Book, "The Gladiolus" Recently Issued.

chemical potato fertilizer rather than stable manure. Like the potato and beet scabs, it is worse on rich alkaline soils. Ordinary corn ground with a dressing of potato fertilizer containing a good percentage of acid phosphate will be suitable.

The diseased bulbs may be treated before planting by soaking them 12 minutes in a solution of copper sulphate, 1 oz. to 10 gallons warm water; bichloride of mercury,  $\frac{3}{4}$  oz. to 10 gallons water; or commercial formalin, 4 oz. to 15 gallons water. Either solution is quite effective. The husks or skins should be removed from the bulbs before treatment, and they should be planted as soon as fairly well dried off. The scabs do not usually prevent the corms from growing unless they are so numerous as to destroy the rooting surface.

In the case of rare varieties the scabs may be cut out, going well into the sound flesh, treated with one of the above antiseptic solutions and rolled in powdered sulphur before planting.

As a rule never plant gladioli bulbs successive years on the same soil.

W. VAN FLEET.

### The French Immortelle Industry.

No industrial plants, save the perfume plants of the Mediterranean departments, grown on French soil equal in importance the immortelles, or everlasting, of the family of Synanthérées, known to the French botanists as *Gnaphalium orientale*.

The shippers of Ollioules and Bandol, two small towns in the vicinity of Toulon, in the Department of the Var, the centers of the growth and traffic in these flowers, state that their trade with the countries of central Europe has fallen off of late, but that it is constantly increasing with "the Americas," states Consul General Francis M. Mansfield, Toulon, in the Consular Trade Reports. There are still some shipments made to England and Germany, and smaller quantities to St. Petersburg and Vienna. Italy being content with an inferior product coming from the Levant, and to a smaller extent from Sicily, draws very little, if any, stock from the growers of this vicinity.

The trade in immortelles with the United States, as shown by the certified invoices of this consular agency, is chiefly with dealers in New York, Philadelphia, and Chicago, who are practically the only American distributors of these dried flowers, in bunches or made up into wreaths, etc. These flowers are in great demand by florists for the manufacture of funeral wreaths, crosses, etc., and for lodge work and other memorials of a like nature in the United States. The demand is, however, chiefly for use in funeral souvenirs, and the Latin population in the United States accounts largely for the increased demand. The exports to South American countries also reach large proportions. For two years past there has been a remarkable increase in the export of immortelles to the United States from the region around Toulon. The value of these exports as per the invoices certified at the Toulon consular agency alone was \$25,188, \$31,245 and \$38,750, in 1908, 1909 and 1910, respectively.

The immortelle is said to be known in California and Mexico; perhaps it

is to be found elsewhere in the southwestern states, in which case it may be possible to extend whatever local sale the plant may have in competing with the foreign-grown product, the trade in which is so largely increasing. Hereabouts another similar flower has been recently tried out, known as the immortelle du cap. The bloom is more luxuriant than that of the oriental variety and is thought to possess the same everlasting qualities and, in addition, presents itself in a variety of pale tints. It is further distinguished by single and double blossoms, the single being only found in the yellowish white tint; that these varieties are said to be less durable, meaning, perhaps, that they are less suitable to the rough handling of shipping; hence the original product of Ollioules still dominates the market.

Dried immortelles in bunches pay a duty of 25 per cent in entering the United States; and wreaths of ornamental flowers are taxed 60 per cent ad valorem.

It is definitely known that one of the largest concerns engaged in the shipping of flowering bulbs from Ollioules is about to enter into the business of exporting immortelles to the United States, to meet an existing demand which their American representative has made arrangements to handle. In this regard it is fair to assume that there is a growing American market to be supplied, either by home or foreign producers.

### CULTIVATION.

In 60 years the area of cultivation has grown from 30 acres to an extent variously estimated at 3,000 to 5,000 acres. Some 60,000 plants (pieds) grow in a hectare (2.421 acres), from which the net returns are estimated at about \$290 per hectare, say about \$120 per acre.

The warm, sheltered hills bordering on the Mediterranean are seemingly exactly suited to the growth of this curious plant, which was first transplanted here from shoots brought from Malta, Sicily, or the Grecian Archipelago, where it was known to travelers early in the nineteenth century. It is a question of soil, temperature, dryness of atmosphere, and freedom from frost that produce the results here that are thought not to be equalled elsewhere. The growing of immortelles hereabouts is in most cases an industry quite apart from their marketing. Cultivation is by the aid of the most primitive of hand tools, chiefly by the hoe, a short-handled, broad-tined, curved fork, used merely to loosen up the soil between the rows of plants, which, before blossoming, resemble cabbage heads, or touffes, as they are called. The sloping, terraced hillsides are not possible of cultivation by mechanically propelled or horse-drawn machines, hence slow hand labor considerably adds to the cost of cultivation, although the wages paid are very little. The plantations are chiefly small properties of from 500 ares (1.2 acres) to 5 hectares (12.355 acres). Originally the culture was confined to the immediate environs of Ollioules but, with the increased demand, the commune of Bandol, which possesses the same characteristics of soil and climate, took up the culture.

Sowing from seed or transplanting the shoots from growing plants are

the methods used for extending the planted area and only in the second year are marketable blooms produced, those appearing the first year being clipped and destroyed. If female labor is employed, as is frequently the case, it is paid from 20 to 24 cents, while the men receive from 58 to 77 cents per day. The boutons or blossoms of the first year, growing from the touffes, which average perhaps a half a yard in diameter, are suppressed that a more luxuriant blossoming may follow in the second year, when, barring abnormal climatic conditions, an excess of humidity, or severe frosts, the plant has a productive life of 10 or 12 years.

### PREPARING THE FLOWERS.

Preparing immortelles for market is simple but painstaking work. The blooms, of a golden yellow, 12 or 20 blossoms to a stalk, and 50 stalks to a touffe, are picked in June or July, just before they are full blown, the stems being cut some 12 or 15 inches before the blossom. On a basis of 60,000 plants to the hectare, the average return is in the neighborhood of, say, 20,000,000 blossoms to the acre, 80 per cent of which will be available for sale after the process of gathering and drying is completed. The crop is gathered into rough bunches or sheaves, called *bottes*, and allowed to dry naturally for 24 hours on the ground or on cloths or racks spread on the ground, when the bunches are removed to the covered drying lofts. During the two summer months one picking follows another as long as serviceable blossoms open out. Over-blown blooms, whose petals have a tendency to drop from the stalks after drying, seldom reach the market from Ollioules, the growers and shippers alike taking great pains that the product offered is only of the best.

The dyeing and bleaching (the white variety of commerce is but the natural yellow bleached) is a simple process, consisting of dipping the bunches of blossoms to be dyed into vats of hot dye the only precaution taken being to assure the use of permanent colors. These are of the most pronounced shades, as is demanded by the trade. There seems to be little or no demand for pale or subdued tints, the blues, yellows, reds, and greens being often of the most astonishing brilliancy.

The drying lofts and dyeing vats are usually the property of the shipper or negotiant, not the grower, and are invariably primitive installations, probably as efficient as a more elaborately fitted plant, save that if the industry were of greater proportions it might pay some of the larger operators to install some species of modern artificial drying appliance. Owing to the existing conditions, however, no satisfactory volume of trade could be expected to result from any such overtures made by manufacturers of heating or drying plants.

### BUNCHING, PACKING AND SHIPPING.

The shipper or negotiant buys direct of the grower, sometimes employing the services of an agent, who is paid 20 cents per case of 55 pounds for his services. The labor of preparing immortelles for market, the remaking of the roughly bunched flowers into regular bunches of 250 grams, the sorting out of the various colors, the weeding out of damaged or faded blooms, and making into wreaths is performed en-

tirely by women and girls at a wage ranging from 20 to 30 cents per day. The original bunches are made into bouquets of a uniform weight of 250 grams (.817 ounces), for which 20 cents per hundred bunches is paid, 150 bunches being a day's work for the most competent.

The product is shipped in bulky light-weight cases, containing usually four layers of 25 bunches, with paper between the layers to prevent rubbing and consequent damage, 100 bunches to the case. The gross shipping weight per case is 45 kilos (99 pounds). Cases are generally invoiced at 60 cents each. The year's output from Ollioules and Bando at the present time approximately 25,000 cases, representing an actual crop of 750,000 kilos net (1,653,450 pounds). In 1885 the price for immortelles averaged 1 franc per kilo (\$0.193 per 2.2 pounds). The price now varies from 35 to 37 francs per 100 bunches of 250 grams each (\$6.75 to \$7.14 per 25 kilos, or 27 to 28.6 cents per 2.2 pounds) for the natural color, to from 40 to 45 francs (\$7.72 to \$8.69, or 31 to 35 cents per 2.2 pounds) for the artificially colored varieties. Wreaths are sold in 15 numbered sizes, ranging from a few inches in diameter to half a yard or more, at five to 50 francs (\$0.965 to \$9.65) per dozen, to which is added the cost of packing and transportation.

#### Easter Business.

The business at Easter was much in excess of that of the preceding years is the report from nearly all sections of the country, the increase varying from five per cent to double the amount done the year previous, and in but few cases is it stated that the trade was not in advance of 1910. The weather was, as a rule, unusually fine, which was not only of material assistance in handling the stock, but also allowed the buyers opportunities to visit the stores and greenhouses and make their selections. Plants were as usual a prominent feature and in the majority of cities the demand for blooming plants increases every year. Lilies were in good supply and sold well, and the Rambler roses were good sellers. The demand for bulbous stock varied greatly, in some places the sales were good, while in others there was a falling off. This may, however, have been owing more or less to the quality of the stock, for it is sometimes difficult to have the bulbous flowers in good condition so late in the season. There was a large sale of cut flowers of all kinds, no doubt owing considerably to the prices at which they could be obtained, for the supply was so ample in all the large cities that the prices were not advanced to any extent. Some complaints are heard of pickled stock. It seems as if some growers were determined to injure the business for an opportunity to grasp a few extra cents. With the amount of stock coming into bloom this year there was no occasion to hold the flowers back and it is getting high time that the dealers should refuse to accept stock that plainly shows that its best days are gone by.

LONDON, ONT.-J. Gammage & Sons write that the total sales were between 15 and 20 per cent greater than last year, the wholesale demand gaining the percentage. There was a slight falling off in the retail, which was in all probability due to the unfavorable

weather, Thursday and Friday being rainy days and Saturday afternoon turning cold with snow made shopping disagreeable, therefore there was not as much transient trade as we were having when the weather was fine. Prices averaged about the same as last year. The supply was in most cases equal to the demand, with the exception of lilies, azaleas and violets. Through this section there was a demand for azaleas, and a considerable quantity more could have been disposed of at fairly good prices. Lilies were in good demand, and probably 25 per cent more than were on hand could have been sold. Violets were the flower mostly called for and the supply was exceedingly short. Carnations were just about equal to the local demand, but roses were in over supply, a considerable quantity being left over. Taking it altogether, this has been a satisfactory Easter, as far as demand is concerned, but a most unsatisfactory one to the growers, who have had to struggle all through March and the early part of April. They had to handle their stock so that it would be ready at the right time, the looked for bright days did not come, and they had to resort to hard forcing. In some cases even the hard forcing did not bring the lilies in.

LINCOLN, NEB.—A large increase over the Easter of 1910 is the word received from C. M. Frey, which will amount to about 35 per cent. Prices were about the same as last year, and the supply of both plants and cut flowers were adequate to meet the demand. The call for blooming plants was very heavy, lilies leading, and the others followed in this order—spireas, azaleas, hyacinths, cinerarias, tulips, Rambler roses, deutzias and hydrangeas. Carnations were the cut flowers that were most favored; roses, violets, sweet peas, daffodils, lilies and marguerites, was about the order of the demand. The weather was ideal, and the buying started early and continued through the week. The stock was in prime condition and there were no complaints about the prices, a large percentage being cash sales, more so than usual.

FARGO, N. DAK.—The Easter business was about the same as last year, reports the Shotwell Floral Co. Prices were not advanced and the supply of both plants and cut flowers was equal to the demand. Bulbous stock, azaleas, hydrangeas and lilies all sold well, and there was a good demand for all kinds of cut flowers. The season has been backward and we did not get all our lilies in. W. B. Shotwell and W. C. Johnson, late with E. H. Hunt, Chicago, have purchased the business of Frank V. Kent & Co. of Grand Forks, and the business will be carried on under the name of the W. C. Johnson Floral Co., with Mr. Johnson as manager.

ATLANTIC, IA.—The Atlantic Greenhouse Co. report an increase of 25 per cent over the Easter trade of last year. The supply of plants was good and there were plenty of roses, but carnations were short of the demand. The prices were about the same as last year. The call for plants was excellent, lilies, azaleas, spireas and primroses selling out clean. Hyacinths and tulips were slow. Roses, carnations and cut lilies sold well. We are getting ready to build five houses, two will be 25x125 and three 16x125, and a brick boiler house 40x40, for which the John C. Moninger Co. will furnish the material.

LEXINGTON, KY.—From reports received all around the increase in the Easter trade was about 10 per cent, states John A. Keller. The prices of cut flowers advanced a little over last year, but on plants they were about the same. Lilies in pots and roses and carnations were short in supply; of

other stock there was plenty. The best sellers were lilies, hydrangeas, spireas and roses, there being no bulbous stock at all. Business has been good for several weeks, with considerable funeral work.

CHICAGO, ILL.—The Easter business this year amounted to as much as 1909 and 1910 combined, says George C. Hartung, at the Kensington greenhouses, 11822 Michigan avenue. The demand for plants exceeded all expectations, there not being a blooming plant or fern left on the place on the Saturday noon before Easter.

## OBITUARY.

### Walter H. Knapp.

Walter H. Knapp, a prominent florist of Newton, Mass., died April 11, after an illness of two weeks at Rutland, where he had gone seeking health; although he had been in poor health since early winter. He was about 56 years of age, being born in Etam, and after passing through the public schools entered the Massachusetts Agricultural College at Amherst, graduating in 1875. With a classmate he established a business at Wellesley Hills under the firm name of Callender & Knapp. About twenty years ago the firm dissolved and Mr. Knapp built greenhouses at Newtonville, where he has successfully carried on a local business, besides selling in the Boston market his surplus product. His specialties were the more winter-tender flowers, such as anemones, sultanas, coreopsis and glloxinias.

Mr. Knapp had a quiet gentlemanly personality and stood very high in the esteem of the trade and the community in which he lived. He was much interested in church work and acquired a reputation as a singer in church choirs in Wellesley and Newton. He was a member of the Society of American Florists. The funeral took place from his late residence, 121 North street, April 13, the interment being in Newton cemetery. He is survived by his mother.

### William E. Starrett.

The trade in Chicago was greatly shocked on the morning of April 12 to hear of the death of William E. Starrett, the popular salesman at the store of the Chicago Carnation Co., 30 East Randolph st. He was at the store the day before performing his duties but upon being called in the morning was found dead in bed, the cause of death being heart disease. He was the son of John Starrett, florist at the La Salle Hotel and although but 26 years of age had acquired the confidence of the trade and had made a host of friends by whom he will be greatly missed. He is survived by a wife, there being no children. The funeral was at his late residence, 3635 Cottage Grove avenue, April 14, and the floral remembrances from his friends in the stores were numerous and beautiful. The interment was in Mount Olive cemetery.

### Mrs. George Stollery.

Catherine Winter Stollery, wife of George Stollery of the well-known firm of Stollery Bros., Chicago, died April 11 of peritonitis after an illness of six weeks' duration. She was about 40 years of age and beside her husband leaves four children, two boys and two girls, the eldest being 14 years old. The funeral took place at Rose Hill chapel on Thursday, April 13, which a large gathering of friends attended, and there were a large number of beautiful floral offerings from friends and associates. The interment will be in Rose Hill cemetery.

GHENT, BELGIUM.—Louis De Smet  
 died at Mont-St. Amand April 6 after  
 a long and painful illness.

FLORAL CALENDARS.—The floral cal-  
 endars received this year include one  
 of Canna Mrs. Alfred F. Conard in  
 colors, issued by the Conard & Jones  
 Co., West Grove, Pa., and one of Car-  
 nation Washington in colors, issued by  
 the Chicago Carnation Co., Chicago.

ACCORDING to an article in a daily  
 newspaper, a gift of a square mile of  
 farming land near New York has been  
 made to Columbia University, with the  
 understanding that the contemplated  
 farming station be established there.  
 The idea is not to conduct an  
 experimental station on the lines of ag-  
 ricultural schools, but to study the  
 economic principles in the cultivation  
 of greater harvests and better quality  
 of crops, by a relatively smaller num-  
 ber of persons.

THE proceedings of the twenty-fifth  
 annual meeting of the Oregon State  
 Horticultural Society has been re-  
 ceived, containing, besides the min-  
 utes of the meeting, the papers read,  
 and illustrations of some of the prin-  
 cipal exhibits of the apple show held  
 in conjunction with the meeting.

THE premium list of the June exhibi-  
 tion of the Newport Horticultural So-  
 ciety to be held in Masonic Hall, New-  
 port, R. I., June 22-23 is received. Lib-  
 eral premiums are offered for plants,  
 fruit, flowers and vegetables and spe-  
 cial premiums for gardens, roses and  
 peonies. A copy may be had on ap-  
 plication to Daniel J. Coughlin, secre-  
 tary.

### Our Supplements.

Subscribers should see that they get  
 copies of the fine supplementary illus-  
 trations showing high grade design and  
 decorative work. These fine supple-  
 ments should be carefully preserved,  
 as they mean much to the retail flor-  
 ists in dealing with their customers,  
 illustrating as they do the various  
 kinds of work that the everyday florist  
 is called upon to perform.

The papers in which the supplements  
 appear should be likewise preserved,  
 as they contain much valuable data  
 with regard to these special illustra-  
 tions. Subscribers should see that they  
 get every issue, as otherwise they may  
 miss some of this high-grade work.

### National Council of Horticulture.

THE fourth installment of the arti-  
 cles sent out by the National Council  
 of Horticulture has been received,  
 which comprise "Preparing a Canna  
 Bed," "Plants and the Soil They Like,"  
 "Planting and Care of Perennials," and  
 "Substitutes for Manure." These arti-  
 cles are very timely, and treat the sub-  
 jects very comprehensively, and are  
 distributed to the press gratuitously  
 by James H. Burdett, 1620 West One  
 Hundred and Fourth street, Chicago.  
 Seedsman should advise their local edi-  
 tors to procure them as they are pro-  
 ductive of interest in gardening.

### Texas Cape Jasmine Conditions.

#### THE LATEST REPORTS.

ALVIN, April 15.—I wish to state that  
 the publication of the condition of the  
 jasmine crop in the Alvin vicinity is  
 misrepresented to a great extent. The  
 crop will be short but what buds there  
 are will be as good if not better than  
 last year. Some patches were dam-  
 aged badly by spraying with a solu-  
 tion recommended by the state, while  
 others were not sprayed with that solu-  
 tion and are in as fine condition as  
 before.

R. W. WOODWARD.

ALVIN, April 15.—Our jasmine buds  
 are in perfect shape. Our buds have  
 not been sprayed for insects of any  
 kind, and are going to be better this  
 year than in a good many years. The  
 stems will be longer than usual. There  
 are a few jasmine patches that have  
 been infested with white fly. They  
 have had to be sprayed with strong  
 fluid to kill the fly and this has in-  
 jured such crops. These crops would  
 not have been much anyway with the  
 white fly on them. I have an inspec-  
 tion card from the state saying mine  
 are in perfect condition.

T. W. CARLTON.

### Horticultural Society of New York.

A meeting and exhibition of the so-  
 ciety were held on Wednesday, April  
 12, at the American Museum of Natural  
 History. Six life and 17 annual mem-  
 bers were elected. A large audience  
 listened to an interesting lecture by  
 Dr. E. B. Southwick on "Hyacinths:  
 their history, cultivation and present  
 day types," illustrated with lantern  
 slides. The exhibition held in the West  
 Assembly Hall was largely attended  
 and prizes were awarded lilies, tulips,  
 and hydrangeas and silver medals and  
 certificates of merit to worthy ex-  
 hibits. Thos. Aitchison and A. Her-  
 rington served as judges. The next  
 exhibition will occur on Wednesday,  
 May 10, and succeeding exhibitions  
 during the summer will be held in the  
 Museum Building, New York Botanical  
 Garden, Bronx Park, New York City.  
 GEORGE V. NASH, Sec'y.

### National Sweet Pea Society.

THE preliminary schedule of the sum-  
 mer exhibition to be held in Philadel-  
 phia, Pa., June 23-24 contains the fol-  
 lowing prizes:

Class 1. President Burpee's cup,  
 value \$25.00, for the finest collection  
 of sweet peas, 12 vases, 12 varieties.

Class 2. The W. Atlee Burpee prize,  
 for the best vase of one variety of  
 Spencer type sweet peas introduced in  
 1911; first prize \$5.00; second prize  
 \$3.00; third prize \$2.00.

Class 3. The W. Atlee Burpee prize  
 for the best vase of grandiflora type of  
 sweet peas; first prize \$5.00; second  
 prize \$3.00; third prize \$2.00.

Class 4. The Henry F. Michell Co.'s  
 prize for the best six vases of sweet  
 peas in the following six varieties:  
 Nora Unwin, Asta Ohn Spencer, Lov-  
 ely Spencer, Captain of the Blues  
 Spencer, King Edward Spencer, Blanche  
 Ferry. First prize \$10.00; second prize  
 \$5.00.

Class 5. The Henry F. Michell Co.'s  
 prize for the best vase of Spencer sweet  
 peas in mixed varieties; first prize  
 \$2.50.

Class 6. The Henry F. Michell Co.'s  
 prize for the best vase of "Magnifi-  
 cent" sweet peas mixed; first prize  
 \$2.50.

Class 7. The Peter Henderson &  
 Co.'s prize of \$15.00 to be awarded to  
 the exhibitor of the best vase of not  
 less than 50 stems of Martha Wash-  
 ington sweet peas with their own foli-  
 age (amateurs only).

Class 8. The Peter Henderson &  
 Co.'s prize of \$10.00 to be awarded to  
 the best collection of 12 distinct vari-  
 eties of the Waved Spencer sweet peas,  
 not less than 12 stems to a vase; own  
 foliage (amateurs only).

Class 9. The Arthur T. Boddington  
 prize, a silver "Challenge Cup," value  
 \$50.00, for a collection of sweet peas,  
 25 varieties, not less than 25 stems to  
 a vase, to be shown with sweet pea  
 foliage only. To be won twice by the  
 same exhibitor. Arthur T. Boddington  
 will also award to the winner of this  
 cup (each time won) a cash prize  
 of \$25.00, also \$15.00 second prize and  
 \$10.00 third prize.

Class 10. The Harry A. Bunyard  
 prize for the best vase of vari-colored  
 sweet peas. First prize \$3.00; second  
 prize \$2.00; third prize \$1.00.

Additional prizes are invited from  
 the trade, which will be published from  
 time to time.

For further particulars write to  
 Harry A. Bunyard, Sec'y., 342 West  
 Fourteenth street, New York.

### Chicago.

#### A GRAND EASTER BUSINESS.

The great flower day of the year has passed, and the trade done by both retailers and wholesalers was enormous. The weather for the week preceding Easter was all that could be either asked or expected. While not too warm, yet the days were bright and pleasant and not cold enough to interfere with the deliveries or to cause unnecessary wrapping. Saturday was, however, very windy, and the plants had to be handled carefully or under cover. At the wholesale stores the business was fine, and "very satisfactory" is the expression of the more conservative dealers, and "a grand good business" is the word of the more enthusiastic. The demand for cut flowers exceeded the supply in many of the stores and telephones to the greenhouses for more stock was the case with many of the dealers. Lilies sold well, and the pot stock cleaned up nicely, with the exception of some of the shorter stemmed plants, and those that were too far advanced and in full bloom. The call for roses and carnations was large and with the exception of American Beauties and Richmond there were enough to fill the orders. American Beauties were off crop with many of the growers and a great many more could have been sold if they had been obtainable, and consequently Richmond had an exceedingly heavy call and were entirely cleaned up. A large quantity of pickled carnations were pushed upon the market; why growers will persist in doing this is beyond understanding, for the price of carnations has held firm for the last week, and it would have been far better for all concerned if the flowers had been placed upon the market when they were in their best condition. Sweet peas had an

immense call and there was a clean up of all stock of this class and orchids sold out entirely. More could have been handled if they could have been obtained. Violets were in great demand, and as was expected with Easter being so late, the supply was not large, and the blooms of good quality sold out early. There was call for quantities of smilax and the market was depleted of this necessary green, but the supply of asparagus was good. The plant trade was very heavy, all the retailers being extremely busy, and in most cases working all night to get the orders ready for delivery. In fact, Saturday morning showed that much of the best stock had already been sold. This week is one of general apathy and the stock is accumulating, and it will take a full week for the trade to get back to normal conditions. Some very fine gladioli are now to be seen on the market, and the other stock is of very fine quality and now coming in in large quantities.

### NOTES.

The wedding of Miss Paula Kroeschell, daughter of Mr. and Mrs. W. L. Kroeschell, to Robert O. Butz was solemnized at the family residence at Winnetka, April 12. The decorations were unusually beautiful and effective, spring flowers being used in abundance. The ceremony was performed in the music room, where a platform was arranged as a verandah with a canopy overhead hung with trailing vines, and the room decorated with blooming plants.

Chas. W. McKellar says the demand for orchids for Easter greatly exceeded the supply and many orders were unfilled, gardenias also had a good call and cleaned up early. The Cattleya Mossie that this house is offering are magnificent and some of the largest

blooms that have ever been received can be seen at the store this week. On Saturday evening this store looked somewhat bare for all the stock had been sold, not even a lily bloom remained.

Pochlmann Bros. Co. did an enormous Easter business and cleaned up fairly well in all lines. An immense stock of Easter lilies were sent out but a large quantity of fine flowers are still coming in. As usual at all holidays, a force from the greenhouse assisted at the store last week, where their services were so greatly needed. The American Beauties that this firm is cutting are of unsurpassed quality and are eagerly sought for by the best trade.

Bassett & Washburn are now receiving a fine, fancy stock of American Beauty roses of the long-stemmed grade. This firm seems to be doing as much business this week as they did last and C. L. Washburn can be seen assisting the help filling the many orders that are received.

The Des Plaines Floral Co. is filling a large number of orders for rooted carnation cuttings that are especially strong and well rooted. Judging from the many orders they are receiving they will have no trouble disposing of the 30,000 that are now in the propagating bench.

Aug. Koelbe is enjoying a good season at his store at 422 North Fortieth avenue; funeral work keeping him very busy.

The Palace Floral Co. had a beautiful Easter window display at their North Clark street store last week.

Frank Fisher, with the Wm. Blackman Floral Co., of Evansville, Ind., paid the city a visit on April 17.

M. P. Lynch has accepted a position as salesman with J. W. Niesen, 304 E. Forty-seventh street.

J. A. Budlong is cutting a large quantity of Kaiserin roses of exceptionally good quality, foliage and stem being all that could be desired. This firm is also cutting a fancy grade of long-stemmed American Beauties and were among those fortunate enough to have a large supply to fill their Easter orders. The shipping trade from this store for Easter was exceptionally heavy and many customers from long distances have written words of appreciation for the excellent condition of the stock upon arrival.

E. E. Pieser of Kennicott Bros. Co., says that this year's Easter trade was the largest they ever experienced and was fully 17 per cent greater than that of 1910. The sales of the five days preceding this holiday were equal to the six last year. The stock cleaned up fairly well and what odds and ends were left over were sold the following Monday, on which day only one shipment, and that of sweet peas, was received. The first Parrot tulip and lilacs of the season were seen at this store on April 15.

Peter Reinberg's American Beauty roses have been arriving in great quantities during the week, and the quality is excellent. Out-of-town trade has kept up very well, and considering the large amount of stock on hand, each day shows a fair clean up. The Easter business was very large and Tim Matchen had his troubles seeing that the many orders were properly filled. He was equal to the task, however, and has yet to hear of the first complaint.

A fine Easter is reported at Zech & Mann's; all the stock cleaned up well. Mathias Mann, the junior member of the firm, proved to be as good a store man as he is a grower, and was a valuable assistant at the store during the Easter rush. John Zech, with his many years of experience on this market, knew what his customers wanted for

the holiday and left nothing undone to fill all orders to their satisfaction.

Hoerber Bros. supplied their customers with as fine a grade of Killarney roses for the Easter trade as is often seen, the color, foliage and stems being perfect. Harry Manheim, the hustling store manager, is deserving of much credit for the splendid manner in which he, with two assistants, handled the large supply of stock that was brought in from the greenhouses last week.

A. C. Rott, the well-known florist of Joliet, was in the city on Tuesday, buying stock for two large decorations. On April 20 he has the decorations for the Firemen's Ball and on the following day the ball to be given by the Union Club, which is the social event of the season.

The Chicago Carnation Co. is showing some fine bunches of hepatica this week, which were picked in Higginbotham's park at Joliet. Will Starrett is greatly missed at the store by the customers, his sudden death being a great shock to all.

The J. B. Deamud Co. had an exceptionally large Easter trade and it was nearly 11 o'clock on Saturday evening when Nic Miller, waited on the last customer. The first trailing arbutus of the season were seen at this house this week.

Vietor Bros. moved their immense Easter cut with very little trouble and report a fine business. The Mrs. Jardine roses that this firm is cutting are of such high quality that many of the retail stores are featuring them in their window displays.

Vaughan & Sperry took care of all their old customers at Easter and many new ones in a very satisfactory way. This firm is enjoying a splendid shipping trade which is steadily growing larger, extending to all parts of the country.

**U S Budlong's**  
**E Blue Ribbon Valley.**

*Mention the American Florist when writing*

W. P. Kyle of Kyle & Foerster, reports a very good Easter trade, the sales being much larger than those of last year. The stock cleaned up fairly well and the quality was greatly appreciated by their customers.

Henry Hilmer of the Kenwood Floral Co., had a very attractive Easter window display at his East Forty-seventh street store that was greatly admired by the public.

James Cochrane, the prosperous florist of West Pullman, says his Easter business was double that of last year, which his many friends will be pleased to know.

E. B. Washburn has recovered from his recent illness and is again attending to his duties at the Bassett & Washburn store.

Henry Van Gelder of Percy Jones, has added another grower to his list and has now on hand a fancy grade of lily blooms.

The sympathy of the trade is extended to F. L. Otto in the loss of his father, whose death occurred on Monday, April 10.

H. W. Rogers of the Weiland & Risch force, left April 17 for Spring Lake, Mich., to visit his mother, who is seriously ill.

W. N. Rudd delivered an address on the "Planting of Home Grounds" before the Normal Improvement Association, April 18.

# Large Crop of Roses

Of all the best varieties. The quality is perfect and there are no better flowers coming into this or any other market.

We have also a good supply of **BEAUTIES** and **CARNATIONS**.

**Send Your Orders Direct to the Grower and They Will be Taken Care of.**

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

New No. 30 E. Randolph St., CHICAGO.

The body of James Fitzgerald, night watchman at the Atlas building, was found Friday morning, April 14, at the bottom of the freight elevator shaft. It was first believed he was killed by falling down the shaft accidentally, but when blood stains were discovered at the foot of the stairway of the first floor up to the second floor and through a hallway to the elevator door, the police were convinced that the night watchman had been murdered. Further evidence of foul play was furnished when Fitzgerald's lantern was found broken at the foot of the stairway where the blood stains were found.

The Chicago Woman's Outdoor Art League is endeavoring to have the State Legislature pass the bill to have Arbor Day, April 21, made compulsory in the schools of Illinois. The motto of the league is, "Leave the world more beautiful than you found it," and the members believe the most effective way is to work with the children. It is suggested that individuals make this day the occasion of the planting of at least one shrub or vine.

The annual flower sale arranged for the benefit of the Home for Destitute Crippled Children will be held in Lincoln hall, Saturday, April 22.

Governor Deneen on April 14 issued a proclamation designating Sunday, May 14, as Mothers' day.

the Orchids and the Violets the Carnations. After the games the prizes won will be awarded to the successful participants.

Stollery Bros. had a large decoration this week in Arcadia Hall, Evanston avenue, on the occasion of the North Side Society Ball. The walls were heavily draped, and owing to the scarcity of smilax, wild smilax, palms and hemlock boughs were used with telling effect. Twenty-five men were employed putting up the decoration.

Peter Reinberg returned April 1 from Hot Springs, Ark., where he has been resting from the arduous duties during the mayoralty campaign. Upon the assembling of the city government, he was appointed chairman of the local transportation committee.

Mrs. Coppersmith, a daughter of John Starrett, the florist at the La-Salle Hotel, died April 16. The family is doubly grieved, the son, William E., having passed away the previous Tuesday and the sympathy of the trade is extended them in their affliction.

The nursery business at the George Witthold Co.'s Edgebrook place is booming, and all hands are hustling getting the stock out and transplanted. They have secured the services of C. P. Andersen of Kenosha, Wis., to assist them with the work.

Miss Helen Gormley, formerly of Vaughan's Seed Store, and John Anthony Kaufmann were married April 17.

Gladioli planting stock is going into the ground rapidly both at Vaughan's nursery and farm.

Visitors: S. R. Lundy, representing W. A. Manda, South Orange, N. J.; F. L. Tornquist, Benton Harbor; Gustav Frederickson, St. Joseph, Mich.; James Karins, representing Henry A. Dreer, Philadelphia, Pa.

### Detroit.

#### UNPRECEDENTED DEMAND.

Easter business this year by far exceeded in volume that of any previous year in the history of the local trade. It was, however, devoid of distinguishing features except that alone of unprecedented demand. From some dealers we learn that the plant trade did not encroach as far upon the cut flower division as upon former holidays, and yet it was evident that flowering plants sold in great quantities and in the aggregate was the major portion of the Easter business, because plants sold during the whole week when the cut flower branch was quiet till Saturday and Sunday. It was noticeable, though, that during the first days of the week the demand did not meet the expectations of many florists and gave no indications of the great demand that fell to the fortune of Friday and Saturday and found most of the trade utterly unable to properly handle it, so great was the rush. Few could dare say what the leaders were after the lily was named, for the whole list of seasonable flowering plants found favor with the public. Azaleas, of course, were very popular in sizes, retailing for from \$2.50 to \$5.00 and yet many rhododendrons were sold at good figures. Spirea, as a medium priced plant, was much sought and hundreds were sold. Bulbous stock in pans and pots were somewhat soft, owing to the lateness of the season, but much good stock was on the market and it sold well. Hydrangeas were in fair demand, especially when well grown, while many roses, including Tausendschon and Baby Ramblers were easily disposed of. In cut flowers, the usual proportion of seasonable varieties were sold, the exceptions favoring great quantities of violets and sweet peas, the latter, while in

## U S Budlong's E Blue Ribbon Valley.

good supply, was yet quite short of the spirited demand that commenced early Saturday and continued until late Sunday. Prices were about the same as a year ago, and possibly the better grades of roses were somewhat lower, while violets that were at all fair commanded good prices, though many were poor and hard to move at any price, as sweet peas were popular substitutes. The weather was favorable except during a snow flurry that prevailed Saturday afternoon for a couple of hours, and even this threatened handicap did not hinder the impetus that gained earlier in the day and resulted in the most successful Easter trade ever enjoyed here.

#### CLUB MEETING.

The Florists' Club meeting, Monday evening, April 17, was poorly attended and the tired condition of those present stripped the meeting of its usual spirit. A paper was read by M. Bloy, which was prepared by Barney Myers, Lancaster, N. Y., on the "Adaptability of Wooden Benches Contrasted with Results with Cement and Solid Beds." The essay was brief but forceful in its advocacy of raised benches, and the author proved his points by convincing data gleaned under his own observation. The subject was discussed by several of the growers present and a hearty vote of thanks was given the author of the paper. J. F. S.

FROM THE FRENCH TRADE PAPERS.

The International Institute of Agriculture—This comparatively new institution, having headquarters at Rome, has heretofore expressed itself publicly only in a monthly bulletin of statistics, devoted principally to the culture and production of cereals. Two new series of monthly publications have recently been inaugurated, a bulletin of economic and social institutions, and a bulletin of agricultural information and of the diseases of plants. The two first volumes of the bulletin of economic institutions are veritable volumes, devoted to a study of associations for production, co-operation, credit, etc., in the forty-seven states represented in the Institute. Those studied so far are Germany, Austria, Denmark, N. S. of N. America, Great Britain and Ireland, Italy, Japan, Ottoman Empire, Norway, Netherlands, Portugal, Roumania, Sweden, Switzerland. The bulletins contain much valuable information, never before collected, from which forceful comparisons should be drawn. The third bulletin is divided in two parts—official communications to the Institute and information bearing upon agronomy, agriculture, agricultural industries and the diseases of plants; the second part of short notices collected from the publications of the various countries, forming a mass of information of greatly varying value. The Institute will receive subscriptions for these bulletins in regard to which communications are to be addressed to M. P. Jannacone, secretary, at Rome.—Editorial in *Revue Horticole*.

**Antiseptic Bath for Lily Bulbs.**—Lily bulbs of most varieties are peculiarly liable to decay, from three principal causes: first, an excess of moisture in the soil; second, unfavorable conditions where raised, such as

**160 N. Wabash Ave., CHICAGO**

fungous or microbe diseases; third, unfavorable shipping conditions, owing often to the long journey. Bulbs arriving in partially rotted or dried condition should be carefully trimmed with a sharp knife, removing all diseased scales even to the base of the bulb, then plunged into a bath composed of one quart boiled water, two grammes sulphate of copper and enough ammonia to entirely dissolve the precipitate formed, from one-half hour to 12 hours, as seems necessary. After this bath the bulbs must be thoroughly dried off, either in the shade in the open or some sheltered place, for a week or so, or until the scales begin to draw slightly apart. Plant in loamy soil covered with sand and powdered charcoal, and sift a good layer of the charcoal over the bulbs and in between the scales. In this way diseased bulbs may often be quite renewed.

**Monument to Gregor Mendel.**—On October 2, 1910, a group of naturalists and scientists met at Brunn, in Moravia, to assist at the unveiling of the monument to Gregor Mendel, whose

memoir on the transmission of characteristics written in 1866, but practically unknown until 1900, became famous as embodying "Mendel's Law of the Principles of Heredity." The monument stands on the plaza before the monastery where Mendel spent the greater part of his life, and represents the naturalist in his monk's robe, standing against a rock covered with the foliage of the plants which he studied most—the peas. Naturalists from England, Holland, Germany, Sweden, Austria, France and Italy joined to do honor to the dead scientist.

Rose Comtesse Maggie Starzynska—Tea—introduced by Paul Nabonmand, and described as follows: Flower very large, double, outer petals large, diminishing and becoming tongue-shaped as they approach the center, where a few stamens develop, giving an added charm to the perfectly formed bloom; it lasts several days in full bloom. Its color is a fine rose, madder tinted, with coppery lights and continues a shade of old rose. The buds are elongated, carmine or coppery, carried singly on a long stem.

**ROSES, our selection, - \$3.00 per 100**  
**WIETOR BROS., 162 N. Wabash Ave., Chicago**

Foliage green brilliant; plant well shaped, wood strong with rather large thorns, very free blooming.

New Gladiolus Pont-de-Ceais.—This new race, which has been in process of hybridization and selection about eight years, is a hybrid of G. Colvillei and G. Nanceianus; the purpose in view has been the obtaining of a gladiolus combining the earliness and easy forcing quality of the Colvillei class and the wonderful coloring and size of the Nanceianus. Planted March 25, these gladiolus have bloomed June 15, even earlier than the Colvillei, flowers measure from four to eight inches in diameter, and show an infinite variety of color. This race should become a real commercial gain.

Smilax hybrids.—Some years ago an attractive hybrid asparagus was introduced in Germany under the name of Medeola myrifolium, the leaflets resembling those of the myrtle in size and shape; this season two new French hybrids are offered: Felix Plateau, a cross between myrifolium and the asparagoides or old type, having the leaflets narrow, very stiff, lanceolate, very elegant; Serres de Bretagne, leaflets curled like an ostrich plume, color varying from deep green to pale green, and more separated on the stem than the parents. It received a certificate of merit.

Rose Lyon-Rose (Pernet-Ducher)—Hybrid tea or Permetiana.—Introduced in 1907. Vigorous grower with spreading green branches, armed with few thorns; foliage, fine green, ample; buds rounded, large, coral red, chrome yellow at the base of the petals; flowers solitary or two or three on the same branch, large, broad-petalled, double or nearly double, globular; coloring superb, shrimp pink at the extremity of the petals, center of the flower coral and salmon red, shaded with chrome yellow, forming a marvelous contrast of colors; very fragrant; ever-blooming.

Leather from Cabbages.—The "Jewish Chronicle" states that a manufacturer has discovered a process whereby a passable imitation of leather may be manufactured from a vegetable product. The novelty owes its introduction to the enterprise of London

vegetarians, who shuddered at the thought of the number of animals that were killed annually to keep humanity in boots. The imitation leather is being used for the manufacture of boots, shoes, Bible covers, and a hundred other articles usually found in the art leather department.

Horticultural Catalogues.—A good catalogue should not be a mere list of names and prices; it should allure the reader, present the articles in an attractive aspect, bring out their merits. It should even do more in the case of the horticulturist; it should become a guide, a counselor which teaches the best species or varieties, the means of using them to best advantage and of

dark blood red, calyx curiously slashed and striped; flower double, well formed; petals thick, concave, velvety when opening; color, brilliant red, center often lighter, tending to cochineal; plant extra free blooming. Etoile de France and Richmond.

Rose Gaston Bonnier—Hybrid tea.—Plant of medium size but good vigor, brownish green foliage; oval buds on firm stems; petals broad, slightly concave, pinkish white in the center and bordered with a peach blossom pink center petals, canary yellow; flower large, double, well formed; a seedling of Antoine Rivoire. Two silver medals and two certificates at Lyons.

Tuberous Begonias.—The novelties, certificated this year, include B. cristata Papilio, single flowers with a deep rose or red base, brightened with irregular white markings; Hubert Dansette, large double salmon pink flowers on cream ground; Madam Page, large double, marbled and striped pink; Duplex race, in eight colors, large flowering.—(Le Jardin.)

Rose Johanna Sebus—Hybrid tea.—Introduced in 1899. This rose is highly recommended as a vigorous grower and constant bloomer, producing flowers well into the autumn. The flower very large and double, stem very strong and bud well shaped, opening well; the color is a pretty bright cerise pink with a slight shading of yellowish salmon.

Rose Anne Duverne—Hybrid tea. Vigorous, erect stems, bearing one flower; thorns few and medium in size, dark brown like the bark; ample glaucous green foliage; pointed bud, medium in size; large flower, well formed, very double, deep salmon in the center, flesh outside. (Germaine Trochan X Beant's Lyonnaise.)

To ripen late tomatoes.—In the island of Guernsey, where tomatoes are grown on a large scale, the last green fruits are picked (after having attained their full growth, of course), and spread upon sacks in the greenhouse, and sprinkled frequently. By this simple treatment they are induced to ripen in a few days.

Rose Madame Julia Bouche—Hybrid tea.—Good grower, branches fine and stiff, bud very long, flower large, double, shapely; petals very firm, recurving as they open; color, white, shaded salmon, center shaded rose, stalk very firm. Received two medals and a certificate of merit in 1910.

Rose Petite Marcelle—Polyantha.—Very small bush, well branched, always in bloom; foliage fine dark green; corymbs of five to 10 small flowers; very double, snow white, opening well; petals numerous and narrow, imbricated like a large double daisy; extra for borders or pot culture.

Rose Helene Granger—Climbing multiflora.—Handsome, broad, shining foliage, enormous corymbs of 15 to 20 flowers, double opening well; color, yellow, coppery in the center, shaded

pink at the edges; slightly lighter on opening; does not burn in the sun.

New Chrysanthemum, Berthe Lachaux.—Certificated at Paris in November, this new variety excited much interest. Japanese in form, hairy, incurved at the center of a "Cyclamen rose" color, with reverse of petals white tinted rose.

Rose Mme. Felix Boulanger—Tea.—Strong, semi-climbing, free-blooming; bud ovoid, single, well carried; flower large, very double, fragrant, opening in all weathers; color, bright yellow with deeper yellow center.

Rose Madame Lucien Picard—Hybrid tea.—Vigorous plant, large, double, well-formed flower, long bud, salmon white color; offspring of B. Chateau. Medal and certificate.

Rose Germaine Chenault—Hybrid tea.—Vigorous, upright; long buds, very large flowers, double, fragrant; salmon white, deeper in the center, sometimes shaded carmine.

Rose Eileen Loow—Dwarf polyantha.—Vigorous, shining green foliage, free

### BUSINESS SATISFACTORY.

The weather that prevailed during the last two weeks certainly helped the Easter stock considerably, bringing in plenty of flowers of nearly all descriptions. According to the reports from the retailers business in general was very satisfactory. There were blooming plants enough for everybody. Lily plants, although rather short in stem, sold well. Rambler roses sold the best, the wholesale growers cleaning up a week before Easter. Cut flowers were fine, the warm spell during the middle of the week played havoc with the stock which had been held back, but toward the end of the week the weather turned colder and the stock kept in fine condition. The heavy demand for red and white carnations kept them cleaned up all of the time. Enchantress were the most plentiful. Violets were fine considering the late Easter and sold well. Saturday evening found the retailers looking for them. Killarney roses were of a fine grade and sold readily, there being enough to fill all orders of both white and pink. Smilax became a little shy, the demand being rather heavy. American Beauties and Richmond were scarce.

### NOTES

Holton & Hunkel Co. report business very satisfactory with plenty of stock. The shipping business in the plant line at their Humboldt avenue greenhouse was very large as they had a large supply of blooming plants which were all cleaned up by Saturday. The lilies were grown at Brown Deer and were shipped in, arriving in fine shape. This place also supplied a considerable amount of fine Killarney roses.

Nie Zweifel had a large crop of carnations for Easter. Among them was a fine white seedling which is certainly worth while mentioning, it is as fancy a white as has been seen in this market for some time. It is known as No. 274.

Edlerson & Leidiger had a quantity of blooming plants in their conservatory adjoining their store the middle of the week, but on Saturday eve there was not anything left to sell, which tells the story.

C. C. Pollworth Co. says that business was good, selling out entirely of blooming plants which were grown for Easter. There were plenty of cut flowers to fill all orders.

E. Welke Co. had a fine Easter trade, selling out completely. A large amount of plants were handled and several large church decorations for Easter Sunday were supplied.

J. M. Fox & Son were completely sold out by Saturday noon and could have disposed of many more plants had they been able to obtain them.

Heitman & Baerman are bringing in iris, which are usually ordered in advance and are of a fine quality.

Mueller & Schroeder are cutting some fine carnations and snapdragon, which are selling readily.

M. A. McKenny & Co. had a large selection of plants for Easter and report business good.

Currie Bros. report a fine Easter trade and say they were well pleased with business.

F. P. Dilger was there with the goods as usual and his bulb stock sold fine.

### EASTER TRADE SATISFACTORY

Everyone apparently seems satisfied with the Easter business. On Sunday morning, when the cut stock was sold out or low in the retailer's ice-boxes, most of them made a handsome clean up of plants. These included principally lilies, hydrangeas, American Beauty and Rambler roses and spiraeas. Many decorative plants also found buyers. Considerable pickled stock came into the wholesale houses and much of it was sold. It did not, of course, sell at the same price that first-class stock brought. The demand centered on carnations; they were offered in larger quantities than was anticipated. As a result the prices towards the end were not as stiff as was expected, white selling a little higher than the others. In roses the amount of pink and red was short of the requirements, white roses were ample at all times, but about cleaned up at the close. The gloomy predictions in a Cincinnati daily paper, of some pessimists among the local florists a few weeks ago, to the effect that lilies would be scarce at Easter time, were not fulfilled. There were plenty of them and more, too, than the retailers required. The same thing was true of callas. The jonquils were the best thing offered in bulbous stock and they sold readily at good figures. Most of the tulips showed the effects of

holding them for the day. Some Narcissus poeticus helped out nicely. Sweet peas were a little short of requirements. Lily of the valley and marguerites were sufficient to meet demands and this was also true of greens.

### NOTES.

J. M. McCullough's Sons Co. received a lot of Easter lilies from John Karsten of Chattanooga, Tenn., that were very excellent.

Wm. Reutenschroer offered a decided novelty, at his stand in the flower market on Saturday, in the shape of chrysanthemums. The blooms were well formed.

But seven enthusiasts showed up for bowling. Their general scores were about their average. Al Sunderbruch rolled the highest score made this season by anyone in the club.

ALVIN, TEXAS

St. Louis.

A BUSY WEEK.

The week before Easter was a busy one for all the florists, and the plant-men were extremely so, having all the business they could handle. There was a very large demand for white flowers of all kinds, and of these and similar there was a shortage in supply.

A TERRIFIC HAIL STORM.

On the afternoon of April 13 one of the most disastrous hail storms ever experienced passed over the city. The damage in the northern and western parts of the city was very large, it being estimated that 250,000 feet of glass was destroyed. The loss at Kirkwood was especially heavy, the broken glass covering and injuring the plants on the benches. The firm of C. Young & Sons Co. were the greatest sufferers in the city. Fortunately the Easter stock had been removed to the sheds, but the loss to the bedding stock is large, and the damage to the houses and stock is estimated at \$30,000 to \$40,000. W. C. Young, the manager, was completely prostrated. Among those who were damaged by the storm are J. F. Windt, Kalisch Bros., F. C. Weber, Fred Meinhardt, Koenig Floral Co., John Nyfot, Alex. Waldbart & Sons, Luther Armstrong, Hugo Gross, Oakland Floral Co., Woodbine Floral Co., Wm. Winter, Fred Ude, Adolph Ahner, Geo. Hartmann, August Hartmann and the Bentzen Floral Co.

NOTES.

The Florists' Club met April 13, there being 15 members present. J. F. Ammann gave a very interesting talk on the National Flower Show at Boston.

Otto Klinger, a 14 year old boy working for Grimm & Gorley, was run over by an automobile while delivering lilies.

The tulip display at the Shaw Gardens is a great attraction.

W. F.

ELMWOOD, CONN.—Louis S. Barton of Milford has purchased twenty-three acres of land and will at once build greenhouses and establish a wholesale florist business.

### Stevia and Gypsophylla.

Will you inform me how to propagate and grow stevia serrata? Can gypsophylla be grown in the greenhouse? The Begonia Rex plants are dropping their leaves. Does it injure their leaves to wet them?

SUBSCRIBER.

Stevia serrata can be grown either from seeds or cuttings, but the latter is preferable, for they root very easily and the plant produces plenty of cuttings. The cuttings should be rooted in the spring and potted. The dwarf varieties can be planted in the field, but the taller growing varieties are more easily handled in pots, being shifted as they may require it, the pots being plunged in the open ground—the growth is so soft that they do not lift readily. The plants should be kept pinched back until mid-summer that they may be made to branch. The tall plants will have to be tied to stakes to protect them from heavy rains and winds. In the fall they should be potted in their blooming pots, and grown in a cool house. By keeping some of the plants very cool the season of bloom can be greatly extended. Gypsophylla paniculata can be bloomed in the greenhouse but commercially it would not pay, as it would require too long a time to bring it into flower. It most certainly injures the leaves of Begonia Rex to wet them, especially if they are in a house where the sun shines on them, as the leaves

### AN OVERSUPPLY OF STOCK.

King Richard, on the battlefield cried, "My kingdom for a horse!" The florists in modern Athens on Saturday morning were crying for an outlet for the surplus stock which they had on hand. Trade all the week was slow, some of the salesmen saying it was hard to move anything. The wholesalers report a good shipping trade on Thursday and Friday, but the market Saturday was like the "charge of the six hundred." Those who had contracts, or orders, at a stated figure were lucky, but they were the exception and not the rule. It seems to be an instinct of mankind to go after the "almighty dollar," and in some to get it at any price, but it seems poor business to hold stock until it is in the last stages of decay, being so timed as to last only a day or so. Abraham Lincoln told about fooling the public some of the time, but the trade often gets a black eye by giving nothing for something. It is not many years ago that a certain magazine advised its readers to take the flower money at Christmas and buy candy. About two years ago a prominent man in the G. A. R. advocated artificial instead of natural flowers for Memorial day, his reasons being the high prices and the poor quality. Such things hurt and hurt seriously. They hurt the wholesaler and the retailer and rebound on the grower. The dollar that is honestly made is good to its possessor, but the one not honestly obtained is, in the long run, the opposite. The only scarce article on the market was smilax. The market was cleaned out so quickly that the holders did not have time to raise the price before they became aware that the supply was exhausted. There is very little of it grown now, asparagus having the past few years largely taken its place. The opinion of many is that Easter of 1911 will go down as having seen the biggest glut, especially in carnations, of any year.

### NOTES.

Mayor Fitzgerald has asked for an appropriation to build greenhouses for the cultivation of flowers, which will be open to the public, and it has been referred to a committee. This may be a result of the late show. Mr. Fitzgerald is a lover of flowers, and his plans are to have the houses built in one of the park systems. This will hold up his motto of a "Bigger, Better and Busier Boston," and give many a poor tenement child a chance to see nature under greenhouse conditions, which otherwise they would never have.

Mr. A. Patten & Co., Tewksbury, report having a great call for carnation plants; that orders have been refused the last week, the sales have been so large. Mr. Patten has a red carnation of which he expects great things. This is another carnation expert who has built up his business on clean business methods and who rightly holds a high place in the esteem of the trade. Anything with the Patten trade-mark means quality.

The retail stores were full of beautiful stock and the windows were nicely arranged. Galvin had an elegant display in his Tremont street windows, Comley and Zinn each had a good show. Penn had an extra store for a sale on Dorothy Perkins roses in pots, and their usual sale on violets.

Robert Doherty, of West Medway, is to erect a house for carnations 26x100 his specialties are carnations and snap dragon, both of which he grows well, shipping the stock to Welch Bros.

Mrs. Robert Montgomery, Natick, has been taken to the hospital, ill with the disease from which her husband is just recovering.

John MacFarland of North Easton had a large shipment of gardenias, which he grows as well as any grower we have seen.

The Waban Rose Conservatories marketed some excellent Killarneys and American Beauty roses.

The wholesalers were too busy to mention trades. Call next week, was the greeting.

Thos. Roland had his usual quota of excellent pot plants of all kinds.

Peirce Bros. brought in some elegant azaleas.

Weather springlike.

MAC.

## Glen Cove, N. Y.

The regular monthly meeting of the Nassau County Horticultural Society was held in Pembroke Hall Wednesday evening, April 12. President Trepass in the chair and with a good attendance. The result of the competition for the society's prizes was as follows: 12 mixed carnations, James MacDonald, first; one calceolaria, Alexander MacKenzie, first; flowering shrub, Alexander MacKenzie, first. Certificates of culture were awarded to Wm. Eccles for vase of mixed carnations, and J. W. Everett for gardenias. Honorable mention to James MacDonald for antirrhinums, George Dorber for mushrooms, and vase of mixed roses. Geo. Dorber, G. Barton, R. Wright and E. Westlake were appointed judges. Harry Jones, Thos. Rolley and Andrew MacHenry were elected to active membership. A. MacKenzie, J. W. Everett and Geo. Dorber spoke as to the methods of culture of their exhibits, which were of great interest and benefit.

It was decided to hold the fall exhibition on November 1-2. The executive committee were requested to draw up a preliminary schedule for the fall show to be presented at the next meeting and also one for the rose show which is to be held at the June meeting. J. Ingram offered a prize of \$5 for sweet peas, 24 varieties, 12 of each. W. A. Sperling, of Stump & Walter Co., offered \$5 for a prize for tulips for the May meeting, six varieties, six of each.

Messrs. Ingram and Sperling were very heartily thanked for their generous offers. E. WESTLAKE, Secy.

### A SATISFACTORY EASTER BUSINESS.

This Easter was very similar to the usual Easter except that stock seemed more plentiful and consequently lower prices prevailed; in fact, some of the stores advertised "no raise in prices," and carried it out. The market on lilies around Easter is as variable as curb mining stocks, and a range of from six to 15 cents is about as nearly correct as one can state. There were far more lilies on this market this year than last and they also cleaned up better. There was an immense lot of potted ones handled—in fact all potted plants had a larger run than usual. The next flower in importance seemed to be the violet, which always cleans up at Easter, and they were much better than one would expect this late in the season, very few complaints being heard. Roses were more in evidence than ever, the wholesalers being very long on white. American Beauties sold well and brought as high as \$7.00 per dozen. Lily of the valley, as usual, cleaned up nicely, as well as sweet peas, and there were some fine specimens of the latter. Bulb stock was not very much in evidence, with no regrets. Smilax was one thing that was not plentiful and the big demand for this green seemed to magnify the call for it. Taking it all around, everyone is satisfied, as one was able to handle good stock and sell at very reasonable prices with the usual profit. The increased demand for potted plants is more noticeable each year.

### NOTES.

The Easter display of the local retailers easily eclipses any shown before. The Easter displays of the Phipps Conservatories are up to their usual standard, as attested to by the thousands who flock there.

Chas. Dougherty, McKeesport, had the misfortune to have his greenhouse, which was stocked with Easter plants, burn down just a few days before Easter. None of the plants were saved.

Quite a number of florists are now located on Penn avenue in East Liberty, two new ones opening before Easter.

Frank Faulk has been very ill lately, and was just able to get out and help a little during the Easter rush.

Lorch & Hoffmeister opened their new store at 402 Smithfield street, April 14.

De Forest Ludwig spent a few days at home recently.

J.

LEAVENWORTH, KAN.—The terrific tornado which passed over the states of Oklahoma and Kansas, April 12 destroyed much greenhouse property. In this city hailstones as large as hen's eggs fell during the storm, and the greenhouses at the Soldiers' Home and St. Mary's academy were demolished and the valuable collection of palms at the home, it is feared, were ruined.

## AN INCREASED EASTER BUSINESS.

The great rush of Easter is over, and all in the trade vote "aye" to the motion that they are glad of it. Expectations have for the most part been realized. There was a large demand, which was, however, quite equalled by the supply. The volume of business was perhaps a trifle greater than last season, just a natural growth to keep pace with the newer stores and facilities for handling the same. The most attractive plants in the stores were the pink Rambler roses, the Tausendschon, Lady Gay, Dorothy Perkins, and the darker Hiawatha. The trained forms of the Lady Gay as pyramids and the spreading umbrellas on single stems about four to five feet high with their pendent clusters of flowers were among the first things picked out and all brought fancy prices. The Tausendschon in all sizes were also good sellers and it has gained a place as one of the standard varieties for Easter. Mrs. Cutbush and Annie Muller were largely used in basket work. Plants of these and similar varieties well flowered in four or five-inch pots should be a good crop as they are invaluable for giving grace and color to these arrangements. One of the artists, in speaking of baskets, said that they are certainly very pretty and add variety to the Easter stock, but it is a question whether there is any money in them. The profit is very little if any greater than on plants of the same value, while their preparation at this busy season always takes a lot of valuable time of one or two of the best men. They are also more difficult to handle in delivery than plants. The lily crop was ample, but in many cases the plants were under size, and not very heavily budded, the made up pans with from 15 to 25 buds were popular and sold very well. There was a splendid stock of hydrangeas; they were never finer than this season. Azaleas also sold as well as usual; there was a dearth of small sizes, plants that wholesaled at \$1 to \$1.50 and many more could have been handled. Genistas were scarce, what few good ones were offered were quickly picked up, medium priced, well flowered genistas are sure sellers and if one grower would turn his attention to this stock he would surely find sale for it. Gardenias in pots were also in demand and very few were left over. Spireas, which are a big eye-fall for the money, sold very well. When stocking up, the tendency of the buyers is to take on a goodly supply of the large showy plants and as a rule quite a few of these high priced beauties are generally found in the list or inventory taken on the Monday following. This is the case this year, the remaining stock in the central stores being in this class. There was a fair demand for cut flowers, the stock was good, with very little increase in prices that prevailed the past two weeks. The best Easter lilies were the Eastern stock which outclassed the local supply in quality and were well worth the two and a half a hundred more. Southern daffodils were seen in quantity and were handled largely by the street men. Violets were in great demand,

but were disappointing, the quality being very poor.

## NOTES.

A great many plants were sold on the streets, the city hall pavements were crowded with stock, which was all cleared out before Saturday night was very far advanced. The department stores also handled a good many plants and towards the last sold them very cheap, marking plants that had been selling for \$2, down to 25c.

Alexander Scott, of Robert Scott & Son, said that last week's cut of roses of all kinds totaled over 40,000 blooms, and the plants in quite a number of the houses were not in crop. There should certainly be something doing here when all the houses get to going. In last week's letter Berger Brothers were quoted as architects of a wonderful floral church. This was an error. Wm. Berger of Germantown having had the construction of this piece.

K.

## Dipladenias.

A very pretty flowering summer plant is the dipladenia, which when grown in covered with beautiful funnel-shaped flowers having a remarkable range of color, being especially rich in rosy shades, with throats brilliantly covered with yellow. While the plants are classed with the climbers and are allied to the allamanda, yet some species are naturally erect bushes, at least when young, and can be grown and bloomed as very handsome pot plants. The cuttings should be propagated in winter, and should

be made from well-ripened wood inserted in sand with brisk bottom heat. When rooted they should be potted in soil consisting of fern root with some sharp sand added. They should be then placed in a light airy house without shade and watered carefully. The plants are slow growers and will make fine specimens the second year. The young stock can be planted outdoors, being careful not to set the crowns too deep; and before frost, lifted and brought into the house. The water supply should be gradually reduced during November and used sparingly until it is desired to start the plants into fresh growth. They do not require a hot steaming house but a cool airy location in a temperature of 50 to 60°. They should be frequently sprayed during the growing period to keep down insects. As soon as the season of blooming is past the plants should be cut back and allowed to rest by gradually withholding water.

BIRMINGHAM, ALA.—A. J. Koenig has fitted up the store at 318 North Twenty-first street and an opening was held April 10.

## New York.

## AN IMMENSE EASTER BUSINESS.

This was one grand Easter so far as the plant and flower trade were concerned. The weather was a little squally at times during Saturday and Sunday, but never became bad enough to interfere with business. A little snow even came in on Sunday morning, but this was soon followed by sunshine and cool and pleasant weather was the rule. Never before was such a huge volume of business done, and never before was there seen such an immense stock of material. Looked at from an individual standpoint, business did not seem to be more than ordinary, because there were lots of flowers left on hand when the wholesale stores closed their doors on Sunday, but the almost unlimited sources from which come the supplies for this market preclude all possibility of a general clean up, either at Easter or at any other time, hence we repeat that while there was plenty of stock on hand after the rush was over, business was good and, when the returns are all in, will be considered as very satisfactory indeed. The early morning market of the Cut Flower Exchange on Saturday gave a clear indication of what was coming. Stock of all sorts was extremely plentiful and no boosting of prices was attempted. Buyers were there on business bent and everything moved off in short order. All throughout the day Twenty-eighth street was an animated scene, something doing all day, and all night, too, for that matter, for it was not until well after daybreak on Sunday that the wholesale men could leave their stores and go get a bite to eat—theirs is surely a strenuous lot at these holiday seasons. But while stock was being moved out steadily during the 24 hours, there was a seemingly constant stream of increasing shipments, and some dealers declared that it was puzzling to realize where it all came from, there seemed to be no end to it. The things that were in the shortest supply, and which consequently cleaned out satisfactorily all around, were cattleyas, good grade violets, lily of the valley and pink sweet peas. Of these it may safely be said that the supply was not equal to the demand. Cattleyas brought 60c and 75c; violets 75c per 100; lily of the valley, \$4.00 per 100. With the exception of these four items prices on all cut flowers were no better than had been prevailing for some time. Lilies ranged at all prices between 4 cents and 12 cents each, there were all grades and there must have been upwards of 100,000 in the market. We thought we had seen lilies plentiful at other Easters, but there was never a dealer of them like this seen before, no wonder there were many left over. Roses, too, came in a regular flood, many of them unexpected and some few of them a trifle weary with age. Special American Beauties were in rather poor demand and were among the left-overs to quite an extent. Forty cents each was as high as we heard quoted anywhere, and we are under the impression that among those which were sold there were more that realized 25c each than 40c. Bride, Bridemaids, My Maryland, Killarney and white Killarney, were all very, very numerous, many were disposed of, and many remained unsold. Ten cents was about the top asking price and eight cents was the taking price as a rule, and from this figure they were available at any price down to \$1.00 per 100, according to the grade. Brunners were not so plentiful, neither were Richmonds, hence these two sorts cleaned out better than other varieties of roses. Carnations, also, were right in crop, they could not all be cleaned out no matter how cheap they had been offered. Four dollars per hundred only was asked for the

best, so it was not high prices that caused some of them to be left over, it was simply a case of too many. While violets were not perhaps what may be called very plentiful compared with what has been seen at previous Easters, there was a fairly good supply came in, unfortunately the really good ones were very much in the minority and they only brought the price mentioned above. The bulk of the stock went to the peddlers and did not realize much, if any, over \$2.50 per 1,000. Gardenias were too plentiful. Long stemmed flowers of these can usually be moved fairly satisfactorily, but let an unusual quantity of short stemmed blooms appear on the market, they soon find their way into the hands of the street peddlers, it would seem that the gardenia supply can be glutted with a lesser number of blooms than can that of any other flower. All available small bulbous stock was in good demand. There was a limited supply of Lillium candidum, of L. rubrum and L. alba there were plenty to supply all wants. Marguerites, both white and yellow, were plentiful and very good. Snapdragon of splendid quality was available and brought from \$1.00 per bunch upward. Mignonettes, wall flower, trailing arbutus, lilacs and other miscellaneous stock helped to fill up the corners. We must not forget to mention single violets; these were in good demand and fetched 75c per 100, just as much as the best doubles. Among the varieties in cut flowers were a few gladioli and white and yellow lilies.

Since Easter Sunday the wholesale cut flower business has been quite slow and prices have weakened along all lines. Some of the retailers have been quite busy with wedding affairs but so vast is the amount of stock coming in daily that a few extra weddings do not seem to affect the market in the least. Lilies and roses are, we believe, the two hardest propositions with the wholesale men. Clearances are out of the question for the time being.

## NOTES.

Quite a nice little exhibition of cut flowers and plants was that given by the Horticultural Society of New York on April 12 in the Museum of Natural History building. Prizes were given only to private gardeners. J. Canning, Ardley, N. Y., showed three splendid plants of hybrid calceolarias, also a new impatiens, the result of a cross between I. oliveri and I. sultana. Among trade exhibitors were John Lewis Childs, with several varieties of richardias and Lager & Hurrell with a plant of Miltonia Bleuana, a beautiful, large flowered white variety. In connection with the show, Mr. Southwick, of the New York Parks, gave an illustrated lecture on "Hyacinths."

The auction rooms had their harvest during the few days preceding Easter. Sales were held several days in succession, and the quantities of flowering plants thus disposed of to suburbanites who believe anything at auction is a bargain, is truly remarkable. Some of the Bermuda cut lilies were seen at the Trent Auction Co.'s rooms,—the stems are too short for them to be of any use to the trade.

The Florists' Bowling Club have secured quarters at "Thums," corner Thirty-first street and Broadway, and from now on bowling will be in order every Friday evening. Commencing with May, a record of scores will be kept and those showing the best form will be selected to represent the club at the annual tournament which will take place in Baltimore next August.

Go where you would about the city, the wagons of the plant peddlers were in evidence, and my how these professional hucksters can shout! They sure arouse the neighborhood with their cries of "Fi-Flowers!" Theirs is mis-

sionary work indeed, and no doubt highly profitable, too.

Union Square on Easter Sunday was turned into a public plant market. The broad walks along the sides were almost covered with plants, this stock coming mostly from the Queensboro Bridge wholesale market. Business was good and the plant speculators reaped a big harvest.

The annual stockholders' meeting of the Cut Flower Exchange takes place on May 6. Officers and directors are to be elected and no doubt a substantial dividend will be declared by this prosperous association.

The early morning plant market, under the arches of the Queensboro bridge, Fifty-ninth street, is in full swing every morning and will continue until Memorial day, perhaps all through the summer.

Alex. McConnell will move May 1 to 611 Fifth avenue, two blocks north of his present location. Mr. McConnell had the Tilford wedding work in St. Thomas Church, April 18, which was quite elaborate.

W. Bluthgen, Jr., grower, Hudson Heights, N. J., had the misfortune to lose his dwelling, and part of his greenhouses, by fire, April 7. He carried but \$1,000 insurance.

Chas. Thorley will vacate his present store, corner Twenty-eighth street and Broadway, and go to No. 10 West Twenty-eighth street, May 1.

Retailers all report excellent Easter trade. Plants sold well and flowers, not being pushed too high in price, did very well also.

The plant auction rooms are very busy places these days. Daily auction sales have been the rule this week.

A. Le Mout, the old-time Bowery florist, has moved to No. 202 Bowery, a little north of his old location.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rockmere, Marblehead, Mass. June 20-22, 1911.

TUBEROSE contracts show advancing tendency in prices.

GRASS seed firms generally report very satisfactory and profitable trade to date.

WINTER or sand vetch is rapidly growing in popular favor. Foreign quotations show a material advance in price over last year.

CHICAGO—Prices on the board of trade April 19 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

IN Massachusetts next fall a meeting of the State Board of Agriculture and a committee of the state grange will be held to consider a seed law. Bill No. 550 was dropped by the committee in charge.

MARBLEHEAD, MASS.—The location of the next seedsmen's convention is noted in New England Horticulture. A traditional scene pictures one farmer-gardener drilling holes in the rock while his assistant is dropping grain in the holes.

NEW YORK.—Plants are being handled quite extensively at some of the seed stores. Counter trade in seeds has developed no unusual rush so far, though a fairly continuous business is being done. The season is considered quite backward.

HOLLISTER, CALIF., April 17.—Severe frosts April 11-13 have injured radish and sweet peas severely throughout the state. Seed crops in general are a month behind normal and later rains will be necessary for these crops. Onions are recovering from the March floods, but all growers are late with their work and labor is very scarce.

SALT LAKE CITY, UTAH.—I notice by the public press that Senator Sutherland of this state has just forwarded seven bags of seeds by mail to be given away to our public schools. The post-office employees, including those in the rural delivery districts, are kept busy distributing seeds to the senator's constituents. If this is not bribery, what is it?—E. E. R.

### California Seed Crops.

San Francisco, April 11.—We are prepared to report that crops are looking fairly well, though later than usual, owing to the continued drought during the early part of the season. The floods of February did some damage, but on the whole we do not see anything that is seriously affected at this time sufficient to cause us to report any apparent shortages.

Celery looks well, excepting White Plume and Golden Self Blanching, both of which may be short. Endive, leek, lettuce and mustard are all good stands. While some lettuce was sown late, it should still make a crop, as it has often done in the past under similar conditions. Radish is later than usual and while normal at present, we have provided a liberal acreage. Parsnip looks well.

Some of our smaller lots of sweet peas are late and under normal, but we will await the effects of the spring rains before reporting them definitely. The general acreage of sweet peas, though late, looks very well and stands are good.

On the whole, the onion crop looks well and the loss we sustained from some crops, does not cause us any uneasiness at the present time. There is lots of time, however, for other troubles, and our advices, at this time, are simply to inform you that the winter floods have done no serious damage to our crops.

C. C. MORSE & CO.

### French Bulb Crop.

Since United States dealers are the largest buyers of flowering bulbs, notably of white Roman hyacinths and Narcissus grandiflora, in the markets of Toulon, Ollioules, and Hyers, the following information gathered recently from among some of the largest shippers of these products has a direct bearing upon the 1911 crop and prices. For some years the tendency has been toward an increase in the prices of bulbs of the finer varieties and the largest dimensions. The prices quoted in 1910 were no exception to this rule, states Consular Agent Mansfield of Toulon, but, in spite of this, shipments from the region to the United States increased from \$119,047 in 1909 to \$166,704 in 1910.

In 1910 the smaller syndicated growers, while not comprising all individuals engaged in the industry, agreed on 68 francs (\$13.324) as the minimum price per 1,000 for the chief competitive article—white Roman hya-

cinths. This was the price paid, or supposedly paid, by all middlemen, negotiators, or shippers, who are the real distributors of the fine product of the region to American dealers. Prices for the finer varieties and the larger dimensions ran as high as 120 francs (\$23.16) for bulbs 15 centimeters in circumference. The comparatively high prices of recent years were caused as much by the relation of supply and demand as by anything else, though there has been a manifest shortage of bulbs of the largest dimensions, as well with respect to narcissus as hyacinths, the specialties of the region. The ruling prices to United States buyers in 1910 were as follows: the prices per 1,000 being those averaged from the figures given on a series of invoices presented at this consular agency for certification (centimeter equal 0.3937 inch): White Roman hyacinths—12 to 15 centimeters, \$15.574; 13 to 15 centimeters, \$18.445; 14 to 16 centimeters, \$21.712; Narcissus grandiflora—13 to 14 centimeters, \$3.898; 14 to 15 centimeters, \$4.941; 15 centimeters, \$5.507.

The 1911 crop in the region promises to be more than ordinarily good, owing to favorable late winter and spring-time conditions, and unless undue humidity occurs between now and the middle of May or the first of June there will be an abundance of bulbs of one sort or another, the growers always hoping for an excess of the larger dimensions, the existence of which, or the lack thereof, really making the market price on those of all dimensions.

As a matter of record, the 1910 season closed with a considerable stock of smaller sizes left on the growers' and shippers' hands, whereas this was not the case in 1909, when the stocks of all dimensions were completely closed out. This argues, if anything, that the larger and finer varieties are those chiefly in demand, above all by American buyers. Just how high prices will go the present season can not be foreseen until the actual state of the crop is known, and this can hardly be before the first bulbs are taken from the ground in June. In general, the shippers basing their statement on the demand of former years, the prices for the bulbs of the largest dimensions and the finer varieties will be high, and, unless there is a falling off in the demand, not lower than in 1910. For the smaller sizes prices may be somewhat lower. It is the general opinion here that United States buyers want the best of the crop and are willing and able to pay for it. If buyers in seeking lower prices (which some of the shippers admit are too high, or at least higher than formerly ruled for the

## JAMES VICK'S SONS, Rochester, N. Y.

same grade of product) will be content with bulbs of smaller dimensions, there will be a general lower average of prices; but, again, if there is a shortage of large sizes, even those of smaller size will be the subject of a rise in prices. The prices are not, therefore, to be regulated by demand and supply alone, but will be not a little affected by the quality of the crop. The small growers are shipping more and more through syndicates or agents and few growers seek to market their product direct. In more ways than one this tends to keep up the standard of prices.

The cost of freight and other transport expenses to the United States somewhat affect the values there, but this of itself is not enough to account for the higher price of the best French-grown bulbs of the varieties mentioned. Freights from Marseille to New York are about 50 francs (\$9.65) a ton, with 6 to 10 francs (\$1.158 to \$1.93) added for rail transport to Marseille from Ollioules, Toulon, or Hyeres. It is possible that these figures for transport may be considerably reduced the coming season if shipments can be made direct by steamships from Toulon to New York or Philadelphia, which come here several times a year to load bauxite ore. If, as is proposed, sailings this year are taking place at the moment when the bulb shipments are being made ready, American buyers will have every reason to favor this method of transportation, and to that end should acquaint themselves with terms and probable conditions from O. G. Hempstead & Son, of Philadelphia, the charterers of the steamers.

## SEVEN TOP TURNIP

Originally introduced by us from South Carolina in 1850 and annually grown for over sixty years under the zero winter temperature of Bloomsdale Farms, the Landreth's strain of Seven Top has obtained, by this northern culture, a hardness not approached by southern grown seed. All inferences would point that way, while thousands of experiments have conclusively proven it beyond a shadow of doubt; consequently one pound of Landreth's Seven Top will, in the dead of winter, produce more greens than can be cut from three times the more delicate southern-grown Seven Top.

Write us how much you want, and we will name you a price.

D. LANDRETH SEED COMPANY, Bloomsdale Farms, Bristol, Pa.

**L. DAHNFELDT, Odense, Denmark**

The conclusion is that the crop of hyacinth and narcissus bulbs promises well; that prices for the best varieties will be as high, if not actually higher, than formerly, with the possibility that the smaller sizes will be somewhat cheaper; that freights stand a prospect of being lowered and that the best market for the finer varieties is still considered to be the United States.

HELENA, MONT.—Harry Gray, of Boston, has accepted a position at the store of the State Nursery Co. and will have charge of the floral work.

### American Seed Trade Association.

The annual convention of the American Seed Trade Association will be held at Marblehead, Mass., June 20-22, 1911. The Hotel Rock-mere has been selected as headquarters. This is one of the best hotels on the famous north shore of Massachusetts, occupying a beautiful location which commands a view of one of the finest and most interesting harbors on the Atlantic coast. On one side of the deep waters and bold rocky coast of this harbor are the beautiful summer homes; and on the other the old colonial fort, and the old town of Marblehead with its ancient churches, its hip-roofed houses with brass door knockers and little old fashioned gardens; its winding, twisting streets, and its ancient and historic landmarks, making it one of the most interesting places on the New England coast. This makes a vivid and contrasting picture of the old and the new, and nearly every room in the Rock-mere commands this beautiful view. Marblehead is only 17 miles from Boston and trains leave the North station every hour. Tickets can be purchased direct to Marblehead and baggage checked through.

It is thought by some of the officers of the association that this, the twenty-ninth annual convention, will be the largest ever held. Extra efforts are being made for an unusually good programme, and there will be plenty of amusement, with special entertainment provided for the ladies.

E. L. PAGE, Secretary.

# Dreer's Offer of New Dahlias.

## New German Giant CACTUS DAHLIAS

**Nerthus.** Flowers fully 6 inches in diameter, of splendid form, borne on stout, stiff stems, held well above the foliage. The centre of the flower is a rich, glowing bronzy orange-yellow, passing to a carmine-rose at the tips, the whole suffused with a glowing golden color, which gives it an iridescence which it is not possible to describe. Strong plants, ready April 15th. 35 cts. each; \$25.00 per doz.; \$25.00 per 100.

**Rheinkönig.** In this we believe we are offering the ideal white Cactus Dahlia which has been a desiderata for a long time. In habit of growth it is robust, similar to the varieties *Lavine* and *Flora*; in color a pure snow-white, with flowers 5 to 6 inches in diameter. These are of great substance, lasting splendidly when cut; they are borne on long, stiff stems held well above the foliage, making it as valuable for garden decoration as for cutting. Our own representative had the opportunity of comparing this variety with many other sorts which were planted for comparison at the trials which during the past summer were made at the Palmen Garten at Frankfurt, Germany, where it showed up in such superior form over all others that we at once secured all available stock. We offer it, believing it to be the most desirable acquisition in Dahlias offered in many years. Strong plants, ready April 15th. 50 cts. each; \$5.00 per doz.; \$35.00 per 100.

**Vater Rhein.** Flowers frequently 7 inches in diameter, raised well above the foliage on stout stems; the petals are broad, curled and twisted, forming an ideal flower, the color of which is yellow suffused with salmon-rose; a beautiful, attractive and imposing flower. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Wodan.** This is the strongest-growing variety in the collection, the plant being exceptionally robust and growing fully 6 feet high, with large, bold flowers, frequently over 7 inches in diameter; but with this large size there is no coarseness, the flowers being a graceful arrangement of semi-incurved tubular petals of a most pleasing, delicate salmon-rose color shading to old gold in the centre. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100.

**Wolfgang von Goethe.** A splendid large, free-flowering variety, with gracefully arranged, perfect flowers of a rich apricot with carmine shadings; a splendid cut flower. Strong plants, ready April 15th. 35 cts. each; \$3.50 per doz.; \$25.00 per 100. One each of the above 5 new sorts for \$1.75.

NEW GERMAN GIANT CACTUS DAHLIA RHEINKÖNIG.

## Decorative Dahlias of Recent Introduction

**Beloit.** Particularly effective on account of its very large flowers, borne on stems 18 to 20 inches long and held well above the foliage; these are full double, of splendid form, of a rich purplish-garnet, shading deeper towards the centre. Plants ready April 15th. 35 cts. each; \$3.50 per doz.

**Delice.** Its beautiful soft, yet lively color, a glowing rose-pink, together with its perfect shape, stout, stiff stems which hold the flowers well above the foliage, and the fact that when cut it retains its freshness longer than any variety we know of, makes this one of the most valuable for cutting, and one of the most decorative sorts in the garden. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

**Le Grand Manitou.** The first variegated Dahlia of the decorative type introduced, and which attracted much attention in our trial ground the past season. The flowers are from 5 to 6 inches across, the ground color being white, prettily spotted, striped, blotched and suffused with deep reddish-violet; these are borne on stout, stiff stems and held well above the foliage. Plants ready April 15th. 35 cts. each; \$3.50 per doz.

**Perle de Lyon.** The most valuable white Decorative Dahlia yet introduced, and which is certain to become a leader as a cut flower, perfect in form, pure in color, and produced on long, stiff stems, and very free-flowering. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

**Yellow Colosse.** Flowers of very large size, of perfect form, pure primrose-yellow; the best of its color and valuable for all purposes. Plants ready April 15th. \$1.50 per doz.; \$10.00 per 100.

One each of the above 5 new Decorative Dahlias for \$1.00.

See our Current Wholesale List for other varieties of Dahlias, Seasonable Plants, Seeds, Bulbs, etc.

DECORATIVE DAHLIA, PERLE DE LYON.

The above prices are intended for the Trade only.

## Market Gardeners

### Vegetable Growers' Association of America.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Boston, Mass., Vice-President;  
S. W. Severance, 508 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

DES MOINES, IA.—The state assembly has enacted a law to become operative January 1, 1912, which will require that all small fruits shall be in packages containing full measure, the standard of measure being the quart containing 67.2 cubic inches, and its divisions and multiples, and all packages are to be marked so as to indicate the part of a quart or pint contained.

### Prices of Indoor Fruits and Vegetables.

New York, April 15.—Mushrooms, 60 cents per pound; cucumbers, 15 cents each; lettuce, \$1.25 per dozen heads; tomatoes, 25 cents per pound; radishes, 50 cents per dozen bunches; rhubarb, \$1.25 per dozen bunches; grapes, \$1.10 per pound.

Chicago, April 15.—Mushrooms, 30 cents per pound; cucumbers, \$1.75 to \$2 for two dozen; lettuce, 15 cents to 17½ cents per pound; radishes, 50 cents to 75 cents per dozen bunches.

### Growing Early Tomatoes.

That the size and character of the plants at the time of transplanting to the field have a marked influence on the yield of early tomatoes, and that the age of the plants and the conditions under which they have been grown determine their size and character, are the conclusions resulting from certain experiments conducted by the Illinois Agricultural Experiment Station. Plants ten or even twelve weeks old that have made a slow, steady growth, and have been provided with sufficient room so that they remained stocky, and have retained all their lower leaves, are capable of giving quick results, provided they can be transplanted to the field without seriously disturbing their root systems. However, an old plant that has begun to stretch for light, lose its lower leaves or turn yellow because of outgrowing its allotted space, is inferior to a younger and smaller plant. The experiments consisted in sowing the seed at different periods in flats and then shifting to pots; in pots, thinning and shifting; in flats, shifting to other flats and then to cold frame; and seeded and transplanted in frame. The best results were obtained from plants seeded in February sown in 2½-inch pots, thinned, and shifted to 4-inch and later to 6-inch pots, the pots placed in cold frame and then planted as early as possible before they became pot bound.

But the condition of the plant may be more important than its age and the plants should be carefully hardened off before they are set in the field. That the differences in the plants at the time of setting in the field influence chiefly the yield of early fruits and have comparatively little influence on later yields. Plants that had produced a heavy crop of early fruit continued to produce abundantly

until killed by frost, and plants that had produced only a light early crop, on account of securing a late start, likewise produced heavily late in the season. The production of a heavy early crop does not impair the vigor enough to seriously affect the yield of late fruits. This means that all the extra early fruits a tomato plant can be made to produce are practically clear gain.

### Frost Protection.

Probably the most difficult problem the market gardener has to contend with is protection from spring frosts. His business absolutely demands running great risks, and a few hours of low temperatures often means big losses. Many methods applicable in home gardens cannot be used on a large scale, owing to expense, or lack of help. We will briefly review some of the practices, hoping to benefit some growers thereby. About the poorest protection is smoke or smudging. There are several reasons for this, the chief one being that heat rises and cold sinks, hence a fire often causes the heaviest losses immediately around the pile, as the ascending heat induces the cold air to draw to the fire. Shifting winds are another cause of loss. We have seen cold west winds induce the grower to build his smudge fires along that line, and in a few hours the wind would shift to east, thus sending the smoke over to the neighbor. We have watched others smudge a good deal and never thought enough of the practice to try it ourselves. While orchards have been heated, the case is quite different. The trees are not at the ground line and the innumerable branches intercept the winds and also the heat currents. Hence while orchard heating may be successful, a bleak garden field is quite a different proposition. The best means we have found is earth and hay mulches. Where rows are straight

and uniform it is an easy matter to cover most crops, provided the ground is in mellow condition. However, wet spells sometimes end in hard freezes or are preceded by a little snow before the frost, and the land is in no shape for furrowing or ridging. Figuring a number of years, we have succeeded fairly well with this earth covering. The most trying season was last year; while the ground was always nice and mellow, the freezes were so numerous and so alternate with good weather that the covering operation had to be repeated so often as to render the work unprofitable. To cover with earth is advisable where one such protection is likely to save the crop.

Broadcasted crops we protect with litter. Thus we use a manure spreader and scatter coarse straw over spinach and radish immediately after sowing the seed. The plants come up between the straws and will stand much more freezing than if exposed. Earthen-pots, tin cans and glasses over tender plants are not safe, as these articles are good conductors and give poor protection. Plant bed cloth is excellent where some framework exists to keep it off the plants, but wherever cloth touches plants damage is surely done. We have seen tomatoes badly damaged by cloth resting on them, where uncovered plants escaped unhurt. Mechanical watering may offer some relief, but our installation is not perfected to a point that we could attempt frost protection. If it was, our land is too retentive to think of throwing water on for ten hours.

## A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909. It is a pure bright dark pink of even shade, size 3 1/2 inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per 5000, \$400.00. 25 at 100 250 at 1000 rates. Place your order now to be in on early deliveries.

Nic. Zweifel, North Milwaukee, Wisconsin

## The Nursery Trade

### American Association of Nurserymen

W.P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shenandoah, Ia., Vice-Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

"SEED-EATING mammals in relation to reforestation" is the title of circular No. 78 issued by the Department of Agriculture which deals with the attacks of mice, ground squirrels and other rodents upon newly planted seeds in a reforesting experiment in the Black Hills in which from 30 to 70 per cent of the seed was destroyed, and the methods employed to protect the seed from the destructive animals.

### Tree Planting in Korea.

The Seoul Press of February 8, 1911, notes that by way of commemorating one of the three national holidays of Japan, to be observed for the first time in Korea, the director of the agricultural department has notified all provincial governors that 2,500,000 young trees reared in the government nurseries, will be distributed among the provinces to be planted on that particular day, in the grounds of public offices, schools, and other public establishments throughout Korea.—Consular and Trade Reports.

### Other Shrubs for Steep Banks.

While reading the article, "A Shrub for Steep Banks," that appeared in THE AMERICAN FLORIST, issue of December 24, 1910, page 1126, a number of other plants suitable for the purpose came to mind.

Chief among these is the Matrimony Vine (Lycium Chinense). We use it on several steep terraces and find it most luxuriant in growth. It stands as much abuse as the symphoricarpos. Its roots freely along the stems which have been known to grow from ten to fifteen feet in a season. It is very ornamental when in fruit as the branches become literally loaded with bright red berries. Propagation is readily effected by hardwood cuttings or suckers; and by seeds or layers. We also find that the trailing Memorial Rose (Rosa Wichuraiana) does well on banks, especially terraces. It requires a year or two in which to become established after which it makes prodigious headway. Bittersweet (Celastrus scandens) is well worth planting. When in fruit it is wonderfully effective. Plants should be placed close together to secure an early cover. The Golden Bell (Forsythia suspensa) will soon spread if the season is reasonably favorable. Any branch which touches the ground quickly forms roots at the point of contact. They revel in good soil.

The brambles will grow in practically any situation. If the bank is not too steep they will soon show a tendency to walk right over it! They require comparatively no care and are worthy a place in any garden. On account of their thorny disposition, however, they are probably better adapted to large places. If given an opportunity the sumach will soon overrun almost any bank and furnish beautiful leaf colorings in the autumn. Rhus

typhina (staghorn sumach) a tall growing sort, is excellent in some situations. Rhus glabra (smooth sumach) of medium size, is also fine. The cut-leaved varieties seem to give more leafage than the types and would doubtless be valuable as a soil binder on banks. Most of the above mentioned plants do well in dry situations. Prunus pumila (Sand Cherry) suckers freely and would doubtless be valuable for bank planting. When young it has more of a spreading habit but later on assumes an upright growth to five feet or more. The Sand Cherry inhabits the sand dunes and rocky places in the great lakes region, but does well in our soil. Prunus cuneata, the Appalachian Cherry, is an allied form found in bogs and low wood lands of the north. The Indian Currant is certainly tenacious as it is not easily driven out when once established. It does well on any fully exposed situation, in shade or partial shade. I have seen it growing in heavy masses by the hazel and viburnum.

FRANK K. BALTHIS.

PORTLAND, ORE.—At the coming rose festival to be held June 5-10 it is estimated that 5,000,000 flowers will be used in decorative effects. One of the spectacular features will be the battle of roses in which 100 of Portland's prettiest girls will bombard the crowds with flowers.

FRANK OECHSLIN,

4911 Quincy St., CHICAGO

### Large and Small Dahlia Roots.

There is a great difference in the growth of the several varieties of dahlias, especially as regards the size of the root upon which so much is depended for the propagation of the plant. Some varieties make immense clumps of roots, yet are very shy bloomers, while others produce a large quantity of bloom of the best quality, yet make scarcely any root at all and those that are made are very small. It often happens that among the latter are included some of the best varieties, and florists and seedsmen are prone to condemn them because "their customers complain." This is the opportunity which the dealer should embrace and proceed to educate the customers instead of decrying the variety, for those that are acquainted with the growth and habit of such a variety never make any complaint.

The variety Storm King is one of those that makes a very small root and inquiries are made asking "Is there not some way that this most beautiful dahlia can be made to produce larger roots?" Larger roots can be grown if the buds are cut off each week from June to October and the entire strength of the plant thrown into the roots, but this would amount to a loss, for the flowers will return more than can be obtained for the roots. Last year Storm King netted us \$1.00 per 100 over all expenses for the entire crop, while the roots are catalogued at 25c. Many growers have discarded this variety on account of its roots being so small, and grow inferior varieties that make larger roots because in selling the stock they are more profitable, but a small root of Storm King, weighing one-half ounce, will make a larger plant and will bloom earlier than any other dahlia from a root weighing one pound, and will produce twice the quantity of bloom. The florists' trade, that is, the intelligent class of florists, who know the varieties of dahlias and who regard quality above quantity, are perfectly satisfied with the small roots of Storm King. We were recently offered by one of the largest dahlia growers, who raises the blooms for market, any price we would name for 500 roots or plants of this variety.

L. K. PEACOCK

BROOKLYN, N. Y.—The display of lilies and spring plants at Prospect Park which was opened on Easter Sunday attracted thousands of visitors. It was considered the finest show ever attempted in these houses.

HELENA, MONT.—The Florists' and Nurserymen's Association of Montana is making preparations for competitive florists' and nurserymen's exhibits at the state fair this fall. W. J. Hugo having resigned the office of secretary of the association, J. W. Mallison has been appointed to succeed him.

## The Book of Gladiolus.

The first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating, storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

Price, postpaid, \$1.25

AMERICAN FLORIST CO.,

Price \$3.00.

American Florist Co., 440 S. Dearborn St., Chicago

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

## What the Users say

No. 6 Kroeschell Boiler---11,000 G.x 3,000 G.---60" at Zero

Your No. 6 Boiler is taking care of 11,000 square feet of glass. Used 3,000 bushels of soft coal (stack). Had no trouble keeping temperature at 60 degrees in zero weather. Fired ordinarily from six to eight hours. Boiler has given entire satisfaction. We're at 10 o'clock p.m. and not go to fire again until 6 a.m., even in the coldest weather (10 degrees below zero). One very windy, cold Saturday night through a m.s. understanding, the fire was not looked after from 10 o'clock p.m. until 8 o'clock a.m. Sunday morning (ten hours) and the h.u.s. registered 42 degrees. Very well pleased with the boiler.

WARRICK BROS., Washington, Penn.

## HARDY CARNATIONS.

The hardy, ever-blooming CARNATION "CRIMSON KING." Everybody has asked for a carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long, never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a deep crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy CARNATION "CRIMSON KING." Per dozen, \$1.25; per 100, \$8; per 1,000, \$75. 25 plants and cuttings at 100 rates. 250 plants at 1,000 rates. Our new Trade List of everything you need now ready, mailed on application. Write today. THE GOOD & REESE CO., The Largest Rose Growers in the World, Springfield, Ohio.

Mats, cheapest and most practical on the market. Send for circular. J. P. Watts, Kerrwood, Pa.

Towers, tanks, windmills, silos. Waterworks supplies of all kinds. The Baltimore Cooperage Co., 9 S. Howard St., Baltimore, Md.

Wagner plant boxes, for palms, boxwood, bay trees, etc. Wagner Park Conservatories, Sidney, O.

## A Talk for the Man Who Is Thinking of Putting His Money and His Time in the Wooden Eave and Gutter House

No delays, no fussing, no mistakes, for all holes in the Iron Posts and the Galvanized Eave Plate are drilled at the factory. It saves you time—it saves you money.

**P**ERHAPS you are barking up the wrong tree and don't know it. Why take anybody's say-so as gospel truth, when you might better sharpen your pencil and figure your own things out?

Take our Pipe Frame House, for instance, and for this particular argument, let's set aside for the moment all talk about its durability, increased lightness and all sorts of things and get right down to erection costs alone.

You order from a greenhouse milling concern, cypruss materials and they come to you exactly as they left the machines. It's up to you to set posts every four feet or so, nail the wooden plate to them, and work out the spacing for the roof bars. And now your trouble begins, for a slight variation of this spacing will make your glass too tight, too loose—and you know it's next to impossible to toe-nail a bar on the plate and not have it slip one way or the other, and that means a good deal of time lost in straightening them.

Let's see how it rounds up in the end: You put your wooden posts every four feet or so—dig all those holes—spend all that time setting the posts. Our guaranteed Iron Posts are spaced every 8 feet 4½ inches, just half as many posts, so that what is saved in labor and the cost of those extra wood posts, about pays the difference in cost of our Iron Post.

Our galvanized Eave Plate is bolted to the Iron Posts by a fitting, and all holes being drilled at the factory it has to go together the right way—you can't make any mistakes. Then the holes in the plate for the bolts of the Sash Bar Clamps are also accurately spaced by machine—before being shipped to you, so the bars must snap absolutely even—anyone can put on the bars and can't possibly get them wrong. Here again you save time besides getting an eave that's solid as a rock, casts about a third the shade, clears the roof from snow and ice, and outlasts any eave that's ever been made.

Now this is the comparison of only one structural cost point—but there are a good many more—each as conclusive—each as much of a money saver in the end and you ought to know every one of them. So before you put another stick into another house, send for our circulars and catalogues and give them the careful consideration that a money saving, money-making proposition should receive. Besides this there is the question of gutters if you build ridge and furrow houses. Next week we will tell you just how our kind of gutters save you money.

### Brampton, Ont.

Business has been brisker than ever during Easter week, and even though the lily crop was not as good in quality and quantity as last season, the bulbous stock and an exceptionally fine lot of carnations helped out to a very appreciable extent. Every single fern and palm was cleared out by the beginning of the week, and not a lily or an orchid could be cut by Saturday morning. Even the violets found a ready market, the same weather that held back a large cut of roses being mainly responsible for an unexpected supply that florists were glad to handle at \$1.50 per hundred. There will be some fine stock ready in about a fortnight's time, but the growers in this vicinity never had a better outlet for their products. In Ontario alone the number of retailers has increased 25 per cent within the last twelve months.

### NOTES.

The Toronto Horticultural Society brought over 300 people on a special Canadian Pacific Railroad train the Saturday before Easter, and the visitors enjoyed a leisurely walk through the Dale Estate, which looked at its best just prior to the busy Easter rush. Most of the excursionists were somewhat disappointed in not being able to procure a few flowers as a souvenir of their visit to the famous greenhouses, but it was equally as hard on the staff to have to refuse them owing to the exigencies of trade.

The Dale Estate had just completed a 300 ft. sod shed begun in the fall, and have in hand for this year the erection of an up-to-date cold storage plant, new stabling accommodations, and three 650 ft. houses for American Beauties.

Spring is very late in Brampton. This time last year saw three large greenhouses erected and all ready for the glass; this season not a post hole has been dug up to the present, while today it is snowing. W. G. P.

## San Francisco.

The spring flower show given under the auspices of Pacific Coast Horticultural Society and the California State Floral Society was opened in the Norman room of the Fairmount, March 30, and continued until April 2. The room was beautifully decorated with huckleberry and fruit blossoms, and the entire room was filled with choice plants and flowers. The prize for table decorations was awarded to Stein & Levin, whose table was decorated with daffodils. The Golden Gate Park displayed a fine collection of palms and blooming plants. Exhibits which were awarded special prizes, not being entered in competition, were made by the Pelicano-Rossi Co., of roses and blooming plants; McRorie-McLaren Co. showed a large azaleas, wisterias and orchids, among which were some very rare specimens; H. Plath, collection of *Primula obconica*; Domoto Bros., flowering plants and evergreens; Ferrari Bros., hyacinths and bulbous stock. The attendance was exceptionally large, the show being a financial success, netting about \$1,000, which will be used in equipping the laboratory of the Children's Hospital.

## Indianapolis.

### AN EXCELLENT EASTER.

Easter trade was excellent. Hardly a flower was left in any of the sales-rooms. There was a little surplussage with some of plants but not enough to hurt. The weather was favorable for good business; we had as fine a day as any man could wish for. On nearly every street one could have seen at least one florist's wagon. There were over one hundred florist's wagons in use.

Smith & Young Co. announce that they will open a wholesale store in the down-town district in the near future. Iceboxes, counters and delivery car have been contracted for. As to location, nothing definite has been decided, but three very suitable sites are being considered and no doubt before the end of the month a room will be rented. The object of the promoters is to offer to the Indianapolis retailers at all times a complete line of cut flowers, greens, etc. in the most convenient manner. Although managed by Herman Jung of the above named firm, the new venture is supported by most local growers and some very prominent out-of-town florists.

A. W. B.

ROCHESTER, N. Y.—The Rochester Floral Co. have opened a store at 12 Clinton avenue, and just completed a conservatory at the Main street store, in which to display their stock.

## ADVANCE MACHINES

Now that you are building a new greenhouse this spring, why not put in the same, up-to-date ventilating machinery and greenhouse fittings?

How about some steel shelf brackets for 10c single and 15c double, and to fit any size pipe from 3/8 inch to 2 inch inclusive with arms to carry 8 inch or 12 inch boards.

## THE ADVANCE CO.,

542 N. 14th St.,  
RICHMOND, IND.

### Pasadena Gardeners' Association.

The sixth annual spring flower show of the Pasadena Gardeners' Association was held under most favorable weather conditions at the Hotel Maryland, Pasadena, Calif., April 13-15. The attendance was excellent and the show of considerable interest, the tennis court of the above hotel being covered with a large tent for the purpose. Local nurserymen and seedsmen made an elegant display of popular stock, though the date being so close to Easter doubtless kept some away. In the class for the best scenic effect of plants, J. Hertrich, gardener at the Huntington estate, put up a very good exhibit, covering a lot of space, and containing a large assortment of fine plants. At one end was an artistic display of water plants and rock work flanked with some elegant neat specimens of Kentia Fosteriana and other palms and ferns. A number of choice plants of Phoenix Roebelenii were included and an immense piece of the pendent Goniophlebium sub-aureulatum in the finest possible health.

Howard & Smith, of Los Angeles and Monticello, have to be placed first among the trade exhibits, their display being remarkable for the fine quality and immense numbers of field grown amaryllis (hippeastums) shown. These, Mr. Howard said, were equally early as the greenhouse grown plants, and were surely a magnificent lot. Seedling gerberas and a fine batch of pelargoniums were also noted in their stand. Ed. Rust, of the Palm Nurseries, staked a most interesting lot of coniferous and other trees and shrubs, as well as a good display of greenhouse plants. Erica Meditteranea was in fine order, and we noted some elegant little specimens of Biota aurea and other dwarf furnishing stock in the best of order. Robert Pegg, of the Mentor Nursery, had fine Moutan peonies in his group, while J. Dietrich showed Japanese dwarf trees that looked as though the California climate agreed with them almost too well for them to keep their character.

E. D. Sturtevant, of Hollywood, showed several very interesting things, among them being Rosa gigantea, which is now flowering with him in fine shape. It is a grand thing, like a glorified Cherokee rose, but of much thicker texture, and of a soft creamy white. This flowers regularly with Mr. Sturtevant. He also showed Chorizanthe illicifolium grown in the open, the showy Solandra guttata (copa d'or), a magnificent variety of Erythrina caffra and others. A varied and choice display of cacti was put up by H. Boorman, these being shown on artificial rockwork in a very natural and pleasing manner. Among the exhibits of outdoor flowers the palm ought to be awarded the tulips. They were magnificent, while there were also elegant displays of watsonias, ranunculi, iris,

ixias and others. To a lover of California wild flowers, the exhibits in this section were of great interest and so showy and beautiful are many of these that they compared favorably with the garden flowers shown close by. During the cold nights recently one exhibitor of indoor stock had to withdraw at the last moment, but Howard & Smith stepped into the breach with a fine lot of choice conifers which were greatly admired.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

**The Home Correspondence School**  
Dept. A. F., Springfield, Mass.

Nashville.

Since the beginning of lent, trade has been rather quiet and all the florists are rejoiced that Easter has at last broken the dullness, and gay life will begin once more. The growers in this city were well prepared for the Easter trade, and brought in from their greenhouses a magnificent stock, both as to quality and quantity. Of Easter lilies there was no scarcity and potted plants of every kind were to be had, of hyacinths, tulips, narcissi, there was apparently no end. Hydrangeas, of which there was a fine supply were a great favorite. Potted Rambler roses were fine, and some of the florists had potted bleeding-hearts. The roses were right on crop, much to the gratification of the dealers, and were of a fine quality, American Beauty led, and were most excellent, white and pink Killarney, Richmond and other roses were abundant. Sweet peas, snapdragon, and a fine variety of stock served to make up pretty mixed boxes of cut flowers. Prices were not materially advanced.

NOTES.

The market-house had its full quota from the various gardens around Mount Olivet, L. Haury & Son, Allen, from the Belmont College, Arnold Schmidt and heading all, McIntyre Bros., with a magnificent supply of not only plants, but cut-flowers. Trade was brisk and of the thousands who left the market-house, scarcely one came away without a flower of some kind.

The display at the Joy Floral Co. was built in tiers massed with bloom, while the spacious rear and cellar contained a large supply. They had some

### SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

OFFICERS—GEO. ASMUS, Chicago, President;  
RICHARD VINCENT, JR., Baltimore, Md., Vice-  
Pres.; H. B. DORNER, Urbana, Ill., Sec'y; WM.  
F. KASTING, Buffalo, N. Y., Treas.  
Annual Convention at Baltimore, Md., August,  
1911.

### AMERICAN PEONY SOCIETY.

Next annual meeting and exhibition June 1911.  
B. H. FARR, Reading, Pa., President; A. H.  
FEWKES, Newton Highlands, Mass., Secretary.

### NATIONAL SWEET PEA SOCIETY.

Next meeting and exhibition at Philadelphia,  
June 23-24, 1911. W. ATLEE BURPEE, Philadelphia,  
President; HARRY A. BUNYARD, 342 W. Four-  
teenth St., New York, Secretary.

### AMERICAN GLADIOLUS SOCIETY.

Next meeting and exhibition at Baltimore, Md.,  
August, 1911. I. S. HENDRICKSON, Floral Park,  
N. Y., President; L. MERTON GAGG, Orange,  
Mass., Secretary.

### AMERICAN ROSE SOCIETY.

Next annual meeting and exhibition at Detroit,  
Mich., 1912. A. FARENWALD, Kosslyn, Pa., Presi-  
dent; PHILIP BREITMEYER, Detroit, Mich., Vice-  
President; BENJAMIN HAMMOND, Fishkill-on-  
Hudson, N. Y., Secretary.

### THE AMERICAN CARNATION SOCIETY.

Next annual convention and exhibition at  
Detroit Mich., January 24, 1912. J. A. VALENTINE,  
Denver, Colo., President; A. F. J. BAUR, Thirtieth  
St. and Senate Ave., Indianapolis, Ind.,  
Secretary.

### CHRYSANTHEMUM SOCIETY OF AMERICA

Annual convention and exhibition in conjunc-  
tion with the St. Louis Horticultural Society, St.  
Louis, Mo., November, 1911. ELMER D. SMITH,  
Adrian, Mich., President; C. W. JOHNSON,  
Morgan Park, Ill., Secretary.

## SUGGESTIONS FOR PLANT GROWERS.

### After Easter.

Fortunate, indeed, is he who has sold out cleanly all the Easter stock, but in most cases there will be more or less of the blooming plants left over. There is need of room for the young stock and Easter being so late, the potting and spacing of these plants must receive immediate attention. What to do with the plants left is a question. The lilies must be cut and the bulbs either thrown away or they can be planted in the ground and will produce a spike of bloom during the summer. The azaleas can be given a light, cool position and with care grown on for another season. The hydrangeas and ramblers and other hard wooded stock are good to grow on and make larger specimens another year. All the more rapid growing plants should be looked over, and as the call for these will be very limited from now on, no great amount of stock should be on hand. The flowers on the bulb stock should be picked and the bulbs thrown away. Of the primulas and cyclamen, if there are many left over a few of the best and later plants may be selected and the balance discarded. It is a poor policy to clutter up the house with a lot of unsalable stock, every inch of room should be in active use at this season and returning a profit to the grower. Even with all the room available, after the Easter stock has been disposed of there may be need of more bench space for the spring plants, and as the carnations are very productive from now on, the cut will be larger than is necessary to meet the demand, and if the blooms are sent to market they frequently do not return enough to more than pay for transportation charges. It is better to pull up some of the plants and use the space they occupy for the young stock. In this case it is better to remove the old soil and spread an inch or more of sifted ashes on the bench, throwing the old soil out and thereby getting rid of some of the vermin it is sure to contain. The bedding stock will require plenty of room to have it in salable condition at the time it is needed, for the time this year is short compared with other years, and the

plants handled as expeditiously as possible. It means good, systematic planning and long hours for the next two months to make everything come out right and bring in the proper returns.

### Begonia Gloire De Lorraine.

Many growers prefer the short growing cuttings from the old plants to the leaf cutting, and there should now be a quantity of these low breaks which can be propagated. They root much more readily than the leaf cuttings, and, in the opinion of many, they make handsomer plants. The young stock that was rooted early should now be making good growth. The plants should be placed near the glass, where they will not get drawn, and as soon as the sun begins to be too warm, a light shade should be placed over them. They should be in a nice, airy position, for they do not do well in a close, moist atmosphere when they are growing. If kept in too moist and damp a location the leaves are apt to spot and are ruined. The plants should be given every opportunity to start into good growth, and in case any of the shoots show buds, these should be removed that the strength may be given toward making a short-jointed bushy plant. The soil for potting should be composed of good fibrous loam and leaf mold, two parts of the former to one of the latter, with a little sharp sand added. There has been more or less complaint during the past winter of the keeping qualities of this begonia after leaving the greenhouses. There is no doubt but that this plant will not do well in every location, even in a greenhouse, and our experience is that in some residences, in which the air is very dry, the temperature high, and with but little sunlight, this begonia will not keep in good condition any great length of time, but we have known of these plants continuing a mass of bloom throughout the winter in other dwellings. It is also the same in greenhouses, for the location must be favorable and the care the best to grow them successfully; in fact, if only a few plants are wanted it is better to buy them of the specialists in early summer than to attempt the culture in a small way.

**Cyclamens.**

The plants that have been produced from seed sown last autumn should now be fine stock and if not yet potted can be placed in pots at once. The soil should be two-thirds good compost, one-third leaf-mould, with a liberal sprinkling of clean sharp sand. There should be pieces of crock placed in the bottom of the pot, for good drainage is essential in growing cyclamens. If anything causes the drainage to get clogged the plant will surely be severely checked. The plants from later sown seeds are safer still in flats, and should not be placed in pots until they have grown quite a bunch of roots. But they should not be allowed to crowd and, if too close together, transplanted to other flats and given more room. In potting or transplanting the top of the small bulbs should be placed just below the top of the soil. As soon as the warm days approach and all danger of severe frosts are passed they are better grown in cold frames, where they can be given plenty of air and during the hot days of summer the glass should be given a light shade or the frames provided with lath frames. They will need constant attention and shifting in larger pots as the plants grow, never becoming pot-bound during the growing season.

**Violets.**

The propagation of the violet stock should be done at once, for with Easter passed the demand will fall off and it is time that preparation for the next year should be begun. Those that took cuttings earlier and rooted them should now have nice plants in flats, but most growers propagate by division. The plant should be dug from the benches and beds and all the old soil shaken off, and the young growths or runners cut off, preferably with a few young white roots and inserted in flats of good soil. Care should be taken that neither the old stock plants nor the young cuttings are left in the sun, but should be shaded, in fact, it is far better that the work be done in a shady location and the young shoots not allowed to be out of the soil too long, the tender white roots dry up very quickly and if this happens the plant has to make new roots, which gives it quite a check. The runners should be well watered as soon as the flat is filled and kept shaded for a few days, until root action has started. This is easily seen by the appearance of the plants. Where there is a well rooted stock of young plants they can be planted in the field or in a cold frame, which is also a fine place for the young stock just placed in the flats.

**BATAVIA, N. Y.**—L. C. Stroh & Son are in full crop for Easter, making large shipments of carnations to Buffalo.

**ALLENTOWN, PA.**—The display of Easter stock at the establishment of John F. Horn & Bro. was especially fine. Two of the older greenhouses will be torn down directly after Easter and replaced by three large ones of modern construction.

**SAN JOSE CALIF.**—The Pacific Coast Association of Nurserymen will hold their convention in this city June 21-23. Arrangements have been made to meet in the Assembly Hall of the Chamber of Commerce and the St. James Hotel has been selected as headquarters.

**THE RETAIL TRADE**

Conducted by Robt. Kift, Philadelphia, Pa.

**Mothers' Day.**

There is no fixed date for Mothers' day and to designate it by date is confusing. Mothers' day is celebrated always on the second Sunday in May whether it happens to be the eighth, as last year, or the fourteenth, which is the date this season. Many persons do not appear to have this matter fixed in their minds. On a calendar sent broadcast with all floral holidays especially designated, May 8 is stamped as Mothers' day and several dealers and growers have taken this as official. When Miss Anna Jarvis of Philadelphia found-

Bride's Bouquet

Arranged by Canger & Gornley Chicago.

ed the day or started its observance in honor of her mother, she set apart for that purpose the second Sunday in May, which was her mother's birthday. This is now the recognized and official day, and everyone interested should be able to remember the time as the second Sunday in May.

Push the observance of Mothers' day, as it is a beautiful sentiment and should become an important factor in the business. K.

**Bridal Bouquets.**

Of all the arrangements of flowers put together by florists there is none that attracts more attention or is more closely observed than are the bouquets and bunches designed for the bride to carry, and the ingenuity and ability of the best floral artists in the country have been exerted in producing effective arrangements for the wedding

ceremony. From the days of the closely arranged conventional bouquet of roses with its broad white satin ribbon, which was really not so very long ago, to the present time, with the light artistic sprays of the most beautiful flowers to be obtained, has been a steady advance in artistic work and a great stride in progressive arrangement. The early bridal work was very set and formal, adhering very closely to what are now known as old-fashioned bouquets enclosed in paper bouquet holders, with a large bow of double-faced satin ribbon, with long bows and ends. These were at that time invariably made of white roses, in fact, it was a great innovation when any other flower was selected to compose the bride's bouquet, for it seemed that the rose was the only proper flower that could be used for this occasion, and when the Catherine Mermet rose sported a white it was immediately called The Bride, a name which seemed very appropriate at that time. The rose and the orange blossoms were considered the two flowers for the bride, one to carry in the hand and the other to wear in the hair. But with the growing of lily of the valley under glass, and the ability to have this exquisite white flower at all seasons of the year, and also the production of orchid blossoms commercially, the rose found rivals in the flowers that were considered more select, and for the more elaborate weddings these exotics were used, and lighter and more artistic arrangements were made. It was then but a step to the use of any of the smaller white flowers for this purpose. Still the bridal bouquet today at the more select society functions is made of one of these exquisite products of the floral world. With the employment of these beautiful flowers it was but a step to leave the closely made bouquet, for with them came the requirement of handsome ferns to more properly set off the flowers, and this necessarily made a much lighter arrangement, and then came the changes in form from the round bouquet to the more spray-like formations.

While these changes in the flowers and arrangement were progressing the change in accessories was also taking place, and the fancy bouquet holders were discarded for backings and finishings of beautiful ferns, and the broad satin ribbons gave way to the lighter chiffons and taffetas and with the advent of the shower bouquets the use of the narrower baby ribbon, so that at the present time the bridal bouquet has taken on an entirely different form from what was considered conventional but a few years ago. And the more recent departure has been from the bouquet form entirely toward the wreath or ring. Still the bouquet is very closely associated with the bridal ceremony, and innovations of such a radical nature are not taken up quickly, and the greater number of brides still adhere to the bouquet.

The shower bouquet is today the generally accepted proper thing for the bride to carry, and made either of orchids, lily of the valley or roses, and in some cases of white sweet peas. While colors were rarely used at weddings, white being only appropriate for such occasions, yet the last few years have seen a few brides' bouquets made of the more highly colored orchids. The shower bouquet is made either in

PELICANO, ROSSI & CO.'S NEW STORE, SAN FRANCISCO, CALIF.

round or spray form, the showers falling away from the bouquet in pendants of baby ribbon, each little ribbon has small bunches of the flower of which the bouquet is composed fastened to it by small bows. These are tied in so that there are more of the small bunches close to the bouquet, gradually growing farther apart as the distance from the bouquet increases. Lily of the valley is the best of all the flowers for the shower bouquets, for the small bouquets must not be too heavy, and two or three sprays of lily of the valley with a small frond of adiantum makes the proper sized bunch for the showers. The bouquet should be well backed with nice adiantum, and in the more costly ones Adiantum Farleyense is used. The bouquet which we illustrate is a beautiful example of a shower bouquet of lily of the valley, finished with a bow of silk chiffon, and was arranged by Canger & Gormley of Chicago for a recent wedding.

CONCORD, MASS.—Two lectures on gardening have been given to the children at the greenhouses of Wilfred Wheeler. Children enjoy these lectures and are looking forward to those that are to follow.

HARTFORD, CONN.—A fire in the Coomb's green house establishment at West Hartford, March 25, caused a loss of \$1,000. The boiler-house was destroyed and four greenhouses partly burned.

## CHRYSANTHEMUMS

### Growing for Exhibition.

The cuttings of the exhibition varieties intended for show purposes should be got into the propagating bed without any further delay, this particularly applies to most of the imported varieties which require a long season of growth to mature a full double flower. The early flowering varieties of the commercial section, together with Golden Eagle, Ivory, Pink Ivory, Polly Rose and any other slow-growing short-jointed commercial varieties will also have to be propagated now to get the best results with them. The stock plants should be given a place near the light, in a cool house, where there is plenty of ventilation, so that an ample supply of well hardened cuttings can be had. They should be given enough water to keep up active growth without forcing by an overabundance, but to allow the stock plants to dry out to excess will cause the wood to get hard and wiry, making the cuttings more difficult to root. Clean sharp sand and a bench in a cool house are essential for the propagation. Pay particular attention to the cuttings to prevent their wilting by keeping the sand moist, and by frequent sprayings. If the cuttings can be held firm without any wilting they will root much quicker, shading by cloth or papers will have to be re-

sorted to during bright days, but do not leave it on longer than is necessary to shade from the sun or the cuttings will commence to draw up and become spindly.

To increase the stock of cuttings of a new or scarce variety, select a bench near the light in a rather warm house, making up a light compost and plant out the plants. They will rapidly take on growth, when the tops can be taken for cuttings, in a short while another supply will branch out from the sides and spring up from the bottom. A good hatch can be worked up by planting time, providing the cuttings are taken off as soon as they are large enough. Keep the soil open by scratching the surface every few days, and pay particular attention to keep these and all other chrysanthemum plants free of aphids and red spider. Just at this season of the year the chrysanthemums are very often neglected as regards keeping down the insects. This is a big mistake, and leads to a lot of extra trouble to get rid of them later on.

The earlier propagated stock, now in pots, should be shifted along regularly, as they get in condition, but do not let them become hard and pot-bound before giving them attention. At each potting a little stronger compost can be used, guard against overcrowding the plants and keep the soil free of weeds. The exhibition specimen plants are now in condition to demand close and frequent attention.

Pot them along as soon as the roots work through the soil in good shape, but do not carry the size of the pot to the extreme; better to give an extra potting than put a plant in a pot that is several sizes too large for it. If the object is to grow the plant to a clear stem out of the soil, it will be necessary to remove the suckers from the base as they appear, and this they will do very quickly when the plant is in active growth. Topping back the growths and shaping the specimen is also another important item

continually raised to keep the standard moving "upward and onward," but, even if they did not run out, the variety that we thought was a king five years ago, would be easily outdistanced in the shows of 1911 by this year's seedlings. The chrysanthemum today is systematically hybridized, and a careful and scientific record is kept of the peculiarities and good points of each variety. Where a variety has perhaps a splendid color and is deficient in foliage, the hybridizer will use that type just to get the color fit on a sturdy

Lemon and Onunda being among the most prominent flowers in the exhibitions just past. It is very encouraging to see one's varieties maintain their winning way year after year, but as before stated, the result is due to scientific selection of the seedlings, and we may reasonably expect still further advances will be made in the future.

Looking first at the variety Wm. Turner, this showed up splendidly with us, though stock was too limited to be exhibited at many of the shows. Mr. Wells stated, when writing regarding its winning the gold medal at Edinburgh, that it would easily beat Mrs. Syme. Those of us who remember the way Mrs. Syme was exhibited at Morristown in November, might perhaps be pardoned for a little skepticism, did we not know that in almost every case, varieties sent out by Mr. Pockett as improvements on this or that, have invariably fulfilled the prediction of their raiser. Wm. Turner is an excellent grower, just as strong as Mrs. Syme, and it will be interesting to note how long it takes the former variety to climb to the top of the heap.

The variety that I like best of all the novelties is Mrs. G. C. Kelly. This is certainly a splendid grower and seems to combine every good feature the chrysanthemum should have, and so far as I could see from my limited stock, no faults whatever. I had seven plants and each one produced a perfect flower. The color is old rose with a reverse light enough to give a general effect of silvery pink. I have predicted that this variety will be a leader in the shows next fall, time will prove whether I am right or not.

E. M. Byrnes, which many of you saw growing at my place, is not going to set the world on fire for size. It is only medium, but the color is wonderfully brilliant. We have, today, many splendid scarlets raised from the same stock, Pockett's Crimson. Pockett's Surprise and Leslie Morrison being perhaps the most largely grown. Byrnes, on account of its wonderful color, is entitled to be grown alongside of these kinds, and I think it possesses wonderful possibilities for the hybridizer.

Harry E. Converse may be described as an improved Howard Gould, giving

MacRORIE-McLAREN CO.'S DISPLAY AT THE SAN FRANCISCO SHOW, MARCH 30, 1911.

that must be followed up closely, and when doing this let the topping back be done evenly so that not any of the shoots will get away from the others and cause an uneven looking specimen. Follow up the growth of the standards closely so as to encourage them to get to the point where they can form the heads. Protect the plants with stakes as soon as necessary, and pay particular attention to the watering, allowing them to dry out well between each watering and then water thoroughly.

C. W. JOHNSON.

#### The New Chrysanthemums for 1911.

Paper read by Charles H. Totty, of Madison, N. J., before the Morris County Gardeners' and Florists' Society at Morristown, N. J., February 8, 1911.

Just as regularly as the year rolls around, so does the chrysanthemum enthusiast, at flowering time, propound the question, "What have you got new in 'mums'?" There seems to be a perpetual craving among the chrysanthemum growers, more than any other flower growers, for something different. Since I have been giving you what we may here term as the "Yearly Digest," of new varieties, which extends now for a period of nine or ten years, we have seen many wonderful changes in the chrysanthemum. The marvelous flowers of Mrs. David Syme, exhibited at our own show last fall, shows perhaps a greater advance than any other variety, although in any color the "Peer" of five years ago is of very average quality today.

Chrysanthemums, it is true, run out more quickly than roses or carnations and many new varieties must be con-

stem, or he will proceed to work on a variety that is perfect in form, but small, to get that same form in a flower two or three times as large. The old days of saving seed indiscriminately from pollination by the wind or bees are past, and while one cannot yet definitely forecast exactly what will result from different crossings, a percentage of the seedlings will come near the desired result.

I will briefly describe a few of the novelties for 1911. What the varieties that I recommended last year so highly have done, is now a matter of history, Mrs. D. Syme, Howard Gould,

E. W. McLELLAN CO.'S DISPLAY AT THE SAN FRANCISCO SHOW, MARCH 30, 1911.

E. W. McLELLAN CO.'S DISPLAY AT THE SAN FRANCISCO SHOW, MARCH 30, 1911.

somewhat the same color with a larger flower and heavier growth. My only objection to Converse is, that it is so slow in reproducing, that I am afraid most of the exhibitors this year will have to go without it, as stock is altogether too limited for general distribution.

Lady Carmichael is a white which was heavily recommended by its behavior in Australia. Past performances have taught us that varieties that do well in Australia, and stand the sun and weather, will also do well here, as our climatic conditions are much the same. When we get temperatures running up into the seventies, and brilliant sunshine, unless a variety has lots of petals in it, it will become holloweyed and is then only half of its proper size. Carmichael should next year make an excellent showing, as it is a splendid grower and carries itself like a major. I think when this variety gets into general cultivation it will be considerably grown by the commercial men, to whom stiffness of stem is one of the chief essentials of profitable cul-  
cult the final assortment of a great many thousand seedlings, and it is in a large measure due to this unsparring pruning down, that the Wells-Pockett varieties occupy the enviable position that they do at the present time.

Of the American raised seedlings, F. E. Nash is the only one I have seen

personally, and I am, consequently, not in a position to say much regarding others. Nash is a Duckham seedling, giving one much the same color and splendid habit of growth, but it has reflexed petals, whereas, the Duckham petals are incurved. There are other American seedlings, Tarrytown, Morristown, Lenox, Glen Cove, etc., but I have not seen any of them and therefore am not in a position to give you any information about them.

The novelties in other types other than the tremendous exhibition flowers also show marked improvement. The newest singles, for instance, are very different from the types we were working with five years ago. Some of the best of this year's set are Miss Hilda Wells, a beautiful red with a yellow zone at the base of the petals; Crimson Mary Richardson, which is a sport of the most popular single ever sent out, Mary Richardson, and is worth growing by everyone; and two very handsome yellows are Margaret Totty and Emma L. Davis. And while speaking of singles, I may here mention, that, during the past two or three years, I have been experimenting and working up a group of what I may term, early flowering outside singles, which I have gotten down to such a fine point that I can guarantee them to be in full bloom the last week in August and the first week in September.

These, no doubt, will fill a long felt want, and will give a much different appearance to the estates and gardens, where the superintendent is an enterprising man, and wishes flowers along the drive or in clumps on the place. It will not only add to the beauty of the same, but they will give an overabundance of flowers for use; whereas, if it weren't for these, as has been, the place appears barren; and if he wants to find something to cut he has it. These single chrysanthemums are certainly very effective no matter how they are used.

Pompons, too, are not grown as much as I think they should be. Any gardener who has to produce great quantities of flowers from a limited space, will find it hard to grow anything that will give as great return for the time and space involved, as these chrysanthemums. They can be grown outdoors all summer and lifted in the fall and potted, or stuck into a deep frame, and they will give an abundance of flowers until quite late in November. Some newer varieties that are not as yet generally distributed are: Barney, Golden Bronze, Myers' Perfection, a very handsome white; Sylvia, Urith, Windlass and Yellow Gem.

The type known as early flowering varieties, many of you, with an old country training, will recall as flower-

ing so profusely outdoors during the months of August and September, will also give you varieties well worthy of your time and attention. We have been importing these sorts for the last three years, trying to get a selection that would come early enough to give you good satisfaction before the frosts. As you are probably aware, the intensely hot sun in July and August causes most of the early buds of these varieties to dry up. This is, of course, explained by the fact that the chrysanthemum is a cool growing plant. I would suggest that wherever possible, to plant them on a border facing north, where the rays of the very hot sun do not rest on them for many hours during the day, also where a man is not handling very many, a continuous use of the sprayer will help much to develop and expand the buds, thereby diminishing the loss of the same. We now have some 15 or 18 varieties that will begin to flower the third week in August. They need no greenhouse, and one need not worry about bud selection, simply give good soil and persistent cultivation. Plants set out in the spring and left to develop naturally, produce handsome bushes literally covered with flowers. I would state that, as a commercial proposition, these varieties produce more money per plant than any of the best large flowered kinds. A few of the most distinct and best growers are as follows: Ethel Blades, Horace Martin, Carrie, Marie Masse, Crimson Masse, Roi de Blancs, Tottie and Lillia. These types, like the pompons, are hardy enough in our section, with a little protection of dry leaves or litter. The better way to handle them, though, is to lift a few roots and carry them through the winter, either in a greenhouse or cold frame, then propagate young plants every spring. One reason many people do not have the success they should have with pompons, is because they imagine that once a plant is set out it is good indefinitely. This is only half true. The plant will live, but experience teaches any grower, that the best way to handle these varieties is plant out young stock every spring in new soil, and they will make better plants, and give far more flowers, than by being allowed to remain year after year in the same position.

I may also state that I am trying, to bring before the public once more, the incurved varieties. They seemed to have dropped into oblivion the past six or eight years. Previous to that, I have seen special classes arranged at the shows and every gardener took as much interest in his incurved varieties as he did over his large flowering ones, and with this idea in mind, I have listed this year several good and tried varieties including Chas. Blick, Chas. Pacque, Frank Triston, G. W. Matthews and Mathew Russel, also several others. There are many other such varieties of anemones, large anemone pompons and new Japanese anemone pompons, that I am at present experimenting with to find out their true worth.

In conclusion, gentlemen, there is nothing but a cheerful prospect in view for the chrysanthemum. The number of plants sold each year by the different houses catering to this kind of thing is something wonderful, and so long as we can keep introducing new

and meritorious varieties, so long will interest be maintained and everyone benefited.

#### Sweet Pea Buds Dropping Off.

ED. AMERICAN FLORIST:

We planted Merry Christmas sweet peas in boxes four feet long, one foot wide and one foot deep filled with good soil about one-third rotted manure. They have grown well but the buds turn yellow and drop off. Some of the plants have produced good blooms. Can you tell us the cause of the trouble?

H. B. V.

The reason that the buds drop off the sweet pea vines is that the temperature is too low. WILLIAM SIM.

#### Sowbug Remedies.

ED. AMERICAN FLORIST:

Will you inform me of a good remedy to rid the greenhouses of sowbugs?

B. M. N.

In the treatment of sowbugs, poisoned baits are the standard remedies. The fondness of sowbugs for potatoes long ago led to these being used poisoned either with Paris green or London purple; the potatoes are sliced and a thin covering of the powder applied. In addition to Paris green and London purple, arsenate of lead may be used. A still cheaper substitute is white arsenic, which is quite inexpensive, but

is, however, dangerous to apply to delicate plants. One or two tablespoonfuls of white arsenic to a bucketful of bran, sweetened with a quart of syrup or molasses, and the mixture placed in small lots on the beds, will prove very effective in controlling these insects. All old boards, broken crocks, and other rubbish should be cleaned out, for under these they congregate and breed. Such precautions will tend to greatly prevent any great damage or annoyance.

F. H. C.

#### Lily of the Valley in Cold Frames.

ED. AMERICAN FLORIST:

Can lily of the valley be planted permanently and successfully grown in cold frames? How should they be treated?

A. E. P.

Lily of the valley can be very successfully grown when planted permanently in cold frames and can be had in bloom from 10 days to two weeks earlier than those planted in the open. The pups should be planted in the fall and allowed to freeze and given a good covering of manure. When the frost begins to come out of the ground the sashes should be placed on the frames and then carefully ventilated and kept well watered. To keep up the quality of bloom, a three to four-inch coating of manure, preferably cow manure, should be spread on the bed every fall.

## PEOPLE WE KNOW.

### H. Frank Darrow.

By his prominence as an importer of things horticultural, and by his large standing connection with important leading European firms, H. Frank Darrow is well known to the trade, and it is with pleasure that we here-present his portrait, taken from a very recent photograph, with a short sketch of his business career.

Born in New London, Conn., in the year 1866, and receiving there a first-class education, he, at the age of 21, in the year 1887 to be exact, entered the employ of Theodore Pabst & Co., 26 Barclay street, who used the entire building, excepting the ground floor, and who were the American representatives for Vilmorin-Andrieux & Co., Paris, France, and for Louis Leroy's Nurseries Co., Angers, France. Theo. Pabst & Co., going out of business in 1893, the late Aug. Rhotert succeeded to the horticultural representation, adding other agencies and so getting together a complete and entire line for nurserymen and florists. Mr. Darrow was retained on the staff by Mr. Rhotert, and subsequently was given an interest in the business. On the death of Mr. Rhotert, which occurred in 1904, after a long illness, Mr. Darrow became sole owner of the business, and since July of that year has conducted it under his own name. Under Mr. Darrow's management, the yearly business increase is very gratifying. It is one of the largest of its kind in the country, and the European firms represented are among the best and most reliable in the world. Besides the two French firms already mentioned, he is sole agent for the United States and Canada for John Palmer & Sons, Ltd., Annan, Scotland; H. M. Hardyzer, Boskoop, Holland; The Haerens Co., of Ghent, Belgium, and E. Neubert, Wandersbek, Germany. Besides being the sole agent for the

H. Frank Darrow, New York.

above firms he is an importer of French, Japanese, Holland bulbs, and raffia, and also exports a great quantity of material and is a regular custom house broker. As a business man he is a success, as an acquaintance, he is genial and pleasant always. He is happily married and with his wife and family has resided in Flatbush, Brooklyn, for the past twelve years.

### Stevia Serrata.

If the cuttings of stevia have not yet been rooted there is still time to do this and have good stock for the fall blooming. They root very readily and grow rapidly. After they are rooted they should be potted in 2½-inch pots and grown on until time to shift or plant out. The dwarf varieties can be planted in the open ground as soon as the weather is seasonable, lifting in the fall and carrying them into the houses. The standards, however, are

much easier and better handled grown in pots. Before they become pot-bound in the small pots they should be shifted into 3-inch pots, and in early summer again shifted into 6-inch pots. They should not be neglected and allowed to remain in the small pots until they have become hard and wiry. In the early summer the pots should be plunged in a cold frame, where they can be watered regularly. Keep them well pinched back until August, so as to make the plants bushy and after they have grown to any height stake and tie them up to protect them from heavy rain and wind. The plants are very brittle, especially where the branches leave the main stems, and are very easily broken.

### Profiting by the Sermon.

A new minister had preached eloquently on the wisdom of God and His goodness in providing for us according to our needs. "It is the same with the flowers," he said. "Sunshine for your geraniums and heliotrope, a shady corner for your fuchsia."

The little woman who had listened intently, came forward to thank him. "I profited so much by your sermon," she exclaimed. The minister beamed. "I never knew before," she went on, "just what was the matter with my fuchsias."—Everybody's Magazine.

### Intended to Pay.

A bashful young lover walked into the house of his sweetheart bearing a large box with the name of a prominent florist written on the cover.

"How sweet and fresh they are!" cried the young lady, opening the box. "I believe there's a little dew on them yet."

"Why—er—yes," admitted the young man in great confusion, "but it's just a little, and I'll pay it tomorrow."—Success.

### Right in Line.

"Won't you join the national campaign to beautify our cities?"

"I'm deep in it already. My wife has painted a spray of flowers on our ash barrel."—Chicago Journal.

# THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1911

Subscription, United States and Mexico \$1.00  
 year; Canada \$2.00; Europe and Countries  
 in Postal Union, \$2.50. Subscriptions  
 accepted only from those in the trade.

When sending us change of address always send  
 the old address at the same time.

Advertising rates on application.  
 From the first issue the AMERICAN FLORIST has  
 accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier  
 if possible) as we go to press Wednesday.

We do not assume any responsibility for the  
 opinions of our correspondents.

**MOTHERS' DAY** is the second Sunday  
 in May.

RENEW subscriptions promptly so  
 that no copies of the papers may be  
 missed.

ONE thousand dollars is offered for a  
 new rose by the directors of the Pana-  
 ma-California Exposition, according to  
 the daily press, the requisite being that  
 it is hardy and can be grown out  
 doors, and is entered with the Floral  
 Association by a resident of the United  
 States.

WASHINGTON, D. C.—The Avenue  
 Floral Co., O. W. Dalcorn, proprietor,  
 advises us that Mrs. W. H. Taft has  
 been pleased to accept a box of daffodils  
 from the Dalcorn Bulb Farm, compli-  
 menting the company on "growing such  
 splendid specimens." Wonder what Bill  
 will say when he hears about it?

## Chrysanthemum Society of America.

The following additional special pre-  
 mium is offered at the exhibition to be  
 held at St. Louis next November, to be  
 known as the Hitchings' Prize.

Best 30 blooms chrysanthemums, six  
 varieties five blooms each, not less  
 than 18 inch stems, Silver Cup, offered  
 by Hitchings & Co., New York.

C. W. JOHNSON, Sec'y.

## Sweet Peas for Winter Blooming.

William Sim, of Cliftondale, Mass.,  
 the well known and successful grower  
 of sweet peas, whose exhibit at the  
 Second National Flower Show at Bos-  
 ton attracted so much attention and  
 favorable comment, and who is an au-  
 thority upon the culture of sweet peas  
 under glass, states that the best varie-  
 ties of early flowering winter sweet  
 peas are Watchung, early white;  
 Christmas Pink, pink and white;  
 Greenbrook, white marked lavender,  
 one of the best; Earliest of All, pink  
 and white; Florence Denzer, white;  
 Mrs. C. H. Totty, light lavender; Wal-  
 lace, dark lavender; Mrs. Sim, sal-  
 mon; Gov. Fort, pink; Mrs. Smalley,  
 satin pink, a re-selected Earliest of  
 All; Mrs. F. J. Dolansky, light pink;  
 Helen Kellar, striped pink and white,  
 and Mrs. Geo. W. Lewis, white wavy.

## Florists' Hail Association.

A widespread hail storm devastated  
 portions of St. Louis and it's south-  
 western suburbs. Greenhouse at Kirk-  
 wood suffered largest damage, the fol-  
 lowing firms being hit to a greater or  
 less extent: Edward Sexauer, W.  
 Bruecker, Wm. Mackle, Chas. Krons-  
 berger, Rht. W. G. Scott, August Hart-  
 man, F. W. Ude, W. J. Pilcher, Wood-  
 bine Floral Co., G. Thuer, Geo. H. Goel-  
 bel, Wm. Winter, Albert Senger, Chas.  
 N. Main, Mrs. Theo. Richter, Fred C.  
 Weber, C. A. Hicks, Jos. Deutschmann,  
 Phil J. Goebel, J. F. Armann, R.  
 Wolfsberger, Bentzen Floral Co., Hugo  
 C. Gross, Arnold Scheddiger, Frand &  
 Aug Venenman, Wald, M. Stretzing,  
 J. E. Muldoon, Ellison Floral Co.,  
 Grimm & Gorley, J. G. Rahner, C. C.  
 Sanders, Mrs. L. S. Werth, N. Nie-  
 mayer, Fred Meinhardt, C. Young &  
 Sons Co., J. R. Steinkne.

JOHN G. ESLER, Sec'y.

## American Rose Society.

### EXHIBITION NOTES.

The great exhibition of flowers at  
 Boston was a wonderful display of  
 ornamental horticulture. The amount  
 of work there represented, exhibited  
 skill and careful selection of the high-  
 est character, and no one could have  
 visited the show and not have received  
 impressions that would be lasting in  
 their suggestiveness, of what plants  
 and flowers can do amid home sur-  
 roundings, either in city or country,  
 and without any disregard to other  
 sections or portions the most striking  
 exhibit there offered was the rose. The  
 cut flowers staged for three days by  
 The American Rose Society were the  
 attraction of all the visitors. The  
 brightness of the colors, the variety of  
 the shades, the difference in the sizes  
 of the flowers, all called for admira-  
 tion. Hundreds of children, who visit-  
 ed the show seemed to appreciate the  
 color greatly. One small girl shouted  
 out, as she came from another part,  
 "See, there are the roses! I like the

roses." The exhibits in the second sec-  
 tion on Friday, Saturday, and Sunday,  
 the last three days, were also the center  
 of attraction. Each of the three were  
 so different in their make-up that they  
 added to the other by comparison.  
 President Elliott's cabin-shaped exhibit  
 showed the roses that took the eye for  
 variety. A. N. Pierson's great mass  
 was so extraordinary that the specta-  
 tors looked with amazement at the ex-  
 tent of the mass. Adolph Farenwald's  
 display of roses and ferns arranged in  
 a circle on the floor, showed to great  
 advantage.

The total amount of the prizes  
 awarded reached the sum of \$1,845 be-  
 sides the specials. F. R. Pierson Co.  
 received a certificate of merit. Myers  
 & Samtamm received a certificate for  
 the rose, Hilda. S. J. Reuter & Son,  
 and Robert Scott & Son were awarded  
 silver medals. A. N. Pierson, Inc., was  
 awarded three certificates and carried  
 off the first prize of \$250. The honors  
 for pot roses were divided between M.  
 A. Walsh and Thomas Roland. The  
 Society of American Florist's silver  
 medal was awarded to M. A. Walsh.  
 The judges made the following mem-  
 orandum: "The rose, Madison, exhib-  
 ited by the Brant, Hentz Flower Co. is,  
 in the opinion of the judges, an ex-  
 cellent rose, apparently a variation from  
 the Bride, shown in excellent shape." So  
 close was the quality of all of the  
 exhibits that the judges made the fol-  
 lowing special report at the conclu-  
 sion of their awards: "The judges wish  
 to call attention to the special excel-  
 lence of all of the exhibits staged. The  
 competition was so keen that there was  
 very little difference in quality and  
 size between those awarded first and  
 second prizes, and the exhibits of the  
 roses at large, were of a quality ex-  
 ceedingly even and close. March 25th,  
 1911." William F. Kasting, Frederick  
 Burki, Otto G. Koenig, Walter F. Sher-  
 idan, judges. The judges for the sec-  
 ond division were Emil Buettner, Park  
 Ridge, Ill., Joseph Hill, Richmond, Ind.,  
 and J. R. Fotheringham, Tarrytown,  
 N. Y.

The display of pot and climbing roses  
 by M. H. Walsh of Woods Hole, Mass.,  
 was most certainly an enormous ex-  
 hibit. Adjoining this was a rose gar-  
 den laid out in a wonderful manner by  
 Thomas Roland, of Nahant, Mass.  
 These two exhibits which covered so  
 much space along the aisle, were there  
 they were seen and admired were talk-  
 ed about without limit, and the num-  
 ber of questions that were asked re-  
 garding these plants. Their time of  
 blooming. Would they grow under a  
 porch? Would they grow in a back  
 yard? Would they grow in a northern  
 exposure? Is the southern sun too hot  
 for them? These questions and an-  
 swers would all make a small book.  
 The retailers who exhibited under a  
 special class arranged five fine and in-  
 teresting exhibits.

At the annual meeting, which was  
 well attended, there being a delegation  
 of English gentlemen present, Adolph  
 Farenwald was elevated to the presi-  
 dency and Hon. Philip Breitmeyer of  
 Detroit was chosen vice-president.  
 Eber Holmes, of Montrose, Mass., was  
 added to the executive committee and  
 Wallace B. Pierson was re-elected for  
 a term of three years. Treasurer H. O.  
 May was re-elected, as was also the  
 secretary. The question arose concern-  
 ing holding the next rose show upon  
 the same dates as the carnation show  
 in the City of Detroit. Detroit is cer-  
 tainly a capital place for the meeting to  
 be held. Twenty-eight new and old  
 members paid their dues during the ex-  
 hibition. The medals and certificates  
 and special prizes will be delivered  
 without undue delay.

BENJAMIN HAMMOND, Sec'y.

## Meetings Next Week.

Albany, N. Y., May 4, 8 p. m.—Albany Florists' Club, 71 State street.

## Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

**Situation Wanted**—By all-around florist; life experience; married; exceptional references.  
 J. HODGE 42 West St., Fitchburg, Mass.

**Situation Wanted**—Practical gardener on private place; experienced in flowers, vegetables, fruit, greenhouse and fowls. First-class references. Ready April 1; single; age 35. Address  
 Key 392, care American Florist.

**Situation Wanted**—Practical gardener, with experience in floriculture, perennials, viticulture, fruit and vegetable growing, married, wishes position.  
 Address  
 PAUL CERNY Crown Point, Indiana.

**Situation Wanted**—Position as grower of h. h. grade roses, carnations and general cut flowers and plants, by a married man of family; best of references from former employers. Address  
 FLORIST, 1650 Gilbert St., Grand Rapids, Mich.

**Situation Wanted**—As working foreman by a thoroughly capable grower of roses, carnations, mums, and all kinds of greenhouse and tropical plants and bulbs and the forcing of the same; references. Address  
 Key 433, care American Florist.

**Situation Wanted**—First-class gardener and florist; single man; on a private place 17 years' experience in flowers, fruit, vegetables and greenhouse; swede; speaks German; 8 months in this country; references in Sweden, Germany and United States. Address  
 Key 439, care American Florist.

**Help Wanted**—Competent grower of carnations and bulb stock; call in the afternoon.  
 SINGLER BROS.,  
 107th St. and Vincennes Road, Morgan Park, Ill.

**Help Wanted**—A good all-around florist with long years' experience in growing roses, carnations mums, plants for holiday trade, and a general line of bedding stock; have 3500 square feet under glass; good worker; Colorado man preferred.  
 G. FLEISHER, Pueblo, Colo.

**Help Wanted**—Competent, sober man to grow bulbs, pot plants and bedding stock; must know how to do a good job of bedding out; \$5.00 a week to start; prefer a married man who would appreciate a permanent position and fair, square dealing; the business is long established and thriving and amply able to pay more wages to the man who shows by results that he is worth more; give full particulars in first letter.  
 GREEN'S GREENHOUSES, Fremont, Nebr.

**For Sale**—Florist refrigerator, nearly new; fine condition; 52 inches deep.  
 A. G. PRINCE, Iowa City, Iowa.

**For Sale**—A good paving greenhouse in leading southern city; large stock. For particulars address  
 Key 437, care American Florist.

**For Sale**—6 greenhouses, 10,500 sq. ft. glass; steam heat county seat of 6000; no competition; fine location; good cause for selling; 10-room residence; write me if you want a location cheap. Terms to suit.  
 W. BRISCOE, Tipton, Ind.

**For Sale**—Up-to-date retail flower store, established nine years, doing profitable business, good transit trade; situated on main business street. Owner has two businesses and can manage only one. Golden opportunity for the right party. Immediate possession can be given. E. P. KNORR 223 Bergenline Ave., Union Hill N. J.

**For Sale or Rent**—An old established retail florist store in Chicago, located on Wrightwood near Sheffield and Lincoln Aves. Greenhouse in connection. For further particulars call on or write  
 J. T. HELBOK, 941 Wrightwood Ave., Chicago, Ill.

**For Sale Cheap**—Failing health; 9½ acres with 2 creeks houses 20x100; 75 sash, house and barn; drilled well, tank and pumping engine. One block to interurban car line; to center of city one mile; 20,000 population.  
 N. NEV, Second Avenue, Appleton, Wis.

**Wanted to Rent**—3 or 4 greenhouses by Sept. 1 near Chicago for 5 years. State all particulars in first letter. Address Key 438, American Florist.

## Greenhouses For Sale

# VAUGHAN & SPERRY

Long Distance Phone  
Central 2751

161 N. Wabash Ave., CHICAGO

Wm. Graff, the well known florist of Columbus, O., was a welcome visitor on April 25. He is just recovering from the effects of an operation for appendicitis, which was recently performed. Mr. Graff says this year's Easter trade was the biggest he has ever enjoyed, the demand for plants being unusually large. He will leave in a few days for West Baden, Ind., to receive treatment at that famous resort.

On the anniversary of the date usually accepted as the birthday of Shakespeare the Woman's Club decorated the statue of the great poet in Lincoln Park with flowers. There were wreaths from many prominent actors and actresses which with the tributes from the members of the Woman's Club nearly covered the statue. Many of the flowers were furnished by the E. Wienhoeber Floral Co.

Vaughan & Sperry filled a large number of shipping orders on April 21, which helped considerably in cleaning up the large quantity of stock they had on hand. The cup which this firm has donated to the Florist's Club Bowling League was seen at their store on Monday. It is a beauty and a treasure which anyone would prize highly.

John Kruchten says that if he had received the gardenias for the Easter trade that are now being sent him, he would have been able to have shown his growers some very good returns. N. Wuestenberg is now in John's employ and Mr. Kruchten expects some day to make him his assistant manager.

Otto Wittbold and his force of assistants are very busy at the Geo. Wittbold Co's establishment at Edgebrook planting two carloads of nursery stock, which were received on April 20. Every available team in the neighborhood has been hired to assist them during the rush.

The sports and pastime committee of the Florists' Club, Allie J. Zech, Wm. Graff and Wm. Wolff, looked over several picnic grounds last Sunday, and finally decided in favor of Ehrhardt's grove at Park Ridge. The picnic will be held Sunday, July 23.

At Poehlmann Bros. Co's. store, good American Beauty and Killarney roses have been leaders all week. John Poehlmann is again seen at the store, after being confined for nearly a week with a sore throat.

The Raedlein Basket Co. is having a cement floor 50x100 feet laid in the basement of their store at 713 Milwaukee avenue. In the basement will be located the packing and storeroom.

The Chicago Carnation Co. is now very comfortably located in their new store, room 201 in the Atlas building, where they are much better situated to handle their increasing business.

Chas. L. Washburn says that Bassett & Washburn have no cause to complain over the present trade conditions, business being as good as could be expected under the circumstances.

Geo. Woodward, who was operated upon recently for bladder trouble at the Passavant hospital is progressing favorably and expects to be out in two or three weeks.

Victor Bros. have reason to feel proud of the Mrs. Jardine roses that they are cutting, for some were seen at the store with stems nearly four feet in length.

Weiland & Risch are cutting a large quantity of Killarney roses with fine color, foliage and stem. H. W. Rogers returned on April 20 from Spring Lake, Mich.

John Byers, better known as "Jack," has accepted a position as salesman with the Chicago Carnation Co., entering upon his duties April 24.

## REMOVAL NOTICE

We wish to announce that on May 1, we will remove from the Flower Growers' Market to our new Store **82-86 East Randolph Street** and extend a cordial invitation to the trade to call and see us at our new quarters

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

**New No. 30 E. Randolph St., CHICAGO.**

E. E. Pieser, the "Peony King," informs us that Kennicott Bros. Co. will open a branch store on the second floor of the building in which Percy Jones is now located, the balance of the store being recently vacated. The business of this firm will be transacted as it has in the past at the old location, 163-165 North Wabash avenue.

Wm. F. Schofield, the North State street florist, had an unusually good Easter trade in both cut flowers and plants. His window is always an attraction to the trade in his section, and during and since Easter has been very beautiful.

H. Van Gelder, of Percy Jones, bought a number of tables and the ice box formerly used by the Flower Growers Co.

Wm. Graff is the latest addition to Kennicott Bros. Co's. force, starting to work on Monday, April 24.

Wm. Wolff, one of A. Lange's popular young salesmen, has been on the sick list the past few weeks.

Vaughan's Seed Store will decorate and exhibit at the Real Estate show.

Visitors: H. A. Fisher, Battle Creek; Carl Hirsch, Hillsdale, Mich; J. R. Falkenstein, Naperville, Ill.; A. Miller, representing Skidelsky & Irwin Co., Philadelphia, Pa.

HARRISBURG, PA.—J. E. Miller has taken possession of the new store, 19 North Third street.

## ORCHIDS

**:A Specialty:**

A fine stock of **Cattleyas, Gardenias, Dendrobiums, Assorted Orchids, Valley, Violets, Beauties**, and all fancy flowers always on hand. Decorative stock and supplies of all kinds.

Send for Price List.

**CHAS. W. McKELLAR**

**162 N. Wabash Avenue,  
CHICAGO.**

BRIDGEPORT, CONN.—The automobile of N. S. Goulden, the well-known florist, was burned April 2. Mr. Goulden

was trying out the car after the spring overhauling, and it back-fired and was completely consumed.

## Removal

We wish to announce to the trade that on May 1, we will remove from our present quarters in the Flower Growers' Market to our new store, Room 222 in the Atlas Building. A cordial invitation is extended to the trade to call and see us at our new and much larger quarters.

MISS H. V. TONNER,

D. E. FRERES,

126 N. Wabash Ave., 30 E. Randolph St., Chicago

Los Angeles, Calif.

### A RECORD BREAKING EASTER.

Nothing like the amount of business enjoyed this Easter has ever been known in the annals of the trade here. Flowers of all kinds were abundant, yet realized good prices, and, although plants were not particularly plentiful, those displayed sold well. Easter lilies sold remarkably well and those of fine quality were away short of the demand, though there was more than enough of the usual unfinished and poor stock. There were a few good spiraea and these cleaned up well. All the principal retailers reported a magnificent business. Lily of the valley and bulb stock generally were plentiful, while of outdoor flowers there was an over supply. Medium priced stock of good average quality is needed in this market, but there is no foundation for the assertions made by interested commission men that there is room for large ranges of up-to-date commercial glass as yet. The demand will come, doubtless, but there is no need of going into hysterics about it for the market is supplied fairly well already with mediocre and average stock. What is needed is a little more variety and better quality. The best roses of popular varieties sold up clean and there was a decided scarcity of first-class cut lilies.

### NOTES.

A visit to the Palm Nurseries of Edwin Rust, at South Pasadena is always interesting, and just now there is a fine lot of stock in the best of condition. Among the palms grown under lath are some magnificent *Cocos flexuosus*, specimens 10 feet and upwards in height, now being lifted for sale. They are cut around and boxed in the house and left there a few days to become re-established before shipping, thus insuring safe transplanting. Many fine seafortheas, kentias and other popular palms are in equally fine condition and all meet with a ready sale. Among the stock grown for street trade we noted fine blocks of *sterculia*, the bottle tree of Australia, a number of the choicer eucalypti and acacias, while the collection of conifers is large and varied. Smaller decorative stock is grown in large quantities, one of the finest things being *Yucca pendula*, of which Mr. Rust carries a foot of stock. Several greenhouses are filled with a great variety of stock grown for catalogue and furnishing trade and its condition is much better than usually seen in this section. Outdoor roses come in for a good deal of attention and all the most popular kinds are represented. The pink Cherokee is fine here, the plant being identical with the type in every way except color. It is becoming very popular hereabouts. *Bignonia Cherere*, a native of Guiana does well here and is a magnificent color. *B. venusta* is better known and is also very fine here. Both need far more attention than the common kind. Jasmines and other

vines get a good deal of attention and the whole stock is in fine condition, reflecting great credit upon J. W. Ross, the capable and painstaking manager here and all others concerned.

In E. D. Sturtevant's interesting garden at Hollywood the showy and beautiful *Rosa gigantea* is flowering freely. This species is a native of Burmah and consequently is not hardy in the north, while under glass it needs a great deal too much room and does not flower at all freely. But in this favored section it is magnificent, with shoots 30 feet long and wreathed with the great creamy white single flowers seven inches and upwards across. The buds and partly-opened flowers are singularly beautiful and altogether this lovely specimen is a thing of beauty, long to be remembered. Those who know the Cherokee rose at its best and it is beautiful indeed, can form but a slight conception of the glorious display made by the "giant rose" which is worth a long journey to see. Another remarkable plant here is the gorgeous *Solandra guttata* or *Copa d'or* of the Mexicans. The "cups of gold" here grows 40 feet high and just now has many of the great open yellow flowers, it being apparently quite at home in the light, loose soil. *Bletia hyacinthina*, several beautiful calcechorti, *Acacia pubescens* and *Drummondii* and many other interesting and beautiful things were also noted here.

## U S Budlong's E Blue Ribbon Valley.

Wm. Haerle had a magnificent lot of *Lilium giganteum* in for Easter all timed to the minute and by far the finest stock ever seen in this section. Every plant was sold and a batch of 2,500 pots, besides a large number of cuts, was not nearly sufficient to meet the demand. The roses were good, Richmond and My Maryland being especially fine and of great substance and color. In orchids *Cattleya Schroderae* was the principal attraction and Mr. Haerle has been fortunate in flowering a true albino of this species. He is especially lucky as quite recently he flowered a good white *Triana*, as already mentioned here.

The usual monthly meeting of the Horticultural Society was held in C. Winsel's store on April 4. The subject of holding a fall flower show was up for discussion again and committees were appointed to make the necessary preliminary arrangements. It was decided to advertise in local papers for complaints as to the alleged

grievances against the horticultural inspectors with a view of getting after the legislature in regard to the malpractices and ignorance displayed. Arrears of business were brought up and informal discussions held on several topics.

F. R. Hills, late of Maywood, Ill., was in for Easter with a very nice lot of lilies and cyclamen. His adiantum is also in excellent order now. Chicago friends of Mr. Hills will be pleased to learn he has an elegant little place here almost on the crest of the hill close to Elysian park and in one of the prettiest spots in southern California. All his stock is in perfect order and everything looks exceedingly promising in his new venture. Both he and Mrs. Hills have worked hard to get things in shape and well deserve success.

These Florists, Fifth and Hill streets, showed some elegant lily of the valley in pots, also magnificent pans of Easter lilies, with six to ten stems. The latter were very well decorated, shown in mat pot covers and sold well at good prices. A large stock of lilies in 6-inch pots were also disposed of and Frank Lichtenberg and Herbert Wolfskill both expressed themselves as highly pleased with the amount of business done.

The Edendale greenhouses of Wright's Flower Shop are not looking at their best now as they are shortly to be removed to the new

place at Gardena, but we noticed a fine lot of young rose stock which is bound for the same destination.

"The biggest ever," is the report of Morris Goldenson for this Easter. The increased room in the store gave much greater facilities for waiting on customers and a grand trade was done.

O. C. Saakes had very attractive Easter windows, scarlet tulips and white lilies being charmingly shown. An immense number of pot lilies were disposed of.

Visitor:—A. Ringier, of the W. W. Barnard Seed Co., Chicago. H. R. R.

### Chicago Bowling.

On April 19, the Orchids won three games from the Carnations and the Roses won two and lost one to the Violets. Al Fisher was high man of the evening, having a total of 245 pins in the opening game which is also the high score of the season. The season closed on Wednesday evening, April 26, when the Roses bowled the Orchids and the Violets the Carnations. After the games were played the prizes won were awarded to the successful participants, a list of which will appear in our next week's issue. The following table shows the number of games won and lost by each team to date.

|            |         |    |         |         |    |

## Indianapolis.

### TRADE GOOD.

The trade following Easter was very good. Funeral work began coming in better, and thus prevented the usual lull. Since the nice weather has set in, there has been an increasing call for bedding plants, but very little has been done in that line as yet. Quite a number of the smaller growers are now completely out of stock for cut flowers and are devoting their time exclusively to the bringing on of the bedding plants.

### NOTES.

John Bertermann is preparing to move to his summer home during the early part of May so that he may more closely superintend the construction of the new greenhouse. Many additions and improvements will be made this summer at the Bertermann farm, one of the most important of which will be the wiring of the place to receive the current which will finally be furnished by one of the Indianapolis companies after many a hard argument. Mr. and Mrs. Bertermann had a joint birthday celebration at their home April 23. About twenty relatives were present with a glad handshake.

A burglar broke into the house of Chris. Roepeke last week and almost scared Mrs. Roepeke to death. He grabbed her by the throat and told her to "shut up" and not make a bit of noise. Then he proceeded to search the house for valuables. While he was ransacking all of the rooms, Mrs. Roepeke made her escape through a trap door and ran down to the greenhouse where she got help. The burglar did not look in the proper place and therefore did not get much. His whereabouts are still unknown.

Smith & Young Co. lost several thousand of their fine sweet peas during the rush of Easter business. A large part of the great quantity of peas which they cut for this occasion they stored in their storage cellar, which, it seems, was too damp and spotted the peas. The spots also looked as though they might have been caused by too much sulphur.

Since our announcement in last week's issue of Smith & Young Co.'s in-

intention to start a wholesale florists' business in this city, there have been close to a dozen florists wanting to get into the deal. It seems that everyone is now realizing the necessity of such an establishment. As yet no definite location of the business has been chosen.

A. W. Brandt spent April 23, 24 and 25 in Ann Arbor, Mich., his old college town. It is the first time that Brandt has been out of town since entering the florists' business two years ago and he enjoyed his trip very much. A college chum by the name of Kothe accompanied him.

Benson is negotiating for another automobile. This one is to be like an open wagon and is to be used for bedding work. The new Buick delivery car which he recently acquired is giving him excellent service and it is probable that his next car will also be a Buick.

J. J. Karins, of Dree's, was in the city last week and succeeded in getting some good sized plant orders.

A. W. B.

## Montreal.

### A MOST SATISFACTORY EASTER.

That the Easter trade this year was most satisfactory, is not only the report of those first class stores which always have an increase, but of the others who sometimes are quite unwilling to admit it, and they are the loudest to claim an increase of not less than twenty-five per cent. Prices were slightly in advance of last year, but plants and cut flowers were away ahead in quality and quantity of last Easter. Lilies in pots were practically sold out by Thursday night; they were of extra grade all through, not more than 20 inches high and averaged seven to eight blooms of good substance. It is hard to state which was the second choice after the lily, as everything in the shape of a plant in bloom was sold, probably hydrangeas, of which a good lot were on hand, but as in the case of the lily not near enough, and in our opinion it will be impossible to grow enough of these two as they are preferred to any other plant, and we might say cut flowers also, at least in this city. Roses in

## U S Budlong's E Blue Ribbon Valley.

Mention the American Florist when writing

pots were to be seen in many varieties, Baby Dorothy seems to be the best. Spirea Japonica, many of the pink variety, was to be seen. Azaleas, some being good specimens, were shown which took readily at high prices, but a lot received from Boston were of poor quality. In cut flowers the best stock ever seen was received and in immense quantities. Violets and lily of the valley were very scarce. Roses and carnations were more plentiful, but the bulk was made up of bulbous stock of which an immense quantity was on hand, in one case 5,000 cut daffodils were received in one shipment. Probably to no city on this continent are cut flowers shipped from so many different directions. Canadian growers are no longer able to supply the demand and we have to look to the United States while not so many years ago we used to ship them cut flowers, but now we handle Chicago, New York and even Philadelphia products. The weather was ideal for delivery, being just above freezing.

LUCK.

## Yonkers Horticultural Society.

A meeting of the Society was held Friday, April 21 and, as usual, proved very interesting. H. Scott assumed his presidential duties and received a hearty welcome. Three new members, Rennison, Grey and Wood were elected. Discussion centered principally upon vegetables, both early and late, many interesting points being made clear. The society's regular social session will be observed Friday, May 5, and a committee composed of Milliot, Cochrane and Blanche were appointed to make the necessary arrangements.

The Easter of 1911 has passed into history. But so very recently that like many historical events it is a little hard to do it justice at such close range. It may be safely stated, however, that it was a big Easter, probably 25 per cent heavier than last year. Prices ruled about the same, with ample supplies of stock in most lines, although a shortage in violets existed owing to lateness of the season, and a shortage in good carnations developed by Saturday noon. The supply of Easter lilies was about equal to the demand and the quality was good. In the general line of blooming plants the sales were good and some excellent stock was in evidence. Bulb stock in pots was scarce, being confined mostly to hyacinths and Emperor narcissus in pans,—and, as at this time of year the customer has ceased to consider such stock as a novelty, the demand was only moderate. Well flowered plants of marguerites, geraniums, cinerarias, pelargoniums, spiraea and hydrangeas were in plentiful supply and sold well. There was very little call for the foliage class of plants such as palms and ferns. In cut flowers, roses and carnations led the list, with a good sale for cut Easter lilies, Murillo tulips and Emperor narcissus. The sales of other bulb stock was moderate, only about in such quantity as might be termed incidental at such a time of increased demand. One of the most unsatisfactory items was the unreliable quality of the carnations that were shipped to the florists who were obliged to buy in the wholesale markets to meet the increased demand. Only a small part was reasonably good, much was barely salable and quite a lot was altogether worthless. Soft stock or careless packing seemed the trouble in most cases, with some stock showing evidences of age.

### NOTES.

W. H. Culp & Co. were quite successful with their giganteum lilies this year, bringing the crop exactly right for Easter. There was no loss from disease, all the plants were on time to the day, and in such shape that they were finished in a carnation temperature with no loss from soft or old flowers. March 1 this stock, with few exceptions, did not show buds above the foliage. They also had some very fine Spirea Gladstone and a fine lot of marguerites in five and six-inch pots. Owing to a recent severe illness, Mrs. C. A. Rose was unable to be in

her accustomed place in the store of Mr. Rose. Her many friends however are glad to learn of her almost complete recovery, and that a little time only is needed to get back to full health again.

Norval Kline has gone to Lawrence and taken over the old established florist's business of C. M. & S. E. Luther. The opening seems good, and with the finger which seems a part of Mr. Kline's make-up, we predict that there will be something doing in the most historic town of Kansas.

Chas. P. Mueller, in addition to his usual good stock, showed some fine large specimens of hydrangea and spirea. He also had a good cut of really fine snap-dragon.

W. I. CHITA.

PROVIDENCE, R. I.—The flower growers in the suburbs and adjoining towns are contemplating establishing a flower exchange. They are dissatisfied with the methods now in vogue and think that a plan similar to the one in operation in Boston would be successful here.

### LARGE QUANTITY OF STOCK.

Business is good, but with the immense quantity of stock arriving each day it is impossible for the wholesalers to dispose of it readily, and the result is a break in prices, the stock being sold to the clean out buyers at reduced figures, the better grades naturally bringing the usual market price. Enchantress carnations are the most plentiful at the present time, with roses enough to fill all orders. Brides do not seem to sell readily, the demand being for White Killarney and Kaiserins, with a very fine grade of the latter arriving at the present time. American Beauties are also being received and it is now possible to take orders for them. Violets are still hanging on, lily of the valley enough to fill all orders with Easter lilies and callas arriving in large quantities, the retailers having no trouble in getting fine stock. The glut on bulb stock has disappeared and there are but few tulips and daffodils arriving at the present time and these are disposed of readily.

### NOTES.

The entertainment committee announces that the annual May ball will take place April 27 at Miller's Hall, corner Eighth and State streets, with the following members appointed for the different committees: C. C. Poll-worth, A. Leidiger, F. Holton, W. Halliday and W. C. Zimmerman, reception; H. V. Hunkel, Roy Currie, G. Rusch, J. G. Heitman and Gus Mueller, arrangements; Gus Kellner, E. Welke, A. Leidiger and Chas. Menger, decorations. Tickets are now to be had at either of the wholesale houses or of the standing entertainment committee.

The Flora Bon, after making a voluntary assignment is again in existence under the new management of Mr. Leister. He has already introduced himself to the local market and we hope he will be successful in his new venture.

Manke Bros. are cutting a large amount of Mrs. Lawson and Enchantress carnations of excellent quality.

Aug. F. Kellner is busy with a large force of men taking care of his landscape orders.

Mitchell Street Florist reports having had a fine Easter trade, handling a large number of plants which were grown at their own greenhouses.

Gustav A. Pohl is beginning to cut some fine sweet peas which are disposed of readily.

Tuesday, April 17, the bowling club rolled its last series. A prize stake of \$35.00 being distributed among the winners, the following scores being the results:

|                | Total Pins. |

### St. Louis.

### INCREASE IN SUPPLY.

Easter is over and this is made very evident by the increase in the supply of cut flowers. Roses, with the exception of American Beauty, and carnations are plentiful and cheap. Owing to the cold weather violets are still seen, sweet peas are in abundant supply, and out-door lilac is in the market. Ferns are scarce and the quality is poor. All hands are anxious to begin planting out, which will start as soon as the weather permits.

EVERYTHING PLENTY.

Nearly every retailer reports an excellent Easter business this year. Stock was, and still is, quite plentiful in all grades and varieties. Bulb stock is moving slowly, and continues to come in in large quantities, with the inevitable result that some of it goes on the street at little or nothing, while some goes out the back door to the dump. Carnations, also, are very plentiful and the price realized for Easter business was somewhat lower than prices quoted. Roses are plentiful and some job lots are selling at very low prices. The stock of roses is excellent, the quality being all that could be desired. Long-stemmed American Beauties of the very best grade come in daily and move somewhat better. Sweet peas are good with fair demand. Pansies are plentiful, violets have been good sellers up to date, and the supply for Easter was inadequate on this market. Easter lilies are still being secured in quantity and meet with fair sale, callas are moving very slowly. Daisies and calandula sell readily. Adiantum and other greens sell quickly and asparagus is a little short of the request, smilax has a good call. The weather the past week has been such as to put a damper on cut flower business, funerals and one or two large decorations being about the only means of moving stock, but most of the retailers say that they need the rest after the Easter rush, and are glad to take it easy for a little while. C. F. B.

WILKESBARRE, PA.—The greenhouses of A. W. Moore & Co. were destroyed by fire April 10, the damage being estimated at \$3,000. This is the second time within a few years that the firm has suffered loss by fire.

FLOWERS PLENTIFUL.

Flowers are as plentiful as were hingles for the winning side in the opening base-ball game in this city this year. In fact, the growers in the way of supplying flowers are battling well above 300. The quality of most goods is satisfactory. Now and then some shipments of dumped stock are somewhat off and sell at prices accordingly. Lily of the valley is an exception and is scarcely sufficient to meet requirements. Roses are more sufficient to meet the demand than they have been for some time. At the close of last week's business some were cleaned up at slightly lower prices. Carnations are back to normal prices, and at times are selling at lower levels, when a clean up is effected. There are plenty of both callas and Easter lilies offered. Some bulbous stock still arrives. Poeticus is now becoming a factor in this line. The supply of sweet peas is adequate. Many of them are somewhat of a minus quantity, both in respect to stem and flower. Marguerites and

WATERBURY, CONN.—Alexander Dallas has removed the greenhouses from Union and Willow streets to the new location, at Mill Plain. One new greenhouse has been erected at the new place, and other houses will be built during the summer, which when finished will complete a plant of 150,000 square feet. Mr. Dallas' son, Walter, will be associated with his father in the new and enlarged business.

### PLENTY OF STOCK.

Easter is over and every one seems to be satisfied. The person with a smile and pleasant word is usually a welcome guest, but the man with the frown and grumble has a small audience. Life is too short to be grouchy and those that got left during the holiday found the smiling way the best paying proposition, but Memorial day is coming, lest we forget. There were a few things that sold well,—sweet peas, smilax, cattleyas, long-stemmed American Beauties, lily of the valley and Richmond roses. Violets were medium, the double variety being mostly obtainable. Lilies in pots went rapidly but cut lilies did not sell. Carnations, yellow marguerites and snapdragon were indeed hard to move at any price. This week the markets are well stocked with everything; bulbous stock moves slowly. There are some nice carnations and roses to be had. The commission houses were well satisfied and the retail stores had a good Easter with an increased business.

### NOTES.

Among the visitors to the show was Mrs. Alexander Wallace. Her illustrious husband was often spoken of at the late show. Very few men had such a host of friends as he commanded, many read his writings who didn't know him personally, but were drawn to him through his remarkable knowledge. The path of glory often leads to the grave, and there one is forgotten, but it seems a pity that such a brilliant man who did so much for horticultural literature should not have some recognition so that the following generations would know that he had lived and what he did. After all, wouldn't it be better to say something nice to a man when he is alive than all the eulogies after he has gone?

Welch Bros. report business 25 per cent better than any other year in the history of the firm. The greatest demand was for long-stem American Beauties, smilax, sweet peas, cattleyas, Killarney roses, and pot lilies. All of the latter were cleaned out Saturday morning. Mr. Frysted, their representative, is going south in the interest of the firm for Memorial day supplies. Their sales in orchids are increasing. Carl Jorgens of New York is sending the firm some very fine American Beauties from a cool house.

Henry M. Robinson & Co. report an increase in business over any year, this being the best Easter the firm has ever had, the low prices prevailing on certain flowers was the cause of a great increase, as people purchased more. Henry Robinson is going south on a business trip to look after the fern trade for Memorial day. They have had some large western orders. Brown galax, they report, as a short crop; all that is available are of cold storage and prices have advanced.

Pierce and Hastings of the Park Street market, feel well pleased these days. In January they beat Becker and Davenport in a bowling contest, the stakes being a dinner. They met again last week with the same result, the dinner being paid for by the losers at the Bowling game. The losers, like the average Scotchman, not knowing when they are beaten, have asked for another try, and it is whispered the

Wm. Riggs has the first Peach Bloom gladioli of the season. Everything William touches seems to grow well, like most of us he began a private gardener, then a commercial grower, back again to his old love as private gardener, finally starting in Auburndale, where everyone hopes he will succeed in his latest venture.

Chas. Techa, assistant to Thos. Peglar, has gone to the Massachusetts General Hospital for treatment. He was a great favorite in the market and the boys all hope for his speedy recovery.

The Springdale Greenhouses, Canton, Mass., is shipping some first-crop prize President Carnot roses from a cool house, which are fine.

The price of 16x24 greenhouse glass has advanced and it is getting so that it will be a hard job to fill large orders.

The cream of the market in Richmond roses are coming from H. W. Field, Northampton, Mass.

Jahn Bros., East Bridgewater, are seedling in some fine Harry Fenn carnations.

Willow Hill Greenhouses are sending in some fine marguerites.

Frank P. Putnam, Tewksbury, has some very fine snapdragon.

Mann Bros. and H. Waljecker have some very fine Spanish iris.

Herbert Calder is marketing some nice double violets.

MAC.

### Connecticut Horticultural Society.

The society has for several years desired to hold an exhibition of bulbous flowers, just before Easter, and this year made a good beginning. At the meeting April 11, the special feature was a fine display of tulips, narcissus, daffodils, Easter lilies, Dutch hyacinths, etc., mostly by Howard A. Pinney, from the extensive greenhouse plant of John Coombs, of which Mr. Pinney is one of the able foremen. He won a diploma and Alfred Cebellus a certificate of merit for three splendid plants of Calceolaria hybrida. William H. MacKenzie, of the Sessions greenhouses, at Bristol, also was awarded a certificate of merit for his exhibition of sweet peas, narcissus and tulips.

Mr. Pinney gave a talk on the culture of the various bulbous plants, bringing out many facts of value to greenhouse men. The judges for the evening were J. A. Weber, of Hartford; George E. Baker, of New Britain and W. H. Shumway, of Berlin. Of great

interest to the meeting was the report of various members concerning the National Flower Show at Boston. James M. Adams, President Huss, J. A. Weber, John Gerard and W. H. Shumway, all described in glowing terms the different features of that wonderful exhibition that most appealed to them.

During the last month, we have lost one of our oldest and most estimable members, Mrs. Maria L. Barnes, who was a life member, and long an inmate of the Old People's Home at Hartford. Wm. W. Myers, of Hartford, an amateur horticulturist, has also recently deceased.

Our schedule of events calls for "Hardy Primrose Night" at our next meeting, April 28, but the unusual lateness of the season—the ground here still freezing every night—necessitates a change to an exhibition of amaryllis plants, with a fitting paper by President Huss.

GEORGE W. SMITH, Secy.

### San Francisco.

#### A GRAND EASTER.

The Easter business with the florists was a grand success. With one exception there was plenty of stock in the market, and the large assortment of plants and cut flowers were readily disposed of. Lilies were, as usual, very scarce, partly due to the large demand for them, and many sales for them were refused.

### NOTES.

Many fine Easter displays were made by the more progressive retail firms, and this particularly applied in the case of Pellicano, Rossi & Co., who opened their door to the public but a few days before the Easter holidays.

A. Ringier, representing W. V. Barnard & Co. of Chicago, is at present in the city and, as usual, gets his full share of orders.

A new retail store was opened on Powell street, called the "Sign of the Rose." They report business very satisfactory.

Chas. Matrala, of the firm of Podesta & Baldochi, left recently for an extended trip through the east and Europe.

PHOENIX, ARIZ.—About the same as last year, is the report of the Phoenix Flower Store in regard to the sales during Easter. There seemed to be plenty of stock, enough of both plants and flowers, to meet the demand, and the prices did not vary from those of the year previous. There is very little call for plants in pots at any time of the year, and the trade here is satisfied to take what we have on hand in the line of cut flowers. There was a great plenty of roses. American Beauty, Maman Cochet, Marechal Niel, Kaiserin Augusta Victoria, and Meteor were in good supply and all grown out doors. There are no greenhouses here of any account, and there is but little need of them.

## Pittsburg.

### A BIG GLUT

Very few words describe this market during the past week—"a big glut" is about all that is needed. The lily market was never worse; many of those meant for Easter coming in now. The prices run from \$5.00 per hundred to \$8.00 for select stock when a sale is made. The rose situation is about as second. Oddly enough, white carnations are not plentiful. Very fine sweet peas are pushing the violets to one side. American Beauties which have been very scarce all winter are now so plentiful that any decent price offered is taken by the wholesalers.

### NOTES.

Pat Maier had the misfortune to have a horse run away in the city and break his wagon. Luckily he was just through delivering a load of lilies for the Easter market.

John Martin, of the McCallum Co., spent several days at his home in Waynesburg. This firm is handling some exceptionally fine American Beauties.

Gus Ludwig and E. Beckfield, of the same firm were called to court most of Easter week, which certainly was a handicap for them.

H. H. Wiggins, the Butler street florist, has invented a new method of lettering ribbon by stencil.

Miss Krut, of Butler, was severely injured by a gas explosion just before Easter.

Joseph Jones is doing a fine business in his nursery store on Liberty avenue. J.

## Buffalo.

### THE BEST EASTER.

Easter has come and gone, and it is safe to say that the trade was never better. The sale of lilies was large, the stock of the best, and none were left. Roses, ramblers and hybrids, found ready sale for good stock, azaleas were never better and were in their usual demand, hydrangeas, spiraea, hyacinths and tulips all sold well. Special arrangements in birch bark baskets of all plants were very much in demand, and the originality of their arrangement made them very salable. Roses, carnations, and all cut flowers had their usual call. The usual demand for corsages was far exceeded this year. Special corsages of lily of the valley, orchids, gardenias and sweet peas, with daisies in some, still all different, were the call. All of the stores vied with each other to make a good display, and it was very interesting to view the different displays. Anderson and Palmer had stocks on hand that met all the calls for everything. Weddings and receptions have kept all busy since Easter and with the usual amount of funeral work there has not been any spare time with the florists. From inquiries among the growers all are satisfied and are now getting ready for spring bedding stock and will be ready for all comers. BISON.

HARTFORD, CONN. — Wallace W. Thompson has recently purchased two lots of land on the opposite side of the street from that now occupied by his greenhouses.

BRAMPTON, ONT.—The trade at Easter was about the same as last year, writes T. W. Duggan, manager of the Dale Estate. Prices were about the same and everything sold well. There was a shortage of lilies and ferns, but the supply of cut flowers was good. The prices obtained for lilies is too low, six, eight and ten cents for they do not pay the cost of production. We shall increase the price next season.

JANESVILLE, WIS.—The increase in the sales this year over last for the Easter trade is about 25 per cent, states the Janesville Floral Co. The prices were about the same as in 1910. There was plenty of everything in cut flowers, and a good supply of blooming plants, but a little short of lilies. Everything in the plant line that was well finished sold well. Bulbous stock did not seem to be wanted, but roses and carnations found good sale.

WAUKEGAN, ILL.—The sales this year, states Theo. Meyer, were much greater than at Easter, 1910, fully 25 per cent. The prices were about the same as last year, and the supply of both plants and cut flowers was equal to the demand. Easter lilies and blooming plants had a good call, while tulips and narcissus were not so much in demand. Carnations and lilies were the cut flowers having the greatest sale, roses being not so much favored.

KANSAS CITY, MO.—The Alpha Floral Co. states that the increase in business over Easter, 1910, is about 25 per cent. With the exception of azaleas there were plants enough to meet the demand and plenty of cut flowers, with

On quantity we can quote astonishingly low prices on following:

## U S Budlong's Blue Ribbon Valley.

prices about the same as last year. Lilies and hydrangeas and carnations and violets were the plants and flowers most in demand. The cut flowers were fine, but small plants, such as single hyacinths in pots, are a nuisance to deliver.

PARKERSBURG, W. VA.—The increase in the business this Easter is about 25 per cent over last, reports J. W. Dudley & Sons. The trade in plants was very large. The sales of hydrangeas were very satisfactory. The two houses containing 2,500 plants were entirely sold out, as were the azaleas, rhododendrons and spiraea, the plants being shipped to different sections of the country. Sunday, April 9, the houses were opened to the public and fully 3,000 people visited the greenhouses between two and six o'clock in the afternoon.

ANGOLA, N. Y.—The sales at Easter will show an increase of about five per cent, says John J. Neubeck. The supply of plants was adequate to meet requests, but there was not enough cut flowers to fill all demands. Prices were about the same as last year. In the potted plants the call for daffodils was not as large, while hyacinths sold better than before. Carnations were most in demand for cut flowers, with less sale for tulips. Azaleas and lilies sold well and at good prices. The weather was cold and very windy, necessitating good wrapping for all plants to keep them from freezing.

## New York.

## LOW PRICES.

Cold rainy weather predominates, winter seems very loath to leave us this year, and with the possible exception of nurserymen perhaps, everybody is clamoring for warmer weather conditions. The cut flower trade has not yet received its normal balance, wholesale districts are overcrowded with all seasonable flowers, and prices are touching a lower level than has been known for a long time. To illustrate just how demoralized market values have been, we will mention that special grade blooms of American Beauty roses were cleared out in numbers one day recently at six dollars per hundred, they were a day or two old, undoubtedly, yet, it seemed an awful sacrifice. Not alone are the Beauties too numerous, but all other roses are just as plentiful and meeting with similar results. A reaction may set in any day, however, and it cannot come too soon. Carnations continue to come in in almost unlimited numbers; like roses, they have no hard and fast values, and are moved at whatever prices buyers will offer almost, the prime object being to clear out at any price in order to make room for the tomorrow's shipments. Sweet peas of a superfine grade are coming in and move fairly satisfactorily, ordinary short stemmed blooms are very numerous and are not so easily disposed of. Cattleyas are clearing out fairly well from day to day, as also is lily of the valley; these two items seem to be enjoying a run just now. Gardenias are quite unsatisfactory, there are too many of them, they have got into the hands of the street peddlers and their usefulness as a rare and choice morsel has thus become very much impaired for the time being. Lilies continue extremely plentiful, a great many are disposed of daily but the supply seems inexhaustible and prices are low. Snapdragon is one of the good things to have, prices on this remain quite steady, the supply not yet exceeding the demand to any appreciable extent. Violets of quite good quality are yet being received, thanks to the continued cold weather. Among the bulbous stock tulips are the most numerous and they are clearing out fairly well, considering the quantities of other flowers in the market. Southern grown narcissii has not been so much in evidence the last week or so, for which we no doubt ought to be thankful. Spanish iris, yellow and white, and cut forsythia is appearing; lilac is scarce; arbutus is more plentiful, as also are yellow and white daisies. Smilax has shortened up in supply considerably, causing a needed price. Asparagus and adiantum go fairly well continuously, these two items have held steadier in the market, perhaps, than have any line of cut flowers during all the present season.

April 25.—The weather today turned much warmer, stock continued to come in very plentiful, and while lots of it was moved, it went at very low figures; a rather peculiar feature is the fact that spring bulbous flowers are much easier to dispose of than are roses and carnations. Some dealers are of the opinion that the roses, Killarney and May Maryland, are producing three times the quantity that could be cut from the old varieties. Bride and Bridesmaid, and it is this excess of production that is responsible for the present glutted condition of the cut flower market.

## NOTES.

With the coming of May 1, several changes of location will take place among the wholesalers in Twenty-eighth street. A. H. Langjahr will vacate No. 55 and James McManus will immediately occupy these premises.

The Growers' Cut Flower Co. will move across Sixth avenue into the newly renovated building at 111 Twenty-eighth street, and Kessler Bros. will move across the street into No. 113. Fellingour, the green goods dealer, is also moving across the Sixth avenue line, and Thorley will take his Twenty-eighth street retail business across Broadway and get nearer the Fifth avenue district. Quite a few changes for one short block.

At the next Florists' Club meeting which comes on May 8, the essay committee will endeavor to have five minute talks from the following members: J. A. Mandl, orchids; A. Kakuda, Japan; A. T. Boddington, Bermuda; J. McHutchison, South America; W. J. Stewart, The Show Aftermath; J. H. Pepper, Long Island Farming; Al. Rickards, Commercial Traveling; J. G. Esler, Hall; H. A. Bunyard, Sweet Peas; H. Steinhoff, The New Market; W. DuRie, School Gardens; John Young, Reminiscences; R. M. Schultz, The Rose; W. Ebel, Insects. This program, if followed, will certainly bring out a most interesting meeting.

Steamers leaving this port for Europe are very much crowded these days, it is said the coronation exercises to take place shortly in England are responsible for the going away of a great many of the wealthy people, and some retailers are of the opinion that among certain classes of trade there is going to be very little doing for some time to come on that account. Still, there are a great many people who will stay right on this side of the big water, and the flower business will undoubtedly keep right on steadily increasing in volume, just as it does with each succeeding year.

A team of expert bowlers came in from Tuxedo, N. Y., on the evening of April 21, and played three games with the New York Florists' team in Thum's alleys. The visitors made a fine showing during the first game, but the New Yorkers succeeded in defeating them in the second and third games, and so won the match. A return match will be arranged for some time in the near future. On May 2 the New York team of bowlers from the seed district will go to Madison, N. J., to meet a gardeners' team of that town.

Visitors: S. S. Pennock, Philadelphia, Pa.; J. Ruppert, representing H. A. Dreer, Riverton, N. J.

## Albany, N. Y.

Easter, 1911, has gone into the past as an exceptionally good year in this section for the florists. The dealers all say that business "was better than ever," but how much better is the question that is hard to answer. The public found a good supply of everything and a tendency to more moderate prices owing to the abundant supply. Violets sold at \$2.00 a hundred at all the stores, a figure perhaps a little under the average. The trade had no difficulty in getting from Poughkeepsie and Rhinebeck all the supplies needed and all had a sufficiency. Red and pink azaleas sold well and prices ranged from \$1.00 a plant to \$25 for some very large and extra choice specimens. This year the trade had a violet sweet pea which competed with violets at \$2.50 a hundred. Ordinary sweet peas brought \$1.50 to \$2.00 a hundred. The public took kindly to Crimson Rambler and Dorothy Perkins roses and many of these climbing favorites were sold. Prices ranged from \$1 to \$15 a plant. New plants were rare. One dealer had some mountain laurel at \$4 each and bougainvilleas were more numerous than in years past and brought good prices, \$3 and \$5 each. Some English hawthorn was in the market at \$4 and \$5 a plant and was a favorite

## NOTES.

The home of Frederick Goldring and wife, Fort Grove, Slingerlands, was the scene, on April 18, of the wedding of their daughter, Miss Esther, to Romain B. Ostrander of Brooklyn. The house was tastefully decorated with foliage plants and marguerites, and the bride carried a shower bouquet of the latter. The ceremony was performed by the Rev. Norman McLeod, pastor of the New Scotland Presbyterian church. The guests numbered 40, relatives of the couple. Mr. and Mrs. Ostrander will live in Brooklyn. Mr. Goldring, father of the bride, was for three years president of the Albany Florists' Club. Theodore S. Strickler, aged 72 years, one of the oldest florists of this section, died at his home in Watervliet on April 16. For years he conducted a small establishment on Broadway, Watervliet. On account of its proximity to the street car line it was known to a large number of people who had no connection with the florists' business.

William C. King gave up his retail store at 24 Steuben street the day after Easter, and will confine himself entirely to the greenhouses at 1056 Madison avenue where he will grow stock for the trade. R. D.

WESTBORO, MASS.—Leonard C. Midgley, manager of the Worcester Conservatories, has bought 70 acres of land and is planning to have built, by the King Construction Co., of N. Tonawanda, N. Y., two greenhouses 50x300 feet. It is expected the houses will be finished by June 15, at about which time Mr. Midgley and his family will move from Worcester to their new home here.

### Easter Business.

The early reports of the Easter business which were received in time for publication in our last week's issue, plainly indicated that there had been a large increase in the amount of trade done all over the country and subsequent reports fully substantiate the fact. Two great features stand out very prominent in the trade this season, that the stock was of good quality, and that the prices were not materially advanced. It is very plain that these two important things had much to do with the great increase, and a lesson should be learned from the result. At all the great days be careful to give the customers only the best quality of stock and shun all pickled stock and refuse to handle it if it is received, and do not scare the customer away with exorbitant prices and allow them to have the impression that florists are all "hold up men." It is very gratifying to read and hear so many say that this Easter "was the best ever."

BAKOR, ME.—Adam Sekinger states that it was the best Easter trade that we ever had, and all the stores did a good business and sold out clean. It was almost impossible to get all the flowers delivered on time Sunday. The increase in the sales over 1910 is fully 25 per cent. The prices were about the same as last year. The trade in plants was good, especially in Rambler roses, and more could have been sold could they have been obtained, hydrangeas, lilacs and all shrubs sold poorly this year. The cut flower trade was fine, everything sold well, and the supply of roses, carnations, daffodils, tulips, was adequate and of good quality. Violets were short and the stock was poor. We have broken ground for a new house for Killarney roses 35x300 feet.

PUEBLO, COLO.—The Easter trade this year, states G. Fleischer, was about the same as the year previous. There was a good supply of lilies and bulb stock, and prices were no better than last year. There was a good demand for sale of lilies and hyacinths, but daffodils, tulips and lily of the valley did not sell well. In cut flowers, roses and carnations were most in demand. Made up plant baskets do not sell here, and the churches do not have the florist make the decorations, hiring the plants by the dozen. Mr. Fleischer has been very ill with sciatic rheumatism and nerve trouble since the middle of January and was unable to attend to the Easter business, but is improving slowly.

OKLAHOMA CITY, OKLA.—The Easter trade was about the same as last year,

writes The Stiles Co. The supply of both plants and cut flowers was equal to the demand, this is a matter which any good business manager can fully control. All the well-grown plants and first-class flowers sold well. Angel's Greenhouses has opened a store at Third and Broadway. The Brenner Floral Co., one at 5 North Robinson street, and The Stiles Co. has moved from 139 to 202 West Main street. A hail storm on April 13 broke all the glass in the greenhouses at Wheeler Park and did considerable damage at Angel's greenhouses and at Carter & Hagemann, vegetable growers.

FALL RIVER, MASS.—Chatterton Warburton writes that the Easter business increase was about five per cent over last year. Prices were about the same and the supply of all kinds of stock except violets was adequate. All the blooming plants sold well and there was a good call for violets, lily of the valley, daffodils and orchids. The supply of lilies was good, but they sold out clean. The trade in plants is constantly increasing, as is the demand for corsages of violets, lily of the valley and orchids.

LYNN, MASS.—The best Easter we ever had reports F. J. Dolansky, the increase in sales amounting to about 25 per cent, with prices about the same as last year. Lilies and azaleas were the best selling plants and more lilies could have been sold, being short of the demand. The medium grades of cut flowers were very plentiful and there was a good call for sweet peas, violets and carnations. The weather was fine, which was of great assistance in packing and delivering.

NEW ORLEANS, LA.—The Easter trade was about the same as last year, writes Abele Bros. Prices were no better, and with the exception of carnations, the supply of flowers and plants was fully equal to the demand, lilies and carnations are the favorites and mostly in request. There was little call for foliage plants, the demand being almost entirely for plants in flower. There was a lot of pickled stock shipped here from Chicago, which was unfit for sale upon arrival.

DALLAS, TEX.—The Texas Seed & Floral Co. states that the increase in the business done at Easter over that of the year previous is about 20 per cent. The prices were about the same and there was stock enough of both plants and flowers to meet all demands. The best selling plants were lilies and hydrangeas, medium sized plants was what the trade wanted, those at about \$1.00 each sold the best. All cut flowers sold well, especially lilies.

POUGHKEEPSIE, N. Y.—The Salford Flower Shop writes: Ideal weather for delivery. The sale of blooming plants

Caldwell the Woodsman Co., Evergreen, Ala.

greatly increased and we find that it is growing constantly. The sale of cut flowers was about the same as last year. General business is the best ever and there are plenty of decorations booked for the coming months.

YORK, PA.—The sales this year at Easter were 50 per cent better than last, says Chas. A. Schaefer. The demand for both plants and cut flowers was much greater than in 1910, everything that was salable was sold. Violets were in great demand, but the supply was short and lily of the valley and roses were used instead.

COLUMBUS, O.—The Easter trade this year was the best we ever had writes John R. Hellenthal. There was a shortage of good stock.

# HARDY AND CLIMBING ROSES

## Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name:  
Price, 75c for 5 (of one variety), \$13.00 per 100, \$120.00 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.  
Anne de Diesbach. Bright carmine.  
Ball of Snow (Boule de Neige). Large, pure white.  
Capt. Christy. Delicate flesh color.  
Clio. Satin blush.  
Duke of Edinburgh. Bright vermillion.  
Fisher Holmes. Dark variety crimson.  
Frau Karl Druschki. The finest white in existence.  
Gloire de Margottin. Dazzling red.  
Gen. Jacquemont. Brilliant crimson.  
John Hopper. Bright rose.  
La France. Peach blossom pink.  
Mme. Charles Wood. Bright carmine.  
Marshall P. Wilder. Cherry rose and carmine.  
Magna Charta. Dark pink.  
Mme. Gabriel Luizet. Light, satiny pink.  
Mrs. Sharman Crawford. Deep rosy pink.  
Paul Neyron. Lovely dark pink.  
Ulrich Brunner. Cherry-red.

For prices see above.

## English Moss Roses

Assorted. White, Pink, Red. Large dormant plants, from open ground. 75c for 5, \$14.00 per 100.

## Baby Rambler Roses.

PHYLLIS. Very fine clear pink, highly recommended, \$1.25 for 5, \$20.00 per 100.  
BOSKOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30.00 per 100.  
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c for 5, \$15.00 per 100.  
CATHERINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume. 85c for 5, \$15.00 per 100.  
MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85c for 5, \$16.00 per 100.  
MME. NORBERT LEVASSEUR (Baby Rambler). Strong, field-grown plants. 75c for 5, \$14.00 per 100.

## Ramblers and Other Climbing Roses.

CLIMBING BABY RAMBLER (Miss C. Messman). A novelty for 1911. Where the Baby Rambler is popular, the climbing type will soon become so too. We have a small stock and offer same for donation. It is a true Polyantha type, color deep rose. 50c each, \$2.25 for 5, \$40.00 per 100.  
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown, \$1.50 for 5, \$22.50 per 100.  
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15.00 per 100; 4 to 6 feet, \$2.25 for 10, \$20.00 per 100; 7 to 8 feet, extra heavy, \$4.00 for 10, \$35.00 per 100.  
DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 8 to 9 feet, \$2.00 for 10, \$18.00 per 100.  
TAUSENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15.00 per 100.  
TAUSENDSCHON (Grown as a Standard). Fine for forcing. 40c each, \$3.75 for 10, \$35.00 per 100.

## Something New in Roses for Florists

### Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and one-half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY RAMBLER (Half Standard). Crimson, 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY CATHERINE SEIMETH (Half Standard). White. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY "STARS AND STRIPES" (Half Standard). White and red grafted on the same plant; most attractive. 45c each, \$1.50 per doz., \$35.00 per 100.  
MRS. CUTBUSH (Half Standard). Rose pink. 40c each, \$4.00 per doz., \$30.00 per 100.

## English Grown Hybrid Tea, or Ever-blooming Roses, etc.

Hybrid Tea or Everblooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in winter, they give a wealth of bloom all through the summer months and late in the fall till frost checks them.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation: is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 for bundle of 5; \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for summer-flowering and cutting. Maman Cochet (Pink). Color a clear, rich pink changing to silvery rose; very double and fragrant. Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride. \$1.25 per bundle of 5; \$22.50 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10; \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower, \$1.25 for 5; \$20.00 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor summer growing, \$1.25 for 5; \$22.50 per 100.

BETTY. Coppery yellow, overpaved with golden rose. A fine formed Rose, large and moderately full, \$1.75 for 5; \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink, \$2.50 per 10; \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 per 10; \$22.50 per 100.

AMERICAN BEAUTY. Almost too well known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong field-grown plants, 75c for bundle of 5; \$14.00 per 100.

CAROLINE TESTOUT. Bright satin rose, with brighter center. Large, full and globular; sweet-scented, \$1.25 for bundle of 5; \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

# Dreer's Select Potted Roses

## FOR OUTDOOR PLANTING

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and coll frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

HYBRID-TEA ROSE JOSEPH HILL

# Dreer's Select Potted Roses

## FOR OUTDOOR PLANTING

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

### Rambler, Hardy and Tender Climbing Roses. Strong Two-year Old Plants.

R. VINCENT, JR. & SONS CO., Whi'e Marsh, Md.

TAMPA, FLA.—The sales were about the same at Easter as last year, writes Anton Fiehe, proprietor of the Tampa Floral Co. The supply of both plants and cut flowers was adequate for all demands, and the prices were lower. There was not a heavy call for decorative stock, such as palms, ferns and crotons, but a good demand for lilies, callas, carnations, asters, pansies and hydrangeas.

WILMINGTON, DEL.—William N. Potter states that the Easter business this year was about the same as last, as were also the prices which prevailed. There was a good supply of both plants and cut flowers, plenty to meet all the calls. The greater demand was for cut flowers, carnations, snapdragon, daffodils, violets and roses being the kinds having the best call. There was a good variety of blooming plants, such as lilacs, genistas, lilies, hyacinths, spiraeas, pansies, tulips, cinerarias and azaleas.

FREDERICTON, N. B.—The most satisfactory Easter on record, writes John Bebbington & Son, the sales showing an increase of about 25 per cent over any previous year. The prices for the same quality of stock were about the same. The supply of plants was good, and there were enough to fill all orders, there was also enough cut flowers with the exception of violets, of which more good ones could have been sold. Lilies were most in demand, hyacinths, tulips and daffodils in pans second, lily of the valley being the least salable. Good roses and carnations sold well. The weather was excellent and contributed to the brisk trade of Thursday, Friday, Saturday and Sunday.

LITTLE ROCK, ARK.—Tipton & Hurst write that the sales at Easter were about the same as last year, with prices no better. There was a short supply of blooming plants, not enough to meet the demand. In cut flowers the stale stock which was received was too large and could not be used. Lilies were the plants most desired, and cut lilies, sweet peas and roses were the favorite flowers, the carnations were all asleep when they arrived. We could

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rock mere, Marblehead, Mass. June 20-22, 1911.

J. C. VAUGHAN XXXXXX April 24.

GLADIOLUS trial plats are now being planted at Vaughan's Nurseries, West-ern Springs, Ill.

THE Braslan Seed Growers Co., San Jose, Calif., have appointed J. W. Edmundson general sales manager.

ALBERT Dickinson, of the Albert Dickinson Co., Chicago, and Miss Emma L. Benham were married at Waukegan, April 22.

THE trade is warned against a man named Reynolds who gives a Milwaukee address and has secured money from seedsmen on worthless checks.

CHICAGO.—Prices on the board of trade April 26 for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.

LOS ANGELES, CALIF.—John C. Bodger of the John Bodger & Sons Co., and Miss Bertha Emma Jones, daughter of Alfred W. and Mrs. Jones, were married April 19.

VISITED CHICAGO: Catesby Spears, representing E. E. Spears & Sons, Paris, Ky.; A. J. Brown, Grand Rapids, Mich.; Mr. Steele, of the Steele-Briggs Seed Co., Toronto, Ont., enroute to Winnipeg, Man.

NEW YORK.—The weather keeps cool and counter trade is away behind that of last year for the same period.—Arthur T. Boddington and wife have returned from Bermuda where they spent a brief vacation.—Visitor: Mr. Reck, of John Reck & Son, Bridgeport, Conn.

A. H. GOODWIN returned to Chicago April 24 from a four months' trip to Mediterranean regions. Wild boars and gazelles are frequent game animals in the North African districts which Mr. Goodwin visited, but he did not secure any specimens this trip; Spanish dancers in Tunis might well entertain the American seed trade. Mr. Goodwin found but one flower seller in those North African cities, though they are only 15 hours from Italian markets; he greatly enjoyed the scenery in Montenegro and Bosnia.

### New York Seed Bill.

Marshall H. Duryea advises us that the hearing on Assemblyman Gregg's Seed Bill, No. 834, at Albany April 19 was largely attended by the seed trade throughout the state. A protest against the bill was filed and the matter is now in the hands of the agricultural committee, whose decision is awaited with interest.

### National Council of Horticulture.

The fifth installment of the press service of the National Council of Horticulture is received and contains articles on "Cruelty to Trees," "Nasturtiums," "Pansies" and "Growing Geraniums." These articles are distributed gratuitously for publication to the press and can be obtained of James H. Burdett, secretary, 1620 West One Hundred and Fourth street, Chicago. Tradesmen should see that their local editors procure a copy and publish the same, for they are bound to produce an interest in the planting and care of garden, which will be of benefit to the trade.

### Bean Prices.

The bean market March 15 apparently had reached an exceptionally low stage, and as the buyers throughout the country had very short stocks, they started in to buy in a small way. The price on March 15 was \$1.77, Michigan, on March 18, \$1.80, March 28, \$1.85, while on April 3 it had reached \$1.95 to \$2.00. At the present moment the market is easier with further decline in sight, today's value being about \$1.93 to \$1.95, F. O. B. Michigan. The demand has been very light the past few days, there being practically no inquiry. However, the Michigan dealers are holding stock quite firm at this price.

### Bermuda Lilies.

Arthur T. Boddington, New York, who recently visited Bermuda, spent some time in looking over the lily fields and is of the opinion that Liliun Harrisii is coming back to its old form. The larger growers in Bermuda are paying stricter attention to the production of better grade bulbs and on the places of such men diseased stock and mixed types are the exception. Some of the smaller plantations, however, contain quite a percentage of mixed or undesirable stock but, as Mr. Boddington says, "If the good growers will only have a private brand and so mark every case of bulbs they ship, showing

absolutely that the bulbs contained in such cases are of their own growing, then the poorly grown bulbs would be driven out of existence so far as our markets here are concerned and Liliun Harrisii would again be a feature."

Mr. Boddington also learned that those who are producing the best bulbs and have studied conditions and methods thoroughly, are very particular in having the bulbs handled very carefully, either in harvesting, packing or at any other period while they are dormant. They say that rough handling causes sickly and otherwise unprofitable plants. There may be more in this than our growers and dealers realize and perhaps a little more care at this end would decrease the number of deformed and sickly plants that usually appear in every batch of forced lilies of whatever type.

### Business Conditions.

Washington, D. C.—F. W. Bolgiano & Co. write: "Trade has been very uneven, and while the aggregate is larger than in former years, the local trade has all come in bunches. The cold weather almost put a stop to counter trade, but shipping orders continued. Prices have been unsatisfactory and of some stocks there will be diminished plantings."

Rochester, N. Y.—James Vick's Sons advise us, "That the season as a whole, up to date, has been very good. The retail sales are not up to those of last year, but we attribute the falling off to cold weather. On the other hand our wholesale trade breaks all past high records for the months of February and March."

Cleveland, O.—A. C. Kendel informs us as follows: "Our counter trade has been nothing much to speak of on account of the bad weather. Our early orders have been up to the average in face of advances in price on many items and indications are that trade will at least equal last year's."

Bismark, N. D.—Oscar H. Will & Co. advise us that the trade this year has been the greatest on record, every month showing considerable increase over the corresponding month in other years, and February nearly double that of February, 1910.

Los Angeles, Calif.—Aggeler & Russer Seed Co., states: "The seed business has been decidedly better for the past three months than for the corresponding periods of the years 1909 and 1910. Weather conditions are fine and there is every indication of good crops."

New York.—J. M. Thorburn & Co. state that the present season does not seem to differ much from other years so far as they have noticed to date.

## SEVEN TOP TURNIP

Originally introduced by us from South Carolina in 1850 and annually grown for over sixty years under the zero winter temperature of Bloomsdale Farms, the Landreth's strain of Seven Top has obtained by this northern culture a hardness not approached by southern-grown seed. All indications would point that way, while thousands of experiments have conclusively proven it beyond a shadow of doubt: consequently one pound of Landreth's Seven Top will in the dead of winter produce more greens than can be cut from three times the more delicate southern-grown Seven Top.

Write us how much you want, and we will name you a price.

## Market Gardeners

Vegetable Growers' Association  
of America.

B. L. Watts, State College, Pa. President;  
H. F. Hall, Boston, Mass., Vice-President;  
S. W. Severance, 508 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

THE Massachusetts State Board of Agriculture will hold on April 29 a demonstration of the best methods of planting, fertilizing and caring for asparagus at the experiment station of the Massachusetts Asparagus Growers' Association at Concord, Mass. C. W. Prescott, president of the association, will conduct the demonstration.

LANCASTER, O.—The boiler house and the ends of the eleven greenhouses belonging to M. M. Miesse were burned by a fire of unknown origin on the night of March 29, entailing a loss of \$4,000 or more. The watchman left everything in good shape at 10 o'clock but just before midnight the proprietor was awakened and upon looking out found the boiler house afire. Every effort was made to save all that was possible. The buildings will be rebuilt this summer.

THE home gardener, the market gardener and the truck farmer are more or less interested in the culture of the cabbage, and the Department of Agriculture has recently issued Bulletin No. 433 describing its cultivation under the different requirements of those three environments. A section is devoted to each of the three methods of producing the crop commercially—truck crop, market garden crop and farm crop—and the influence of climate, extent of production, soil fertilizer, and method of producing young plants, varieties, cultivation, enemies, harvesting, and marketing is described and explained under each head.

### Prices of Indoor Fruits and Vegetables.

New York, April 22.—Mushrooms, 60 cents per pound; cucumbers, 15 cents each; tomatoes, 25 cents per pound; grapes, \$1.25 to \$1.50 per pound.

Chicago, April 26.—Mushrooms, 30 cents per pound; cucumbers, \$1.75 to \$2 for two dozen; lettuce, 15 cents to 17½ cents per pound; radishes, 50 cents to 75 cents per dozen bunches.

### Screening Cabbage Seed Beds.

The cultivation of late cabbage is an important industry and one of the chief difficulties is the growing of seedlings. The New York Experiment Station has just issued a bulletin on "Observation on Screening Cabbage Seed Beds," which states that the trouble in raising seedlings is largely due to insects, though methods practised and unfavorable weather are contributory factors. The important insects attacking the seed bed are the turnip flea-beetle and the cabbage-maggot. The seed in the north is sown during the latter part of April or early in May, a week being required for germination and from five to ten weeks for the plants to make the desired growth. The work of transplanting to the field is performed during the latter part of June or the first week of

July. The turnip flea-beetle appears in great numbers about May 15 at about the time young cabbage seedlings are also making their appearance. In feeding, the beetles gnaw round holes which, in the cotyledon of the cabbage, are uniform in size and shape and reach only to the lower epidermis, and if the plant is attacked before the second and third leaves are started, it is stunted if not killed. The cabbage-maggot appears about May 15, and deposits its eggs, and upon hatching the larva attack either the stalk or root of the plant. The newly-hatched larva is less than one-twentieth of an inch long, and as the injury is at first slight, the grower is not aware of the presence of the maggots until many plants are killed. During cloudy and rainy weather the injury is not so apparent, but under a hot sun is plainly indicated by the general wilting and dying.

By the screening of the seed beds with frames of cheesecloth the injuries by the maggot can be entirely prevented, the work of the flea-beetles may be partially or wholly avoided, depending upon the grade of cloth used for the screen, and the screen conserves the moisture and prevents baking of the soil between seeding time and the period when the plants are of such size as to permit cultivation. It is found that the cloth having about 20 to 30 threads to the inch is to be preferred for the purpose, as this grade handles easy in putting on the frame, prevents attacks of flea-beetles, and plants grown under such screens compare favorably in stockiness with those

grown in the open bed. Plants raised under cloth grow faster during most seasons, and attain the size desired for transplanting about 10 days or two weeks sooner than plants grown in open beds. The extra cost of screening, in ten different experiments, ranged from six to twenty cents per thousand plants. The plants grown under screens have good roots and start quickly when transplanted, and although more tender, experience has shown that by removing the cover a week or ten days before planting, the seedlings become sufficiently hardened so that there is very little difference in the growth of the sets in the field.

Six-inch boards will serve for the frame and the cloth should not sag and rest on the plants; this may be prevented by stretching lengths of wire not more than four or five feet apart from end to end of the bed. The wire can be supported on stakes to which it is held by staples. It is preferable to use galvanized wire, for rusty wire wears holes in the cloth at the point of contact. All openings under the frame, due to unevenness of the soil, should be filled by banking the earth against the boards.

## A GRAND NEW CARNATION

# Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909. It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000, \$100.00; per 5,000, \$400.00. 25 at 100, 250 at 1000 rates. Place your order now to be in on early deliveries.

## AMERICAN FLORIST

## The Nursery Trade

### American Association of Nurserymen

W. P. Stark, Louisiana, Mo., President;  
E. S. Welch, Shenandoah, Ia., Vice-Presi-  
dent; John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

VISITED CHICAGO: W. Van Kleef, Jr., representing W. Van Kleef & Sons, Boskoop, Holland, on his annual tour. Mr. Van Kleef reports business good and says nursery stocks in general in his line promise well.

### Augusta, Ga.

February was extremely warm hence the nursery season was cut short. It was all that could be done to handle the orders on hand and as they came in, everything was pretty well cleared up, and there was no surplus stock left.

We are now having fine growing weather after one of the most severe drouths ever experienced in February and March in this section. Last week we had a series of showers for five days. All spring planting will be completed this week. Notwithstanding the drouth in February and March, there are thousands of peach buds two to three feet in height. The peach crop in Georgia this year as estimated, will not be more than 1,200 cars.

L. A. B.

### American Association of Nurserymen.

F. A. Weber, chairman of the St. Louis convention entertainment committee, advises us that during the meeting, June 14-16, entertainment will be provided for the ladies in good measure with a few good things for the men, about as follows:

First afternoon—A visit to the Missouri Botanical Gardens—for members and ladies. The evening will be reserved for Protective Association meetings or other business of the association.

Second afternoon and evening—Seeing St. Louis, either in special cars or automobiles, taking in residence sections, parks, etc., Shaw banquet for members attending the convention, ladies' theatre party at one of the popular summer gardens.

Third afternoon—A boat ride on the beautiful Mississippi river, with music, luncheon and refreshments; returning to St. Louis in time for outgoing trains.

### Grape Insects.

Although the acreage of the grape industry in the western counties of New York state has greatly increased, almost doubled since 1900, yet the yield has steadily declined, and to ascertain the causes the New York Agricultural Experiment Station has, since June, 1910, been conducting experiments in that section, and have issued a preliminary report of the work on grape insects, which includes the grape flea-beetle, the grape-blossom midge, the rose-chaffer, the grape root-worm, and the grape leaf-hopper.

The grape flea-beetle is a small steel-blue beetle which feeds on the swelling buds during April. The larvæ hatch in July and feed on the foliage, and the adult beetles feed on the foliage later in the fall. The most effective spray-

ing mixture is composed of eight pounds of arsenate of lead, three gallons of glucose, and 100 gallons of water applied in the spring when the beetles are feeding on the vines, and the use of the same spray will kill the larvæ if applied the first part of July.

The grape-blossom midge works in the larvæ stage on the pistil of the blossom bud, preventing the development of the bud so that they do not produce any fruit. The use of a nicotine preparation as a spray was found to diminish the number of eggs laid.

The rose-chaffer is a serious enemy of the grape when it is numerous, the beetles feed on the blossoms and destroy the entire crop. The adults emerge from the soil about June 20, when the Concord grapes are beginning to bloom. Various insecticides were used and a mixture consisting of 10 pounds of arsenate of lead, 25 pounds of glucose and 100 gallons of water was found to be very effective in killing the insects. The net gain per acre over the unsprayed grapes was \$61.84. Experiments proved that the numbers of the rose-chaffer could be materially reduced by cultivating the soil during May, when the insects are in the pupal stage.

The grape root-worm is the most serious insect pest of grape in the district. The larvæ feed on roots of the vine during late summer and fall. The adults appear late in June and early in July, and feed on the foliage. The most efficient method of controlling these insects is to spray the vines with arsenical poison, preferably arsenate of lead combined with bordeaux mixture, when the beetles are feeding. One gallon of molasses, six pounds of arsenate of lead and 100 gallons of water is a very effective treatment.

The experiments with the grape leaf-hopper have shown that the nymph are very easily killed by the use of a nicotine preparation. Lime-sulphur solution as dilute, as one gallon to 100 gallons of water, proved very effective against the leaf-hopper nymphs, but it caused much injury to the grape foliage and fruit, the growth of the berries being stopped, and they never ripened.

BRIDGEPORT, CONN.—A meeting of the creditors of the Fernwood Nursery will be held in this city, room 715, Security building, 1115 Main street, May 5 at 2 p. m.

## THE BOOK OF GLADIOLUS

The first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating, storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, \$1.25.

AMERICAN FLORIST CO.,

440 So. Dearborn St.,

CHICAGO.

MANKATO, MINN.—The report from H. Neilson is that the total sales in money were about 10 per cent greater than last year with the prices about the same. The supply of both plants and cut flowers was about equal to the demand. Plants all sold well, but the greatest call was for lilies, they being sold out long before the others. Carnations, cut lilies and daffodils were the cut flowers most desired, single tulips being the least salable.

BENNINGTON, VT.—A good increase over last year, at least 50 per cent better, writes L. C. Holton. Prices ranged a little lower than at the season a year ago and the supply of both plants and cut flowers was equal to the demand. Every one wanted Easter lilies there being no particular call for other potted plants, it was the largest demand for lilies in pots in the history of our business career of 20 years. Roses, carnations and violets were the favorites in the cut flowers.

ROCHESTER, N. Y.—The Easter trade for 1910 was greater than the previous year by 10 per cent, is the report of John B. Keller's Sons. Prices were about the same as last year, the supply of plants was adequate to meet the demand, and flowers were very much in oversupply. All kinds of flowering plants sold well, there did not seem to be any particular call for any one variety of plant. Sweet peas and violets were the favorite cut flowers and were most in demand, but all flowers had good sale.

NORWALK, CONN.—The Easter business this year, states R. G. Hanford, was greater than last, perhaps by 15 per cent. Prices were about the same as a year ago, and there was a good supply of both plants and flowers, enough to meet the demand. There was a much increased call for a better class of plants, azaleas being in great demand, while smaller plants, such as hyacinths, were passed by. Cut flowers all sold well, carnations, violets, bulbous flowers, lilies and roses all had a good sale.

## Florists, Seedsmen,

**Dahlias** are now the popular flower. Peacock's Dahlias are the "Quality Dahlias That Bloom." The best that can be grown. We know it. After a trial you will know it.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

## What the Users say

## KROESCHELL BOILER SAVES 35 TONS COAL.

"I bought a No. 7 boiler in 1901. It takes care of 10,500 sq. ft. of glass and could take care of 5000 more. Must state that I am in business for 25 years and have attended to many boilers, but I must say for your boiler that it has given better satisfaction than any other being easier to fire up, and it is easier to keep the temperature with your boiler in our houses than it is with any other."

I used 35 tons of coal less than I did with the boilers I had before. I can keep the temperature to 75 to 80 degrees during the severest weather. If it is necessary to do so."

PETER CROCZYNSKI, Chicago, Ill.

Carnations, Wood Bros., Fishkill, N. Y.

## HARDY CARNATIONS.

"The hardy ever-blooming CARNATION 'CRIMSON KING.' Everybody has asked for a carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long, never a day that you cannot cut blossoms. By putting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy CARNATION 'CRIMSON KING.' Per dozen, \$1.25; per 100, \$8; per 1,000, \$75; 25 plants sold at 10¢ rates; 250 plants at 1¢ per 1,000 rates. Write for catalogue of everything you need now ready, mailed on application. Write today. THE GOOD & REESE Co., The Largest Rose Growers in the World, Springfield, Ohio.

Nikoteen, pint bottle, \$1.50. Nikoteen Aphs Plant, \$6.50 per case of 12 paraffined boxes.

**MISCELLANEOUS.**

Mats, cheapest and most practical on the market. Send for circular. J. P. Watts, Kerr-moor, Pa.

Wagner plant boxes, for palms, boxwood, bay trees, etc. Wagner Park Conservatories, Sidney, O.

# A Continuation of That Time and Money Talk We Had Together Last Week. This One is About Gutters.

LET'S see—last week you finally admitted that a wooden post and eave house actually cost more to erect than our Iron Post, with the Galvanized Ice-Clearing Eave Plate and Sash Bar Clamps attached. Exactly the same facts apply to the using of our Cast Iron Center Gutter, as all holes are drilled, all spacing of the Sash Bar Clamps done at the factory—there is no fitting on the job—no time lost—all things are bound to go together right. The Cast Iron Gutters are cast in lengths of 8 ft. 4 1/2 inches, and supported by pipe posts set in our adjustable cast iron foot pieces. These foot pieces are made adjustable so that the posts can be moved up and down, so that it is easy for you to get an even line up.

Here again, you use just half as many posts as with the wood gutter and post, and it takes just half the time to set them. Your house will also be a good deal stiffer and the warmth from the iron gutter keeps the snow and ice thawing and clears itself.

But don't confuse this gutter of ours with the "channel iron" kinds or the steel gutter, for the channel has not capacity enough, and either one of them will rust out and go to pieces in a short time. The gutter we are advising you to buy is Cast Iron and will outlast your house.

Then there is the added rigidity and life that the Sash Bar Clamps give—but that's a subject by itself—next week, then for a talk about the clamps.

Pots, Florist red. Peters & Reed Pottery Co., Zanesville, O.

**STAKES.**

Cane Stakes. Standard grade, 6 to 8 feet, per 100, 50c; 600 for \$3; \$3.50 for 1,000.

Pipe stems, about 6 feet, per 100, 60c; per 1,000, \$5. Vaughan's Seed Store, Chicago.

Cane Stakes. Yokohama Nursery Co., Ltd., 31 Barclay St., New York.

## ADVANCE MACHINES

Now that you are building a new greenhouse this spring, why not put in the same up-to-date ventilating machinery and greenhouse fittings?

How about some steel shelf brackets for 10c single and 15c double, and to fit any size pipe from 3/4 inch to 2 inch inclusive with arms to carry 8-inch or 12-inch boards.

**THE ADVANCE CO.,**  
542 N. 14th St.,  
RICHMOND, IND.

Davenport, Ia.

Business since Easter has kept up wonderfully well. There has been a great deal of funeral work, which has kept all hands busy, and used up all the stock as fast as it has come in. Easter business was very good, as good as any past Easter, and perhaps a little better,—everything salable was sold,—there being no glut in any one thing. Bulb stock cleaned up well, but went rather slowly until carnations and roses were all gone. Roses and carnations were short of the demand and also pot lilies. But all in all, Easter trade was very satisfactory to everyone concerned.

### NOTES.

John Staack and wife, of Moline, entertained the Tri-City Florist Club at their home on the evening of April 20, this being the regular monthly meeting. Nearly every member was present. The newly elected officers were installed, and a very interesting meeting was held. Outdoor carnation culture was the subject discussed, after which Uncle John Temple gave a very interesting talk on what he had seen and learned at the Boston show, which was much enjoyed. One new name was presented to the club for membership. Henry Paulis' invitation to meet at his home in Davenport on May 11 was accepted, after which a luncheon was served by the hostess and a pleasant social hour spent.

Frost most every night is keeping the boys from planting carnations, which job they are very anxious to get finished before the bedding season starts. On the other hand, it just suits the nursery men, keeping their stock from leaving out.

The Davenport Park Commissioners have purchased a very beautiful tract of land on the Mississippi River east of the city for park purposes. This gives Davenport seven parks any one of which would be the pride of any city.

Otto Klienbiel, florist at the State Orphans' Home (Davenport), was recently married. Best wishes. Otto.

J. W. Davis and John Temple took in the Boston show, and were more than pleased with their trip. T. E.

STROUDSBURG PA.—J. Howard Stone is erecting four new greenhouses, of 28x150 feet, and three 25x150 feet. The houses will be of modern construction, iron frame with concrete base, the material being furnished by the King Construction Co., No. Tonawanda, N. Y.

DOVER, N. H.—Charles L. Howe opened an attractive new store on Washington street April 12. The opening took place at 4 p. m. and by 9 o'clock it is estimated that 4,000 people had attended. More than 2,000 roses were distributed. Herbert A. Meades will be the manager of the store. Mr. Howe now has stores in Laconia, Portland and Augusta, Me.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

**J. G. MASTIN CO.**

### Terre Haute, Ind.

On Monday evening, April 10, every florist doing business in this city met at the store of N. B. & C. E. Stover and organized the Terre Haute Florists' Club with the following officers:

Fred G. Heint, president.

Henry Graham, vice-president.

N. B. Stover, secretary.

Fred Wunker, treasurer.

Ed. Cowan, Otto Heint and Dr. Reisse, executive board.

The committee of by laws is composed of N. B. Stover, Otto Heint and Dr. Reisse. The commission houses of Chicago and St. Louis will kindly be asked to discontinue shipping carnations and other flowers to the department stores here in competition with our flowers, as it was decided unfair to us who buy largely from those houses. These flowers sell at the stores for much less than we can buy them at wholesale. Following is a list of the members of the new club, and includes every florist in the city: John Winton, Dr. Reisse, Fred G. Heint, Otto Heint, Fred Wunker, Harry Richmond, Ed. Cowan, James Cowan, Henry Graham, Harry Graham, Senger Bros. The club starts off under the most favorable auspices, and an unusual friendly feeling was shown by every one. Fred G. Heint, the president, represents the oldest establishment in the city, having been in business here for over fifty years, his father, John G. Heint, started in business sometime in the sixties. B. S.

BANGOR, ME.—The opening of the new floral shop of J. Martin Jr. on Center street, was a great success. Carnations were given to all who called as souvenirs of the occasion.

## Our Supplements.

Subscribers should see that they get copies of  
the fine supplementary illustrations showing  
high grade design and decorative work. These  
fine supplements should be carefully pre-  
served, as they mean much to the retail florists  
in dealing with their customers, illustrating as  
they do the various kinds of work that the  
everyday florist is called upon to perform.

The papers in which the supplements appear  
should be likewise preserved, as they contain  
much valuable data with regard to these special  
illustrations. Subscribers should see that they  
get every issue as otherwise they may miss  
some of this high grade work.

## SUGGESTIONS FOR PLANT GROWERS.

### Hydrangeas.

The hydrangeas for Memorial Day  
and the summer should now be given  
plenty of room to produce handsome  
plants. They should be spaced far  
enough apart for the air to circulate  
through the plants and so that the  
light can reach the lower leaves. When  
grown too close together they make  
tall unshapely plants that require  
stakes to each bloom to hold them  
erect, and frequently lose the lower  
leaves from lack of sunlight. Those  
that are wanted for Memorial Day  
should be showing flower, and an ap-  
plication of liquid manure will be ben-  
eficial in producing larger heads of  
bloom. Keep the plants in a cool, airy  
house and during hot days syringe  
the walks and beds to keep a moist  
atmosphere, so as to keep down red  
spider, which will quickly ruin a hy-  
drangea plant if they once get started.  
The pots are full of roots, and the  
large blooms and strong growths are  
a great drain on the small pots in  
which the plants are grown, so they  
will need copious waterings contin-  
ually, often in bright weather twice  
during the day. The strong growing  
blind shoots can be cut out and made  
into cuttings, which, if rooted now,  
planted out, and pinched back before  
July 1, will make nice plants for next  
year's blooming. The plants that have  
already bloomed should be pruned  
back almost to the hard wood, and if  
wanted for early forcing next season,  
should be potted up and grown in pots  
plunged in frames outside through the  
summer, for pot-grown plants force  
much more readily than those grown  
in the open field and potted up in the  
fall.

### Lilium Speciosum and Auratum.

The flowers of these lilies are very  
useful all through the summer season  
and they often fill a want when nice  
flowers are in demand. While they  
are good subjects for out-of-door  
planting and are very decorative in  
the garden, yet if wanted for cut  
flowers, the blooms produced outside  
do not compare in quality with those  
grown in the houses. Bulbs started  
at this time will bloom in August, giv-

ing blooms at a period when there  
is little but the coarser outside flowers.  
They are very easily grown either in  
pots (one bulb in a 6-inch pot) or in  
boxes, six inches apart, and during  
the summer months there is always  
room in the houses to grow all that  
may be needed. We prefer boxes  
about six inches deep to pots, for they  
are more easily cared for and do not  
dry out as rapidly during the hot  
summer days. After the bulbs have  
been planted they should be kept dark  
and cool for a week or ten days until  
root action has started, when they  
can be brought into strong light. Aphis  
are as partial to these as to the other  
lilies, and a careful watch for these  
insects must be continually kept up.  
Constant fumigation will keep them  
down, and, if as sometimes happens,  
a cluster of the insects gathers on a  
bud and the fumigation does not get  
rid of them, rub them off with a piece  
of cotton or soft cloth. *L. speciosum*  
can be obtained in both the pink and  
white shades, and *L. auratum* is the  
beautiful large white lily banded with  
yellow and with brown spots. This is  
an extremely showy variety, and one  
of the most beautiful of the lily family.

### Planting Out.

By the first of May much of the  
hardier stock can be planted outdoors  
in most all of the different sections of  
the country. Carnations and violets  
should be planted out as early as pos-  
sible with safety, for it will be of great  
advantage for them to get a hold in  
the soil before the warm, dry days ap-  
proach. A little planning is a great  
saving of labor in getting the plants  
into their summer locations. Plant-  
ing in rows sufficiently far apart to  
work either with a wheel hoe or cul-  
tivator is far preferable to planting in  
blocks, where the labor must be done  
entirely by hand hoes, making the  
labor expense much more. Keep the  
different plants and varieties as much  
as possible together, for at lifting  
time it will be far more expeditious  
to have each kind by itself, and the  
transplanting in the fall will be per-  
formed much easier and less mistakes  
made if all of a kind are in one loca-  
tion. In setting the plants in the

field, avoid traveling over the ground any more than is necessary. The land has been either plowed or forked over to get into a loose condition, and as it is very full of moisture at this season, packs down again very easily, and if it gets hard and solid is much less retentive of the moisture during the summer season. We have seen men start at one end of the row on their knees and literally wallow down the length of the field, never getting up, and boasting how rapidly they could accomplish their work, and all the time making the ground as solid as a rock and totally unfit for the proper growth of the plants. We have known good gardeners who would not under any circumstances allow men to kneel upon the ground when it was in a moist condition, claiming that it made the ground so hard that the plants could not grow, and it could never be lightened up again. This may seem a small matter, but if followed by a dry summer the difference in moisture held in the soil will be very material.

#### Tuberous Begonias.

The plants that are to be grown in pots all summer as specimen plants should now be shifted into their blooming pots, either a 6-inch or 7-inch pot, according to the robustness of the plant. They should be spaced out so as to leave plenty of room to grow in fine shape. The varieties differ greatly in their habit of growth and the setting of their flower buds, many of the larger varieties, especially those bearing double flowers will need a support to the flower stem, the small green bouquet sticks are especially suitable for this use. Some of the varieties will need to be staked up as soon as the stems attain any length, the flower stalks being very weak. If there is not enough stock for bedding out it is not too late to start the bulbs, but they should be attended to at once. Bulbs started at this time will make nice little plants in June three or four inches high, nice stock for bedding purposes. The seedlings should be potted in two and one-half-inch pots as soon as they have two or three well-defined leaves, and kept moving right along so that they can be of good size in late summer. It is not expected to get much of a plant the first year from seed, but to produce a bulb for next year's blooming.

#### Gloxinias.

There should be plenty of room now to give these plants the room which they require. They should be potted now in the blooming-sized pot, which will vary according to the size of the bulb and plant. They should be spaced on the bench so that the leaves do not touch, and with room enough between the plants so that they can be watered without wetting the foliage, for the leaves will spot if water stands upon them. Careful watering is one of the great factors in the culture of gloxinias. To grow them successfully the hose had better be dispensed with entirely, and the watering can be depended upon. They will not stand over-watering at any time, and the plants will not all grow alike or need the same amount of water, so they will have to be looked over very carefully and only those that require it should be watered. The seedlings should be potted as soon as they are

large enough to be handled and at about the same depth in the pot which they have assumed in the seed bed.

## THE RETAIL TRADE

Conducted by Robt. Klft, Philadelphia, Pa.

#### Hugh Seales, Birmingham, Ala.

The beautiful display of plants and flowers which we illustrate was made in the store of Hugh Seales in the City Hall Building on Nineteenth street, Birmingham, Ala. The stock displayed was grown by Mr. Seales in his greenhouses, and was of the best quality, and the illustration clearly shows that the southern florists are thoroughly up to date and that the quality of the stock and the store compare favorably with the larger northern cities.

#### Rocklin & Lehman's Window Display.

The window display which we illustrate was a beautiful arrangement of plants in the store of Rocklin & Lehman, Sioux City, Ia. Lilies were, of course, the principal plants, but they were surrounded by finely-grown specimens of azaleas, spiraea, hydrangeas and bulbous stock, arranged in baskets and the shelves draped with paper. A display of stock of this class is a most important feature in a store at such times, for while the picture was taken on Friday night not a plant of any kind was left in the store on Saturday night, and in addition to those in the window the store was banked with lilies and blooming plants.

ing of a florist's business. The rich and subdued colorings blend with the plants and flowers and the great plate glass mirrors paneling the walls reflect the brilliant colors of the flowers in a never ending vista of bloom. It is said to be one of the most magnificent flower stores in America. A good illustration of the new store appears in our issue of April 29, page 716.

#### Gates Ajar.

SEE SUPPLEMENT WITH THIS ISSUE.

Among the many flower designs executed by the trade, especially where a large effective arrangement is desired, the gates ajar has, ever since it was first conceived, been very popular, for it represents a sentiment that is so easily understood by all. It is a design that is capable of so many different ways of arranging that the florist need never duplicate his work, and with any artistic ability has an opportunity to execute a beautiful floral emblem. The frames can be obtained in different forms; some to represent the posts upon which the gates are hung, others with the simple arch, some with the broad steps at the base which represent the path ascending to the gates, and others with the base arranged as in many of the larger floral pieces forming a beautiful foundation for the design. With the posts and steps the form must of necessity be adhered to very closely, and the flowers used be of short stems, but with the arch and plainer base the arrangement can be of a much looser and artistic nature. Many customers prefer the former, with the posts distinctly outlined and

INTERIOR VIEW OF HUGH SEALES' STORE, BIRMINGHAM, ALA., APRIL 12, 1911.

#### Pellicano, Rossi & Co.'s New Store.

The new store of Pellicano, Rossi & Co., "The Flower Palace," at 123 Kearny street, San Francisco, Calif., which was opened April 17, was the center of attraction for the flower buyers of that city during Easter week. The store is beautifully designed and especially convenient for the conduct-

the broad walk and steps at the base made very distinct, for this more fully meets their ideas of the gates and their approach, but this compact arrangement does not allow of the use of so large a variety of flowers, for they must necessarily be of the smaller flowers that will arrange closely. We much prefer the lighter and more ar-

tistic arrangements where the outlines of the frame are not too closely followed, and which permits of the larger and more prominent flowers and make it possible for the florist to arrange them in a more artistic manner with the accompaniment of beautiful ferns, which give him the opportunity to show his individuality in floral work. The gates must of course be made compact, for it is necessary that they clearly and definitely show what they are intended to represent, and care should be taken that they are fastened ajar by a strong, stiff wire. The closed gates are not the idea intended, in fact, just the opposite is the sentiment designed for this floral piece to convey. The base gives the designer ample opportunity to display his best ideas and can be made very effective. Any of the prominent flowers and greens can be employed and beautiful arrangements can be made with long stemmed lilies, roses and other flowers backed with nice greens or cycas leaves, which make an effective background.

With this design many of the beautiful accessories of the florists' trade can be employed. It seems to be peculiarly adapted to the use of the doves and a proper arrangement of the lighter ribbons and chiffons are a great addition, but care must be taken that this feature is not overdone and that there is not too much "millinery," as it is expressed by some. The design which we illustrate is a beautiful example of the gates ajar, showing the use of the large callas with roses and carnations, lightened with the smaller marguerites, Roman hyacinths, freesias and sweet peas and shows what an artistic arrangement can be made of this large floral design.

#### Approaching the Finish.

Easter marks the last turn in the yearly course and the entering of the homestretch, with one of the great floral days but a short ways ahead, and then the month of June, which to the majority of florists is the best month of the year, for at this time are the sales of bedding and other plants for the grower who makes this one of his specialties, the weddings and school graduations for the retail florist and the consequent large demand for cut flowers of the rose and carnation growers, and to add to all this our old friend, the coal man, is not getting any part of the money that is earned at this season, for old Sol is furnishing not only the necessary light, but the heat also. But this is the season of hard work and long hours, for which ever way one may turn he can see something to be done. The first thing after Easter is to clean up the houses and make room for the large quantity of stock that has, in all probability, been demanding more room. The bedding plants should be immediately spaced out so that they may be shapely plants by the last of May or first of June, and those that are becoming pot-bound should be potted up that they do not become stunted or checked and the young stock of seedlings potted and cared for.

The stock for Memorial day will this year have to be attended to as early as possible. Easter coming in the middle of April leaves but six weeks to Memorial day. While this great day for the floral trade is everywhere known as rather a cheap day yet it

comes at a time when the expense of growing the flowers is comparatively small, and there are also quantities of outside stock, that is inexpensive, and can be used to great advantage, and there is no reason why small orders cannot be filled cheaply. The florists who are located near cemeteries will have great demands for bouquets and bunches for one to two dollars, and must have a large supply of the cheap-

taken and grown on for stock plants during the summer. There is still time to root Begonia Gloire de Lorraine and the poinsettias should now be started enough to make the first cuttings. The propagating bench should be full of young cuttings up to the first of June in preparation for the coming season.

The decorative stock will also demand attention, it has been growing all winter in the same soil and with the

EASTER WINDOW DISPLAY OF ROCKLIN & LEHMAN, SIOUX CITY, IA.

er stock. It will not do to depend too much upon the out-door stock for a backward season will check all growth except what is under control and it therefore pays to be forehanded and have a good stock in the greenhouses. Stocks make a splendid flower for this time of the year and spires are particularly good both for cut flowers or for plant sales. Candytuft and feverfew are also very useful in the cheaper work.

The planting out of the carnation and violet stock should be done at the earliest possible moment. These plants especially the carnations are not to be out very long, and they need every day that is possible in the open to make them strong and sturdy for the production of good blooms during the winter. These plants, if they have been properly grown and hardened off a little preparatory to being planted out, will stand considerable cold weather and it is much better to get them out while the ground is good and moist that they may get a good hold before the hot days come on. Besides, it will be but a short time before the other work such as the bedding stock and the planting of the more tender plants will be on hand, and the hardier stock should be planted and out of the way.

The propagating bench should be full all the time, the chrysanthemums ought now to be rooting and any late stock of which there is danger of being a short supply can be propagated now. Any geraniums of which there will not be any stock left, that is the varieties of which all the plants will probably be sold, a late cutting can be

approach of warmer days and more congenial weather will start into growth and should be given every encouragement to make new roots and foliage. Many of the palms are now approaching the best growing season and will need to be repotted. This should be done at the earliest opportunity, for if put off until later is sure to be deferred until the first of July, when it is too late to get the best results. The Boston ferns and its many sports should be broken up and the stock planted out in the benches for summer growing. Be sure and give these plants a nice new soil and they will quickly take hold and if grown warm and in a humid atmosphere will make fine plants to lift and pot up in early September. Some of the more decorative forms do not stand the bench treatment and subsequent lifting as well as the old Boston and are more successfully grown in pots during the summer, but these will need new soil and should be potted up at once. There is always plenty to do at this season and the successful grower is continually planning to get everything done at the proper time and out of the way before the work that is to follow is thrust upon him.

NEW CASTLE, PA.—John Campbell has opened a flower stall in the Borough market.

OWEGO, N. Y.—On July 1 the floral business conducted under the name of A. J. Thomas, on Main street, for a number of years, will be transferred to the two sons, Joseph and Albert.

## Mothers' Day.

"All that I am or expect to be, I owe to my mother," said Abraham Lincoln and this sentiment has found echo in the heart of everyone, and with such a feeling in every breast it is not wonderful that a day set apart on which to commemorate the memory of one's mother by the wearing of flowers should have been adopted so generally and that the growth of the commemoration of the day has been phenomenal so that Mothers' day has become one of the flower days of the year. This most beautiful idea and sentiment originated with Miss Anna Jarvis of Philadelphia, who observed the first anniversary of her mother's death by wearing white carnations, her mother's favorite flower. The happy thought occurred to her that all mothers, whether living or dead, should be honored on some day and that the second Sunday in May, which was the anniversary of her mother's death, should be set apart and called Mothers' Day. In furtherance of this plan she began writing letters to churches, societies, people in official life, the public press and all whom she thought would interest themselves in the movement of celebrating the day when every man, woman and child was to honor the "best mother in the world, their mother." This was indeed a great work, but Miss Jarvis, in her love for her mother and prompted by the beautiful sentiment, labored indefatigably to found this day as Mothers' day.

In 1908, the second anniversary of her mother's death, the seed which she had so fondly and laboriously planted made rapid growth, and Mothers' day was recognized all over the country. In that year THE AMERICAN FLORIST called the attention of the florists of the country to the proposition for the commemoration of Mothers' day, and of the custom of wearing a white flower in honor of the wearer's mother, which should appeal to every man and every manly boy and it was hoped and the duty of the florist to see the idea extended. Cities, towns and organizations immediately adopted the plan and in some cases official proclamations were issued calling attention to the selected day. While it was the idea of Miss Jarvis that white carnations only were to be worn, yet the plan had been so largely adopted that the supply of that flower in some localities was entirely inadequate to fill the demand and any white flower was used to designate the observance of the day. The following year again we called attention to the growing popularity of the day and of the great benefit which might be reaped by the trade if the plan was extended in the proper way and the reports of the business which was the result upon that day were very gratifying.

Again last year, on the fourth anniversary of the day, we strived to direct the attention of our readers to the observance of the day, reminding them of what could be done on their part toward encouraging the beautiful custom which was being so generally adopted all over the country, and we received many letters informing us of the results of their interest in the work by drawing the attention of the city officials and local press to this movement. This beautiful idea should be encouraged by all, for not only is it of great commercial benefit to all those engaged

in the growth and sale of flowers, but it is such a beautiful idea expressing the deepest sentiment that it is immediately taken up and appreciated by all. Other trades have endeavored to create a demand by advocating the wearing of buttons and other insignia on this day, and the collecting of money for poor mothers and for endowing beds in hospitals, thus bringing

Miss Anna Jarvis.  
Founder of Mothers' Day.

in commercial features that Miss Jarvis greatly deplores, for her idea is to simply remember mother with nature's beautiful product and is not at all in sympathy with the commercial features.

## Floriculture for the Wayward Boy.

PROFESSOR SARGENT ADVOCATES THE  
FLOWER'S BENEFICENCE.

The wayward boy, the boy with criminal or mischievous tendencies, may be served with greater advan-

Mrs. Jarvis.

tage to himself and his future development by being apprenticed to a gardener or florist than by going into any other line of work, according to Professor Charles S. Sargent of Harvard.

This opinion, states the Boston Post, coming from the famous director of the Arnold Arboretum and professor of arboriculture at Harvard, draws attention to a phase of occupational influence on the individual that has just been touched upon by Luther Burbank, the California plant wizard, who has taken a boy addicted to truancy and proposes to reform him by bringing him up among flowers. Though the California inventor of new and strange fruits and plants has mapped out a course of instructing the boy in botany and teaching him the processes of plant culture, Professor Sargent holds that as far as he can see there is no regular regime to be used in such cases.

According to Professor Sargent the mere fact of working among plants and growing things cannot help but affect such a boy for the better. Professor Sargent's views of the good influence of plants and flowers is shown in a practical way by his custom yearly of throwing open to the public the gates of his beautiful estate of Holm Lea in Brookline on occasions when the rhododendrons and other flowers in which he takes delight are at their best in blossom and color. Last year, as was announced in THE AMERICAN FLORIST, issue of December 10, 1910, page 978, he was made the first recipient of the George Robert White medal, which is, according to the terms under which it is given, "awarded to the man or woman, commercial firm or institution which has done most for the advancement of horticulture during the year, in its broadest sense."

With such an intimate knowledge of plants and flowers and of their influence on persons who live among them, Professor Sargent says of the possibility of reforming boys by garden life:

"There is no doubt, I think, that the occupation in which a man engages reacts upon his personality, and I believe that gardening has an elevating effect upon the men who are employed in it. I have been told that a surprisingly large percentage of murderers are men who have at one time or another been employed as butchers. Whether this is true I do not know, but somehow it does not surprise me, since the natural reaction of butchering is brutalizing. That is an extreme instance of occupation, but I might say that at the other side of the proposition is gardening in one form or another. No man can make a success as a gardener unless he loves his plants.

"This is a fact that is even more clearly apparent among florists, for it seems to me that the man who does well as a florist must be very fond of flowers, and that this fondness grows upon him, so to speak, with the years. It would seem clear enough, then, that a boy thrown into work among growing things would be brought under a better influence than in almost any other occupation that he might follow. The reported experiment of Mr. Burbank with the truant boy might seem to be along this line. In fact, I think the principle has come to be widely recognized, at least in its effects, since I understand that in many of our reformatories and similar institutions for

wayward boys the inmates are encouraged in planting individual gardens besides being made to work in the vegetable gardens. Any association with plants and flowers cannot fail to have an elevating effect on the human mind.

"Although I do not suggest any set form of associating wayward boys with particular sorts of flowers or vegeta-

#### Gladiolus Bulb Rot Investigation.

About three years ago the Department of Plant Pathology at Cornell University started some investigations on the bulb rots of gladiolus. This work was done by Errett Wallace, a graduate student in the department who undertook the investiga-

some practical method of controlling the disease.

As plant pathologist for the Society of American Florists, the writer finds that \$50.00 has been set aside by the society for his use in carrying on investigations. With the approval of President Asmus of the society, this sum is to be used toward paying a young man in the department to continue these investigations on gladiolus bulb rots so well begun by Mr. Wallace. This work is now under way, and Mr. Fitzpatrick, who is doing the work is very anxious to obtain specimens of diseased gladiolus bulbs from growers who will be kind enough to contribute. We shall also be glad to visit any growers within reasonable distance to look over the disease in the bulbs and select material for study and talk over the problem with them, if they are willing to pay the traveling expenses. There are no funds for this investigation beyond that contributed by the Society of American Florists. Moreover, the writer feels that if gladiolus growers believe the investigation and solution of these bulb rot problems would be worth anything to them, they should be willing to bear at least a portion of the expenses for such investigations. The Department of Plant Pathology is now making it a general practice to undertake no investigation of any plant disease, unless the growers of the crop are sufficiently interested to co-operate financially in carrying on such investigations. The state has provided a good laboratory equipment and facilities for carrying on such investigations, together with competent men to oversee the work, but that such investigations may be properly and promptly carried on, it is necessary to have one or more men devote their entire time to each problem under the direction of the professor in the Department of Plant Pathology. The salaries for these men, which are relatively small, range from \$500 to \$750 a year, where the men are employed continuously throughout the year, and the necessary expenses for traveling range from \$250 to \$500 per year, all being met by growers or associations of growers. Some 10 to 12 such co-operative arrangements are now in operation, and no less than 30 different disease problems are now under investigation.

WINDOW BOXES KEPT LOW TO AVOID SIGNS.

bles, I think that as a general proposition, if a wayward boy were apprenticed to a good gardener his chances of growing up a useful citizen would be much greater than if, for example, he ran away to sea or became a butcher. I am mentioning these two occupations simply as instances of work that would not tend to reform the boy. Of course it is likely that some forms of gardening would have a more direct and active effect on such a boy than would other forms. Some persons, for instance, say that the florist, the man who specializes in flowers, is brought under more esthetic influences than the man whose business is the raising of vegetables. That is largely a matter of individual preference, just as is the fact that some persons cannot abide the odor of certain flowers.

"Regarding the ways to interest a wayward boy in flowers an absorbing question is opened, since a liking for flowers is not generally found in children. The fondness for flowers is something that in most persons comes later in life. Still, if a wayward boy were set to work under the direction of a good gardener who would impress upon him regularity of habits together with a working knowledge of plants and their culture, I think it would go far toward putting the boy on the right track in life."

HARTFORD, CONN.—John Brodrib has opened a new flower store at 909 Main street which is well stocked with plants and flowers.

SPRINGFIELD, O.—The city has accepted the offer of the Florists' Club to lay out, plant and care for a park on the esplanade. E. S. Kelly, a public-spirited citizen, offered to furnish the soil and prepare the park, and the club will take care of beautifying it.

tion as a thesis for his master's degree. Mr. Wallace continued these studies for about a year and a half and made good progress toward the solution of the cause of those various bulb rots. He isolated and studied three or four different fungi and proved that they were in each case the cause of different types of bulb rots. However, for the lack of funds we were not able to continue these investigations further, and while Mr. Wallace has quite clearly shown that there are at least three different kinds of bulb rots of the gladiolus in this country and that they are in each case caused by a different fungus, it has not been possible for us to make further studies on these parasites to determine just how they get into the bulbs, or to carry on experiments to determine

MARGUERITES AND GERANIUMS IN WINDOW BOXES.

The work on the gladiolus bulb rots is now under way and can be carried along until autumn of this year on the funds in sight. A. E. Cowee, of Berlin, N. Y., a well-known gladiolus grower, has in the past contributed very largely toward these investigations by paying the traveling expenses of Mr. Wallace in connection with the work and in contributing diseased and healthy bulbs for the investigation. He has again come forward this year and offered his further co-operation along these lines. Much credit is due Mr. Cowee for having made possible the work already done on these diseases. The enthusiastic support which he is giving in continuing this work this season is most gratifying, and we trust that every gladiolus grower will see his way clear also to assist in carrying out this work. You can all materially aid us by sending in diseased bulbs for examination. Address all material and correspondence to the undersigned.

### How to Treat Carnation Soil.

ED. AMERICAN FLORIST:

We would like to ask you about carnation soil. We manured ours very heavy about Christmas with cow manure and are thinking of not changing it, but simply heap it up in ridges in the middle of the beds, which are solid, and lime the dirt thoroughly as we work it up, also the sides of the beds. Any information you can give will be greatly appreciated.

J. V. L. N.

North Carolina.

We conclude by the reference of J. V. L. N. of having manured the soil very heavy about Christmas with cow manure, that carnations are now growing in the soil, and it is the intention of not renewing any of the soil for next season's planting, but after these plants are taken out, to lime the soil and use it for another season. We believe in fresh soil for each season's growth, after the soil has carried a bed of plants for nine or ten months it cannot be expected to have much life. Any manure applied to the soil at Christmas time will be about used up after four or five months' plant growth in it, unless it was put on heavy enough to do harm to the growing plants. The application of lime to the soil can very easily be carried to the extreme. A small amount is beneficial to set the ingredients of the soil working, but an overabundance is more likely to impoverish it than to do it any good. If we had the directing of this case, we should have some live fresh soil and well rotted cow manure got together now, or as soon as it could be worked, and then after the plants now in the bed are taken out, remove some of the old soil and replace with the fresh. It has always been our experience where the same soil has been used from year to year, not only with carnations but with roses and other plants, that there has been something lacking to bring out the plants' best efforts, and that additional manuring and work has had to be resorted to more than offset any saving that occurred in not renewing the soil before planting. The enquiry is not very clear on some of the points, and if we have come to the wrong conclusion, and J. V. L. N. will write again, we will be pleased to answer anything he wishes to know as clearly as possible.

C. W. JOHNSON.

### Window and Porch Boxes.

The boxes of plants for windows and porches are great decorative features in many of the cities and towns and can be made very beautiful additions to a residence if properly filled and cared for, and is a remunerative part of the business to all the florists dealing in plants. The boxes, of course, will have to be made to fit the location, but as the plants are invariably planted very closely together, in fact, generally crowded, when first set out, and as the locations are generally very trying for plant culture it is necessary that the boxes be deep enough to hold soil to carry the plants through the season. They should under no circumstances be less than six inches deep and six inches in width inside measurements and a depth of nine inches is far better, for there should be at least an inch of good drainage in the bottom, a good depth of soil and an inch of clear space at the top for the watering. There should be plenty of holes in the bottom and they should be at least an inch in diameter to insure the necessary drainage to get good results. The best wood of which to make the boxes is cypress or oak, for they are far more lasting and in the end will not cost as much as the cheaper grades of wood, but many will not care to meet the expense of cypress or oak and the boxes of spruce or hemlock will have to suffice. Hemlock is better than spruce, but will require a much heavier coat of paint, for the wood splits and checks badly. The cheaper woods are

ferable and in many cases the dark reds and drabs are far better than the green. While this may make but little difference at the latter end of the season, when the vines have grown heavy enough to entirely cover the box, yet, for the first month or so the box is generally plainly visible and it is often these little details that make the effort successful and a customer satisfied. Be sure that the boxes are securely fastened where they are to remain, for after the plants have grown and require constant watering they are very heavy and present quite a surface to high winds, and in the case of window boxes it is extremely dangerous to leave them where they might be blown off or drop. It never pays to take any chances of this kind, and if the boxes have become at all decayed it is better to have new ones than take any risks of their not being secure throughout the season.

### PLANTS FOR BOXES.

The selection of plants for the boxes will depend greatly upon the location and the surroundings, for some of the boxes will be in bright, sunny locations where blooming plants can be effectively used, while others will be in very shady positions where they will receive the rays of the sun but a few minutes or perhaps not at all, and the blooming plants that require full sunlight will not be at all adapted to such a location and other plants will have to be employed, and in the shadiest place palms and other decorative stock with ivy will be the only serviceable

VERANDA BOX AT THE HOTEL PLAZA, NEW YORK.

Kentias, Phoenix, Ficus Pandurata and Ivy in Terra Cotta Box.

often charred on the inside to prevent rot. This can be easily done by coating with kerosene and lighting it and as soon as well afire the box turned over or covered with dirt.

In painting, the dark green seems to be the favorite color, but a color more in harmony with the house is often pre-

ferred. The one necessary requisite for good window boxes is nice trailing vines, and in the majority of cases the vinca is the plant most desired, for if good, sizable plants are used it rapidly covers the box and makes a very beautiful showing. Probably the next of importance in the

vines are the ivys, which can be used in the shadier locations. The German ivy is a very rapid grower and soon covers the box and hangs in long strings down in front, the English ivy is a much slower grower and must be planted closer, but is the best of all the vines for the shadiest places. *Thunbergia alata* is a very desirable plant for the front of window boxes, for its trumpet flowers add considerably to the appearance of the box. This vine should be placed in the half shady places, for it is frequently attacked with red spider if in the bright sun, and if so placed should be syringed frequently. *Nasturtiums* of the tall growing varieties are often used in the cheaper arrangements. *Lobelia gracilis* is another fine plant for the front of the boxes, but will not grow as long as the other vines mentioned. The ivy geraniums are among the finest of the trailing plants and make a beautiful showing in sunny locations, but care must be taken in using them that the colors do not clash with those in the box. These plants deserve to be more generally used than they are, but one of the reasons that they are not is the inharmonious arrangement of colors. *Tradescantia* is very useful and will grow anywhere and the variegated forms are very beautiful additions.

The plants for the back of the box will greatly depend upon what the customer is willing to pay, and the variety of stock that can be used is almost innumerable, yet is also dependent upon the location and suitability. First and foremost will come the geraniums, which will be used alone with the vines or in combination with other blooming plants. *Marguerites* are especially adapted to window boxes and if well cared for will bloom all summer. *Brompton* stocks, *calendulas* and a number of the everblooming annuals can be used to fill in the boxes. In the shadier locations *fuchsias*, *begonias* and ferns are the better plants with some of the light-colored foliage plants such as *crotons*, and if not too shady, the *coleuses*. In the real shady places the palms, ferns and decorative plants with *crotons* and other variegated foliage will have to be depended upon.

#### SOIL AND FILLING.

The soil that is used in window boxes must be of the best, just as good as is used in the greenhouse benches for rose and carnation culture if the best results are desired. It will not do to dig up any old garden soil and expect to have a beautiful display all summer. There should also be added to the soil a little ground bone to carry the plants along after the plant food has become exhausted. The smaller boxes can be filled in the greenhouse and carried to their places and fastened there, but many, and especially the larger ones, are in locations where they cannot be placed after they are filled and must be planted out after being secured. This work must be performed by a very careful workman, especially in cities, and also one who is extremely careful about spreading dirt. This may appear a small matter, but is very important in some places. Where the boxes are planted in their permanent locations it is better to have two men, one who can stand and see the box and direct the other in his work. After the boxes are planted they should receive a good watering, not just enough to wet the top of the soil, but a heavy watering to

wet the box clear through and settle the soil thoroughly around the plants. The care of the boxes through the summer will generally devolve upon the owner, but in order that they may be an object of beauty through the season, a little instruction may be necessary and should be freely given. If they are placed where the sun shines upon them all day they will, of course, need copi-

#### Greenhouse Management.

Paper read by C. L. Washburn, Hinsdale, Ill., before the joint meeting of Illinois Horticultural Society and State Florists' Association at Champaign, Ill., February 7, 1911.

In giving my ideas on greenhouse management it must be understood that they refer to American Beauties, roses, carnations, etc. I am not familiar with the growing of palms, ferns and that class of plants. How-

VERANDA BOX AT THE HOTEL PLAZA, NEW YORK.

Palms, Foliage Plants and Ivy in Terra Cotta Box.

ous waterings, and if on a dusty street, to be syringed often. The one who fills the boxes should study the conditions and instruct those who are to have the care of them in the necessary work. While the job is practically finished when the boxes are filled and placed in their location, yet the work is going to be judged on how they look all the season and it is therefore necessary that these things should be given consideration.

OGDEN, UTAH.—The business at Easter was about the same as last year, reports F. J. Hendershot, with prices no better and the supply of both plants and cut flowers was equal to the demand. Lilies were the most desired plants and roses were first choice in cut flowers. California growers sent in thousands of callas, which were shipped in cans containing water and enclosed in other cans.

SPRINGFIELD, MO.—The Easter trade, according to W. A. Chalfant, was about the same as last year. The supply of cut flowers was greatly deficient, there being a shortage of everything and there was a great scarcity of lilies in pots. The prices were about the same as in previous years. Easter was too late for tulips, hyacinths, daffodils and other bulbous stock and pot lilies were in good demand. Cut lilies, roses and carnations had a good call, in fact, everything in the flower line sold out clean. We even sold sprays of cherry blossoms.

ever, the management is about the same regarding the usual care of watering, ventilating, etc. I will suppose at the beginning that the greenhouses are well built and of modern construction. The heating is the first subject we shall take up—it is absolutely necessary that a good circulation is obtained of either hot water or steam. The pipes must be so arranged that they will easily drain back to a tank whence they can be pumped into the boilers. The circulation is the main foundation plank of successful heating as either hot water or steam with perfect circulation will do better work with a less amount of fuel than when the returns have to be forced around by pressure. The boiler capacity in every greenhouse heating plant should be at least 50 per cent larger than what was figured as the rated capacity required, as the most economical way of firing a boiler is to burn an even fire without forcing it. If the boilers have to be forced to their full capacity, a large amount of heat escapes up the chimney. The heating plant and the greenhouses themselves should be thoroughly overhauled and all repairs made during the summer months. All broken glass should be replaced and the woodwork thoroughly painted. If any of the outside sheathing has rotted or broken away, it should be repaired and made snug and warm. The drain pipes should be carefully looked after to see that none are broken, for greenhouses

require a good drainage in order to keep good fresh air under the benches.

We now come to the matter of planting the houses. When removing the old soil from the benches, it is best to thoroughly clean and whitewash the benches if they are of wood. Have the benches well repaired so that all will be lined up in good shape. The new soil is one of the principal features of the success for the coming season's

bushed out with three to five branches. It is best to have the field plants all benched by the middle of August. In roses, there is considerable controversy over which is best to plant—the own root or the grafted. From our own experience, we find that grafted plants produce the best results in Bridesmaid, Brides, Pink and White Killarney and Richmond. However, the grafted plants require more careful attention

time the roots will be working towards the surface and scratching must stop. This is a very important feature. It is better to spend a little more money on heating and give the plants plenty of fresh air than to keep the ventilators closed all night or with only a small crack of air on. Our plants will be less liable to mildew if grown with plenty of air, also thrip and other insects can be more easily gotten rid of from good strong healthy stock than from weak plants. The steam pipes should have a little dab of sulphur put on twice a week as soon as steam is turned on. We found a very good preparation for keeping thrip and other insects down, to be a solution consisting of one pound Paris green, five pounds brown sugar, 20 gallons of water. This preparation should be sprayed on the plants when the sun is not shining, or late in the afternoon, and left on until the next syringing is done. A few applications will suffice to keep the plants free and it is a very cheap preventative. A little later it is a good idea to paint the pipes with nicotine solutions. This fumigation should be kept up the whole season, also the putting on of a light dose of sulphur on the pipes should be kept up. An ounce of prevention is worth a pound of cure and this especially applies to plant pests and diseases. The care of the plants in tying up should commence as soon as possible as the careful training of the young growth will be a great help to the future production of good stock. Roses usually take about four months on own root stock and three months on grafted stock from the time of benching before we can commence to cut any flowers. It should be our idea to get a crop of flowers in September and again the last of October. This will bring our plants in crop for the holidays. It takes four to six weeks between crops in the fall and almost eight weeks in November and December.

If Easter lilies are to be grown, and some flowers are wanted in January, then for that purpose the Formosum lily should be planted, but for Easter itself the Giganteum is the best. Also the latter is the best lily for cold storage purposes. Our bulb stock should all be potted or planted in flats as soon as received and placed outdoors covered with a good mulch. The cutting of flowers should be done twice a day—the main cut will be in the morning.

BOSTON FERNS AS WINDOW BOX PLANTS.

operations. This soil should be mixed the previous fall and left in a pile all winter so as to get well mellowed. When the soil pile is being made, it should be composed of at least one-third well rooted manure and one-quarter good fibrous sod—the balance good block soil with about 20 per cent of clay in it. This should be thoroughly mixed both when put up in the pile and again when ready to spread on the benches. A soil pulverizer should be used if possible. This will give us a splendid bench soil for the growing of either roses or carnations. Our plants for own use should be the very best that can be procured. Our own firm has found out from years of experience that the very best young plants that we can grow we must save for ourselves. We have made a practice of keeping track of the best blooming plants in the benches of both roses and carnations and propagating exclusively from that stock. By carefully following this plan, we have raised the flowering quality of our plants fully 10 per cent over our former average.

I want to impress this point on every greenhouse man that the very best young stock possible is the cheapest in the end and the stronger and larger the stock is at the time of planting the better the results will be that are obtained. As a general rule, early planting is always advisable. With roses, replanting should start by June 1, and be completed by not later than the middle of July. In a large place, some replanting is done in April and May in order to commence cutting new stock in August. With carnations, I would advise the planting of part of the stock indoors. Those plants that have been grown in the field should be well cared for and constantly cultivated. Pinching in the field is necessary so that our plants will be well

during the cool nights of August and the early fall. The fires should be started just as soon as the night temperatures drop to 50°, as otherwise mildew will form. The wood and foliage of the young grafted plants is much softer than similar plants of own root stock and in consequence is more susceptible to a cold night. In the early stages of growth in the benches, we must remember that our young plants are simply a large family of children and they require the most careful attention to develop good strong bodies. We must be careful as to their food and drink, seeing that they have plenty of water, good food and plenty of fresh air. The soil around the plants in summer should be scratched over with a hand scratcher and by the last of August a light mulch of manure should be put on the benches to keep the soil from baking and cracking, for by this

M. H. WALSH'S RAMBLER ROSE GARDEN AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 25

The flowers should be carefully sorted and graded and placed in jars of water in a cool cellar. In these days when ice can be put up so cheaply, it is advisable where the cut of flowers is quite large to have an ice house with a flower cellar underneath. Ice can be cut and stacked away in an ice house for from 50 cents to \$1.00 per ton depending upon the distance it has to be hauled. An ice house holding 100 tons of ice well packed with hay will carry through the whole season if not opened. The saving of flowers and improvement of quality by storing the flowers in an ice chilled cellar, will pay for the ice several times over. An increase of glass beyond capacity of taking care of same should be avoided. The increase of boiler capacity should always be first considered, also the care of the new stock—the means of handling the product and various little details connected with the business should be perfected before new glass is built. A moderate amount of glass will bring better returns in proportion than a large amount imperfectly cared for. A too rapid increase of glass should be avoided as it is the rock on which so many florists have stranded.

#### Easter Business.

MERIDEN, CONN.—The Blatchley Co. advises us that the increase in the Easter business was more than 50 per cent over the previous year. The prices were about the same, and the stock of both plants and cut flowers was large enough to meet the demands, there being some plants left over owing probably to the bad weather. Flowering plants sold well, there being but little call for ferns and decorative stock. The cut flower buyers wanted carnations, sweet peas, gardenias and violets, with not so large a call for roses. There was a great demand for sweet peas and violets there not being near enough to fill all the orders.

Snow storms and cold weather caused the loss of a large amount of business and also made deliveries difficult.

AERDEEN, S. DAK.—The Easter business this year was considerably less than that of 1910, about 40 per cent, says Richard Strohmeier. The prices were about the same as last year, and there was plenty of stock of both plants and cut flowers to meet the demands. The large plants sold slowly, the call being for the smaller and cheaper grades. Roses, lilacs, violets and tulips sold the best in cut flowers, and carnations were the slowest sellers. There seemed to be a considerable shortage of money as was made evident by the small number of cash sales. The gale which blew Friday and Saturday may have had some effect in cutting down the sales.

TERRE HAUTE, IND.—N. B. & C. E. Stover report that the sales at Easter show an increase of 25 per cent over the preceding year. The supply of cut flowers was about equal to the demand with prices about the same, the largest call was for carnations, cut lilies being in small request. There could have been a great many more plants sold had they been on hand, at least a third more, the call for hyacinths and spring blooming plants was the greatest, while lilies did not seem to be greatly desired. The high wind of Saturday was a disagreeable feature, making safe deliveries difficult, but otherwise the weather was fine.

DENVER, COLO.—The Park Floral Co. states that the sales at Easter will show an increase of 10 per cent over the previous year. The prices were no higher than in 1910, and the supply of plants was equal to the demand and the same was also true of cut flowers, with the exception of carnations and American Beauty roses. In the plants, roses and lilies sold well, but azaleas were a little slow. Carnations were the popular cut flowers and had the largest call, bulb stock moved very slowly.

SAVANNAH, GA.—A. C. Oelschig & Sons report that the sales at Easter this year were about the same as last, with prices no better. Easter was very late and all the azaleas and bulbous stock were through blooming, which made the supply of plants very short and any white flowering plants would have sold had we possessed them. The supply of cut flowers was good and roses, carnations and lilies were the ones most desired.

GAINESVILLE, GA.—J. E. Jackson says that there was an increase of 25 per cent in the Easter trade this year over that of 1910. Stock of all kinds was a little short, there not being enough of either plants or cut flowers to supply the demand, and prices ruled a little higher. Blooming plants sold very well and the calls for roses and carnations exceeded the other cut flowers.

PORTLAND, ORE.—About 20 per cent increase over the Easter business of 1910, is the statement of Clarke Bros. The supply of both plants and cut flowers was good, with prices about the same as last year. The only shortage was of violets, which were almost out of season. Plants sold well especially lilies and Rambler roses.

MERIDIAN, MISS.—The demand for all seasonable flowers was much greater this Easter than ever before, writes Mrs. N. G. McKinney, especially was there a large demand for lilies. There is a great need of more wholesale flower stores in the south. A recent death in the family has placed us in a position where there was but little time for business.

HAGERSTOWN, MD.—H. A. Eester & Son state that the Easter business was 30 per cent greater than last year and the prices were also better. There were not enough of either plants or cut flowers to meet the demand and everything sold well. All the blooming plants were disposed of and there was a good demand for all the cut flowers.

PERTH AMBOY, N. J.—Frank Vanderliev has opened a florist store at 201 Main street.

CANNA plants are in good demand.

The first flower trade reference to  
 Mothers' day appeared in the issue of  
 THE AMERICAN FLORIST, May 16, 1908.

The lack of information as to the  
 working of the new law is delaying the  
 shipment of such foreign insecticides as  
 fir tree oil, etc.

The annual report of the Board of  
 Commissioners of Tower Grove Park,  
 St. Louis, Mo., is published in pamph-  
 let form and fully describes the work  
 and expense of maintenance of this  
 beauty spot for the citizens of that  
 city.

The Report of the Dominion Horti-  
 culturist issued by the Canada Depart-  
 ment of Agriculture has been received,  
 which is a detailed report of the yearly  
 work of W. T. Macoun, horticulturist  
 at the Central Dominion Farm, which  
 included the investigation of plants and  
 crop diseases, examination of new fruits  
 and vegetables and experiments with  
 spraying formulas in combating fung-  
 ous diseases and insect pests.

The preliminary prize list of the St.  
 Louis Horticultural Society for the fall  
 exhibition which will be jointly held  
 with the Chrysanthemum Society of  
 America at St. Louis, Mo., November  
 7-11, 1911, is received. Prizes are  
 awarded for plants, chrysanthemums  
 and other cut flowers, floral displays  
 and fruit. Special premiums are do-  
 nated by William Wells & Co., Elmer  
 D. Smith & Co., Jerome Jones, Chas. H.  
 Totty, Henry A. Dreer, The Foley Man-  
 ufacturing Co., Vaughan's Seed Store,  
 Peter Henderson & Co., Lord & Burn-  
 ham Co., E. G. Hill Co., Hitchings &  
 Co. and the Chrysanthemum Society of  
 America. A copy may be had by ad-  
 dressing Otto G. Koenig, secretary.

## American Institute of New York.

The fall exhibitions of the American  
 Institute of the City of New York will  
 be held in the rooms of the Institute as  
 follows: dahlia, fruit and vegetable  
 show, September 19-21; chrysanthemum  
 show, November 1-3, 1911.

WM A. EAGLESON Sec'y.

## Ladies' Society of American Florists.

The President, Mrs. J. V. Phillips ap-  
 points as an introduction committee to  
 serve at Baltimore, the following  
 ladies: Mrs. E. V. Boone, Baltimore,  
 Md., chairman; Mrs. James Glass, Bal-  
 timore, Md.; Mrs. Richard Vincent, Jr.,  
 White Marsh, Md.; Mrs. W. F. Gude,  
 Washington, D. C.; Mrs. J. R. Freeman,  
 Washington, D. C.

MRS. CHAS. H. MAYNARD, Sec'y.

## American Gladiolus Society.

There has recently been organized in  
 England the National Gladiolus Society  
 and I am informed by the secretary, K.  
 Atkinson, Locksheath, Southampton  
 that they are working very much along  
 the same lines of the American Gladi-  
 olus Society, and will gladly co-operate  
 with us for the interest and advance-  
 ment of the gladiolus. I hope to give  
 at an early date further particulars  
 concerning this new society. Now  
 then: Germany and France, and then  
 all together—an international society  
 of the gladiolus is here.

The Henry F. Mitchell Co., Phila-  
 delphia, has offered for our Baltimore  
 exhibition a silver cup, valued at \$25  
 to be awarded for the best 25 spikes of  
 the new gladiolus, Kunder's Glory  
 exhibited in one vase.

L. MERTON GAGE, Cor. Sec'y.

## Mothers' Day.

In the proclamation for Mothers'  
 day by Gov. Shallenberger of Nebraska  
 is this beautifully worded paragraph:  
 "The idea of Mothers' day is not idle  
 sentimentalism. It has been called 'the  
 highest bit of practical sentiment that  
 has ever taken hold of the hearts of  
 men.' A tribute to the mother's love  
 resolves itself into a tribute to the  
 mother's law, and recognition of the  
 mother's law means love for country,  
 for comrades and for God." Gov.  
 Mann of Virginia in his proclamation  
 says "No state is greater than its  
 mothers." Gov. Sloan of Arizona says,  
 "What greater woman is there on earth  
 than one's own mother?" Gov. Norris  
 of Montana adds to his proclamation,  
 "Any movement that tends to add an-  
 other star to the crown of glorious  
 motherhood has my sincerest good  
 wishes"

"The Mothers' day movement is for  
 all men, women and children of mother-  
 loving hearts. Send your name to the  
 founder of the day and in honor of a  
 good mother help to make Mothers' day  
 and its work world wide." "Live this  
 day as your mother would have you  
 to live it." These are the words and  
 sentiments of the founder of Mothers'  
 day.

## Our Supplements.

Subscribers should see that they get  
 copies of the fine supplementary illus-  
 trations showing high grade design and  
 decorative work. These fine supple-  
 ments should be carefully preserved,  
 as they mean much to the retail flor-  
 ists in dealing with their customers,  
 illustrating as they do the various  
 kinds of work that the everyday florist  
 is called upon to perform.

The papers in which the supplements  
 appear should be likewise preserved,  
 as they contain much valuable data  
 with regard to these special illustra-  
 tions. Subscribers should see that they  
 get every issue, as otherwise they may  
 miss some of this high-grade work.

## American Rose Society.

### REGISTRATION OF AMERICAN ROSES.

At the Boston exhibition it was sug-  
 gested that a registration and record  
 of all the roses that had been origin-  
 ated in America for the last twenty-  
 five years be made by the American  
 Rose Society and to embody the list  
 as a permanent record in the next bul-  
 letin. During the last two years records  
 have been received of several new va-  
 rieties or sports, and the same have  
 been published. We want to go further  
 than that and gather an accurate rec-  
 ord of all the roses, and the stock  
 from which they are obtained, and  
 place the same in a book of registra-  
 tion that would be for general informa-  
 tion. This idea was suggested to the  
 secretary, and in speaking with a few  
 rosarians, the plan was deemed ad-  
 visable if possible to carry out, and  
 therefore I would ask all parties that  
 may have any accurate information  
 bearing on this subject, or who may  
 have been the originator of a new rose,  
 to file a statement with the secretary  
 of the society, with the idea of com-  
 piling an accurate list to be published  
 by the American Rose Society.

The secretary of the Florida State  
 Horticultural Society writes that Flor-  
 ida is a state that should be quite  
 interested in roses and asks for copies  
 of our bulletin.

BENJAMIN HAMMOND, Sec'y.

## Primula sinensis and Obconica.

### ED. AMERICAN FLORIST:

When is the proper time to plant  
 the seeds of *Primula sinensis* and *Pr-  
 imula obconica* to have them in bloom  
 at Christmas? A. L. & S.

The seeds of *Primula sinensis* and  
*obconica* should be sown in March,  
 April or May, according to the size of  
 plants desired, to have them in bloom  
 at Christmas. The earlier sowing will  
 make larger plants and be a little  
 more forward in blooming. The seeds  
 should be sown thinly in well-drained  
 shallow pans, in a soil composed of  
 leaf-mold, loam and sand in equal  
 parts. Cover the seeds lightly and  
 when well watered place the pans in a  
 temperature of 60° and cover with a  
 light of glass. When the young plants  
 have three or four leaves they should  
 be potted off single in small pots and  
 shifted during the summer as required,  
 never letting them get pot bound, and  
 in their blooming pots by the last of  
 September. During the summer a  
 shaded frame is preferable to the  
 greenhouse for their culture. W.

## Meetings Next Week.

Baltimore, Md., May 8, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Butte, Mont., May 12.—Montana Florists' Club, Columbia Gardens.

Chicago, May 10.—Gardeners' and Florists' Union 10615, 10 and 12 Clark street.

Cincinnati, O., May 8, 8 p. m.—Cincinnati Florists' Society, Judge Elliott Flower Market.

Cleveland, O., May 8, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit avenue.

Davenport, Ia., May 11.—Tri-City Florists' Club, home of Henry Paul.

Hartford, Conn., May 12, 8 p. m.—Connecticut Horticultural Society, County building.

La Crosse, Wis., May 9.—La Crosse Gardeners' and Florists' Society, Hotel Stoddard.

Madison, N. J., May 10, 8 p. m.—Morris County Gardeners' and Florists' Society, Madison hall.

New York, May 8, 7:30 p. m.—New York Florists' Club, Grand Opera House building.

New York, May 10, 4:00 p. m.—Horticultural Society of New York, American Museum of Natural History.

Omaha, Neb., May 11, 8 p. m.—Omaha Florists' Club, City Hall.

Rochester, N. Y., May 8, 8 p. m.—Rochester Florists' Association, 97 Main street, east.

Springfield, O., May 8.—Springfield Florists' Club, office of the Good & Reese Co.

St. Louis, Mo., May 11, 8 p. m.—St. Louis Florists' Club, Odd Fellows building, 9th and Olive streets.

Toledo, O., May 10.—Toledo Florists' Club.

## Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

**Situation Wanted**—By all-around florist: life experience; married; exceptional references. J. HODGE, 42 West St., Pittsburg, Mass.

**Situation Wanted**—Experienced saleslady; wishes to secure a situation in a Chicago florist store. State wages. Address Key 444, care American Florist.

**Situation Wanted**—By young man: 8 years experience in growing and general work; central or western states; references if wanted. Address Key 445, care American Florist.

**Situation Wanted**—Position as grower of high grade roses, carnations and general cut flowers and plants, by a married man of family; best of references from former employers. Address FLORIST, 1650 Gilbert St., Grand Rapids, Mich.

**Situation Wanted**—As working foreman by a thoroughly capable grower of roses, carnations, mums, and all kinds of greenhouse and tropical plants and bulbs and the forcing of the same; references. Address Key 433, care American Florist.

**Situation Wanted**—First class gardener and florist; single man; on a private place 17 years' experience in flowers, fruit, vegetables and green house; Swede; speaks German; 8 months in this country; references in Sweden, Germany and United States. Address Key 439, care American Florist.

**Help Wanted**—At once, young man of neat appearance as assistant store clerk; must have had experience; state wages expected; references required. JOHN RICKS & SONS, Bridgeport, Conn.

**Help Wanted**—I want a first-class man for roses, carnations, chrysanthemums, and pot sales; will pay high wages to a high grade man who can make good; unless you can furnish first-grade references and mean business don't bother me. BYRON H. IVES, Albuquerque N. M.

**Help Wanted**—Competent, sober man to grow bulbs, pot plants and bedding stock; must know how to do a good job of bedding out; \$15.00 a week to start; prefer a married man who would appreciate a permanent position and fair, square dealing; the business is long established and thriving and amply able to pay more wages to the man who shows by results that he is worth more; give full particulars in first letter. GREN'S GREENHOUSES, Fremont, Nebr.

**For Sale**—A good paying greenhouse in leading southern city; large stock. For particulars address Key 437, care American Florist.

**For Sale**—New double strength glass, high quality, 50 boxes 16x12 D. S. B. at \$1.95 per box; 60 boxes 16x24 D. S. B. at \$2.10 per box. J. V. DAVIS, Davenport, Iowa.

**For Sale**—4,000 feet of glass; hot water heat; city water; with or without dwelling; fine location in northern Illinois; city of 50,000; value increasing rapidly; a bargain.

Address Key 441, care American Florist.

**For Sale**—6 greenhouses, 10,500 sq. ft. glass; steam heat, county seat of 6,000; no competition; fine location; good cause for selling; 10-room residence; write me if you want a location cheap. Terms to suit. W. BRISCOE, Tipton, Ind.

**For Sale Cheap**—Falling health; 9 1/2 acres with 2 greenhouses (2x100); 75 snsh. house and barn; drilled well, tank and pumping engine. One block to interurban car line; to center of city one mile; 20,000 population. N. NEV, Second Avenue, Appleton, Wis.

**For Sale or Rent**—An old established retail florist store in Chicago, located on Wrightwood, near Sheffield and Lincoln Aves. Greenhouse in connection. For further particulars call on or write J. T. HELBOK, 941 Wrightwood Ave., Chicago, Ill.

**Wanted**—At once experienced store man with some knowledge of plants. Inquire J. W. NISSEN, 304 E. 47th St., Chicago, Ill.

**Wanted to Rent**—3 or 4 greenhouses by Sept. 1 near Chicago for 5 years. State all particulars in first letter. Address Key 438, American Florist.

**Wanted**—A first class rose grower to take charge of a place of 35,000 feet of glass, where miscellaneous stock is grown; married man preferred; send references and wages expected. Address Key 442, care American Florist.

## WANTED

Seedsmen who has had some experience in calling on country trade and capable of working in the house when road work is done. Four months of the year road work, balance of the time in the house. Address Key 440, care American Florist.

## Private Place--Gardener.

## BASSETT & WASHBURN,

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

### Chicago.

#### AN IMMENSE SUPPLY.

The end of April and first of May has been marked by a succession of cold, stormy days and generally disagreeable weather, and this with it being moving week for a large proportion of the residents of the city has not been conducive to any great amount of business. It has been stated that it is a great deal easier to comment on the items that are scarce or in good demand than to catalogue the ones that are in over-supply. Such being the case, there would be little to say of the market at the present time, for there is plenty of everything, in fact, an oversupply of all kinds of stock, and prices of all grades are low. The only items upon which the prices are at all firm are smilax and hardy ferns, but of flowers there is far too many. The rose market is actually flooded, but the last few days of cloudy, cold weather has shortened up the cut to some extent and prices were a little firmer, yet there is more than enough to go around. American Beauty is in good crop with all the growers and there is plenty of long, medium and short; close, tight and open; and excellent, good, bad and indifferent, yet most of the stock is of first class quality. Of Killarney and the teas and hybrid teas the shipments are immense, box after box of splendid stock is received at the stores. Carnations are to be found in large quantities, especially Enchantress, of which there are more than can be handled. The call for white carnations for Mothers' day promises to be large. Some of the florists have been informed that the commemoration of Mothers' day will be on May 8 and have placed orders for that date, but the proper day is May 14, which is the day named in the proclamations. Violets are out of the market, but arbutus is to be had and sweet peas are being used in large quantities

## Clara Cemetery Vase

12 inches high, with wide flaring mouth.  
Can be supplied in green or white.  
Doz., \$2.50; barrel of 3 doz., \$6.00,  
f. o. b. Chicago.

## Vaughan's Seed Store,

CHICAGO:

31-33 W. Randolph St.

NEW YORK:

25 Barclay St.

### NOTES.

both for corsages and for weddings, but there is a good supply being received of all colors and of excellent quality. The quantity of orchids is not excessive, there being about enough to meet the demand. Of the lesser flowers there is fine antirrhinum, mignonette, gladiolus, calendulas, pansies, Spanish iris, and outside bulbous stock. To swell the already large supply shipments of southern outside stock are being received, peonies, lilacs, viburnums, cape jasmines and other hardy stock are to be seen at the wholesale stores. The green market is not overstocked, while there is plenty of asparagus, both plumose and Spenceri, yet smilax is short, and hardy ferns are quoted at good prices. The new crop of southern ferns is coming in, but the prices will probably not drop materially until after Memorial day.

W. E. Lynch, for many years manager at E. H. Hunt's, is embarking in the greenhouse business on West Twenty-second street, near Harlem, where he will start with three new houses 28x25 feet, even span, Foley construction. The Foley Mfg. Co. reports many contracts on hand in addition to that of Mr. Lynch, including one of four houses for the Meredith Floral Co., Libertyville, in which there is one show house 20x82 feet and four growing houses, three of them 27½x200 feet, and one 35x100 feet. The Foley material supplied this season for the Poehlmann Bros. Co.'s 26 new houses is all delivered and most of it is up.

Thorley of New York is reported to have an advance agent in town with a view to opening a branch store here.

The store at 56 E. Randolph street in which was located the Flower Growers' Market will be occupied by Percy Jones, and a branch store of Kennicott Bros. Co. E. E. Fleser of the latter concern and H. Van Gelder of the former will establish the Chicago Flower Growers' Exchange where the growers can dispose of their products on a 1-2 per cent commission basis. The exchange will furnish counter space, ice box and the necessary business paraphernalia, and supply to the growers a list of credit-customers whose accounts they guarantee and collect and on all such accounts make weekly payments. The growers embracing this offer will be under no expense except the commission on their sales.

Sol. Garland is one of the prominent growers who has planted out his carnations this week. He will not grow white varieties as extensively as in the past, as he believes there will be an overproduction of white the coming year. This belief is strengthened by the fact that in nearly all the orders received for rooted cuttings, White Enchantress or some other standard white variety is included. Although there is a good demand for white at certain periods during the year, he has found that some of standard colored varieties average better returns. In conclusion Mr. Garland says that but one-fifth of his carnations this year will be white. Foreman Sauerland has the plants in the greenhouses in splendid condition.

Fred A. Chapman, the hustling foreman for the Grand Rapids Greenhouse Co., of Grand Rapids, Mich., visited Poehlmann Bros. Co.'s greenhouses on April 27. He spoke very highly of the splendid condition of the plants, especially the Killarney roses, which are now in full crop. Mr. Chapman returned home the day following.

Fred Lautenschlager, the hustling representative for Kroeschell Bros. Co., has returned from a most successful eastern business trip. He informs us that Kroeschell Bros. Co. will furnish the piping system, and a Number 17 hot water boiler, for Fred Stielow's new range of greenhouses at Niles Center.

On April 28, a seven pound baby boy was born to E. B. and Mrs. Washburn.

**STORE, 30 E. Randolph St., CHICAGO  
O. JOHNSON, Salesman.**

At the birth of the child there were living five generations on the mother's and four on the father's side of the family. C. L. Washburn is the happy grandfather.

Chas. W. McKellar and wife left Sunday, April 30, for Hot Springs, Ark., where he will take the regular course of treatment at that famous resort. Frank Ayres is in charge at the store during his absence.

Chas. Drissler, the popular young storeman of Wietor Bros., is the proud father of a 12-pound baby girl which arrived at his home on Thursday, April 27. The mother and child are both doing nicely.

James Novak has accepted the position as foreman with Wietor Bros. and now has charge of their large range of greenhouses. Mr. Novak is an experienced grower and comes well recommended.

O. W. Frese, the well known salesmen of Poehlmann Bros. Co., and Miss Josephine H. Truede were quietly married April 29. Congratulations are extended to the happy couple.

H. C. Blewitt, who has been confined to his home for the past six months with rheumatism, has recovered sufficiently to be about and is again seen in the local market.

J. B. Deamud returned from a flying business trip to St. Louis on Friday.

April 28. An exceptionally fine grade of arbutus and gladioli are leaders at the store this week.

The regular meeting of the Florists' Club will be held at the Union Restaurant, Randolph street, between Dearborn and Clark street, Thursday evening, May 4, at 8 p. m.

Weiland & Risch were among the early ones to plant out their carnations. Dorothy Gordon will be grown quite extensively at this establishment the coming season.

Harry Manheim says that Hoerber Bros. are having a good call for sweet peas, especially for the "butterfly" variety, which are of unsurpassed quality.

The Des Plaines Floral Co. shipped several large orders of rooted carnation cuttings last week to South Carolina, Texas and Montana florists.

The body of Henry Werner, a driver for N. C. Moore & Co., was found in an empty lot at Morton Grove, Friday, April 28.

Frank Felke of Wilmette has an exceptionally fine stock of S. A. Nutt geraniums, mostly in 4-inch pots.

Manager Pyfer says that the Chicago Carnation Co. is planting out 300,000 carnation cuttings this week.

Fletcher James of Des Plaines is putting up one of Geo. M. Garland Co.'s iron frame houses.

# Large Crop of Beauties

**2,000,000 FEET OF MODERN GLASS.**

# Peter Reinberg,

New No. 30 E. Randolph St., CHICAGO.

Lord & Burnham's new factory at Des Plaines is now in operation and Manager Sykes, in addition to much other work on hand, is busy with the material for four sectional iron frame vegetable houses for J. W. Davis, Danport, Ia. Three of these houses will be 43x600 feet and the other 24x260 feet. This, however, is only the beginning of the Davis establishment, which it is proposed to make one of the most extensive and up-to-date vegetable growing plants in the west. The iron frame house is gaining favor with the western growers.

The Milwaukee Florists' Club Bowling League will be the guests of Chicago Florists' Club on Sunday, May 7, when a return match will be played at Bensinger's alleys, East Monroe street. It is planned to give the Milwaukee boys a warm reception and a dinner is planned to be held at the Hofbrau to which the members of the Florists' Club are invited, that the courtesies of the city may be tendered to their guests. All who desire to participate should notify Allie Zech before Saturday evening, May 6.

The A. Dietsch Co. will furnish the material for a new house 20x100 feet that E. T. Wanzor of Wheaton, Ill., will erect this season. This firm also has an order for two houses from G. Van Bochove & Bros. of Kalamazoo, Mich.

## ORCHIDS

## MICHIGAN CUT FLOWER EXCHANGE, Inc.

Wholesale Commission Florists and Florists' Supplies,

38-40 Broadway,

All Phone Connections.

DETROIT, MICH.

The House of Flowers, or the Source of Supply, whichever name one may call it, consists of a number of growers now located on the second floor of the building 82-86 East Randolph street. J. A. Budlong, Sinner Bros., Hunt Bros., M. C. Gunterberg, A. E. Hunt & Co., H. C. Blewitt, Sidney Wiffin and Mrs. Frank Beu, all have space on this floor where now practically everything seasonable in the cut flower line can be obtained.

Miss Henrietta Reinberg, daughter of George Reinberg, and Arthur Graben Krueger, were married in this city Wednesday morning, May 3. A reception was held at the home of the bride's parents, after which the happy young couple left for an extended trip in the east. Their many friends wish them a safe voyage on the sea of matrimony and may all their troubles be little ones.

Miss H. V. Tonner and D. E. Freres found no trouble in disposing of their stock this week in their new store, room 222 at 30 East Randolph street. Miss Tonner reports a good demand for Spanish iris of which she is handling a large quantity.

The Geo. M. Garland Co. has closed a contract to furnish the gutters for the new range of five houses that Henry Smith of Grand Rapids, Mich., will build this season. They will also furnish the material for two houses that J. B. Goetz's Sons will erect at Saginaw, Mich.

The trials of Dutch bulbous stock at Vaughan's greenhouse grounds are now at their best and well worth seeing by the trade. It is the custom of this firm to test all their importations of commercial strains used for its florist trade.

The force at Peter Reinberg's is very busy filling the large number of orders for the choice grade of American Beauty roses. The cut of these is quite heavy now and a large quantity can be seen at the store every day.

The office of John McWeeny, the new chief of police, was filled with flowers and floral pieces when he entered upon his duties May 2. Prominent among the designs was a floral chair and an American flag made of flowers.

The Batavia Greenhouse Co. is showing an exceptionally fine grade of American Beauty roses at their new store at 30 East Randolph street. W. O. Johnson is now in the employ of this firm.

N. P. Miller will, on May 6, resign his position as salesman with the J. B. Deamud Co. It is rumored that he will accept a similar position with another wholesale house in the local market.

J. A. Budlong's out of town customers must be well pleased with the quality of stock that they are receiving, for this firm's shipping trade is very large.

## "The Busiest House in Chicago"

 Central 3155

160 N. Wabash Ave., CHICAGO

Robert Northam says that George Reinberg's Richmond roses are bringing fancy prices these days, this is not surprising for they are of excellent quality.

George Asmus has donated \$25 toward the expenses of the bowling team that will represent the Florists' Club at the convention at Baltimore.

W. W. Goodell has accepted a position as shipping clerk with Vaughan & Sperry, entering upon his duties May 1.

E. E. Pieser left Monday evening, May 1, for Villa Ridge to look over Spalding & Son's 34 acre peony farm. C. W. Erbe is succeeding W. E. Lynch as manager of E. H. Hunt's cut flower department.

The People's Florist have moved from 1530 to 1736 West Forty-seventh street.

Visitors: J. A. Peterson, Cincinnati, O.; L. W. C. Tuthill, of the Tuthill Advertising Agency, New York, N. Y.

KANSAS CITY, Mo.—In the organization of a stock company for the purpose of purchasing a home, where it is proposed to make the interstate fair a permanent institution. Alpha Elberfeld, the well known florist, asked to have his name placed on certificate No. 1 for \$1,000.

BELLINGHAM, WASH.—A 30 per cent increase over the year previous in the trade at Easter, says The Kersey Floral Co. The supply of both plants and cut flowers was enough to meet all the demands, and the prices were about the same as last year, at least, they were no better.

BAR HARBOR, ME.—The Easter trade was practically the same as last year, reports the Mount Desert Nurseries, with no material change in the prices. The supply of both plants and flowers was enough to meet all the demands. In the plants lilies were the most salable and in cut flowers carnations had the call.

# VAUGHAN & SPERRY

Long Distance Phone  
Central 2751

161 N. Wabash Ave., CHICAGO

### Chicago Bowling.

The bowling season closed on April 26, when the Roses bowled the Orchids and the Violets bowled the Carnations. Al. Fisher was so elated over winning the Vaughan & Sperry cup that he invited all those who were present to partake of a substantial spread that he had ordered at the Hofbrau restaurant. To say that Al did it up brown would be putting it mildly for he insisted upon paying for all the refreshments (lemonade) and smokes that followed. After the inner man had been satisfied, appropriate speeches were made, at the close of which a rising vote of thanks was extended to Mr. Fisher for the royal reception he gave the club at the close of its season. Immediately after the spread the prizes won were awarded to the successful participants. As one glances over the list of awards he will find that John Zech, the old warhorse and winner of many a contest, finished third which is a very creditable showing and proves to the younger bowlers that he is still in the ring and far from being all in. John Huebner is another of the old timers who proved loyal to the club and it was mainly through his encouragement that the Orchids, of which team he is captain, finished first. The team prizes were awarded as follows: Orchids, first prize \$25.00; Carnations, second prize, \$15.00; Roses, third prize, \$10.00; Violets, fourth prize, \$5.00. The six highest scores were rolled by A. Fischer, A. Zech, J. Zech, E. Farley, F. Ayers and Friedman and they were each awarded an umbrella, donated by the John C. Moninger Co. The first five named were each awarded a handsome scarf pin, donated by Poehlmann Bros. Co. for having bowled the five highest scores at the end of the season.

All Green Goods at market rates.

**ROSES, our selection, - \$3.00 per 100**  
**WIETOR BROS., 162 N. Wabash Ave., Chicago**

### Omaha, Neb.

Easter is past but not forgotten. All the florists in this vicinity report that Easter, 1911, was the best they ever had, many claiming an increase of 30 to 40 per cent. over the previous Easter. Potted plants sold out clean. Prices were normal and the stock was good. The weather helped, as it was exceptionally fine and on Easter Sunday it was very spring like. All the down town florists advertised their goods during Easter week in the daily papers, which no doubt, helped considerably to sell out clean. J. W. & E. E. Arnold and Miss McNamara each rented a display room near their stores for Easter which helped them to dispose of their potted plants. One department store advertised lilies for 12 cents each, most of the lilies were sold for 25 cents each.

#### NOTES

Hess & Swoboda's seven new houses 22x150 are almost finished as is also their cold storage building. Winandy Bros. of Chicago did all the work and it certainly was done all right. The Florists' Club held their monthly meeting April 27, combined with a bowling match. GRIFFS.

### Cleveland.

#### STOCK IN PLENTY.

Business has improved the last week over the week previous. Stock of all kinds is plentiful and selling at low prices, especially roses and carnations. Easter lilies are moving slowly, while callas cannot be given away. Bulbous stock is in very little demand. Dagger and fancy fern have advanced in price, pansies are plentiful and sweet peas are exceptionally fine in all colors.

#### NOTES.

The Florists' Club meeting April 24 was well attended, showing much interest in the coming flower show. The May Party will be held at the West Side Chamber of Industry Hall on Franklin avenue, May 11. Come and bring your friends.

The city has purchased Rheinholt Hoffman's place for school purposes. Mr. Hoffman will soon vacate, and as

he has a good city position, may not again grow cut flowers.

Herman A. Hart will retire after the spring business is over, and intends to take a few months' vacation traveling in the South. The business will be continued by his sons.

Mrs. G. W. Mercer has the sympathy of the trade in the loss of her father, who died April 24. C. F. B.

### Birmingham, Ala.

The Easter business according to all the retail shops was very satisfactory, and the quantity of stock plentiful. The quality was somewhat better than in other years. Especially the lilies which were of fine grade, and the best seen here in many seasons. There were pot plants enough for everybody and they included, lilies, rambler roses, hydrangeas, etc. There was also a great demand for cut flowers, carnations being first choice. The roses were the best seen here for some time. The weather was very satisfactory, and the deliveries made in good order.

#### NOTES.

A beautiful new store has been opened on Twenty-first street between Third and Fourth avenues by A. J. Koenig and a fine lot of flowers were displayed at the opening, the place being crowded all day. Mr. Koenig was formerly connected with the Amzi-Golden Seed Co.

The week following Easter was quite a social week, many events being held weddings, dinner-parties, and receptions, a large quantity of flowers were used, and stock was rather short. S.

PHILADELPHIA, PA.—The Chestnut Hill Horticultural Society held its annual spring exhibition April 11.

ENID, OKLA.—The increase in the trade at Easter over that of last year was fully 30 per cent says J. R. Detwiler. Prices were about the same as during the same period in 1910. The supply of plants was adequate to fill all the orders, but there was not enough cut flowers to meet the demands. Roses and carnations were the most called for in the cut flowers.

## Cape Jassamine Buds

(GRANDA FLORA)

**The Prettiest and Most Fragrant of Flowers.**

*Mention the American Florist when writing*

PAMONA, CALIF.—C. Roessner writes that the trade at Easter was 30 per cent better than that of last year. The prices were no better and the supply of both plants and cut flowers was equal to the demand. The call for blooming plants was good, and in cut flowers the greatest call was for carnations.

PETERSBURG, PA.—The Easter trade was about the same as last year, reports William S. Young. The supply of cut flowers was adequate, and with the exception of lilies there were enough plants to fill all orders. There was a good demand for pot lilies, azaleas, lily of the valley and pansies. In cut flowers the call was for lily of the valley, violets and carnations. Roses did not seem to be wanted and were the least salable. It rained all day the Saturday before Easter which was detrimental to the sale of plants; many more would have been sold had the weather been pleasant.

## New York.

## VERY LOW PRICES.

There has been a much freer movement noticed in the cut flower trade within the last few days, occasioned no doubt by the very cheapness of everything, for prices have got down to where every retailer, large and small, can afford to buy in quantity and take a chance, as it were. Some say that crops of roses and carnations are just coming in, and there is going to be a heavy supply for the next few weeks. To us, it has seemed as though every grower has been in full crop for the last two weeks, for we have never seen stock more plentiful, and, where prices will go if flowers still continue to increase in numbers is a problem indeed, for everything is selling very low now. American Beauty roses are so numerous and so reasonable in price that many retailers are handling them now who do not as a rule carry them. It is also a noticeable fact that there are a great many more short stemmed blooms of this variety than have been seen in the market for many months. Bride and Bridesmaid are perhaps not any more plentiful than they have been for some time, but Richmond, Killarney, White Killarney and My Maryland are coming in in sheaves and in many cases, long and short stems together are cleaned out in lots at prices that seem ridiculously low in proportion to the quality of the flowers. Carnations continue plentiful and, considering the general conditions prevailing in other staples, they are perhaps doing as well or better than could be expected for the best grade are averaging better than are number one grade roses. The lily of the valley demand is still away to nothing and prices took a great fall. Some of the prime growers' stock has begun to come in and, its hardy looking appearance together with its better fragrance, has helped it to move a little better even than has the forced product. Violets are no longer a feature in the trade, since surpluses were recently cleaned out at one dollar a thousand, the season for these is now practically over. Tulips and narcissus are also losing their supremacy, the demand has dwindled away very perceptibly and values have weakened on all varieties. Gardenias are averaging less than five dollars a hundred, there are far too many of them. Sweet peas have not increased in supply as have some other flowers, hence little change in values is noticed. Cattleyas are maintaining their prices fairly well as the supply is not so abundant. Similax and asparagus are among the best sellers in fact, these green goods seem to have the advantage over cut flowers, when it comes to clearing out the stock from day to day, at what may be called satisfactory prices.

## NOTES.

The Bridge Plant Market Company is the name of a firm that has opened a store at 349 E. Sixtieth street. This is close to the location of the Queensboro Bridge early morning plant market and it is intended to keep open all day and all night, so as to accommodate all classes of customers.

The well known firm of growers Pan-kok & Schneiderman is dissolving the junior member withdrawing. Mr. Schneiderman is retiring from business owing to poor health, and has gone to Germany where he will make his home in the future.

Maurice L. Glass, of the firm of A. Moltz & Co. will be married May 16, at 2:30 p. m. to Miss Rebecca Moltz. The ceremony will be in Adas Jeshurun Anshe Synagogue, Attorney street, this city.

The Florists' Club will meet May 8, in the Grand Opera House building at 8 p. m. A feature of this meeting is

to be several short talks on various subjects by some of the club's members.

A. H. Langjahr has moved to 113 West Twenty-eighth street, where he will remain temporarily, as the large store, of which he has secured a long lease is not quite ready for occupancy.

J. Gilman, one of Poughkeepsie's large violet growers, sailed for Europe April 26. Mr. Gilman marketed 141,000 violets for the Easter trade, quite a crop from one establishment.

Peter Christie has been operating a retail store for 10 years at 561 Fifth avenue, Brooklyn, and now owns the building in which he is located, not a bad record that.

The auction rooms are receiving a very liberal patronage these warm days, and a vast amount of hardy stock is being disposed of under the hammer.

A. Hanig has opened a wholesale cut flower stand on the first floor of the Coogan building, corner Twenty-sixth street and Sixth avenue.

The Growers' Cut Flower Co. and Kessler Bros. have got settled in their new quarters at 111 and 113 West Twenty-eighth street.

Brooklyn has another wholesale cut flower store, S. Stone has opened a place on the parlor floor of 377 Jay street.

A. Sauter has moved from the ground floor to the first floor of the Coogan building.

Southern lilac has appeared in the market.

On May 2, the bowlers went to Madison, N. J. to play a match with the Madison experts. The scores made at "Thums," April 28, were as under:

## Philadelphia Notes.

H. A. Dreer is pushed to the limit with spring business. Pot roses are going out by the thousands and there is an immense demand for herbaceous stock which is a specialty here. Ferns of the crested and Boston types are also largely in demand, large quantities of young stock being forwarded daily to the wholesale growers for growing on. Over 10,000 flats of seedling ferns have been sold for June delivery. They go all over the country, many of the fern growers depending on this concern for their young stock. Large importations of palms and araucarias were received the past week the first of the quantities that are to come. Over 100,000 dahlia cuttings have been potted off and are coming on in the new range at Riverview. John Ruppert celebrated his 25th anniversary as an employee of H. A. Dreer, on March 22 last. He may now be said to be fairly well acquainted with the business. John is a hustler, well known to all the retail trade of the eastern cities and towns, where his weekly and semi-weekly visits to keep them up to date with the best stock are anxiously awaited.

I had an interesting talk with Miss Anna Jarvis, the founder of Mothers' day. She says she is overwhelmed with letters as the day draws near, many of them being from Governors of states, Mayors of cities and other government officials and from a great many clergymen. All speak enthusiastically of the movement and say they will do all they can to push it along. Miss Jarvis says that she has every reason to believe that its observance this year will be more successful than ever before and she urges the florists to advertise it all they can by

## Cincinnati.

## AN ADEQUATE SUPPLY.

Stock, as a whole, is still easily sufficient for local demands. A good out of town call did not appreciably reduce the amount offered the Cincinnati buyers. For some time past this city has been receiving more than its share of rain, and as a result the ground gets little or no opportunity to dry out. The outdoor crops and the carnations will accordingly be late in getting into the field. Enough roses come to easily satisfy all demands. Every now and then many are cleaned up at less than bargain prices. The uncertain weather has had an appreciable effect on the quality of some, but as a whole they are in very good shape. The call for pink seems to exceed that for white. Red roses are apparently going off crop. Carnations enjoy a strong call, but many more come in than are needed. During the day many are taken up. No particular color is short. The offerings of other flowers is adequate.

## NOTES.

P. J. Olinger has taken C. J. Jones as a partner in the consignment end of the business, under the style and title of P. J. Olinger & Co., and in addition to cut flowers the firm will handle a full line of supplies.

It is with regret that we report advices from Xenia, Ohio, which tell of the death of George Engle, a prominent florist of that city.

Julius Dillhoff, representing Schloss Bros., called on the trade last week.

Tom Windram has returned from Leesburg, Fla.

The champion "Punks" in bowling have at last been rewarded. D. Rusconi and C. H. Hoffmeister won the prizes offered by Thos. Jackson for the two lowest averages of the evening at the meet of April 3.

## Flatbush, Brooklyn, N. Y.

The greenhouse districts of Flatbush, Brooklyn, are rapidly becoming surrounded by boulevards and handsome residences. Taxes on property are going skyward every year and it is only a question of time when many of the old-time places will have to give way to the modern trend of the times, and dwellings will occupy the sites that now are covered with glass, for the land is getting too valuable for greenhouse purposes. With the building up of this section there comes an increase in the demand for plants and flowers, so that growers have no difficulty in disposing of all that can produce, for, aside from Dailledouze Bros. and Henry Hesson, both of which firms specialize in carnations, the Flatbush growers as a rule grow a little of everything, and, what is more to the point, they grow everything well.

Take for instance the two establishments of Louis Schmutz, both are on Clarkson street, though about half a mile apart. We remarked to Mr. Schmutz, when going through them, that there were so many different kinds of plants that it was like visiting a "curiosity shop" for variety. "Well," he said, "what can we do, we must have some things of everything," and sure enough he has it. Tomatoes, egg plants, peppers, cyclamens, honeysuckle, passiflora, vinca variegata, and rosea, cannas, coleus, geraniums, begonias Vernon and other bedding sorts, lemons, oranges, phlox, ferns of all the commercial types, in fact, a full list of all he has growing there would read more like a plant catalogue than anything else. We mention this just to show that all Flatbush is not specialists yet, the grower of mixed collections is still filling an important place in the plant industry.

Carl Woerner, at 220 Clarkson street, is also one who believes that in variety there is strength. This was formerly the Wilks place, which Mr. Woerner took possession of about two years ago. Several new varieties of tradescantia, that were brought from Germany last year, are making quite a hit as basket plants, owing to their abundant flowering proclivities, they are a mass of bloom continuously and naturally are proving good sellers. In addition to quite a mixed collection of bedding plants, a house of carnations are grown for cut flowers, as Mr. Woerner runs a regular cut flower business in conjunction with his plant trade.

At Chas. Koch's establishment there is probably the largest collection of agave Americana to be found anywhere near New York. These have been wintered in frames so are not a great deal of trouble, though they take up a lot of space. Besides the agaves, Mr. Koch has about every kind of bedding plant needed in his place, and these days he is so surrounded with retail customers from morn till night that he hasn't much time to talk with a newspaper man. He did say, however, that he was waiting for someone to come along with \$25,000 and purchase his property. Then he would go to live in Rutherford, N. J., where his married daughters are bringing up a new generation of florists.

PEORIA, ILL.—About the same as last year reports Juergens & Co., in regard to the Easter trade. There was a large enough stock of both plants and cut flowers to meet all requirements and prices were about the same as in previous years. All the blooming plants sold well, and there was also a good demand for all kinds of cut flowers. A great many plants and a large quantity of flowers were sold to be used for decorating the churches, which kept the florists' wagons busy delivering all the week before Easter.

# Look Bargains In Bedding Plants

For Immediate Shipment.

NOW READY.

Godfrey Aschmann, the busy bee, is more active than ever. Come and look at what he and his sons and employees have done in four weeks' time. Inspect it yourself, judge it yourself, and you will say "Is it possible?" Ten greenhouses and equally as many frames are filled with choice bedding plants of all descriptions.

# HARDY AND CLIMBING ROSES

## Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name:  
Price, 75c for 5 (of one variety), \$18.00 per 100, \$120.00 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.  
Anne de Diebach. Bright carmine.  
Ball of Snow (Boule de Neige). Large, pure white.  
Capt. Christy. Delicate flesh color.  
Clio. Satin blush.  
Duke of Edinburgh. Bright vermilion.  
Fisher Holmes. Dark velvety crimson.  
Frau Karl Druschki. The finest white in existence.  
Gloire de Margot. Dazzling red.  
Gen. Jacqueminot. Brilliant crimson.  
John Hopper. Bright rose.  
La France. Peach blossom pink.  
Mme. Charles Wood. Bright carmine.  
Marshall F. Wilder. Cherry rose and carmine.  
Magna Charta. Dark pink.  
Mme. Gabriel Luizet. Light, satiny pink.  
Mrs. Sharman Crawford. Deep rosy pink.  
Paul Neyron. Lovely dark pink.  
Ulrich Brunner. Cherry-red.

For prices see above.

## English Moss Roses

Assorted. White, Pink, Red. Large dormant plants, from open ground. 75c for 5, \$14.00 per 100.

## Baby Rambler Roses.

PHYLLIS. Very fine clear pink, highly recommended, \$1.25 for 5, \$20.00 per 100.  
BOSKOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30.00 per 100.  
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c for 5, \$15.00 per 100.  
CATHERINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume. 85c for 5, \$15.00 per 100.  
MRS. W.M. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85c for 5, \$15.00 per 100.  
MME. NORBERT LEVASSOUR (Baby Rambler). Strong, field-grown plants. 75c for 5, \$14.00 per 100.

## Ramblers and Other Climbing Roses.

CLIMBING BABY RAMBLER (Miss C. Messman). A novelty for 1911. Where the Baby Rambler is popular, the climbing type will soon become so too. We have a small stock and offer same as follows. It is a true Polyantha type, color deep rose. 50c each, \$2.25 for 5, \$20.00 per 100.  
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown, \$1.50 for 5, \$22.50 per 100.  
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15.00 per 100; 4 to 6 feet, \$2.25 for 10, \$20.00 per 100; 7 to 8 feet, extra heavy, \$4.00 for 10, \$35.00 per 100.  
DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 8 to 9 feet, \$2.00 for 10, \$18.00 per 100.  
TAUENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15.00 per 100.  
TAUENDSCHON (Grown as a Standard). Fine for forcing. 40c each, \$3.75 for 10, \$35.00 per 100.

## Somthing New in Roses for Florists

### Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and one-half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY RAMBLER (Half Standard). Crimson, 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY CATHERINE SEIMETH (Half Standard). White. 40c each, \$4.00 per doz., \$30.00 per 100.  
BABY 'STARS AND STRIPES' (Half Standard). White and red grafted on the same plant; most attractive. 45c each, \$4.50 per doz., \$35.00 per 100.  
MRS. CUTBUSH (Half Standard). Rose pink. 40c each, \$4.00 per doz., \$30.00 per 100.

## English Grown Hybrid Tea, or Ever-blooming Roses, etc.

Hybrid Tea or Everblooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in winter, they give a wealth of bloom all through the summer months and late in the fall till frost checks them.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation; is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 per bundle of 5; \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for summer-flowering and cutting. Maman Cochet (Pink). Color a clear, rich pink changing to silvery rose; very double and fragrant. Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride. \$1.25 per bundle of 5; \$22.50 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10; \$22.50 per 100.  
HERMOSA. Soft pink; flowers full and freely produced; a good grower, \$1.25 for 5; \$20.00 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor summer growing. \$1.25 for 5; \$22.50 per 100.

BETTY. Coppery yellow, overspread with golden rose. A fine formed Rose, large and moderately full, \$1.75 for 5; \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink, \$2.50 per 10; \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 per 10; \$22.50 per 100.

AMERICAN BEAUTY. Almost too well known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong field-grown plants, 75c for bundle of 5; \$14.00 per 100.

CAROLINE TESTOUT. Bright satin rose, with brighter center, large, full and globular; sweet scented, \$1.25 for bundle of 5; \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N. Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Annual convention, Hotel Rockmere, Marblehead, Mass. June 20-22, 1911.

VISITED CHICAGO: F. A. Forbes, of Forbes Seed Store, Plymouth, Ind.

PRESIDENT PAGE of the American Seed Trade Association will visit the Pacific coast this month.

HOLLISTER, CALIF.—Sweet peas and radish, which looked bad for a while, are beginning to recover somewhat from the effects of the recent frost, but will not make full crops.

IN the west, counter and mail trade was only moderate the first half of April, but in the last half the weather conditions improved greatly and this improvement made the short month's business rather more than the average.

NEW YORK.—Seasonable spring weather has at last reached us and counter trade in the stores has become quite active. Hardy plants, flowering and ornamental, are displayed at most of the stores and this week vegetable plants of many kinds are also on sale.

LOS ANGELES, CALIF.—The John C. Bodger & Sons Co. advises us of the disappearance from its office, of 12 or 15 unopened letters about April 20 and requests firms in the trade writing about that time, and not receiving a reply, to kindly send duplicates of their letters.

CHICAGO.—Prices on the board of trade May 3, for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White clover, from \$22 to \$30.—Retail counter trade here is at its best about May 1 and Saturday, April 29, was a very busy day with the local trade.

W. AILEE BURFEE, presiding at a meeting of the Canadian Society of Philadelphia, April 25, took up the subject of reciprocity, saying that he thinks all loyal Americans and Canadians understand and will back President Taft in his fight for reciprocity. He said that Mr. Taft has only done what he believed to be his honest duty in calling the extra session of congress to discuss it.

Trade Only.

SAN JOSE, CALIF.

### Sweet Peas For Winter Blooming.

William Sim, of Cliftondale, Mass., the well known and successful grower of sweet peas, whose exhibit at the Second National Flower Show at Boston attracted so much attention and favorable comment, and who is an authority upon the culture of sweet peas under glass, states that the best varieties of early flowering winter sweet peas are Watchung, early white; Christmas Pink, pink and white; Greenbrook, white marked lavender, one of the best; Earliest of All, pink and white; Florence Denzer, white; Mrs. C. H. Totty, light lavender; Wallace, dark lavender; Mrs. Sim, salmon; Gov. Fort, pink; Mrs. Smalley, satin pink, a re-selected Earliest of All; Mrs. F. J. Dolansky, light pink; Helen Kellar, striped pink and white, and Mrs. Geo. W. Lewis, white wavy.

Came Up All Right.

Storekeeper: "Did the seed that I sold ye, come up all right, Uncle Sam?"

Uncle Sam: "Yes, next door neighbor's chickens got at 'em at 4 o'clock in the morning."

—Philadelphia Evening Telegraph

### New York Seed Tests.

We are in receipt of Bulletin No. 333 of the Geneva, N. Y., Experiment Station on seed tests made at the station during 1910, from which we take the following summary:

Farmers and others may send samples of agricultural seeds to the station and have them tested for purity free of charge; but the station does not make germination tests. During 1910, 947 samples were tested—566 of alfalfa, 200 of red clover, 69 of alsike clover, 13 of white clover, 77 of timothy and 22 of miscellaneous seeds. Many of the samples received were too small for a dependable analysis. The percentage of samples infested with dodder (11.13

per cent for alfalfa and 3.5 per cent for red clover) is considerably smaller than that found in previous years. This indicates that seedsmen are now more careful about dodder than they were formerly. The alfalfa samples show a marked increase in the number containing large-seeded dodder. In more than half of the infested samples the dodder was of the large-seeded kind which can not be separated by sifting. The frequent occurrence of the seed of *Centaurea repens* in the alfalfa samples shows that much of our seed is imported from Asia Minor. This is known as *Turkestan alfalfa*. Only 4 samples (3 of alfalfa and 1 of alsike clover) were found to be adulterated. It appears that red clover seed sold in the state during 1910 was of higher average quality than usual. As regards purity and general appearance, the timothy seed, also, was of high grade. Russian thistle seed is a frequent impurity of alfalfa seed, but the experience of farmers indicates that the weed is rarely able to maintain itself in New York and is not to be feared. Roquette, a foreign, mustard-like plant, has appeared in some alfalfa fields in the state having been introduced with imported alfalfa seed. Little is known of its capabilities as a troublesome weed.

### FURTHER NOTES.

The adulteration of alfalfa is much less common than in previous years, only three samples out of 566 were found to be adulterated. Seed containing large dodder should be avoided. English plantain is the most noxious weed in alfalfa seed.

Some kinds of seeds if not harvested and stored properly lose their ability to germinate. The only safe and reliable way is to make a germination test, which farmers can do for themselves.

Samples are not reported as adulterated unless they contain 5 per cent or more of some one kind of foreign seed or inert matter.

Samples should be taken from the top, middle and bottom of the bags. The samples from the top may be very misleading.

Buyers are urged to make a practice of testing the germination of each lot of timothy seed before purchasing.

Analyses show red clover seed sold in the state averaged much purer and of higher grade than usual.

The bulletin contains a list of other publications on seeds and weeds available to seedsmen.

### Free Seeds.

A canvass has been made of a certain locality in Pennsylvania to find out what proportion of government seeds was actually used by the recipients, says The National Stockman and Farmer. In this village 180 people were favored by their congressman with a package of free seeds. Of these seeds exactly seven packages, 3.88 per cent, were used. We do not claim that this represents the proportion of seeds used in all cases, but it does represent the proportion used in some cases, and it shows that the money spent for the congressman's little graft is very largely wasted. Evidently the principle of economy in government expenditures does not extend to matters which congressmen think will affect their chances to serve the dear people in the future.

## SEVEN TOP TURNIP

Originally introduced by us from South Carolina in 1850 and annually grown for over sixty years under the zero winter temperature of Bloomsdale Farms, the Landreth's strain of Seven Top has obtained by this northern culture, a hardiness not approached by southern-grown seed. All inferences would point that way, while thousands of experiments have conclusively proven it beyond a shadow of doubt; consequently one pound of Landreth's Seven Top will, in the dead of winter produce more greens than can be cut from three times the more delicate southern-grown Seven Top.

Write us how much you want, and we will name you a price.

H. F. Hall, Boston, Mass., Vice-President;  
S. W. Severance, 503 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Kestener,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, April 22.—Mushrooms, 75 cents per pound; cucumbers, 15 cents each; tomatoes, 25 cents per pound; grapes, \$2 per pound; lettuce, \$1.80 per doz heads; cauliflower, 40 cents each.

Chicago, April 26.—Mushrooms, 30 cents per pound; cucumbers, \$1.75 to \$2 for two dozen; lettuce, 15 cents to 17½ cents per pound; radishes, 50 cents to 75 cents per dozen bunches.

### Early Tomatoes.

In the experiments which were carried on at the experiment station of the University of Illinois in growing tomatoes for early market the plants were set in the field on May 4 and May 15, the plants having been grown in cold frames and gradually hardened off. The early plants were set before the normal season in this locality, and before it was really safe to set them, for although the weather was warm and pleasant at the time they were set, a frost occurred a week later and caused slight injury to the plants. However, favorable weather followed, and the plants were not seriously checked. These plants, while they did not ripen their fruit any earlier than some of the other lots, yet they made by far the heaviest yield of early fruit.

In preparing the plants for withstanding the transfer to the field without suffering a sudden check in growth, they must be gradually accustomed to winds and night temperatures, while they are still in the cold frames. Beginning about two weeks before the time of setting the plants in the field, the frame is left uncovered later each evening, and is adjusted to let in a little air even at night. Finally, on pleasant nights, the cover is left off entirely. A few hours before the planting is to begin, the soil in the cold frame containing the plants should be saturated with water and should be kept wet as the planting proceeds. The plants are removed by cutting around each plant with a spade and a six-inch cube of dirt taken up with each plant. The plants are set four by five feet apart or four and a half by four and a half. At the first named distance 2,178 plants are required to set an acre, and at the latter distance 2,151 are necessary.

### Fertilizers on Asparagus.

The Maryland Agricultural Experiment Station has issued a bulletin entitled "Fertilizers on Asparagus" reporting the experiments which have been carried on to ascertain the best fertilizers for the culture of asparagus during the last six years. The fertilizers used were kainit, dissolved rock, muriate of potash, nitrate of soda and manure. The results obtained were that kainit at the rate of 2,000 pounds per acre applied in midsummer gave the

highest net gain per acre. Dissolved rock 400 pounds, kainit 400 pounds and nitrate of soda 200 pounds per acre the next best returns, kainit 500 pounds per acre in midsummer the third best. Manure is too expensive to apply year after year. In seven manure plots only two produced any profit. Manure and fertilizer combinations are desirable in moderate amounts, but are too expensive in the heavy applications.

In the culture of asparagus, after the bed has reached the second year it is advisable to give a good coating of stable manure or 1,000 pounds of kainit per acre, or both, in early spring and ploughed in, after the shoots appear the soil cultivated every ten days or two weeks. No cutting for market this year and in late fall the stalks cut and burned. In the third and succeeding years a light covering of rotted manure, about five tons per acre, should be given during the winter or early spring every year, and in connection with this some commercial fertilizer should be used either a complete fertilizer or Kainit 1,000 to 2,000 pounds per acre.

The ground should be plowed and harrowed in early spring, and the kind of stalks desired for cutting, whether green or white, will determine how the ground will be handled. If green stalks are wanted the ground may be left nearly level, or at most only a slight ridge over the row. If white stalks are desired furrows from each side must be thrown over the row to form a round flat-topped ridge eight or more inches high. Good cultivation must be given throughout the season and after the

stalks die in the fall they should be removed and burned.

DECATUR, ILL.—A hail storm passed over the city in early April that broke a great deal of glass in the greenhouse. Henry Daut and Daut Bros. Co. were both heavy losers.

NEW YORK.—A series of lectures on horticultural subjects is to be delivered in the museum building of the New York Botanical Garden in Bronx Park on the Saturdays of May and June.

### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909. It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

Price: Per 100 \$12.00; per 1000 \$100.00; per 5,000 \$400.00. 25 at 100 250 at 1000 rates. Place your order now to be in on early deliveries.

## The Nursery Trade

**American Association of Nurserymen**  
 W. P. Stark, Louisiana, Mo., President;  
 E. S. Welch, Shepardsburg, Ia., Vice-Presi-  
 dent; John Hall, Rochester, N. Y., Sec'y.  
 Thirty-sixth annual convention to be held  
 at St. Louis, Mo., June 14-16, 1911.

VISITED NEW YORK: A. Koster, of Koster & Co., Boskoop, Holland.

PROF. SARGENT of the Arnold Arboretum has favored us with a copy of the guide to the institution, just issued. It is beautifully illustrated with half-tone views of the trees, shrubs and beauty spots and contains a history and description of the several features and detailed plans of the large area included in the arboretum.

"THERE are probably 30,000,000 apple trees in Missouri," says the professor of horticulture in the University of Missouri, "and of this number 75 per cent are Ben Davis and varieties equally poor." He recommends that these trees be rooted out and replaced by something worth while. Missouri is the last refuge of the Ben Davis "apple." There is some hope, therefore, that this so-called fruit soon will become extinct.—Chicago Tribune.

### Conifers in the Arnold Arboretum. V.

In the three-leaved group of pines, to which our native pitch pine belongs, there are not many that can be depended upon in the New England states. The lace-bark pine, *Pinus Bungeana*, from northern China is quite promising in the arboretum. It is quite hardy and bears cones freely. It has a tendency to be bushy in habit, and may not attain the arborescent character that it does in its native state. Dr. Sargent told us on one occasion that he was much impressed with the singular appearance of the lace-bark pine planted in connection with Chinese temples. The adult trees displayed white or whitish stems that almost looked as if they had been whitewashed. In old mature trees the bark assumes this appearance.

*Pinus Jeffreyi* from eastern California is a most beautiful and noble pine. It does not appear to do as well, however, in the arboretum or around Boston, as it does in western New York. There is a remarkably healthy specimen in Mrs. Thompson's estate at Canandaigua, N. Y., and there are two trees growing rapidly in the pinetum at Highland Park, Rochester, N. Y.

*Pinus ponderosa*, perhaps one of the most majestic of American pine trees, which is distributed from British Columbia to Mexico, is another pine like P. Jeffreyi, which does not appear to do as well in the arboretum or around Boston as in western New York. There are individuals of *Pinus ponderosa* in the city of Rochester from fifty to sixty years old that are in perfect health, and they were disseminated in Rochester by Ellwanger & Barry.

In the two-leaved group of pines there are many that are perfectly hardy, and they are largely represented in the arboretum. *Pinus densiflora* from Japan is doing well in the arboretum, and has grown to considerable size and has been producing cones in the arboretum for many years. In the pinetum at Highland Park, Roches-

ter, *Pinus densiflora* is inclined to be bushy and does not show any inclination to throw up a central leader.

The Jack pine, *Pinus divaricata*, which is remarkably hardy and extends from Hudson Bay to Minnesota, is looking well, and has a picturesque habit which the writer admires. It is somewhat similar in habit of growth to *Pinus Virginiana* and *Pinus pungens*, but is much superior to either of these in decorative value.

The yellow pine, *Pinus echinata*, is represented by one plant of considerable size and a number of thrifty young plants. It seems to be hardy in the arboretum. This is a handsome pine in its fully developed adult condition in its native state. The most northerly station in which it is known to grow is Staten Island, and it extends south to Florida.

*Pinus Laricio*, from the south of Europe, does not appear so far in the arboretum or elsewhere in this country to be of much promise. H. J. Elwes of England procured a quantity of seeds of *Pinus Laricio* in Bosnia, which he sent to Dr. Sargent a number of years since. These are growing with remarkable vigor in the arboretum, and some of the same seedlings which were given to the Board of Park Commissioners are growing with similar vigor in the pinetum, Highland Park, Rochester, N. Y. It is, therefore, possible that a different geographical variation of this pine may do better in this country than those which have been grown hitherto. *Pinus Laricio* does remarkably well in the British Islands, and is of considerable economical importance.

Perhaps the most important pine in the two-leaved group for planting is the red pine, *Pinus resinosa*, a common northern native. It is one of the most important pines for planting in New England and the northeastern states. There is a beautiful group of it in the arboretum, and Dr. Sargent has a very high opinion of its highly decorative value. In a young state the red pine has a general resemblance to the Austrian pine, and is sometimes mistaken for it. The leaves, however, are not as heavy as in the Austrian pine, and they are a much lighter green. For some reason the red pine is difficult to procure in American nurseries which is unfortunate. I have been asked occa-

## THE BOOK OF GLADIOLUS

The first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating, storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, \$1.25.

AMERICAN FLORIST CO.

440 So. Dearborn St.  
CHICAGO.

ATLANTIC CITY, N. J.—The Easter business was about the same as last year, reports the Edwards Floral Hall Co. The stock of both plants and cut flowers was adequate to meet the demands and the prices were about the same as in the previous year. Everything in blooming plants that was in good condition sold well. In cut flowers the principal calls were for carnations, gardenias, orchids, violets and sweet peas. Bulbous stock was slow and did not sell well.

ATCHINSON, KANS.—A ten per cent increase over last year, reports the Groves' Greenhouses for this year's Easter trade. The prices were no better and, with the exception of lilies, there were plants and flowers enough to fill all orders. Palms sold well, but sprays were a drug and went slowly. The greatest demand in cut flowers was for roses and carnations.

BOULDER, COLO.—Charles F. Fawcett reports that the Easter business was 25 per cent better than last year. The prices were about the same and the supply of both plants and cut flowers was equal to the demand. The best call in pot plants was for hydrangeas, pink spirea, lilies and azaleas. Roses, sweet peas and violets sold the best in cut flowers. Carnations were not in great demand. The covering of the pot, if with nothing more than crepe paper, pays well and helps the sale.

OAKLAND, CALIF.—The Easter trade will show an increase of 25 per cent over the previous year write Clarke Bros. The supply of cut flowers was equal to the demand and there were plants to spare after the sales were all made. Prices were the same as in years before. The best seller in pot plants was the lily, and cut lilies had the call in flowers, followed by roses and carnations. Callas, which were grown outside, sold in large quantities. The preparations for Easter by the retailers were in general very elaborate, a little too much so in some cases.

LAFAYETTE, IND.—H. Roth is erecting two greenhouses, 26x114 feet, of Foley construction, which, when completed,

## Florists, Seedsmen,

**Dahlias** are now the popular flower. Peacock's Dahlias are the "Quality Dahlias That Bloom." The best that can be grown. We know it. After a trial you will know it.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department 'W' Detroit, Mich.

Send for Catalogue.

## What the Users say

## KROESCHELL BOILER SAVES 35 TONS COAL.

"I bought a No. 7 boiler in 1901. It takes care of 10,500 sq. ft. of glass and could take care of 500 more. Must state that I am in business for 25 years and have attended many other boilers, but I must say for your boiler that it has given better satisfaction than any other, being easier to fire up, and it is easier to keep the temperature with your boiler in our houses than it is with any other.

I used 35 tons of coal less than I did with the boiler I had before. I can keep the temperature to 75 to 80 degrees during the severest weather. If it is necessary to do so."

PETER CROCIYNSKI, Chicago, Ill.

KROESCHELL BROS. CO., 452 W. Erie St., Chicago, Ill.

## HARDY CARNATIONS.

The new hardy ever-blooming CARNATION "CRIMSON KING." Everybody has asked for a carnation that would live in the garden during the winter. We have pleasure in offering this new plant, as well as all the others it is absolutely hardy, standing over the Canadian winters in the yard. It blooms all summer long, never a day that you cannot cut blossoms. By winter, fall, and spring, it can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy CARNATION CRIMSON KING. 2 1/2-in. pots, per doz., \$1.25 per 100, \$8; per 1,000, \$75. 25 plants sold at \$40 rates; 250 plants at 1,000 rates. Our new Trade List of everything you need now ready, mailed on application. Write today. THE GOOD & REESE CO., The Largest Rose Growers in the World, Springfield, Ohio.

## And This is Our Third Talk on Which House is the Cheapest.

OH yes, it is the Sash Bar Clasp this week.

You who put up wooden houses have been toe-nailing your bars to wooden plates or gutter and can now see that what you saved in cost of materials over our patent plate and gutters, you more than lost in the extra time it took in erecting the wooden ones.

This clasp of ours is made to do three things and it does them.

Leads off all condensation, and makes a dry wood to iron joint.

Stops end rot.

Acts as a stiffening brace to the roof.

It is used on all our cast iron gutters and on the galvanized Ice-Clearing Eave Plate. It is bolted directly to either gutter or plate at accurately spaced intervals, holes for which are always drilled at the factory.

This shows a section of the eave plate with clasps bolted to it and screwed to bar.

The bar is held in place by a screw at the bottom. You see the sides of the clasp further prevent any possible side movement—one reinforces the other.

It is at the eave your house first gives out, then why not first make that strong?

Then there are two mighty strong reasons why these special iron parts make our Semi-Iron House the cheapest—First, they save you time in erecting.

Second, They save you time and money after erection, by making a house that will outlast three wooden ones. And now that you are convinced that so far we are absolutely right, we next week want to talk over with you our Clamp Column fittings and that famous Giant Arch.

## EVANS' Improved Challenge Ventilating Apparatus

Write for Illustrated Catalog.  
Quaker City Machine Works,  
Richmond, Ind.

SALEM, ORE.—Ruef Bros. state that the Easter sales this year were about the same as during the Easter of 1910. There was very little difference in the prices which prevailed at that time, and the supply of both plants and flowers was not equal to the demand. In the potted plants, everything sold well, especially lilies, and carnations were the best selling cut flowers.

SAN DIEGO, CALIF.—The directors of the Panama-California Exposition offer \$1,000 for a new rose, which shall be known as San Diego, to be used in profusion on the grounds of the exposition in 1915. The offer is extended to every florist in the United States. The restrictions are that the rose must be hardy, the competitors must be residents of the United States, and they must make known to the floral association their intention to compete.

PORTLAND, ME.—The Easter sales this year were fully equal to the same period last year with, perhaps, a slight increase, writes L. C. Goddard. There was very little change in the prices except on carnations, which were lower. The supply of plants was fully equal to the demand and there was plenty of everything in the cut flower line except violets. All flowering plants sold well, there being the most demand for lilies. In cut flowers bulb stock went slowly and carnations sold best.

SIoux CITY, IA.—Everybody did a big business at Easter, writes Rocklin & Lehman. The demand for pot plants was excellent, the sales of these were double the amount of last year. Cut flowers sold well, carnations being the

## Some Facts About The U-Bar

It was invented by two practical men—each standing high in his particular line. One a successful grower, who knows plant requirements from A to Z; the other a greenhouse builder of wide experience.

The main principle of the U-Bar these two men worked out first, and then came months of minor problems upon which the success of the construction depended quite as much as on the U-Bar itself.

Then an experimental house was erected and theories proven to be facts. Then and not till then was a single U-Bar house sold. You know that no construction has yet been perfected that can approach it for demonstrated lightness, attractiveness and durability. Send for Catalog.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from start to finish.  
When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

### SUGGESTIONS FOR PLANT GROWERS.

#### Freesias.

The freesia bulbs that bloomed during the winter if properly cared for can now be shaken out of the soil and put away until planting time. Many growers do not seem to understand that the freesia bulbs forced are just as good for next season as are those that are bought, for unlike the narcissus and other Dutch and French bulbs, the freesia is growing and blooming at its natural season and is not what might be called forced. When the bulbs are shaken out of the soil they should be sorted and the larger ones saved for planting. It hardly pays to keep the small bulbs unless it is desired to increase the stock. If this is desired the small bulbs may be sown quite thickly in flats or under a bench where there is considerable light, and while they will not produce flowers will grow blooming bulbs for another year. To have freesia for Christmas the bulbs should be started early in July. Pick the bulbs over, and by close examination some will be found on which the young root eyes are beginning to swell. These should be taken for the early planting. The soil in which freesias are grown should have at least one-quarter sand incorporated in it in order to get the best and largest flowers, the balance of the soil being good compost. After the bulbs are planted they should be placed in a dark, cool place until the growths appear, but should be removed to the light as soon as the green tips are seen emerging from the soil.

#### Antirrhinums.

If the propagation of the antirrhinum cuttings has not been done the month of June is plenty early enough to raise good plants for next season's blooming. After the long spikes are cut off the plants will make new growths and these will make good cuttings for propagation and will root easily, even without bottom heat. The soft cuttings at this time of the year will require frequent watering to root them successfully, the sand should be kept well saturated and the cuttings sprayed often. Much of the damp off of the cutting bench is caused by dry-

ing out and then watering when the cuttings are in a wilted condition. The cuttings when rooted should be grown in pots, preferably 3-inch, and grown on for fall planting. They should be pinched back to make them branch and kept short all summer. If they become pot bound they will require a shift to larger pots, but in order to obtain spikes of bloom in early winter they should be planted in the bench during September. If planted at this time the roots will get a strong hold in the soil, and the large spikes start to grow before the short days. It is the custom of some growers, however, to grow antirrhinum to follow the chrysanthemums. This can be done by growing the plants in boxes about six inches apart and carefully transplanting after the early chrysanthemums are removed, or they may be grown in boxes six inches wide and six inches deep and the boxes set upon the benches after the chrysanthemums. The plants that are transplanted will not bloom as early as those that are benched and planted in the boxes and grown along without any check. If the plants are carried along in pots until November and then benched they will not bloom until early spring.

#### Dahlias.

The proper time to plant dahlias outside depends greatly upon the section of the country and the season, but they should not under any circumstances be placed in the open until all danger of frost is passed. But if the weather is not sufficiently warm to plant outdoors the plants are much better off in cold frames, where they may be given plenty of air, which will produce a nice stocky growth, and be hardened off a little preparatory to planting out. If the plants are left in the greenhouse they will require much more care and extra room to space them out in order to prevent their becoming drawn, both important items at this time of the year. Where the season is far enough advanced to allow them to be planted out the ground should be made ready. In selecting the location a place protected from high winds is much preferable, and one that can be protected

Send Advs. Early.

from early frosts in the fall will extend the season of blooming. The ground should be well spaded and a fairly good coating of manure worked in, but do not make the ground too rich or a fall, sappy growth will be encouraged, which will not flower early. It is much better not to manure too heavily before planting, and when the plants begin to bloom give them a top dressing of manure or complete fertilizer which can be worked into the soil. The plants should be set from two to three feet apart in the row, and if there is plenty of room the rows about four feet apart. Where roots are planted do not allow more than two shoots to grow, in fact, one is more preferable and will give finer blooms if the season is unfavorable. The earlier blooms which the plants produce are generally of the best quality, and if a succession of first-class blooms is desired it is advisable to make a succession of plantings, but each variety has its peculiar characteristics and to produce the best quality of bloom will require a constant study on the part of the grower.

#### Ficus.

The demand for rubber plants is not nearly as large as it was a few years ago, yet there is always a steady call for plants in the fall and during the winter and plants propagated in June will make good small stock for the winter. There are always plants that are either too tall or have lost the lower leaves so that they are no longer ornamental, and the top cuttings may be rooted at this time. Where there is no propagating bench with a large degree of bottom heat it is better to root them on the plant. Some growers cut a ring around the stem and moss the cut, but we have found it far better to cut the stem about half way through, six or eight inches below the top leaf, and press into the cut a small piece of wood, about the size of a match, in order to keep the cut open, fill the cut full of wet sphagnum moss and bind moss upon the stem all around the cut and tie it on with raffia. This should be securely tied on, for with the necessary watering and syringing, if not securely bound will be washed off. The plants should be then placed in a warm moist house where there is but little ventilation and the temperature maintained between 80° and 90° during the daytime and the ventilators closed early to hold the heat during the night. Be sure and keep the moss wet all the time and under these conditions the roots will be seen coming through the moss frequently in three weeks' time. The cutting should then be taken off just below the moss and potted and kept in the moist, warm house for a week or ten days until the roots have got a good hold in the new soil. After the young plants have begun to grow they are much better in frames, shaded with laths, during the remainder of the summer, that the plants may not grow too rapidly and become tall with the leaves too far apart. The old plants should be cut way back, after the cutting is taken off, to about ten inches from the pot and watered sparingly until new growths start, depending mainly upon the syringing, and will make good branched specimens.

PORTSMOUTH, O.—The Herms Floral Co. has purchased a new International Harvester truck for delivery purposes.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### Mothers' Day.

The observance of Mothers' day is increasing very rapidly and will be more general this year than last, additional states and cities have issued proclamations. There seems to be a doubt in the minds of some as to the date of the observance but the second Sunday in May is the proper day and Governor Deneen of Illinois has issued a proclamation and following is the proclamation of Mayor Harrison of Chicago.

"To the Citizens of Chicago: Whereas, The inauguration last year of a memorial known as Mothers' day, dedicated to the love and reverence which all persons owe their mothers, met with the spontaneous and cordial

Z. D. Blackistone.

approval of the people of Chicago; and,

"Whereas, The duty of faithful care, and devotion to our mothers, if they are living, and the sentiment of loving remembrance, if they have passed away, are recognized as constituting one of the greatest influences for the betterment of mankind; and,

"Whereas, The governor of the state of Illinois has proclaimed the observance of Sunday, May 14, as Mothers' day and urged upon all citizens the recognition of the memorial;

"Therefore, I, Carter H. Harrison, mayor of the city of Chicago, hereby proclaim the observance of Sunday, May 14, as Mothers' day as a worthy one and call upon all the citizens of this city to join in honoring the celebration by attendance at commemorative public ceremonies or in such other manner as may be deemed appropriate."

**MEMORIAL DAY** this year will mark the fiftieth anniversary of the outbreak of the great Civil War, and the decorations will be more numerous and elaborate than ever before.

### Special Sales.

Address of Z. D. Blackistone before the Florists' Club of Philadelphia, May 2, 1911.

About six months ago I received an invitation to come over and address the Florists' Club of Philadelphia, and feeling quite puffed up at your compliment, I advised Chas. Meehan of my acceptance. However, as the time approached I began to realize that in exchange for your fine compliment I was expected to come over here and tell you lots of things that you know already and some that you had never heard before. I was reminded of the darkey wedding down in the good old state of Virginia, as narrated by an old colored mammy. After describing the affair in detail and telling of all the good things to eat and what kind of dresses everyone wore and how the bride looked, she was asked about the groom. Her reply was, "Don't you know that good for nothing nigger never showed up." I was tempted to play the part of the good-for-nothing nigger.

You have asked me to tell you something of the value of special flower sales in a retail store as a means of advertising. Therefore, to speak on this subject, I shall rely mainly on my own personal experiences. This will necessitate the frequent reference to myself and business, which I trust you will not consider egotistical, but simply given for the purpose of throwing more light on the subject matter.

My business career began in November, 1898, when I started in a very small store and on a very small capital. For the first five or six years my business continued to grow and it seemed so easy that I wondered why everybody did not go in business. Then competition in the neighborhood became keener and business seemed to stop growing, but the expenses continued to increase just the same. Things went on in this way for several years, when I awoke and realized that I had to be more aggressive and progressive in the conduct of my business if I wished to succeed. Up to this time I had done very little advertising and even that in a very desultory manner, in programs principally, with an occasional advertisement in a special Thanksgiving or Easter edition of a newspaper, given to a newspaper solicitor. My first attempt at special advertising came when I signed a twelve months' contract at \$80.50 a month for a streetcar ad. With this space on my hands I began to get busy to keep it working. My first ads were gotten up something like this: "Blackistone, Washington's Leading Florist, Roses, Violets, Orchids. Telephone —, Address, etc." Well, this went on for several months and I began to wonder if anyone ever read them. My first real attempt at special advertising came when I photographed a small kentia in a jardiniere, had it reproduced and put in my car space, advertising "Special Dwarf Palm and Jardiniere Complete 50 cents, Regular \$1.00 Value." Now notice: this particular ad had run for at least two weeks and we had not had a single call. I then telephoned to the man in charge of the advertisement telling him of my disgust, and ordered new cards substituted, which required about a week to prepare, instead of my "Special Palm" ad. But, mind you, that very day we had calls for our "Special Palm." This was followed up the

next day, and the next, and the next, with frequent calls and these customers were nearly all perfect strangers who had never been in my store before, and many of whom had never heard of Blackstone, Florist. This I consider the best paying advertising I ever did. It not only paid for itself, principal and interest, but continued to pay interest for several years. And would you believe that, still to this day, although the advertisement has been dead for several years, we occasionally have people to come in and ask if we have this article. On this advertisement I cut my eye teeth on the value of special sales as a means of advertising, and I can assure you the lesson has been worth to me thousands of dollars. After this I used a photograph of a table bouquet of carnations any color, arranged with greens, "Special at \$1.00," and then during the spring and summer a spray of carnations with gauze ribbon, "Special at \$2.00." Both these were successful, paying advertisements and good drawing cards.

Now I fully realize that all this, while being pertinent to the subject, is not what your committee had in mind and wanted me to tell you about. What you are really looking for is information on the subject of conservation. How shall we florists manage so that the great glut of the crops of cut flowers, which necessarily must come from time to time, shall not be wasted? How shall we manage that they may prove a useful and profitable help to the florist instead of a bane and a nightmare?

The foregoing I have recited more as an introduction. It shows you the evolutions of practical commercial development as pertaining to the specific subject. Having shown you the experiments which I made and their results, you will readily understand that my mind was now in a receptive mood on this subject. I had finished up my streetcar advertising contract when, at the psychological moment, a friend of mine, representing one of the largest papers, induced me to sign a 10,000 line contract. This was in the fall about four years ago. Just after this I was visited by one of your enterprising commission men and offered a special price on roses in large quantities. You must have had an awful crop of Richmond roses here at that time. Anyhow, they induced me to place a pretty good size order at \$20 per thousand. And now observe the craftiness of the wholesale florist. In this entire first special shipment there was not a rose that was not worth \$1 per dozen and a good many of them were worth and actually sold for \$1.50 and \$2 per dozen. I had placed a large advertisement of my "Saturday Special Rose Sale at 50 cents per dozen" in the paper, and also put a large-size card in the window displaying the roses which we were offering. That day everyone in the store, including the boss, was busy all day. When we closed that night we did not have a Richmond rose unsold in the house. That shipment was a sort of coaxer. I am still trying to get another one like it.

Well, with this as a starter I have continued my "Saturday Special." Roses and carnations are the best for this purpose, but we use all and any kind of flowers that we can buy in quantity, and at a price which will be

an inducement. We have customers who telephone and come from all over town for this sale and we always have it. I have paid 60 cents per dozen for carnations and sold them for 50 cents, giving greens and delivering in a box at this price, in order to preserve this custom and not disappoint our patrons, and it paid us to do this. At our Saturday sales we not only move thousands of flowers, thereby relieving the congestion to the market, but also send flowers and good cheer into poor and obscure homes all over the city. In fact, I have always had this for my motive in offering these special inducements. Our patrons of the "Saturday Special" come on other days for funeral pieces and flowers for other

ing. It is the idea sometimes set forth by some competitors that special sales are degrading and detrimental to the business in general. In my opinion nothing could be more erroneous. To the contrary, the result is beneficial to all. A large proportion of the flowers sold at a special sale are bought by persons who do not have to have them. They simply buy because they are getting a bargain or that their 50 cents in flowers is more satisfying than spent in anything else. If not for flowers, it would go for candy, cheap amusement or something else, perhaps in something even harmful to the health, and certainly not more generous in the spread of sweetness and good cheer. There are times when the busi-

FIRST PRIZE BASKET OF ROSES.

Exhibited by Sidney Hoffmann at the Second National Flower Show, Boston, March 31.

special occasions, and the point sometimes raised that customers will hold off in buying for the bargain day does not hold good. In fact, to the contrary, it increases the popularity of the business and the patrons for the other days of the week as well. Do not think that the special sale only requires securing of proper stock and inserting an advertisement in the paper. Oh no! In order to make a success of it one must give it close attention and study. Many times I have spent good money in stock and printers' ink and have never seen it returned. Usually I can trace the cause, and more often than not, I find it in myself, in something that I have done or have failed to do.

There is another phase on this subject which I must touch on before leav-

ness seems to come to a standstill. When it seems to need a stimulus or tonic, not with one establishment in particular, but with all. And then it is that the rousing good special starts things going and helps everybody. Perceptibly and beyond argument, is this true in the fall just as all flowers are beginning to come in full crop, and the public have gotten out of the habit of buying hothouse flowers; and again at holidays when all flowers are so high that people in ordinary circumstances are afraid to come in and even ask the price.

Fifteen years ago the special flower sale was scarcely heard of. The reason which you all know is very simple. Then the output of flowers was perhaps not more than 10 per cent of

that of the present day and all stock was easily disposed of. Then the florist was simply the florist. Today he must also be the artist. And tomorrow, in order to succeed, he must be the florist, the artist and the merchant combined. "Necessity is the mother of invention" and the special sales are brought about by the unalterable laws of nature. Who shall say that the great glut of berries which enables the poorest to enjoy them when they are the most luscious, and all who wish to preserve them for the winter season, is an evil? Who shall say that the production and maturing of any of our vegetables, the vegetables we serve on the table, the fruits and grains of the earth, the trees, the grass and the flowers, is a mistake? Some may tell us that this periodical overproduction is a necessary evil, but I do not see it as such.

Gentlemen, I have no panacea to offer for this or any other evils, real or imaginary, which we may have, but I am convinced that with proper forethought we can, through the means of special sales, actually turn defeat into victory. Gentlemen, this is our mission and opportunity; this is the means by which we can place flowers in the reach of every house; this is the means of educating the poor as well as the rich in the love of flowers. Do you realize that if flowers were bought by only the wealthy people 50 per cent of the florists in the City of Washington would have to go out of business? Here, and likewise in many other cities, the running expenses and the bread and butter of the families depending comes from the poor and moderate classes. Then, gentlemen, it is not only our necessity, but our duty, to find a means of distributing this bountiful supply which nature has placed in our hands. It is our mission and our opportunity to educate and instill in the hearts and minds of the young and the old, the rich and the poor, that inherent love of nature and all her works, the love of trees and shrubs and every flower that blooms. This is the mission of the florist in the generation to come, and we can utilize the special sales as one of the means to this end.

#### Interpretation of Experimental Results.

At a time like the present when a considerable amount of experimentation on crops, manures and kindred subjects is being carried on, it is important that those engaged in the work should be in a position to appreciate the sources and extent of probable error in their experiments. We, therefore, draw attention to a valuable paper by Professor Wood and F. J. M. Stratton published in the Journal of Agricultural Science (vol. iii., part iv., December, 1910), on "The Interpretation of Experimental Results." Among the conclusions reached by the authors, one of the most important is that the probable error of field experiments is about equal to five per cent of the crops. This being the case, it is important for the experimenter to know how many duplicate plots must be employed in order to reduce the probable errors to the extent that may be desired. The authors publish a useful table, which gives information on this head, and point out that more accurate results may be obtained by employing large numbers of small plots than by the use of a smaller number of large plots.—The Gardeners' Chronicle.

## THE ROSE.

### Care of Young Stock.

The young rose stock should now receive careful attention. In the first place they should not be allowed to become potbound; as soon as the growth becomes ripened they should be shifted into larger pots and given a good sunny bench in a house where they will not be subjected to drafts and drip. A leaky house for young stock of any kind is not the right kind of economy; for any old house isn't quite good enough to grow good sturdy rose stock.

Careless watering in connection with the same kind of judgment when ventilating often spoils a batch of plants that bid fair to make good stock. A few points to follow are to go over the pot plants the first thing in the morning and spout the driest of them carefully. Then by handling the hose properly the watering is uniform. Raise the ventilating sash early in the day and leave a crack of air on the house all the time, and if the weather permits give them all the air possible, just so the plants are not blown around, as they sometimes will be on windy days. The spraying should be done with a good strong pressure, otherwise the red spider will walk off with them. Very often the man in charge of the young stock does not spray with enough force for fear of overturning the pots. If the pots are placed crosswise on the bench touching each other, and the room the plants require is left between the roses, and the grafted plants are firmly staked, one can spray them as hard as they choose without upsetting the plants, and the plants will develop fully as well with the room between the rows one way as they would placed two ways. Be sure to drain the pots, including the three and one-half inch size and larger, and allow the plants sufficient room to have the foliage dry

powder evenly and there is practically no waste. We prefer grape dust to any other preparation we have tried, owing to its being so finely ground, and it contains nothing harmful, in fact, it is the best medium we have ever used for the prevention of mildew on any kind of plant.

The treatment prescribed for the pot plants is applicable to the growing plants that we are cutting from, and, just a few words in reference to the latter. As a rule the roses are somewhat neglected after Easter; they are not disbudded regularly or perhaps they require tying, mulching and many of the little details so essential during every month of the year, has been sidetracked, so to speak. We do not believe there is any work outside of such importance as to cause a grower to neglect anything inside, if one has work that must be attended to out of doors of any description, whether it be the small grower or the fellow with a couple of acres of glass, the inside men should not be taken away from their work, for if managed properly there will be enough work in the rose houses the year around for the growers to keep things as they should be kept, and we find that our plants have to be cut right up until they are thrown out to be made to pay. That is why we hear a grower say at times one had better throw out good plants at the end of the season than poor ones (referring to replanting with young stock or making room for it). Plants to produce, so they will at the end of the season be a source of profit, should, we think, produce a good grade of flowers for nine months out of the twelve, and we have often seen plants cut continuously through two seasons without the slightest rest. This can be done where they are planted in solid beds and where the soil is exceptionally suitable to the variety of roses grown therein, at the same time in no

KAISERIN AUGUSTA VICTORIA ROSES AT C. LOVERIDGE'S, PEORIA, ILL.

rapidly. Do not wait for signs of mildew or blackspot, but dust the foliage every three or four days with grape dust, which is very effective as a preventive. There is no way of stamping out a bad dose of mildew that we know of after firing ceases, so sulphur in any form should be used as a preventive, a sulphur blower is the best machine to apply all powders in the sulphur line, as it distributes the

instance have we seen this done without the most careful attention being paid to all the details the whole season through.

From now on it is advisable to keep close watch on the old plants. Keep the surface of the soil covered with a top dressing or mulch of well-rotted cow manure, just enough to protect the roots and to help retain the moisture, as the beds from now on will require

copious watering. Liquid manure should be used at least once in ten days, and it would be best to apply the manure water on the beds when they are not too dry. Very often when using liquid manure on a bright, warm day with dry beds the tender foliage on Killarney will suffer, appearing scorched as if done by a bad pane of glass in the roof. This rarely occurs during the winter months except where the soil has become bone dry, caused, perhaps, by a heating coil coming very close to the beds or tables.

The soil pile should be turned frequently between now and the time it is to go in the houses, and should be ricked up so as to shed as much water as possible and ditched around so that no water will collect after rains under the compost. It is not too late now, if the soil is composted at once, to make up the shortage, if any, soil stacked up in layers, grass side down, adding one part cow manure to three parts soil and a sprinkle of ground bone to each layer. By chopping down several times and turning it will be in fairly good shape by June 15 or June 20, which is a good seasonable time to plant the young stock, or to transfer some of the bench stock (one-year-old forced stock) to the solid beds. It is one great stride toward a successful season's cutting to have everything planted and started nicely by July 1. Try it. E.

#### Factors Determining Color in Roses.

Paper read by Prof. M. A. Blake of New Brunswick, N. J., before the meeting of the Society for Horticultural Science held at Tampa, Fla., February 9, 1911.

The forcing of roses for cut flowers during the fall, winter and spring months has become a great industry in certain sections of the United States. The more extensive plants are located within easy shipping distances of such large cities as New York, Philadelphia, Chicago and Boston. A considerable number of varieties are grown commercially, but American Beauty, Killarney, Bride, Bridesmaid, My Maryland and Richmond far exceed any others in quantity produced. These varieties represent three colors: red, white and pink. Red roses are principally in demand during Christmas week and for special occasions. The general trade prefers a pink or white rose, and these greatly exceed the red varieties in the quantities produced. The matter of color is of little concern when white roses are grown, but becomes important when the pink varieties are considered. When the trade purchases the better grades of Killarney roses, it expects to secure flowers of a decided deep pink color, and light, faded-out appearing specimens are regarded as of inferior grade. There is a marked difference in the matter of color between the various pink varieties. Some are quite constant in their coloring even under a great variety of conditions, while others are decidedly variable. American Beauty is one of those whose color is quite constant under varied conditions, although there is often a difference in the real quality and finish of the blooms. The variety Killarney which is rapidly replacing Bridesmaid is, however, distinctly variable. Specimens of a deep, rich pink are seen in the same florist's window with very light-colored "faded-out" appearing specimens, and yet the latter may have perfect foliage and good

Exhibited by Myers & Sautmann at the Second National Flower Show Boston, March 25.

stems. The variety My Maryland which is one of the newer pink sorts, is even more variable in color according to the conditions under which it is grown.

Comparatively few investigations have been conducted by experiment stations in the forcing of roses, to determine the relation of factors which influence their development. Factors which determine color, size and quality of our deciduous fruits have received considerable attention. Yet no one would venture to say that the same influences apply to roses under greenhouse conditions. All successful rose growers have a system of treatment for each variety which they grow, and such a system is obviously necessary, as the whole environment of the plant is under their control, and the relation of soil, moisture, temperature, light and plant food must be properly adjusted for the best results. These elements of which all are necessary for the proper growth and development of the rose plant, also occupy a place with reference to the color of the flowers. The preparation of the soil for roses does not vary greatly with the different commercial florists. A strong clay loam soil is preferred where it can be obtained. It is collected in the fall in the form of sod, and placed in a pile with alternating layers of cow manure in about the proportion of one part manure to three parts of soil. Liberal quantities of lime and ground bone are also used in the soil piles by most florists. The soils used for the forcing of roses are therefore rich in humus and plant food from the beginning, and sufficient amounts of the different elements of plant food are generally supplied, or, in other words, the lack of sufficient quantities of ni-

trogen, potash or phosphoric acid for the needs of the plants is an exception. In general, we may say that the florist furnishes good growing conditions for his roses as far as soil and plant food are concerned, and is more likely to err on the side of too liberal supplies of plant food rather than a lack of them.

Since June 1909, the New Jersey experiment station has been conducting some investigations with roses which have given the writer an opportunity to observe their behavior quite closely. The varieties Killarney and My Maryland were selected for investigational work because they are quite extensively grown by commercial florists. These are both pink varieties, and the color of the flowers varies from a light to a deep pink according to the environment under which they are grown. All florists recognize the importance of having greenhouses for rose forcing located and constructed so that the plants may receive the greatest possible amount of light. Where any shading of the plants occurs during the months of December and January, the growth becomes more slender and weak. Several successive cloudy, dark days during the winter months will often cause a decided change in the appearance of rapidly-growing rose plants. The red and bronze color of vigorous, young rose shoots and leaves fades to a light green, the shoots stretch out and become spindling and the leaves which develop during these dull days are not only lighter green in color, but are smaller in size. The depth of color of the blooms of such varieties of roses as Killarney and My Maryland may not be determined until the buds begin to show color. In fact, changes in the color of roses may

sometimes occur within a few hours. A crop of My Maryland roses was maturing at the New Jersey experiment station greenhouses during the week of January 15-21. Previous to January 13 the color had been high, but from January 13 to 16 the days were dark, cloudy and foggy and the roses cut upon the morning of January 16 were very light in color. Bright weather conditions occurred upon January 16, and upon January 17 the opening rose-buds were again of a deep pink color. Here was an instance of a decided improvement in color within twenty-four hours. This might lead one to believe that light was the real determining factor in the color of roses. However, crops of light-colored Killarney and My Maryland are not infrequently seen in greenhouses during clear days where the plants are exposed to all the light possible. It is therefore evident that other factors may exert an influence.

A constant night temperature of from 58° to 60° is regarded as most favorable for Killarney and from 60° to 62° for My Maryland. During the day a temperature of from 70° to 75° is favorable for both varieties. When a greenhouse containing My Maryland is kept at a temperature above 64° at night the growth of the plants is more rapid, but the stems become slender and are likely to be softer and weaker. If the house is kept at this temperature after the buds commence to set, the stem between the bud and the first leaf below it becomes elongated and the bud itself is much smaller than desirable. If a liberal supply of plant food and moisture is maintained in connection with the access of heat the flowers have a tendency to become light in color. Yet My Maryland roses which have made a soft, rapid growth because of high temperatures and liberal quantities of moisture and plant food may produce flowers of high color even after the buds have set, if the houses are then kept cool and bright days follow. Plants which have been forced too rapidly, however, will be sure to produce small buds, and the stems will lack vigor even though the flowers may be of good color.

A fairly rapid drying-out of the soil in the greenhouse benches is of more importance than is often conceded to it. The rate at which a bench of soil will dry out depends upon the character of the soil, the width and depth of the bench, the temperature of the house, and the amount of ventilation which is given. Soils generally used for roses are quite retentive of moisture, especially where a mulch of manure is applied, which is quite a common practice with florists. The movement of water in the soil, encouraged by evaporation from the surface, is absolutely essential to the welfare of the plant. If we desire early vegetables we plant them upon soil which dries out rapidly in spring and where conditions favorable to growth are active. In a heavy, retentive soil plants develop more slowly during the cool months. The rose is most desired by the commercial florist during the months of December, January and February, when the days are short and likely to be dull and cold; at a season of the year when ideal soil conditions for growth need to be maintained. If the soil remains wet and soggy at all times, the roses do not grow well and may even be severely injured. When

a high temperature is maintained in connection with a wet soil and very little ventilation the plants make a very tender, soft growth, and the flowers of such varieties as Killarney and My Maryland are certain to be under size, and likely to be of poor color.

There is frequently a variation in color between different flowers upon the same plant, and a careful examination will reveal that those lightest in color are almost invariably produced upon the softer and weaker shoots, and are frequently upon portions of the plant which are partially shaded. Occasionally a large, vigorous shoot will have a lighter-colored flower than other shoots upon the same plant which have more slender stems, but an examination usually reveals the fact that it has made a very rapid and tender growth, even though it may have been vigorous. The observations just stated indicate that the rate and character of the plant growth is a factor which may influence color in the forcing of roses. Although light and the character and the rate of growth may be directly responsible for the color of the flowers, the indirect factors of soil, moisture, plant food, temperature and ventilation are of perhaps greater interest to the florist, for it is these elements in combination with each other which directly determine the rate and character of growth of the plants, and are things over which the florist has control. And it is by the proper adjustment of these units that the florist secures a firm, vigorous growth of plant and flowers of good quality. It has been stated that lack of sufficient light, poor ventilation, excess of moisture and

supplied. It is obvious that a certain amount of plant food is necessary in order to secure a strong, vigorous growth of the rose plants, and that a deficiency of plant food would result in a check to the plants. However, the matter of a general deficiency of plant food can be set aside, from the fact that liberal amounts are commonly furnished by successful florists, as previously stated. Plant food may be applied to such an excess, however, as to check the growth of the plants and even severely injure the roots; in such cases the color of the flowers is affected. This really represents abnormal conditions, however, and would not occur with proper management. Any check to the growth of the plants which causes the stems to harden, commonly has an influence upon the color of the flowers, and a slow but vigorous growth results in flowers of the largest size and of the best quality. Where the check to the growth is caused by actual injury to the plant by improper fertilization or lack of moisture the color may be light. It may be that some inorganic fertilizers may tend to produce a somewhat firmer leaf and wood development than some organic forms under similar conditions. But such factors as light, temperature and moisture exert much stronger influences than the various forms of any plant food such as nitrogen, and are likely to obscure its particular effect. A recent test of heavy applications of high grade sulphate of potash upon My Maryland roses at the New Jersey experiment station, showed no influence upon the color of the flowers where sufficient quantities of nitrogen and phosphoric acid were

CARNATION GENEVIEVE.

heat may cause a tender, weak and undesirable growth of the rose plant which results in flowers of poor color and quality.

The discussion thus far has been based upon the supposition that sufficient amounts of plant food have been supplied. It is quite a common belief among florists, that color and quality of flowers are often determined by the kind and amount of plant food

supplied, and proper greenhouse conditions maintained.

Heat and moisture may have a marked influence upon the rate and character of growth of roses. A few extra degrees of heat may convert a slow growth into a rapid one, and a lack of moisture may check rapid growth even where an abundance of plant food occurs. A proper rate of growth for any variety is secured more

SOME MEMBERS OF THE PACIFIC COAST HORTICULTURAL SOCIETY.

by good greenhouse management than by the particular form of plant food supplied. Aside from the effects of insufficient light due to dull, cloudy days, and the proper control of injurious insects and diseases, the secret of growing roses of high color and good quality is the securing of good plants for benching; a liberal but not excessive supply of the plant food elements, a constant temperature suited to the variety grown, and the proper watering and ventilation of the houses. Light, and the rate and character of growth are considered to be the direct factors which determine the color of roses, but the indirect factors, which together affect the rate and character of growth, are likely to prove of more direct interest to the florist.

#### The Brazilian Cocoa Palm.

Pernambuco is situated in the center of the tropical section of Brazil, within which the cocoa palm grows most luxuriantly. The cocoa palm seems to be indigenous to the district which extends from the vicinity of Bahia, on the south, to Parahyba, on the north, but it attains its fully luxuriant and most prolific development in the vicinity of Pernambuco.

The cocoa palm is one of the most beautiful and attractive natural adornments of many of the public parks and private gardens of this city and environs, often attaining a height of from 80 to 90 feet. The trunk is without branches, and the leaves, which cluster in a tuft at the top, are from 15 to 20 feet in length. At the base of the leaves the nuts hang in clusters, the number varying from three to 15, according to the age and condition of the tree. Occasionally cocoa palms are found which do not bear nuts, and these attain even a greater height, their sterility seeming to augment their virility and consequent attractiveness.

While this particular palm grows naturally, it thrives a great deal better with care and cultivation, and there are several large plantations in this vicinity planted within recent years and carefully cultivated which are now returning a fair revenue to the owners. Most of these plantations are located along the coast, but the tree will grow and produce up to an altitude of 880 meters (2,624 feet).

The nut is first planted in its natural state, with hull and fiber. At the expiration of about twelve months, or when the plant has reached a height of about three feet, it is transplanted and set out in rows about 40 feet apart. If cultivated and irrigated, the tree will produce at the end of five years, otherwise it will require about ten years to produce. Although the rainfall within this coast region averages about 80 inches per annum, several inches often fall within a very short while, and all falls during the months of the "rainy season," and often when it is of no service to certain vegetation. The summers are hot and dry, and young plants and trees need to be irrigated.

There are two cocoanut markets in this city, one for the green and the other for the mature or dried nuts. The green nuts, which are picked at about the end of five months, and before the real meat of the nut has begun to form inside, are composed entirely of water, for which exclusive purpose they are bought and sold, and which forms one of the principal and most popular beverages of this section of Brazil. This water is nonalcoholic and when iced is converted into a most savory refrigerant. Its action is diuretic. When the nut is partially mature, the inside is sometimes extracted and, by the use of sugar and some other ingredients, is converted into a popular confection. The meat of the dried or ripe nut is used exclusively

for food, being usually seasoned and mixed with different provisions for flavoring purposes. The owner of one of the large plantations here informed me that he averaged about \$1 net profit per annum from each tree.

The greater proportion of the nuts grown here are consumed locally, but a considerable quantity is shipped to Rio de Janeiro and other cities of Brazil, and also to European countries, where the improved facilities for extracting the oil have greatly enhanced their value.

The price of the nuts in the market here ranges, according to size, from three to nine cents, the average being about six cents each.

The bud rot, a destructive disease quite common in India, is not known in Brazil. There is, however, a long black beetle, which bores through the shell and destroys the ripe fruit, but not the tree, as is the case with the diseases prevalent in the Orient. Up to the present time these beetles have not been sufficiently plentiful to cause the owners of plantations here any undue concern.

COUNCIL BLUFFS, IA.—J. F. Wilcox is a grandfather, his son, Roy Franklin Wilcox, and wife rejoicing in the arrival of a boy April 24.

NEWTON CENTER, MASS.—The Irving street greenhouses run for so many years by the late Robert Rodden will be continued by the family of the deceased under the management of Robert K. Rodden, son of the late proprietor.

PASADENA, CALIF.—The demand for chrysanthemums has been exceptionally fine this year, says Richard Thomas, the chrysanthemum specialist with Miss Sadie A. Thomas, and adds that the growers greatly enjoyed the visit of one so well posted on chrysanthemums as Elmer D. Smith of Adrian, Mich.

## Doctors for Plants.

Abstract of paper read by Prof. H. H. Whetzel, of the New York State College of Agriculture, Ithaca, N. Y., before the Massachusetts Horticultural Society, Boston, Mass., January 21, 1911.

Plant pathology as a distinct profession can scarcely be said to have more than just appeared in our economic system. So far as I know, only two institutions in this country at present maintain distinct teaching departments of Plant Pathology, namely, Cornell University and the University of Wisconsin.

Man has always looked upon plants from quite a different point of view from that with which he has regarded his animals. He regards them as so much material, to be chopped, reaped, eaten, burned or trampled upon. The ease and readiness with which new plants may be grown to replace those he has eaten or wasted, their great abundance and variety and their helplessness before his onslaughts, has demanded of him little respect or consideration. It is only as population increases, and the thoughtless waste of his hands becomes appallingly evident in the rapidly disappearing lumber supply, depleted soils and reduced crop production, that diseases in plants begin to demand his careful consideration. It is the economic feature of the case alone that appeals to the plant-producing public.

Some of you, most of you in fact, may doubt whether the development of a great number of professional plant pathologists is actually warranted by the economic losses from plant diseases at the present time. Are the annual losses to our crops sufficient to maintain a corps of such highly priced servants and still pay a good profit on the investment? A glance at some of the well established facts as regards losses from plant diseases and insect pests will, I think, serve to convince us on this point. While it is difficult to get reliable estimates of the annual losses from diseases of fruit and fruit trees, one has only to compare the yield and quality of apples from sprayed and unsprayed trees, season after season, to realize the tremendous losses from apple scab and codling moth, or from peach rot and curculio. Little peach and peach yellows, collar rot and root rot, crown gall and many others of like nature, continue year after year to take unchecked, a heavy toll from our plant resources. The control of these

maladies would swell tremendously the gigantic annual crop production of this country. Wherever a thorough and practical study of such a disease problem has been made, it has almost always resulted in the discovery of an effective, practical and profitable method of control. One of the greatest leaks in our modern agricultural business is that from pests and diseases. It certainly will pay to train and maintain at the direct expense of the grower expert plant pathologists.

The primary object of the plant pathologist is to prevent diseases, not cure them. The plant doctor should be a public servant supported in part, at least, by the local growers. In short, the growers must meet the state at least half way in the training and support of experts for the solution of this plant disease problem. I believe we have made some progress in this direction in the state of New York. Already eight industrial fellowships have been established in the department of plant pathology by growers and commercial firms along the lines of plant disease control. These each provide for salary and expenses for young men to take up the investigation of the diseases of certain crops or particular lines of disease control, fungicides, etc. These fellowships represent financial cooperation between the growers and manufacturers with the state, through the college, which furnishes the necessary laboratory equipment, training for the men and competent supervision of their work.

The work, during the growing season, is conducted in field laboratories in different parts of the state, where the particular disease problem can be studied to best advantage, in the orchard, the field, the garden, or the greenhouse. The grower not only has the advantage of seeing the problems solved in his own locality but has the especial advantages of the young plant doctor's advice and supervision in his spraying and other disease control operations. Our plan of training and developing specialists on the diseases of crops has been that they shall be maintained by groups of growers as their experts on our staff, the state providing facilities for these men to continue their labors for the benefit of the growers of the state. The most convincing proof of the success of the plan is the constantly increasing demand of the growers for

more of these field laboratory fellowship cooperations with the college. Not only in plant pathology but in economic entomology, as well, are these fellowships being established.

You will better appreciate the value of these young experts if I show you some of the results which they have obtained for the growers of the state. I shall select the work of two of them. The serious injury to the fruit which so frequently results where bordeaux is used in the control of apple scab convinced our growers that some substitute equally effective but less injurious must be found. With no special funds at our disposal we were unable to press the investigations. The establishment of the Niagara Sprayer Company fellowship in the spring of 1909 enabled us to put a man on the problem at once. A field laboratory was established and has been maintained during the growing seasons of 1909 and 1910, right in the orchards in a different locality each year. August 5 and 6, 1910, at the summer meeting of the State Fruit Growers' Association, over one thousand growers saw the results of these experiments right on the trees in the orchards near Sodus, N. Y. B. J. Case, president of the association, in whose orchards some of these experiments were conducted, declared that if the fruit growers of that locality would retain Mr. Wallace, as their local plant pathologist, he would save that town \$50,000 the next year.

For many years nurserymen in central New York have lost more or less heavily from fire blight in their blocks of pears, apples and quinces. By co-operative arrangement with the department of plant pathology, in the spring of 1909, C. W. Stuart & Co., nurserymen, provided for one of our men, Mr. Stewart, to undertake the study and control of this malady in their nurseries. The young man was given to understand that upon his efforts and results in that nursery that season depended future opportunities to get advanced training in his chosen line. It was distinctly up to him.

When he came to the nursery in June, the disease was already well established in a block of quinces and was spreading into the pears. By systematic and untiring efforts this young man regularly inspected about one hundred and thirty acres of nursery stock from one to three times a week, wiped out the blight already estab-

WM. PATTERSON'S DISPLAY OF BULBOUS FLOWERS AT THE SECOND NATIONAL FLOWER SHOW AT BOSTON, MARCH 25, 1911

lished and promptly suppressed several new outbreaks of the disease. He kept an accurate record of all trees removed because too far gone to save, and a record of all trees saved by prompt removal of diseased shoots. This table shows the results for the season:

| Apples, Pears, Quinces, Total.                                     |     |    |      |      |
|--------------------------------------------------------------------|-----|----|------|------|
| Number of trees from which blighted shoots only were removed ..... | 834 | 32 | 1451 | 2317 |
| Number of trees entirely removed                                   | 83  | 7  | 256  | 346  |

Not only did he save the company these 2,317 trees, which they would certainly have lost, but he indirectly saved at least as many more by preventing the general spread of the disease. So well had he done his work of eradication during 1909, that none of the disease was carried over for 1910, and while a few new infections were brought into some blocks late in the season, they were easily and promptly suppressed with insignificant losses.

But why retain these experts permanently? For the same reason that we retain our physicians, our surgeons, our veterinarians; because new diseases and epidemics of old ones will be constantly appearing. It requires the training and experience of men who make plant pathology their business to successfully and profitably cope with these. The grower will never learn the technique of plant pathology any more than he will that of veterinary medicine, and he will soon learn that it is not only necessary but highly profitable to pay for the services of expert plant doctors. There will be a constantly increasing demand for the professional plant pathologists in the conservation of our crop production.

### Callas.

#### ED. AMERICAN FLORIST:

What is the proper treatment of callas that have been in bloom all winter?  
A. E. P.

The callas will be through blooming by the last of May or first of June, and then should be gradually dried off. When thoroughly dry, the pots may be laid on their sides, or the tubers shaken out from the soil. If in benches, the tubers may be dug up and stored in a dry location. If wanted for early forcing they can be started in late summer, being placed in small pots and watered carefully until root action starts, when they should be shifted to larger pots, or planted in the bench. Pot grown plants will bloom earlier than those in benches. W.

### Chrysanthemum Thanksgiving Queen.

Thanksgiving Queen.—In form an improved and magnified Silver Wedding, being larger and more double. Color creamy white, maturing November 20, just right for Thanksgiving use. Only four feet high from early June planting, foliage medium in size. Stem so strong as to scarcely require tying. Blooms nine inches in diameter. Best bud September 1 to 10. Awarded certificate Chrysanthemum Society of America. Elmer D. Smith & Co., sponsors.

STAMFORD, CONN.—The Frost & Bartlett Co., foresters, has been incorporated.

CHRYSANTHEMUM THANKSGIVING QUEEN.

### Insects.

Paper read by M. C. Ebel before the New York Florists' Club, May 8, 1911.

An intelligent discourse on insects is always interesting to florists and gardeners, but when one is limited to a ten minute discussion on so important a subject, as I have been by your essay committee, it does not permit of any broad presentation of all that might be said respecting the many insect pests so troublesome to those engaged in any branch of floriculture, and will afford me no opportunity to say what I might like to regarding some of the two legged bugs we daily encounter.

In approaching your committee to learn what they had in mind when they called on me as to just what points they desired to have me elucidate, I was informed that they were thinking of insecticides, but that their modesty restrained them from placing any limitation on me, and as there would be no insecticides were there no insects, they gave me the entire field to talk on, all providing, however, that I would restrict myself to the time limit, if I should attempt to cover it all. As the treatment of insects is more within my line than the cultivating of them, I will confine myself to some of the methods for their control. My experience has taught me that entirely too little thought and consideration is given by the grower to this important

feature of the business, and the neglect of this at times causes them serious loss, which might easily be overcome by a little more attention to the preventing of insects getting a foothold on their plants. In every other branch the progressive growers are alive to the new conditions and methods employed and keep themselves in tune with the times, but when it comes to controlling insects it appears that too many of them find that their grandfather's ways are still good enough for them. But plants are very much like the human being, who is not content to bear only what his forefathers suffered, they are continually producing new diseases and insects, and it is essential that the florist or gardener who is ambitious to rank with the successful of his profession should study this important phase of plant culture as he does the temperatures and fertilizing, etc.

Some growers prefer fumigating or vaporizing, and others spraying, as a means of insect control. From the results that are being obtained there is little doubt that both remedies are effective when properly applied, but improper applications, no matter how good the material employed may be, must result in failure, and carelessness oftentimes is the chief contributor when bad results are obtained. Both the methods referred to have their special merits, fumigation being more

generally regarded as the most economical from the labor-saving standpoint. But on many of the large places spraying is being resorted to more and more, for it is found to be the less harmful to plants, and with proper system the labor of an establishment can be so engaged in the work without additional cost above that of fumigating; in other words, when everything is done in its time and place spraying can be made one of the routines of the regular work in a house. Fumigating requires the filling of a house, while spraying is necessary only in that part of the house where the pests have taken a hold, when cures are sought. Still, every grower should bear in mind that "an ounce of preventive is worth a pound of curative" and nowhere can this old adage be more truly applied than in the control of insect pests. Our most successful growers no longer wait for the insects to put in appearance but fumigate or spray regularly to keep the pests down, as they realize that clean plants make healthy growths. Too much care cannot be exercised in the use of insecticides to obtain proper results. Many men are satisfied to make a guess at the proportions required and will not take the trouble of careful measuring, and then when failure, or worse, injury results, the remedies are immediately blamed and the careless management of those entrusted with the work seems seldom to be considered. Fumigation and spraying is regarded by too many as only boys' work, although no careful grower would set an apprentice at work to attend to the fertilizing of his houses and it certainly does not seem that one of these departments in the growing of plants is of much less consequence than the other. It must be admitted that much more attention is given today to the proper means and methods of insect control than has ever been the case in the past, and it is also true that the means for their control are more effective than they have been heretofore; but by no means has perfection been attained and great opportunity is still at hand for further improvement to those who are giving thought and study to the ravages which result in the loss of millions of dollars yearly in the horticultural and agricultural industries of this country.

To substantiate some of my assertions of the laxity found among so many growers in the treatment of insect pests, I recently came across a grower in charge of a large range of glass who condemned one of our products, because he could not get the results his neighbors were getting, and on being a uniform material. On investigating I found that he had misunderstood the directions given him by a neighbor and was using the product at half the strength prescribed. When his attention was called to the fact that he might have been equally successful with the others had he followed the directions on the package, he remarked that he did not know we printed our directions on the cans, although he had eyes to see. He, however, now can see that Aphine is making good for him, and has been converted from a "knocker" to a "booster."

A complaint came to us from one of the well known estates of this part of the country that the same satisfactory

results from Aphine was not obtained there as was claimed for it elsewhere. A visit to the place, and an investigation, found that the man entrusted with this work was trying to make a gallon reach for an area of glass for which two gallons were required. His superintendent now sees to it that he uses the necessary quantity to obtain effective results. However, these are only mere incidents in our line of business and I am aware that every business man "has troubles of his own."

Most of you here are familiar with the unfortunate experience which Aphine suffered shortly after it was placed on the market, due entirely to the placing of too much responsibility on a man whose capabilities were overestimated, and who, for some unaccountable reason, never uncovered, appeared not to be satisfied with the good thing he had but continued to experiment until it practically resulted in disaster. While the experience was a costly one and the reputation of Aphine at the time was badly shattered, persistency, however, has been rewarded. For more than a year Aphine has proven to the most critical experts that its merits are equal to all that has ever been claimed for it and we have the satisfaction of numbering some of the best known growers and professional gardeners of the country on our list of users, and who do not hesitate to endorse it highly. I simply refer to this as I want to take this occasion to pay my respects to the representatives of some of the competitive concerns who do not hesitate to tell the story of our misfortune to those of the trade who have not previously heard of it, as though it was an event of yesterday. Now that Aphine has fully recovered its reputation I want to thank those who, having had faith in the product and knowing all the circumstances connected with the unfortunate encounter, did not lose confidence in it and especially the trade papers, for their impartial attitude and fairness at a time when "the power of the press" meant much to us.

#### **Bobblink & Atkins, Rutherford, N. J.**

NURSEYMEN, FLORISTS AND PLANTERS.

Twelve years ago the writer met F. L. Atkins at a florists' gathering in Orange, N. J., and was informed by him that upon that day he had joined partnership with L. O. Bobblink to develop a nursery business. Today this firm owns and is operating 280 acres of land at Rutherford, N. J., with greenhouses and storage sheds approximating 250,000 square feet of surface, where more than 200 people find regular employment. Both members of the firm are yet young, and just how much of the acreage of the state of New Jersey they will yet secure and utilize for nursery purposes remains to be seen, for they are progressive and evidently there is no limit to their capacity for doing things.

To give a comprehensive description of the subjects cultivated at this establishment is beyond the possibilities of the trade newspaper man, because the space at his disposal is too limited, as it would need a lengthy magazine assignment to in any way attempt to do justice to such a subject. Nowhere in the United States, we believe, can such

large and varied collections of trained boxwoods, bay trees and fruit trees be found as are seen here. Home-grown evergreens also are a feature and that reminds us that at the big show recently held in Boston they exhibited 100 trees in 100 varieties, fine specimens, and among them there was not a single imported plant, all were home grown. But we are drifting into the nursery matters to which, as we could not do full justice, we intended leaving alone. However, if you wish to learn what they are doing write for their catalogue. They issue a fine one with 136 pages of descriptive matter.

One thing we cannot omit to mention, and that is their "tub" manufacturing industry. On the place is built and fully equipped a factory for the making of all kinds of tubs and boxes for plants and trees. Expert mechanics are employed and light, durable, artistic wooden receptacles are being turned out all the year round. When one sees the neat and strong tubs and boxes such as are here manufactured he is apt to think that it is only a question of time when this firm will be supplying the entire trade of the country with this line of material, they seem so far ahead of other manufacturers of this class of goods.

#### **National Sweet Pea Society.**

At the executive meeting held in New York Friday, May 5, President Burpee presiding, the following additional special prizes were received and the executive committee appropriated \$170 for prizes, to be known as The National Sweet Pea Society's prizes.

Owing to the extremely late season it was considered advisable to change the previously published date, June 23-24, to a week or two weeks later, but the matter will be finally decided early in June and an exact date set at that time.

The following judges were appointed for the summer exhibition: Samuel L. Hamilton, Huntington, Pa.; William Sim, Cliftondale, Mass.; Edwin Jenkins, Lenox, Mass.; William Duckham, Madison, N. J., and Walter Angus, Chapinville, Ct.

Class 11. The Henry A. Dreer prize for the best vase of Queen Alexandra Spencer sweet peas; first prize, \$5; second prize, \$3.

Class 12. The Henry A. Dreer prize for the best vase of Ruby Spencer sweet peas. First prize, \$3; second prize, \$2.

Class 13. The Henry A. Dreer prize for the best vase of Mrs. Routzahn Spencer sweet peas. First prize, \$3; second prize, \$2.

Class 14. The Jerome B. Rice Seed Co.'s prize for the best vase of White Spencer sweet peas; 1st prize \$5.00; 2nd prize \$3.00, 3rd prize \$2.00.

Class 15. The Anton C. Zvolanek prize for the best vase of 50 Orange Spencer or Unwin sweet peas. First prize, \$3; second prize, \$2; third prize, \$1.

Class 16. The Anton C. Zvolanek prize for the best vase of 50 pink or rose sweet peas, Spencer or Unwin type. First prize, \$3; second prize, \$2; third prize, \$1.

Class 17. The William Sim prize for the best five vases of sweet peas, commercial varieties. First prize, \$10; second prize, \$5; third prize, \$3.

Class 18. The Philadelphia North American's prize. A silver cup for the

MILWAUKEE AND LOCAL BOWLERS AFTER AUTO RIDE AROUND THE CHICAGO PARKS, MAY 7.

best vase of sweet peas never before exhibited.

The National Sweet Pea Society's premiums, classes 19 to 35, consist of first, second and third prizes of \$5, \$3 and \$2 respectively for the different colors of Spencer and Unwin varieties and Grandiflora varieties of sweet peas.

HARRY A. BUNYARD, Sec'y.

### Roses and Carnations.

#### ED. AMERICAN FLORIST:

I desire to grow roses and carnations in a greenhouse to bloom in December. Will the best results be obtained from plants grown in the field and planted in the house in the fall?

Arkansas.

SUBSCRIBER.

To have roses bloom in the greenhouse in December, the plants should be set out in the house in June, in either solid beds or deep benches. Carnations will give best results if planted out in the field, given good culture, and then transferred to the house about the middle of September. They will need some shading for a week or ten days after planting, also spraying a few times every day until established in their new quarters. A night temperature of 56° will be about right. Enchantress and its rose pink sport and While Perfection are the best varieties to grow at this temperature.

WM. LEAR.

### Chicago Bowlers Defeat Milwaukee.

The visit of the Milwaukee bowling delegation to Chicago May 7 was a very pleasant occasion. The party arrived at the Northwestern depot about 11 o'clock and was at once taken in hand by President Philpott of the Chicago Florists' Club, assisted by Vice President Kohlbrand, Allie Zech and numerous others. President Asmus, of the Society of American Florists, E. C. Amling, H. N. Bruns, Geo. Reinberg, A. F. Amling and Frank Oechslin had their automobiles waiting and in these the visitors, to the number of 15, made a tour of the parks. The weather was ideal and this with the vegetation just bursting into early bloom and greenery made the trip a most delightful part of the program. Arriving at the Hofbrau restaurant about 12:30 some sixty sat down to dinner, after which all adjourned to Bensinger's bowling alleys, where the Milwaukee bowlers graciously lost the three games rolled to their hosts. Refreshments were served in the alleys during the games, details of which are appended. Many old-time faces were missing in the Chicago ranks, but their places were well filled by the

younger generation of bowlers, many of whom appeared to have acquired all the winning tricks of their predecessors. A. L. Fisher made the high score for Chicago with 212 points and G. A. Pohl was high man on the Milwaukee team, with 198 points. On the announcement of the final scores the visitors cheered the winners heartily and the party again adjourned to the Hofbrau, where a Dutch lunch was served.

After lunch President Philpott congratulated the bowlers on their successful meeting and in the absence of President Hunkel of the Milwaukee Florists' Club, who was unable to attend on account of illness in his family, called on ex-President Zweifel of that organization to explain the defeat of his team, which was done by the speaker and other representatives, including Vice President Leidiger, Capt. Rusch, F. W. Holton and T. Cassidy, in terms highly complimentary to their opponents. Captain Zech, Vice President Kohlbrand, John P. Degnan, M. Barker and others of the Chicago Florists' Club told some stories and it was the general sense of the assemblage that such gatherings are most beneficial, commercially as well as socially, and that, like angels' visits, they are too few and far between.

President Asmus, of the Society of American Florists, who joined the party after the bowling, having been detained during the day by pressure of business, spoke of the coming Baltimore convention, urging the bowlers to be earnest in their preparations, as the prizes were numerous and valuable and the various cities would be well represented. There was some inquiry for Phil Foley at that point, but on investigation it was found that he had left for places unknown.

Copies of two photos taken on this occasion can be had at 50 cents each on application to M. C. Gates, 725 West Nineteenth place, Chicago.

The following are the scores:

## OBITUARY.

### Mrs. Mary Reissig.

Mrs. Mary Eva Reissig, widow of Charles Reissig, one of Chicago's pioneer florists, died at her residence at Riverside May 5 of heart trouble, after an illness of a few weeks, aged 63 years.

Mrs. Reissig, whose maiden name was Mary E. Becker, was born in Bavaria, and came to America in girlhood. In 1872 she was married to Charles Reissig, at that time one of the leading florists of Chicago, and with him carried on successfully the florist business for many years. In 1891 Mr. Reissig retired from business, being succeeded by his nephew, Philip J. Hauswirth, retaining only one house, devoted principally to orchids and palms. This was conducted until his death in 1892 and it was continued for some years by his widow, the other greenhouses being rented. From this union there were born six children, four of whom, two sons and two daughters, survive her. The funeral ceremony was at St. Mary's church at 12 m. on May 8 and the interment was at Forest Home Cemetery.

### Charles F. Mielenz.

Charles F. Mielenz died April 25, at his home, 13 Walker avenue, Troy, N. Y., after a year's illness. He was born in Germany sixty-five years ago, coming to Troy in boyhood where he had lived for fifty-five years. He was at one time in the carpet renovating business, but some years ago established a florist's business at his home in Walker avenue. He was a prominent member of the Methodist church, holding the office of steward, and also belonged to the Royal Arcanum. He is survived by a widow, one son and three daughters. The funeral was from his late home April 25.

### George Engel.

George Engel, a florist of Xenia, O., died at his residence April 30, aged 62 years. He was born in Hesse-Darmstadt, Germany, December 25, 1848, the son of Philip G. Engel, from whom he received his early instruction in floriculture. At the age of 16 he left home and later served in the Hessian army, participating in the Franco-Prussian war under Gen. Mantofel. In 1873 he left Germany for the West Indies, but finding the climate unhealthy went to Brooklyn, N. Y., where he was employed by a florist for two years. Leaving New York he went to Louisville, Ky., and in 1878 purchased the greenhouse of T. G. Wilson in Xenia. By close application and perseverance he made his business a success. In 1892 he married Mrs. Fredericka Siefert. He was a member of the Lutheran Church and also of the I. O. O. F. and K. P.

MEMORIAL DAY stocks should be  
moved without further delay.

READERS will oblige by mailing us a  
postal card report stating how Mothers' Day,  
May 14, is observed this year by  
their patrons.

MEMORIAL DAY this year will mark  
the fiftieth anniversary of the great  
civil war, and the decorations, accord-  
ingly, will be more numerous and elab-  
orate than ever before.

THE Aphine Mfg. Co., Madison, N. J.,  
announces that arrangements have  
been completed with the Florists' Ex-  
change of Baltimore to hold a public  
demonstration of the merits of its  
specialties prepared for the use of  
growers in cleansing their establish-  
ments of plant diseases and insect  
pests. The date will be announced  
later.

### American Gladiolus Society.

The American Gladiolus Society is  
now preparing for a magnificent ex-  
hibit of gladiolus blooms at the con-  
vention and flower show to be held in  
Baltimore Aug. 15-18. The schedule of  
prizes will soon be ready, and copies  
can be had by applying to L. Merton  
Gage, secretary, Orange, Mass.

### Light a Factor in the Color of Roses.

The splendid paper read by Prof. M. A. Blake, of the New Jersey Experiment Station before the Society for Horticultural Science on "Factors which determine color in the forcing of roses," which will be found in this issue, shows conclusively that no matter what other factors there may be upon this question, the amount of light which is bestowed upon the plants is the greatest consideration to be taken in their culture. Now while this is not perhaps entirely new by any means, to many growers for they are well aware of the fact that the color of roses, especially the pink varieties, deteriorates in the short days of winter during the period of diminished sunlight and during extended periods of cloudy weather, yet does not the condition of the glass in the houses also have more or less effect upon this important matter? A prominent eastern grower once remarked that it was no great credit to grow a fine crop in a new house, for the house being clean and light and free from vermin would grow a crop of high quality with but little attention. Now all growers know that it is difficult to produce a crop of roses of the first quality in old or blackened houses and is it not plausible to think that one of the great causes is the deficiency of light? The glass is shaded in the spring and summer and never thoroughly cleansed, and the woodwork never made white. How much light would a living room have if the windows were never washed? This is a matter for all greenhouse owners to take into consideration and to experiment to see how much lighter the house would be, and how much more light the plants would receive, if the house were kept white, to reflect the light, and the glass thoroughly cleaned at least once each year.

### An Englishman's Appreciation.

As an Englishman who has lately had the pleasure of spending six or seven weeks in your country, I should like to re-echo the thanks, put in by your valuable paper on behalf of the English visitors. Like them, my wife and myself appreciate very highly the unbounded hospitality shown us. The way in which we were received and entertained by those connected with horticulture wherever we went leaves very pleasant memories. A visit such as we were privileged to make could not impress one with the great importance of horticulture in America, as well as with the fine personalities of the men who are conducting it. I doubt if anywhere in the world a finer lot of men connected with any one business could be found than those we had the pleasure of meeting at the banquet of the New York Florists' Club and the National Flower Show at Boston—men capable, large-hearted, though modest men, whom it was a privilege to meet, men in whose hands the future of horticulture is safe to be carried on to the benefit of all concerned. And who can foretell the future of horticulture in your great country? Great in every sense of the word, in its aims, in its extent, in its possibilities of enormous development in so many ways, as the wealth, and the innate love of

the beautiful and useful in nature increases, as it must and will increase.

Take one phase only. What a future lies open to the hybridist, to take in hand the various trees, shrubs and flowers which now successfully withstand your trying winters; to improve and multiply the types of these alone is a great work which may well occupy the lifetime of those who are able to pursue that work, and which must add largely to the possibilities of horticulture for future generations. My visit was not at a season when one could enjoy, or form a fair idea of horticulture as pursued outdoors. On the other hand the magnitude and the perfection of your large cut flower establishments was a revelation, and are not, I think, to be equalled in any other country. Again, the harmony, good fellowship and what one may call "esprit de corps" are most marked. There seemed an utter absence of that exclusiveness which British seem to revel in—possibly our dull, sunless skies get reflected in our temperament—. Be that as it may, there seemed an utter absence of it on your side, and an open-heartedness which was most impressive and refreshing. I had the privilege of attending a meeting of the American Rose Society at Boston and was impressed by the verve and go in conducting your business. I had the pleasure of hearing the papers read by your essayists, August Poehlmann and Wallace R. Pierson. I think Mr. Poehlmann's paper on what one may call the statesmanship of a business was a marvel of terse, lucid and trite compression. In its way Mr. Pierson's paper was a suggestion of a well thought and detail. At the meeting of the American Carnation Society on the Tuesday I was much impressed with the president's remarks on the advisability of paying more attention to the keeping qualities and fragrance of future seedling carnations. I think he is right and that with the splendid varieties you have now given us, his advice may well be seriously thought over and acted upon, both by the American Carnation Society and our own. Turning to the show itself. It was a great show, worthy of the great country and the great men who organized it and carried it through. I esteem it a privilege to have been there and to get to know and to shake hands with so many fine exponents of horticulture. As an Englishman it was a source of pride to me to see the great part which our Britishers, that is, natives of these islands and their descendants, are playing in the development of your horticulture. The part which the Killarney rose plays in your cut flower system, too, was another surprise to me, and was an excellent example of which it was grown. In comparing your carnation exhibits with our own I think I have seen as fine blooms of the leading varieties, such as White Perfection, Enchantress, Winsor, Pink Delight, etc., exhibited in London as any I saw there, but we could not approach you in the huge quantities shown. The exhibit of Ranunculus shown by M. H. Walsh, of Woods Hole, was unique in its way, being all of his own raising. It was extremely sorry I missed shaking hands with this fine raiser. The sweet pea exhibits of William Sim and A. C. Zvolanek, too, were magnificent for the date. If I may presume to criticise, may I say that I think if there were a little less crowding in some of the exhibits they would gain rather than lose in effectiveness. The mignonette staged there I have never seen equalled. I must, however, bring these rambling remarks to a close and again thanking you all most heartily for a most instructive and pleasant holiday.

W. E. WALLACE.

Eaton Bray Nurseries, Dunstable, England.

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.

#### Chicago.

##### AN IMPROVED MARKET.

The market toward the close of last week took a turn from that of the few days that had preceded it and while there was plenty of stock to fill all the orders yet at the end of the week there was very little, if anything, left over. The roses are still being received in large quantities but the demand is great enough to take them as fast as they come in though the prices have remained at about the same figures as they have been for the last week or two but there are fewer bargain sales. There is a very heavy cut of short stemmed American Beauties and these are being made a feature in some of the stores. Killarneys, White Killarneys and My Marylands are in large supply and some of the stock is elegant and Richmond is of fine quality and in good supply. The carnations are not in quite as heavy crop as they have been and are finding a better market. The growers of this flower are looking forward to a spirited demand at the end of the week, especially for white carnations for Mothers' day, and they have advanced the price. The demand will however be mostly for white carnations, and it is possible that it will extend to white flowers of other kinds than these. The sweet peas are meeting with good call and are freely used both for corsages and flower work and some extra fine stock is to be found every day. Orchids are in quantity enough to supply the demand and some very fine blooms of Cattleya Mossie are among the receipts. The after crop of Easter lilies has about passed away and there is not any over-supply of these on the market at present. The Spanish iris is used by many of the retail stores in their window displays and is a great

12 inches high, with wide flaring mouth.  
Can be supplied in green or white.  
Doz., \$2 50; barrel of 3 doz., \$6.00,  
f. o. b. Chicago.

## Vaughan's Seed Store,

CHICAGO:

31-33 W. Randolph St.

NEW YORK:

25 Barclay St.

addition to the other flowers. Out door bulb stock is quite plentiful but does not have a very heavy call. The antirrhinum is exceptionally fine and embraces all the colors and is having a good sale. Pansies are very plentiful but the quality of some is far from the best. Greens are having a good sale preparatory for Memorial day and large quantities of galax and ferns are being prepared for shipment. There is plenty of asparagus but smilax is very short and is bringing good prices.

#### NOTES.

The plant trade is occupying the attention of all hands at Muir's on Michigan avenue and a fine assortment is to be found here. A few plants of calceolarias were particularly noticeable, these plants are so seldom seen these days and the strain grown here was very fine.

W. L. Sullivan and J. R. Friedman, proprietors of the Woodlawn Floral Shop, East Sixty-third street, had an exceedingly busy day May 6, when a large number of funeral orders were arranged. Seven of the many designs were delivered to 6741 Evans avenue.

Charles Schneider will, in the near future, open a store on the second floor of the building at the northeast corner of Washington and Dearborn streets.

Wm. Kilsner, formerly with the Chicago Carnation Co., and Miss Hilda Ryden of Joliet were married in that city last week.

Kyle & Foerster are showing an exceptionally fine grade of sweet peas and Mrs. Francis King gladiolus.

C. H. Fisk has purchased a 50-horse power seven-passenger Speedwell touring car.

**POEHLMANN'S FANCY VALLEY  
EXTRA FINE HARRISII LILIES**

We make these a specialty.  
Can supply them all the Year.  
Once tried you will have no other

John Mangel always has an attractive floral arrangement in his window on Wabash avenue. A large galax wreath with a spray of Mrs. Jardine roses this week nicely arranged is a beautiful feature to catch the eye of the prospective customer. A very fine specimen cattleya in the other window attracted attention.

At J. A. Budlong's the trade keeps up well and the quality of the stock now arriving is very creditable to the growers. Phil Schupp is paying particular attention to the out-of-town shipping trade and the stock is fine for the purpose.

A splendid spring trade is being enjoyed at Lange's store on East Madison

street. Some large orders for funeral work the last two weeks beside the usual business has kept all hands very busy.

Mike Seganos is managing Nick Deligiannis' new store, which recently opened at 35 East Van Buren street. Nick Speropurs has opened a temporary store at 22 South Wabash avenue.

Canger & Gormley have had their share of the spring work and have executed some very nice orders. A new delivery wagon is an addition at this store.

Peter Propps, who now has a stand in the Maurice L. Rothschild store, will, in the near future, open a store at 2450 North Clark street.

A splendid grade of American Beauty roses, "Butterfly" sweet peas and cattleyas were seen at E. C. Ambling Co.'s store this week.

Aug. Grossman, the well known Lincoln avenue grower, is supplying John Kruchten with an exceptionally fine grade of Killarney roses.

James Bernard has leased Nic. Miller's range of greenhouses at Wilmette and will take possession June 1.

A. Ziska of the Chicago Rose Co. has been suffering considerably from rheumatism the past two weeks.

Fred. Liebermann is enjoying good business and is building up a nice trade at his store at 1611 Wells street.

The young stock in Wietor Bros.' greenhouses is looking fine and the management is looking forward towards a big year. The indications for an early carnation crop are bright. The Uncle John roses that this firm is cutting are of A 1 quality, the color, foliage and stem being grand. N. J. Wietor evidently believes in letting the young fellow have a good time, for he purchased a \$250 motorcycle for his nephew last week.

Wm. Graff, the well known florist of Columbus, O., returned May 11, from West Baden, Ind., where he had been receiving treatment. He has been on the sick list for some time, but is feeling much better at present and an early recovery is looked for. Mr. Graff will leave for Columbus in a few days.

Conrad Frauenfelder and daughter, Edna, and his sister Mrs. Decker returned May 4, from Phoenix, Ariz., where they went for the benefit of the latter's health. They returned much earlier than they expected as the climate did not prove as beneficial as it was thought it would be.

James Psenicka, formerly with Wietor Bros., will now devote his entire time to the Northwestern Floral Co.'s interests. Mr. Psenicka, who is one of the proprietors of the above mentioned company, has moved his family and household furniture to Gross Point where the greenhouses are located.

The interior of the store now occupied by Percy Jones is being repainted and it is hoped that the painters will complete their job this week. Kennicott Bros. Co. will have a store here also, likewise the Chicago Growers' Exchange, who expect to open for business May 22.

Teddy Vogel returned Sunday, May 7, from San Francisco, Calif., after a six months' absence. Life on a ranch evidently agreed with him for he is feeling fine and is in the best of health. He has accepted a position with Kennicott Bros. Co., and entered upon his duties May 8.

E. E. Piezer says that the peony crop for Memorial day is a weather proposition, but as far as quality is concerned it will be good. He states

that Kennicott Bros. Co.'s branch store will open either on May 13 or May 15, with Nic. Miller in charge.

Bassett & Washburn are supplying their customers with a good grade of American Beauties and other roses. Their carnations are also of good quality and judging from the supply seen at the store they will be enabled to take care of all orders entrusted to them.

Vaughan & Sperry are enjoying good business, the shipping trade being very good and is increasing. This firm is now handling the output of three additional growers which they have added to their list the past week.

E. F. Winterson anticipates early removal to Independence boulevard, opposite Garfield park, where he is building a fine new residence. Ha! there! You violets! Sweet violets! And he doesn't care who knows it!

L. Hoekner, familiarly known as "Stogie," is getting his flower booth in Riverview Park in readiness for the coming season. Sunday, May 4, is inspection day, the regular season not opening until May 24.

Frank Oechslein is adding six new houses and installing a new No. 12 Kroeschell boiler. The houses are Foley construction and material, four 24x125 feet, one 38x125 feet and one 10x125 feet.

Paul Blome & Co., the North Clark street florists, are kept very busy these days with funeral work. Art Christiansen formerly with H. C. Rowe, is and has been with this firm for some time.

Among the large quantity of high grade stock that Poehlmann Bros. Co. are receiving at the store this week, a splendid grade of Killarney roses of unsurpassed quality can be seen.

Peter Reinberg is cutting an exceptionally fine grade of roses of all kinds and finds a ready sale for same. Tim Matchen and his force of assistants have put in a very busy week.

H. N. Bruns says that the demand for lily of the valley has kept up very well since Easter and will probably continue so for some time, especially in June, the month of weddings.

**We are now located  
in our new store**

where we are much better prepared than ever to handle both our local and shipping trade.

For first-class stock send your order to us and we will supply you with the **Choicest Grade of Cut Flowers in the Chicago Market.**

**SINNER BROS.,**

82-86 East Randolph St., CHICAGO.

Manager Pyfer of the Chicago Carnation Co., bought an adding machine last week and is now busy figuring out how much they realized from the sale of Washington last season.

Sinner Bros. are well pleased with the amount of business they are doing in their new store, trade being a great deal better than they expected.

The Geo. Wittbold Co. have had several important wedding decorations within the week. They report trade in general very good.

The J. B. Deamud Co. is receiving a large supply of all kinds. Their sweet peas, gladioli and carnations are of good quality.

Visitors: A. L. Glaser, Dubuque, Ia.; J. Schwartzau, Nashville, Tenn.; Chas. Loveridge, Peoria, Ill.; Robt. A. Smythe and wife, Benton Harbor, Mich.; E. N. Weygant, Indianapolis, Ind.; P. Ouwerkerk, Weehawken Heights, N. J.; Jas. Meiklejohn, representing H. Frank Darrow, New York; A. S. Roth, Joliet.

#### Chicago Florists' Club.

The regular meeting of the Chicago Florists' Club was held at the Union Restaurant, May 4, with a good attendance. President Philpott in the chair. The club accepted the invitation of the Milwaukee florists to hold a joint meeting in the Wisconsin city, June 1, and the transportation committee was instructed to make the

necessary arrangements. W. J. Kelmel, of Elmhurst, will read a paper on roses at this meeting and W. G. McGee has promised a paper on fertilizers for the July meeting. Resolutions of sympathy with Mrs. Wm. Starrett in the death of her husband were adopted. T. E. Waters reported that Geo. Woodward was progressing favorably at the Passavant hospital.

Allie Zech reported that the Milwaukee bowlers would be on hand Sunday, May 7, and that arrangements were in progress for entertaining them. Mr. Zech also announced that Ehrhardt grove at Park Ridge had been selected for the picnic Sunday, July 23, and that the bowling season would open Tuesday, May 9, at Bensinger's alleys, Monroe street. All those who wish to qualify for the team that will represent Chicago at the Baltimore convention should be present.

President Asmus of the Society of American Florists, addressed the meeting and stated that the Baltimore florists are making great preparations for the coming convention in August and that all indications point to one of the most successful meetings in the history of the national organization.

Phil Foley reported that the transportation committee has as yet made no arrangements for the Baltimore convention trip, and added that he believed special low rates to the east would be in effect at that time.

# VAUGHAN & SPERRY

Long Distance Phone  
Central 2751

161 N. Wabash Ave., CHICAGO

### Davenport, Ia.

During the last two weeks there has been more funeral work arranged than for many a year in the same length of time. Every florist had all they could do and there was hardly enough flowers to meet the demand. As the weather has been fairly frigid up to within a few days the plant business now opens with a rush, and prospects are very bright for a record-breaking spring business. Several firms claim that their advance orders will about clean them up. Carnations have all been planted, and the young stock has started off well, having had a nice rain and cool and cloudy days to give it a good send-off.

J. W. Davis has signed a contract with the Lord & Burnham Co. for the erection of a greenhouse plant at Bettendorf, a suburb of Davenport, for the growing of vegetables. There will be three houses 43x600 feet, one house 24x260 feet, one service house 50x130 feet. Three boilers will be installed with a capacity of 350 h. p. and room will be provided for the addition of three more when they become necessary. A smokestack of special brick, made only for that purpose, 100 feet in height, with an inside diameter of five feet, will be erected. The houses will be 17 feet to the ridge with the gutter on seven foot supports and 2,700 boxes of glass will be used in the roofs. There will be a continuous ventilator sash on both sides of ridge, and also on both side walls, these being of glass, to within one foot of the ground. The contract calls for the plant to be finished by Sept. 1, 1911. A spur track is being built so that all material can be laid right on the ground. Coal will be bought at the mines and unloaded from cars right into the boiler-room. The contract for piping has not been given as Mr. Davis has not as yet

DETROIT, MICH.

### Cincinnati.

#### A BETTER MARKET.

The market as a whole has tightened up somewhat since the last report, but prices, however, have not been materially affected. Some things are moving at slightly lower figures. At the close of last week's business practically everything except lilies, lily of the valley, snapdragon and a small amount of bulbous stock was cleaned up. Sunday brought in some shipments of roses and carnations which moved none too rapidly. The sum total of the week's business was only fair. In roses a heavy crop of Brides is coming in and other varieties are offered in goodly numbers. The supply of American Beauties, especially long ones, seems more than adequate. The cut of carnations seems to be reducing and as a result the good stock cleans out rapidly. Outdoor tulips are coming in. Spanish iris are being offered. Cape jasmynes from south Texas are in full blast and some are being used for corsages. Sweet peas find a good steady call. Southern ferns are now in demand in this list of green goods and other supplies in this line are adequate for all needs.

#### CLUB MEETING.

The Florists' Club held its regular monthly meeting at the club rooms and a very lively interest was shown in all the affairs that came up for discussion. An outing committee composed of Albert Sunderbruch, Ray Murphy, Al Heckman and Charles H. Hoffmeister was appointed. They are to arrange details for the annual outing and report at the next meeting, and at that time nomination of officers will be made in open session to be balloted upon at the annual meeting.

#### NOTES.

The following intend to visit "the old country" this summer: J. A. Peterson, Norway, Denmark and continental Europe; Max Rudolph and Henry Schwartz, Germany and other neighboring continental countries.

Martin Reukauf of H. Bayersdorfer evidently couped some choice orders if we judge correctly from the self-satisfied smile and sphinx-like silence he bore.

Wm. Murphy has been receiving some very elegant carnations from the various greenhouses in Murphysville.

Heller Brothers of Newcastle, Ind., have been heavy consignors of American Beauties to E. G. Gillett.

The Bloomhust Floral Co. are shipping a heavy cut of Bride roses to J. M. McCullough's Sons Co.

C. E. Critchell received some southern ferns the early part of last week.

L. H. Kyrk has been keeping up his steady supply of elegant sweet peas.

Visitors: H. F. Winters, S. A. Greeg and R. E. Silman of the Charleston Cut Flower and Plant Co., of Charleston, W. Va., and—Weber of Weber Bros., Ironton. H.

### Cleveland.

#### FROM FEAST TO FAMINE.

The flower market underwent a wonderful change during the latter part of last week, from an oversupply of carnations and roses which existed up to Wednesday to a famine on Saturday was the unusual condition. On Saturday there was not a carnation and only a few roses left in any of the wholesale houses. The big crop of carnations is off and from now on there will be a slight advance until after Memorial day. Everything cleaned up except lilies and callas, smilax was in demand with but a limited quantity on hand. Sweet peas, daisies, lilies, forget-me-nots, mignonette, outdoor tulips and daffodils are a part of the daily stock. There are still a few calls for violets.

#### NOTES.

Peter Nichols, the Arcade florist, was married to Miss Marie Nauspali on Thursday evening, May 4, at Royal Hall, corner of East Eighty-fifth street and Woodlawn avenue. Mr. Nichols has opened a moving picture show in Elyria. This enterprise makes three separate and distinct lines of business which he runs and controls.

The Flower Club met at Campbell's Hotel on Friday, May 5, and adopted a set of rules and by-laws. Steps were also taken to properly advertise Mothers' day by placing advertisements in the local papers and placards in the windows.

C. B. Wilhelmly had a house-warming at his new place May 5. A good time was reported.

The May party promises to be a success if all the florists attend who promised they would.

G. P. Braund & Co.'s place in Newburgh was partially burned Friday, May 5. C. F. B.

### Tarrytown, N. Y.

The regular monthly meeting of the Tarrytown Horticultural Society was held Friday evening, April 25. President Brunger occupied the chair and two names were added to the list of members. The prize for the evening, offered by E. W. Newbrand for the best flowering plant, was awarded to George Wittlinger with a fine plant of *Medinilla magnifica*. A cultural certificate was awarded to John Woodcock for a fine vase of antirrhinums and also for calceolarias. A certificate of merit was awarded to Abel Weiko for a variegated carnation seedling.

FROM GLUT TO SCARCITY.

The weather is warmer and more like summer. The market the latter part of the week underwent a great change, where there had been a glut there was a scarcity, carnations advanced to three and four cents, and if it had not been for the quantity of roses and other flowers they would have gone higher. There are quite a few long-stemmed American Beauty roses and a few peonies. Sweet peas have shortened up in supply.

### NOTES.

The golden wedding of Herman Angermueller and wife was celebrated Saturday evening. Their nephew, George H. Angermueller, presented them a beautiful floral basket made of yellow roses which were expressly ordered of Poehlmann Bros., Chicago. A great many yellow marguerites were also used.

A meeting was held at J. J. Bencke's May 6 to arrange for the banquet to be given on the twenty-fifth anniversary of the Florists' Club. A committee was appointed consisting of Henry Ostertag, E. W. Guy of Belleville, Ill., A. J. Bentzen, Chas. Schoenle and George Winder.

Here is something for the Retail Association to act upon. A large dry goods house retailed Cape jasmines at one cent each, and at the same time the retailers paid that and more at wholesale.

David Geddis, formerly with F. C. Weber and C. A. Samuelson of Chicago, has accepted a position as manager with the M. M. Ayres Floral Co.

Arthur Meyer, bookkeeper at C. A. Kuehn's, fell off the car and broke his wrist and is unable to attend to his duties.

The appointments of Park Commissioner Davis and City Forester Julius Koenig have been confirmed by the council.

C. A. Kuehn had some very fancy Cape jasmines with 18-inch stems which brought \$2 and \$2.50 per 100.

# Do You Gamble? As

Suppose, Mr. Retail Florist, it is May 29 and a customer stands at your counter. On the counter is a bunch of twelve good Peonies. In another vase there are twelve roses, and in still another vase twelve carnations. The Peonies cost you 5 cents for each flower, the roses 8 cents and the carnations 4 cents. Put your own selling prices on them. Which does the customer select? The Peonies, practically every time. The modern Peonies as fine as any rose. It's as big as several carnations, and it makes a showing for the money unequaled by any other flower. That's why the Peony is the big special item of the Decoration Day demand.

### BETTER MARKET CONDITIONS.

There is a better tone in the market the past few days. Since last report we have had some cold weather and the markets have lost the stagnant condition in which they were at the last writing. There is still plenty of material, but the buyers are enjoying better business, the salesmen are more hopeful and this, of course, makes the growers feel that things have not gone to the dogs. The flower business is something like the stock market, no one can tell what tomorrow may bring forth. The quality of the carnations continues to be good and roses, also, are of good quality. There are more yellow marguerites in the market this year than ever before. Let us hope the improvement in trade has come to stay for some time or at least until July, when we expect our summer dullness.

### NOTES.

Donald Carmichael of Wellesley, on account of his health, gives up business June 1. Mr. Carmichael has been in his present location for 17 years and has been recognized as an expert carnation grower. By hard work and skillful culture he has built up a nice establishment, and is noted as one of the solid men of Wellesley, and is a director and treasurer of the Co-operative Flower Market. He retires to take a rest and may perhaps engage in other business lines apart from that of the trade, so that he may be outside most of the time. The best wishes of the trade go out to him, and no doubt he will always keep in touch with his fellow craftsmen. The establishment has been let to Smith & Farquhar, two young men, who will have an up-to-date place to begin with, and we hope they will keep up the reputation of quality that the place has gained from the owner.

This has been a great spring for the nurserymen, the cold weather has helped late planting, but the seedsmen are having a hard time. Everything comes to those who wait, but they feel that the waiting business has been overdone, with the result that the clerks are ready for an immediate vacation. Shop early and avoid the rush is the usual saying, but in this case everyone seems to shop early and at all times. Some of the seed stores

#### Pittsburg.

EVERYONE CONTENTED.

There is very little to report in flower circles during the last week or so. The supply of stock is, of course, more than there is any demand for, but at that everyone seems contented. Owing to the weather a little difficulty is experienced in shipping stock—roses open and carnations shut (an open and shut game as one man puts it). Beauties are very plentiful but clean up nicely at reduced prices. Lilies, which have been so very plentiful, are a little shorter and in good demand. Smilax has disappeared almost entirely.

Nick Harris spent several days in Cleveland, O., attending the wedding of Peter Nichols, the Arcade florist of that city.

The new store of Lorch & Hoffmeister makes a bright spot on Smithfield street with their window displays.

S. J. Hatch, De Haven, is shipping in some fine orchids which are finding good sale.

Mrs. B. A. Mick, Wellsville, O., wishes to dispose of her store in that town.

## ROSES PLENTIFUL.

With excursions here and there of occasional spurts in prices on different varieties—which changes are not particularly marked—the market remains practically in the same condition as last week. The cut of Killarney roses is still heavy, so that it is only a very small percentage, and then only the longest stems and largest flowers, that sell at quoted prices. Bridesmaids and Brides are doing as well as any of the small roses on an average. American Beauty has the preference and are selling a trifle better than a week ago. During the week last passed carnations reached a new low figure and were difficult to move, particularly in the middle of the week, but toward the end the effect of the cool weather was felt in a decreased cut which aided in clearing up the market, with improved prices Saturday. It would seem that the supply should fall off somewhat after the large crop that has been coming along for the past two months, but, on the other hand, not so many are wanted now for the coming of the outdoor stock. We are having tulips, narcissus, and lilac from favored places further south. Harisii lilies are not so numerous as they have been so that quotations are higher than last week. Gardenias have been very plentiful and very cheap. Violets are about done for and have not figured for the past week. There is no change in cattleyas. Sweet peas are in heavy supply and of fine quality.

## New York Florists' Club.

The regular monthly meeting of the New York Florists' Club was held Monday evening, May 8, with an attendance of 60. Joseph Fisher, Joseph Robinson and Marshall H. Duryea were elected to membership.

The following committees reported. The essay committee announced that Otto Thilow would deliver, in the near future, an illustrated lecture on the Yosemite Valley and that J. K. M. L. Yosemar of Boston would give a talk on Japan. Mr. Totty stated that the New Jersey legislature had appropriated \$20,000 for experimental work in horticulture and a maintenance fund of \$3,000 a year and that Prof. M. A. Blake was instrumental in securing this appropriation. The committees appointed to prepare resolutions on the deaths of John H. Taylor, the father of the Kessler Bros., George Lorenz and the wife of F. W. Brugerhoff, read their reports.

The committees of award granted a cultural certificate to Robert Schultz of Madison, N. J., for a vase of fine Richmond roses. The outing committee announced that the price of the tickets for the annual outing of the club to be for one admitting gentleman and lady \$6, single gentleman's ticket \$4, single ladies' or children's \$2.50.

The business of the evening finished the members were entertained with a most interesting and instructive talk by J. McClintchison, on his trip to South America. Arthur P. Rodington followed with a summary of his observations of the lily industry in Bermuda from which place he has recently returned.

W. B. DuRie read a paper on the influence of school teachers in the development of horticulture. J. A. Shaw also read a paper entitled Insects, by M. C. Ebel who was unable to be present. Mr. Kakuda made some lucid remarks on lily growing in Japan.

## BOWLING NOTES.

The bowling club will play a return match with the Tuxedo Horticultural Society team at Tuxedo, Wednesday, May 10, and will also play with the

Madison Club at Thum's alleys Saturday eve, May 20.

The score last Friday evening was as follows:

|              |     |     |     |
|--------------|-----|-----|-----|
| Irwin        | 148 | 144 | 138 |
| Kakuda       | 155 | 145 | 187 |
| Holt         | 146 | 135 | 129 |
| Scott        | 135 | 138 | 125 |
| Shaw         | 102 | 104 | 104 |
| Nugent       | 88  | 100 | 109 |
| Madda        | 188 | 177 | 168 |

## SPRING BUSINESS.

Window boxes are now in good demand and the old dead boxwood is giving way to bright colored geraniums and vines, which does much to give the residence streets a bright, cheerful appearance. The demand for this window sill ornamentation does not increase as it should, for the reason that so many are giving up their city houses for a home in the country on the main lines of railways where there are frequent trains. Property in the once fashionable residence districts has depreciated in value considerably the past few years on account of this exodus to the country. This difference in demand is quite noticeable amongst the retail stores, the telephone helps to hold on to much of it, but there is not that personal visit to the store that enables the clever salesman to show his ability. The supply of cut flowers continues a trifle above the demand but there has been nothing approaching a glut, and Saturday night sees a general clean up. The quality of the stock has commenced to show quite a falling off, the warmer weather showing particularly on the roses. American Beauties have shortened up quite a bit with a corresponding increase in prices. Carnations on the approach of Mothers' day are stiffening up and will rise to holiday prices by Saturday. The wholesale price for Mothers' day delivery is \$4, \$6 and \$8, the latter being for the special whites. Orders are coming in stronger than last season and all the wholesalers say there will be a much greater demand than for 1910. The wholesale men have sent out a neat window card 11x14-inches printed in green ink on a white ground with the following inscription "Mothers' Day Second Sunday in May. Wear a flower in honor of your mother, the best mother who ever lived." A large carnation flower cut illuminated the card. About a thousand of these cards were presented by the commission men to their customers for their windows. They also had printed and distributed two thousand cards worded by Miss Jarvis "Mothers' Day Second Sunday in May. In honor of the best mother who ever lived, your mother. Badge—a white carnation. Observance—In loving remembrance of your mother or her memory through kindness, visit, gift or letter. Are you too poor or busy to write home? Remember the unfortunate in hospitals, homes or prisons." These cards were distributed to all the department stores and stores of every character all over the city, and were very conspicuous in calling attention to Mothers' day and the reason for its observance. We believe the memorial feature of this day should be worked up by the trade, so that it will become the custom to decorate or lay some flowers on the graves of the mothers who have passed away. This would be a beautiful tribute to pay to a deceased parent and one that would appeal to many a loving son or daughter.

H. Bayersdorfer and wife are off for their annual tour in Europe in search for the latest things in florists' supplies. They will study the decorative effects of the coronation festivities and are

doubt something stunning in London effects will be seen here before long.

Ralph Shrigley, of of Ed Reid force, just escaped pneumonia the past week and Stewart Miller, another Reid man, is laid up with la grippe. As the weather gets warmer it behooves the worker to look out for the dangerous ice box, do all the talking outside.

M. Rice and wife have returned from their extensive tour through the European cities and the results of the trip are seen in the new goods which have already commenced to arrive.

Decoration day business promises well judging from the advance sales made by the florists' supply houses, who say they are booking lots of orders for this holiday. K.

## Lenox Horticultural Society.

The monthly meeting of the society was held in the Town Hall, May 6, and was well attended. It is a great pleasure to announce, that Wm. Henry, one of our oldest and most esteemed members, is on a fair way to recovery, after a very severe illness. There was a good discussion upon the effect of frost on all kinds of trees; it has been a very severe winter, and the death rate will be very heavy, instances were given of shrubs having no protection coming through the ordeal little the worse. Other instances, where they had been protected and apparently in good condition on being opened out, had died shortly after. Some members put that down to fall drought. Of course, there were different opinions on the subject. But when doctors disagree, who shall decide?

Our worthy president, George Foulsham, who had spoken in the highest terms of A. H. Wingate at our recent dinner, asked the society to honor him for his past services. It needs a more eloquent pen than mine to do Mr. Wingate full justice. Upon this vote being put to the meeting, Mr. Wingate was unanimously elected a life member of the society. They certainly put him in good company. Two new members were elected and one proposed for membership.

# Dreer's High Grade Hardy Perennial Phloxes

These are not dug from the field, but are one-year-old, field-grown plants which were dug early in the season, cut back, potted up into three-inch pots, and are now well established, with a good ball of soil, and will give a wealth of bloom this season.

## STANDARD COLLECTION OF CHOICE HARDY PHLOX

Price for any of the varieties listed below, \$5.00 per 100, \$40.00 per 1000.

HARDY PHLOX. MRS. JENKINS.

**La Mahdi** (Tall.) Deep reddish-violet, with darker eye.  
**Louise Abbeema** (Dwarf.) Very large dwarf, pure white, of fine form.

**Mme. Paul Dutrie** (Tall.) A delicate lilac rose, reminding one of some of the beautiful soft pink Orchids.  
**Mozart** (Tall.) Ground color white, suffused salmon; aniline-red eye.

**Mrs. Jenkins** (Tall.) The best tall early white for massing.

**Obergartner Wittig** (Medium.) Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.

**Pantheon** (Tall.) Bright carmine rose.  
**Prosper Henri** (Dwarf.) Pure white, with large decided eye of rosy magenta.

**Pacha** (Dwarf.) Deep rose pink, suffused with solferino-red and carmine-purple eye.

**R. P. Struthers** (Tall.) Rosy carmine, with claret-red eye, fine.

**Sunshine** (Dwarf.) Large, aniline-red with crimson-red eye and light halo.

**Selma** (Tall.) Large flower, pale rose mauve, with claret-red eye.

**Siebold** (Tall.) Bright vermilion-red, overlaid with orange scarlet; crimson-red eye.

**Albion** (Medium.) One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

**Antonin Mercie** (Medium.) Light ground color, upper half of petal deeply suffused bluish blue; large white halo.

**Baccante** (Tall.) Tyrian rose with crimson-carmine eye.

**Benanger** (Dwarf.) Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.

**Bridesmaid** (Tall.) White, with large crimson-carmine centre.

**Belle Alliance** (Medium.) White, with large pure red eye.

**Clara Benz** (Dwarf.) Lovely carmine rose, with darker eye.

**Colibri** (Tall.) White, with crimson-carmine centre, very late.

**Consul H. Trost** (Medium.) Pure red, with bright French-purple eye.

**Champs Elysees** (Dwarf.) A very bright rosy magenta.

**Caran d'Ache** (Medium.) Geranium-red, with old rose shadings and white eye; very effective.

**De Miribel** (Medium.) White, suffused with bright rosy scarlet, red eye.

**Edmond Rostand** (Medium.) Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.

**Eugene Danzanviller** (Tall.) Lilac, shading white towards the edges; large white centre.

**Edmond Boissier** (Dwarf.) Bright reddish-violet, with large white halo.

**Eclaircur** (Tall.) Brilliant rosy magenta, with large lighter halo.

**General Giovannelli** (Dwarf.) Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.

**General von Heutz** (Medium.) Scarlet, with rose shadings and crimson-red eye.

**Hermine** (Dwarf.) The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

**Helena Vaccaresco** (Dwarf.) Very large-flowering dwarf, white.

**H. O. Wilcox** (Tall.) White, with bright crimson-carmine eye.

**Henry Murger** (Tall.) White, crimson-carmine centre.

**Henry Marcel** (Medium.) Pure red, with bright salmon shading.

**Henry Boyer** (Medium.) Tyrian rose, with lighter shadings.

**Jules Cambon** (Medium.) Brilliant reddish-purple, with exceptionally large, pure white centre.

**Jennae d'Arc** (Tall.) A good standard late white.

**Louis Blanc** (Tall.) Reddish-violet, with purple shadings and darker eye.

**La Vague** (Medium.) Pure mauve, with aniline-red eye.

**Sarrabande** (Medium.) Reddish-violet, with lighter shadings.

**Von Goethe** (Tall.) Tyrian rose, suffused with carmine lake and carmine-red eye.

**Von Hochberg** (Tall.) The ideal crimson Phlox.

**Vesuvius** (Medium.) One of our own seedlings; pure red with bright purple eye; a dazzling color.

**Von Lassburg** (Medium.) The purest white in cultivation, individual flowers larger than any other white.

## THREE FINE NEW HARDY PHLOX

Price of the New Varieties:

\$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

**Elizabeth Campbell.** Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

**Frau Anton Buchner.** The finest white variety yet introduced, having the largest truss and individual flower, of dwarf habit.

**Rosenberg.** Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

**HENRY A. DREER, Inc.,**

**714 Chestnut St., Philadelphia**

The Above Prices Are Intended for the Trade Only.

# The Grandest Fern of the Age *Nephrolepis Roosevelt*

## Important Special Notice PRICE ADVANCE

The heavy demand from those who have seen *Nephrolepis Roosevelt* growing on our place and scarcity of stock compels us to advance the price on all orders dated after June first to the following: 2 1-4 inch pots, 50c each; \$4.50 per dozen; \$35.00 per 100; \$300.00 per 1000.

It is our belief the price of *Nephrolepis Roosevelt* for 1911 will be maintained during the season of 1912.

*Nephrolepis Roosevelt* is a sport from *Nephrolepis Bostoniensis*, but a wonderful improvement over the parent variety. The fronds of *Roosevelt* are from a third to one-half wider than *Boston* and beautifully tapered from base to tip. Each pinna is distinctly undulated, giving the whole plant a decided wavy effect, which attracts the eye instantly. *Nephrolepis Roosevelt* will make more young plants, produce a third more fronds, has more graceful drooping habit and finish to a larger and finer plant in small pots than any other fern on the market. Our stock is positively free from that vicious little white scale which is causing fern growers so much trouble.

Orders received to June first will be booked at the following prices: 2 1/4-inch pots, 40c each; \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000. Twenty-five plants at hundred rate; 250 plants at thousand rate.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rockmere, Marblehead, Mass. June 20-22, 1911.

EARLY potatoes appear to be cleaned up.

TUBEROSES and the best kinds of gladioli are about sold out.

CANNERS are just waking up to the fact that Stowell's Evergreen corn is scarce.

NORTHERN grown seed corn is turning out very disappointing, low germination everywhere.

PHILADELPHIA, PA.—While business is good here, seedsmen say it is not up to last year's record.

ENGLAND is reported to have placed advance orders for Dutch bulbs more freely than usual this spring.

JESSE E. NORTIUP and daughter, of Minneapolis, Minn., are now at the Hotel Traymore, Atlantic City, N. J.

FREDERICKTOWN, N. J.—Geo. R. Pedrick and wife, who have been in Miami, Fla., since early December, returned last week.

A CALIFORNIA report of May 2 says, "Crops very backward and likely to be only light. There is quite an acreage of radish but plants are small yet."

FRED B. KING, of the Mandeville & King Co., Rochester, N. Y., and Miss Elizabeth Reinick, also of Rochester, were married April 19 and made a honeymoon trip to Chicago, returning May 8.

VAUGHAN'S SEED STORE, Chicago and New York, is offering a modest consignment of South African grown Lilium Harrisii bulbs which arrived in fine shape, each bulb very firm and of healthy color.

CHICAGO.—Prices on the board of trade May 10, for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds. White Clover, from \$22 to \$30.—Texas onions are selling very well. The crop is much shorter than last year, the yield being about 60 per cent.—H. Woods & Co., South Water street, who have been handling most of the western melon crop, have failed.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

SAN JOSE, CALIF.

## Hyacinth Decision Reversed.

The United States Court of Customs Appeals has reversed the decision of the board of general appraisers and sustained the protest of Jos. Breck & Sons, Inc., Boston, Mass., against the payment of an import duty of \$2.50 per thousand on hyacinth bulbs, the proper duty being 50 cents per thousand. This protest was a test case.

## Holland Bulb Crops.

Sassenheim, April 22.—Hyacinths have suffered less than was expected from the severe frost of some time ago, which continued five nights in succession, the varieties with tender leaves suffering most. The damage to tulips is greater, especially the early varieties and those that make large broad leaves, such as Keizerskroon, Proserpine, Couronne d'Or, etc. The weather since the frost has been in our favor, however, cool and cloudy, and if warm weather does not set in within two weeks the affected plants will recover to a large extent. Under present circumstances the outlook for the hyacinth crop is fair; tulips in some varieties fair, but mostly uncertain; and narcissi good.

The green auction sales started this week and there is evidently a strong tendency to buy hyacinths, which find ready sale at high prices. Some varieties of tulips, such as Couleur Cardinal, Mon Tresor, Proserpine, Prince of Austria, Cramoise Brillant, Rose Luisante, Vermillion Brillant, Couronne d'Or, Murillo, Salvator Rose and Tournesol are much called for all over Europe, and certainly will go up in price, also Narcissi Golden Spur, Bicolor Victoria, Incomparabilis Sir Watkin and especially Double Von Sion, the stocks of Von Sion being very limited.

## Marblehead.

### THE CONVENTION TOWN THIS YEAR.

The old town of Marblehead, first settled about 1629 by people from Lincolnshire, England, is situated on the famous north shore of Massachusetts. It has one of the finest and most interesting harbors on the Atlantic coast. Its deep waters and bold rocky coast lined with a city of beautiful summer homes on one side and the old colonial port on the other form a vivid contrasting picture of the old and the new. Marblehead has many evidences of former wealth of the time when ships of every clime crowded its docks. The old town with its ancient

churches, hip-roofed mansions with brass knockers of old still on the door, the little old-fashioned flower garden marking its borders with evergreen boxwood, and the winding, twisting streets, with its antique and historical landmarks in a good state of preservation secure for it the title of curiosity shop of New England.

The war of 1812 destroyed the commerce of this grand old town and it never regained its prestige. Instead of ships of commerce there are luxuriously appointed pleasure steamers riding at anchor and phantom like yachts sailing over the deep blue sea. St. Michael's church, built in 1714—the frame and all the material for this church was brought from England. The ancient chandelier, "the gift of John Elbridge, Esq., of ye city of Bristol, 1732," hangs where originally placed. The Rev. David Massom, who was rector in 1718, afterward moved to Virginia and officiated at the marriage of the Widow Custis and George Washington. When the news of the Declaration of Independence was received the bell was rung till it cracked, and in the excitement the coat of arms of King George was pulled from its place above the chancel.

The old Colonel Lee mansion built in 1768 by Colonel Jeremiah Lee at a cost of ten thousand pounds (they print it lbs. in Marblehead) with its grand vestibule and stairway. The paper made in England for the walls, still excites the admiration of the visitor. It was here that Washington greeted his countrymen in 1781 and Lafayette visited in 1784. President Monroe honored the town with a visit and Andrew Jackson greeted the sturdy old fishermen. Nearby is the birthplace of Elbridge Gerry, signer of the Declaration of Independence, governor of Massachusetts, and vice-president of the United States. The old King Hooper House, now the Y. M. C. A., the home of Whittier's early love and the house of "Flud Olsson," made famous in song by Whittier, can be easily found, and, with many others in this interesting old town, recall the stirring colonial times.

## Now is the Time to Plant ROSES

### Has Your Order of Rose Stock Been Placed?

If not, it should be at once; and we are in the market to supply it. Remember that we are headquarters for Grafted Roses, and are especially strong on Standard Commercial Varieties.

We are ready to supply in quantity  
as well as quality:

## Killarney, White Killarney, Richmond, My Maryland, Bride and Bridesmaid.

These varieties from 2¼-in. pots.

**\$15.00 per 100, \$120.00 per 1000.**

Special price on 5,000 or more plants.

The Newer Roses we have called to your attention before. We hope you saw them at The National Flower Show:

## Double Pink Killarney, Prince de Bulgarie, Mrs. Aaron Ward, Dark Pink Killarney and Radiance.

Let us know your wants

## Market Gardeners

### Vegetable Growers' Association of America.

B. L. Watts, State College, Pa., President;  
H. F. Hall, Boston, Mass., Vice-President;  
S. W. Severance, 508 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, May 6.—Mushrooms, 50 cents per pound; cucumbers, 50 to 75 cents per doz; tomatoes, 10 to 20 cents per pound; grapes, \$2 per pound; lettuce, \$1.80 per doz, heads; cauliflower, 40 cents each.

Chicago, May 8.—Mushrooms, 20 cents per pound; cucumbers, \$1.50 to \$1.75 for two dozen; lettuce, 20 cents to 22½ cents per pound; radishes, 40 cents to 50 cents per dozen bunches.

### Notes on Fertilizers.

Realizing the great importance of proper fertilization, we are constantly experimenting with various combinations. In the last instance, the crop is the only judge, as all theory and analyzing is of little avail, as conditions are local and ever changing. One of our specialties is head lettuce, and we have demonstrated that a fertilizer formula that produces excellent crops of leaf lettuce and spinach means ruination to head lettuce; and vice versa, our head lettuce formula will make such varieties of leaf lettuce as Black Simpson head as hard as a cabbage. The controlling factor in these results are the elements of nitrogen and phosphoric acid, potash remaining the same. To get leaf growth on leaf crops we omit phosphates entirely; to produce hard heads of heading crops we increase the phosphatic elements to the utmost and decrease the nitrogenous elements to lowest possible point. This same rule applies to production of fruit. A leaf-formula is a poor fruit formula and a good fruit formula is again a poor leaf grower. When plenty of manure is used, the addition of potash and phosphates is needed for either hard heading or full fruiting. Our own experiments show that nitrate of soda should never be used alone; we get excellent results by combining it with potash. Growers should study and experiment to master their situation.

MARKETMAN.

### Overcoming Unseasonable Weather.

We are having a great deal of cloudy weather and frequent showers with the temperature well up. The grower of tomatoes or cucumbers can make no greater mistake than to let the fires go out for the sake of economy. Either of these crops must have a dry, bracing air to induce pollen formation, the tomato especially. A little fire heat will do wonders to correct bad effects of rainy spells. It is generally the early fruit that brings the best prices, hence no time should be lost this month. It is the harmony of all elements that tends to big results. We may lose right now what we have carefully built up the preceding months.

With us the season is way late and each week over one-half the time is lost on account of rain. Thus we see some of our carefully laid plans impossible of

execution. There is no greater mistake in gardening than to attempt wet work; generally it is better left undone. We are therefore often compelled to plant crops we had not intended to plant, and abandon subjects we very much figured on. At this time we wish to remind growers of the great help obtainable by potting or sowing in soil such objects as lima beans, cucumbers and melons, provided hot beds are on hand or greenhouse space. We can thus employ our help in rainy weather and later on make excellent use of plants and unplanted land. Sod land, or heavy growths of weeds may be plowed in wet weather without injury. So may soils excessively sandy or full of humus, but anything of a loamy or clayey nature had better be left alone until crumbly.

MARKETMAN.

AUBURN, IND.—Ten Eyck & Sons will rebuild the older sections of their greenhouse plant in a similar manner to the new house constructed last year.

DAVENPORT, IA.—The J. W. Davis Co. has filed articles of incorporation for the purpose of growing vegetables, plants and flowers and engage in a general hothouse business. The capital is \$40,000, the officers being J. W. Davis, president and treasurer; Mary E. Davis, vice president, and Albert Ankeny, secretary.

### VEGETABLE PLANTS.

Cabbage, Wakefield. All Head, Succession and other varieties \$1.00 per 1000; 10,000 and over 85c per 1000.

Lettuce, Grand Rapids, Big Boston, Boston Market and Tennis Ball, \$1.00 per 1000; 10,000 and over 85c per 1000.

Celery, White Plume, \$1.00 per 1000.  
Beet, Crosby, Egyptian and Eclipse, \$1.25 per 1000. Cash with order.

R. VINCENT, JR., & SONS CO., White Marsh, Md.

**CHICAGO.**

### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown  
in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show November, 1909.

It is a pure bright dark pink of even shade, size 3½ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper and the cuttings root easy.

Price: Per 100 \$12.00; per 1000 \$100.00; per 5000 \$400.00. 25 at 1000 rates. Place your order now to be in on early deliveries.

## The Nursery Trade

**American Association of Nurserymen**  
 W. P. Stark, Louisiana, Mo., President;  
 E. S. Welch, Sheboygan, Wis., Vice Presi-  
 dent; John Hall, Rochester, N. Y., Sec'y.  
 Thirty-sixth annual convention to be held  
 at St. Louis, Mo., June 14-16, 1911.

CHICAGO.—The best selling apples on South Water street are Northern Spy, which bring \$12 per barrel against \$7.50 for Baldwins and \$8.50 for Newtown Pippins.—Visitors: P. M. Koster, representing Koster & Co., Boskoop, Holland; Alois S. Dreyer, Woodstock, Ill., representing L. Gaarkuiken, Hazerswoude, Holland.

THE Department of Agriculture has issued a statement as to how a new crop of timber on logged-off land in the Pacific northwest can be started and what conditions are favorable, the rate of growth and yield and the probable cost. Provisions must be made for seed trees of Douglas fir to seed the area, the slashings should be immediately burned to prepare a seed bed, and the cut over area protected from fire. The crop will be financially profitable to private owners.

### American Association of Nurserymen.

#### THIRTY-SIXTH ANNUAL CONVENTION.

The nurserymen are already looking forward to the annual meeting of the fraternity next month in St. Louis, Mo. The convention of the American Association of Nurserymen is a great combination of business and pleasure. The quality and variety of the papers and discussions on last year's program and the important business transacted and published in the annual report of the association should commend itself to every thoughtful man familiar with the great nursery industry of this country. There is every promise of a large turnout of nurserymen with their ladies at the forthcoming convention June 14-16. The famous Southern Hotel has been selected as headquarters. Morning sessions will be the order of each day, and these will be filled with papers and discussions, and the items are so attractive that members will not be inclined to miss any single one. The afternoons will be occupied by social func-

tions under the direction of the entertainment committee, whose program is a superb one. In the notices already sent to members by the secretary a full statement appears regarding hotel rates. Members can be accommodated with rooms from \$1.00 and up on the European plan, and from \$3.00 and up on the American plan.

Any man engaged in the nursery business and not yet a member of this association does not know what he is missing. He is, however, sharing in the benefits derived from membership free of cost. There is yet time to enroll and get into the badge book, and we advise immediate communication with John Hall, secretary, 204 Granite Building, Rochester, N. Y., who is preparing the book for publication.

American Florist Co., 440 S. Dearborn St., Chicago

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

**MOREHEAD MFG. CO.** Department "N" **Detroit, Mich.**

## What the Users say

## KROESCHELL BOILER SAVES 35 TONS COAL.

"I bought a No. 7 boiler in 1901. It takes care of 10,500 sq. ft. of glass and cold take care of 5000 more. Must state that I am in business for 25 years and have attended to many boilers, but I must say for your boiler that it has given better satisfaction than any other, being easier to fire up, and it is easier to keep the temperature with your boiler in cut houses than it is with any other.

I used 35 tons of coal less than I did with the boilers I had before. I can keep the temperature to 75 to 80 degrees during the severest weather, if it is necessary to do so."

PETER CROCZYNSKI, Chicago, Ill.

## HARDY CARNATIONS.

The new hardy ever-blooming CARNATION "CRIMSON KING." Everybody has asked for a carnation that would live out in the garden during the winter. We were pleased in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard, and blooms all summer long, never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the new CRIMSON KING. 2 1/2-in. pots, per doz., \$1.25; per 100, \$8; per 1,000, \$75; 25 plants sold at 100 rates; 250 plants at 1,000 rates. Our new Trade List of everything you need now ready for application. Write today. THE GOOD & REESE CO., The Largest Rose Growers in the World, Springfield, Ohio.

Nikoteen, pint bottle, \$1.50. Nikoteen Apbbs Pank, \$6.50 per case of 12 paraffined boxes.

## The Fourth "Time and Money" Talk. It is About the Giant Arch and How to Use it.

THE Sectional Iron Frame House you know has a complete span of iron rafters, running from the ridge to the Galvanized Ice-Clearing Eave Plate. Sometimes the rafters are welded directly to the guaranteed iron posts, while other cases they are fastened to the post by a Special Fitting.

Now our Semi-Iron house has the same post, the same Eave Plate, the same Sash Bar Clasp as the Iron Frame House, without the iron rafters. So to make this Semi-Iron House of ours similar in strength to the Iron Frame, we support and brace the roof with the Giant Arch. It is a combination of pipe purloins and cross ties, all securely clamped together with our Clamp Column Fittings, making an arch which is a tower of strength and casts little shade.

In erecting the house this Arch makes a complete scaffold, doing away with that expense and saving you much time besides. Next to our Iron Frame House this Pipe frame construction is the very best house you can buy.

Why do we call it the Pipe-Frame House? Well, it was like this—but next week for that.

Do you wish to have a perfect  
gutter, lasting, not leaking, not  
sweating? Use our Cedar  
Gutter.

# Aphine

*The Insecticide that kills plant Lice of every species*

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale and all soft bodied insects.

An excellent cleanser for decorative stock. Used as a spray you can rely on it for positive results, without fear of failure or dissatisfactory.

\$2.50 per gallon; \$1.00 per quart.

## FUNGINE

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has no equal for destroying mildew on roses and carnation rust.

\$2.00 per gallon; 75c per quart.

For Sale by Seedmen.

Send for name of nearest selling agent. Our products are not alone endorsed, but are continuously used by leading commercial growers, professional gardeners, park departments and state colleges of the country.

Aphine and Fungine can be used in house or field.

Manufactured by

**Aphine Manufacturing Company**  
MADISON N. J.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

**J. G. MASTIN CO.**

## Our Supplements.

Subscribers should see that they get copies of  
the fine supplementary illustrations showing  
high grade design and decorative work. These  
fine supplements should be carefully pre-  
served, as they mean much to the retail florists  
in dealing with their customers, illustrating as  
they do the various kinds of work that the  
everyday florist is called upon to perform.

The papers in which the supplements appear  
should be likewise preserved, as they contain  
much valuable data with regard to these special  
illustrations. Subscribers should see that they  
get every issue as otherwise they may miss  
some of this high grade work.

## SUGGESTIONS FOR MEMORIAL DAY.

### Memorial Day.

The beautiful custom of selecting one  
day in the year upon which to com-  
memorate those who have passed on to  
the hereafter, by laying flowers upon  
their graves, was inaugurated in the  
south, but was adopted by the Grand  
Army of the Republic, who selected  
May 30 as a day upon which to honor  
the dead heroes of the civil war, and  
has now become a day generally ob-  
served by all to keep green the memory  
of all those who have gone to their  
eternal home. This year being the  
fiftieth anniversary of the breaking out  
of the war, extensive arrangements are  
being made by the Grand Army to com-  
memorate and honor those who gave  
up their lives and who participated in  
that great conflict, and the publication  
by the daily press at this time of the  
articles upon that war which nearly  
divided this great country fifty years  
ago, is bound to make this one of the  
greatest memorial days in the history  
of the country, and there is no doubt  
but that the demand for flowers will be  
much greater than ever before. It is  
therefore necessary that those dealing  
in floral products should be prepared to  
meet this demand that will be made  
upon their resources.

### Wreaths and Designs.

Floral designs are one of the great  
features of Memorial day, and of all  
of the many forms used the wreath is  
always the most in demand, followed  
by the cross. These will be desired in  
many different arrangements and at  
various prices, and the florist must be  
ready to supply them at good prices as  
well as at low figures. There is no limit  
to the different combinations that can  
be arranged and all the seasonal  
flowers are well adapted for these  
forms. While there are always many  
designs composed entirely of flowers,  
yet for the last few years the increase  
in the use of galax and other orna-  
mental foliage has been very marked,  
and especially at Memorial day when the  
idea of many is to keep green the  
memory of the departed relatives, the  
wreaths of green are very appropriate.  
Galax is by all means the foliage most

employed and wreaths and other de-  
signs composed of these leaves, either  
the green or bronze, are extensively  
made by all the florists. These designs  
artistically arranged with a bunch or  
spray of bright flowers upon them are  
especially adapted for the purposes for  
which they are desired for Memorial  
day, for they keep well, and no matter  
what the weather, whether stormy or  
hot, retain their fresh appearance for  
a long period. The galax can be ar-  
ranged very beautifully, but the flat  
effect which is so often seen should be  
avoided, and the leaves arranged more  
loosely with some standing above the  
others and not simply laid one on top  
of the other.

The magnolia leaves well arranged  
make one of the richest pieces of work  
of all the different kinds of foliage, and  
at this season are sure of satisfying the  
customer. These leaves when well ar-  
ranged are certainly very beautiful, and  
although there are some who are averse  
to work of this kind unless it is com-  
posed of flowers, on account of what  
they consider an artificial look, yet we  
have known of a well arranged wreath  
of magnolia leaves to overcome all their  
prejudices and excite their admiration.  
These leaves have great lasting quality  
and the designs can be made up a few  
days before Memorial day and will be  
very ornamental in the store or office,  
and all ready for sale, and if displayed  
in the window are sure to attract a  
customer. The leucothoe sprays are  
also well adapted for this class of work,  
and while they do not in our opinion  
make as beautiful designs as either the  
galax or magnolia, yet they help to  
give variety and have many admirers.

The leaves of cypress can be used to  
make beautiful and rich looking  
wreaths, especially by the use of the  
smaller sizes, and they are also very  
fine for the background of sprays. The  
leaves are symbolic of victory and a  
cluster well arranged and tied with a  
ribbon make a very beautiful and ap-  
propriate design for this season. The  
cypress can also be employed in combina-  
tions with other foliage or with flowers  
and when artistically and properly used  
are very effective additions to all  
classes of funeral work.

### Plants and Bedding.

While the demand at Memorial day will, with most florists, be largely for flowers, yet there will be calls for many plants, and with many the plant sales may even exceed those for cut flowers. The fine specimen blooming plants are extensively used for decoration at this time, and hydrangeas, spireas and pot roses are always demanded. These the dealer should have in quantity, enough to fill all orders. There is one important item in the sale of these plants that are to go to the cemeteries and be left standing in their pots exposed to the sun and wind, and that is that they should be thoroughly watered before leaving the office or store, and if, as is sometimes the case the florist delivers and places the plant upon the lot at the cemetery, the plant is better watered after being located. While this may be considered a small matter, yet a plant left the day before Memorial day and placed in the sun, if not properly watered, will present a sorry sight on the morrow. Hydrangeas are very satisfactory plants for this purpose and are always in good demand, a nice plant with five or six blooms will really make more show and last longer than the same amount of money placed in cut flowers, and the Crimson Rambler roses are also fine for this purpose. In the cheaper plants there are none more satisfactory than the Spirea Japonica, and if well watered and kept so, will be very decorative for a long period. While these are the three leading blooming plants used at this time, still there will be calls for others, and any of the blooming plants in good condition will find ready sale.

Many lot owners in cemeteries have beds or urns which are filled with

blooming plants and others have the graves planted out with bedding stock. There is one important matter in this work and that is that the plants shall be in bloom, for the purchasers will want all the flowers possible on the plants on Memorial day, and will not be satisfied with a bed planted with stock in bud or not showing color. Geraniums will surely have the call and that popular variety, S. A. Nutt, will be in great demand for the purpose, and a good stock of this variety in bloom is a great necessity to one having much of this trade. Pansies, especially where the lot is shaded by trees, are fine plants for bedding in cemeteries, and they are particularly adapted to shady locations where the graves are made into flower beds. Where pansies are planted in the open sun and receive no after attention—not being given water enough and the seed pods allowed to remain upon the plants—they soon go out of bloom and the beds instead of being ornamental are an eye-sore through the summer. Some people like the graves set out to echeverias, in fact this is very general in some sections and in some cemeteries. There is one great advantage to these beds, they demand but little attention throughout the summer, except to have the weeds pulled out, and it makes but little difference how hot or dry the season may be, they always present a nice appearance.

Another great call in all cemeteries is for grave myrtle, Vinca minor, and this is by far one of the best plants in cultivation for the clothing of graves. It will grow in any location, either bright sun or in dense shade, but is at its best in partially shaded locations. This can be transplanted at any season

and will quickly cover the ground, making a mass of bright green foliage, and the only attention which it requires is to be kept within bounds and trimmed to the shape of bed required. A stock of this plant is a necessity to anyone having any cemetery trade.

The urns will require the same treatment that they do on lawns or estates, but if placed in very shady locations, high colored foliage plants are to be preferred to those that bloom, but if placed in sunny places any of the blooming plants are fit subjects for these ornamental features. Vines will be a necessity to properly fill the urns and vincas and German ivy are by far the best of these, and the other plants may be selected to suit the fancy of the buyers. The one necessary thing in urns is that the soil should be renewed, every spring if a nice effect is to be expected during the summer. It is too often the case that this important thing is left undone, and then the florist blamed for the quality of the plants furnished. It can hardly be expected that the plants will flourish and bloom in the impoverished soil which is allowed to remain in these receptacles from year to year.

### Cut Flowers and Bouquets.

The cut flowers will receive the greatest call, and it will be necessary to have on hand a full line of all the grades of stock for which there will be demand. Many of these will be arranged by those who purchase them and will be taken by them to the cemeteries themselves. But the greatest call will be for bouquets and sprays which are to be arranged by the florists, the former in the regular bouquet form to be placed in vases and the latter to be laid upon the graves or placed upon the head-stones or monuments according to the wishes of the customers, and the facilities with which they have provided themselves at the cemeteries, that is, whether they have vases in which to place the bouquets. If they do not have these, the sprays are generally preferred, for there is but little trouble in arranging them when they are carried to the cemetery. All the flowers of the season can be made to serve in the making of these, but as the majority of the buyers will desire more or less color in the arrangements it is necessary that the florist have on hand a goodly amount of colored flowers. The prices will vary greatly and a large supply of the cheaper flowers will be required, as well as a large stock of green material. Hardy ferns will be one of the first requisites, these will be required to back the sprays and to arrange under the bouquets and to help fill in among the flowers. Of the other greens a large quantity will be needed especially of the varieties of asparagus, for these keep well and do not wilt and are much to be preferred to the softer greens that will not stand in the bright sun and wind.

In flowers, besides the usual stock carried at the season, that is the roses, carnations and other seasonable stock, which is always on hand, a large supply of outside stock is obtainable and can be used in the bouquets, but these should all be picked the day before and allowed to stand in water over night, for this stock is all very soft and wilts very quickly, and should be kept in vases of water long enough for

WREATH OF PAUL NEYRON ROSES AND CYCAS.

it to get well hardened up before being placed in the open air. Of this class of stock peonies will occupy a prominent place, for they are very showy and a few of these beautiful blooms in a spray are a great addition to a prominent feature. Lilacs, weiglas, deutzias, *Spiraea Thunbergii* and *Van Houttei* and many of the spring blooming shrubs are very valuable at this time, for with a little taste these can be arranged with a few of the nicer or greenhouse products and the coarser look which is so often noticeable in arrangements of outside flowers be overcome. Of the cheaper greenhouse products which are so much in demand, there are stocks, both single and double, colored and white, which are especially useful in sprays; candytuft, feverfew, *Spiraea Japonica* are all nicely adapted for bouquet work and greatly add to the floral arrangements.

#### Vases and Supplies.

Another matter that may be turned to profit is the having in stock a suitable supply of vases for cemetery uses. These are now made in different materials, and in many places away from the larger cities, are impossible to obtain. It is then necessary that those who furnish the flowers should also have the receptacles to hold them. Many people will buy cut flowers and take them to the cemeteries and arrange them themselves, but having no vases in which to stand them, place them on the sod and they soon wilt, and they often feel that it is money thrown away. By having vases filled with water they will last much longer and be a source of satisfaction. The having these on hand will prove not only a source of revenue to the dealer acquired in the sale, but also the purchaser having procured the vase is induced to keep flowers in them throughout the summer and thereby increase the florist's business. Calls are frequently made for these receptacles and it is a necessity that those who sell the flowers should also have the required accessories.

#### Immortelles and Prepared Flowers.

A class of work that has a large sale in many sections is the wreath and other designs made of prepared flowers. These are made up before the rush for the fresh flowers comes on, and are displayed with the preparations for Memorial day. They are made of immortelles and cape flowers and while they are very compact and have an artificial look, yet they will keep in good condition for a long time and many people like them for this reason. They are not, of course as expensive as are the floral pieces and to one who likes this class of work are very decorative, and it seems to be the desire of some to get the most show possible for their money and these are just what they want. The immortelles can be obtained in many colors, and while white and yellow are the colors more often used, and generally the designs are made of all one color, yet some very good combinations can be executed. The immortelles and cape flowers are wired short and placed very closely together and this smooth close surface makes an admirable bed for the lettering that is so often desired. A spray of some of the preserved vines placed on these are very decorative additions to this work.

While personally we do not like this class of work, yet it is a great improvement over the metallic floral work which is sometimes used, and if well arranged is sure to find customers, and can be made a source of revenue to any up-to-date florist, for they are inexpensive and can be put up during the time when the help is not employed on rush work and be sold at a good profit. They also serve to attract the cus-

**MEMORIAL DAY** this year will mark the fiftieth anniversary of the outbreak of the great Civil War, and the decorations will be more numerous and elaborate than ever before.

tomers' attention to Memorial day, if properly displayed, and do, no doubt, result in the sale of other stock by calling to mind the approach of the day, and make a sale to some who would otherwise forget it.

## THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

### The Wreath.

SEE SUPPLEMENT WITH THIS ISSUE.

From the earliest times when flowers and foliage were placed together in any form, the wreath has always been the most popular manner of arranging them. In ancient times the laurel wreath was placed upon the victor and so down through all the ages this arrangement of flowers has been sung in poetry and praised in prose. Although the ingenuity of the florist has been exerted in producing many other designs, yet today there is a greater call for the wreath than any other arrangement that is executed. Unquestionably one of the great reasons for this, beside the form itself being so attractive, is that it can be arranged in so many different ways, can be used in so many locations, and can be made of any or all the flowers that the florist has in stock, for the designer is never restricted in his selection and large or small flowers, long stemmed or short stemmed can all be employed in arranging this popular design. The wreath is not only arranged to lie flat or to be hung where desired, but can be made rising above a beautiful base, when it is termed a standing wreath or fastened so as to recline upon an easel, both of which are beautiful designs and is also often designed in combination with other features such as the wreath and bar, with the bar across the center, or the wreath and the scroll, both of which forms are extensively used where lettering of any kind is desired. Wreaths are equally beautiful made either with one kind of flowers only or with a mixture, and the only instructions that are necessary are to avoid arrangements that are too compact. Much flower work is spoiled by the use of too large an amount of stock, the design thereby looking crowded. It is much better to use less flowers and so arrange them that each single flower stands out prominently, not all of the same height, but some standing above the others. The spaces

between the flowers can be filled in with lighter, smaller flowers or appropriate greens and the effect thus obtained is much more beautiful and effective. The wreath reclining on an easel which we herewith illustrate is a very artistic design composed of roses, carnations and Roman hyacinths and is a beautiful example of the lighter manner of arrangement. Each and every flower shows its individuality, there being no overcrowding, and the lighter hyacinth being used to fill between the larger flowers and standing above them, giving the design a beautiful finish.

### Memorial Day.

May 30, the last floral holiday of the season, is right ahead, and all branches of the trade should have all their lines out, and be prepared not only to get what business offers, but by putting their best foot forward to attract new customers and hold them for the future by the satisfactory way in which their orders are filled. The value of this event as a floral holiday varies considerably in different parts of the country; in Boston it is said to reach or attain as great a prominence as Easter or Christmas, and while the character of the business is different, being for the most part the sale of flowers for cemetery decoration, preparations are made weeks ahead, stock laid in and made up, and everything possible done to relieve the strain when the final day arrives. In many other cities and towns the general observance of the day carries with it a greater or less demand for plants and flowers. With all firms who cater to a cemetery trade it is their busiest day of the year, as lot holders will take no excuse for failure to have their vases filled or lot in order on that day.

One of the most useful designs for Memorial day is the magnolia wreath, these wreaths are made of the imported prepared leaves bronzed in color, and almost everlasting. Galax leaves at this season shrivel very quickly and can not be prepared very far ahead, while the magnolias that were left over from Christmas or for that matter from last Decoration day, if they have been kept clean, are just as good as the fresh stock, and when decorated with a few flowers are very attractive and salable. Their dark color also makes an admirable background for immortelles, nicely gotten up wreaths of this kind will be found good sellers.

It would be interesting to know how the general decorating of graves, so prevalent in Boston on Memorial, or Decoration day, was brought about, so that this very beautiful, and from the florists' standpoint, profitable custom, could be introduced and made general all over the country. Such a result is possible; look what has been done for the flower trade in the establishing of Mothers' day by Miss Jarvis of Philadelphia, who, without the assistance of anyone, has created a demand for white carnations for this occasion that has far exceeded the supply. Of course this feature of the observance of the day, the wearing of the carnation, was only incidental, but it has turned out to be a very valuable custom, creating a demand for flowers at a season when an accumulation of stock generally takes place. We believe that the business of this holiday, Memorial day,

could be improved by a system of literary work along the lines of making this a day for the annual decorating of graves. Such matter, if gotten up attractively, would be accepted as news and spread broadcast with but comparatively little expense. The name of the day implies that it is a day for decoration, and this feature should be kept before the public. The fallen heroes, the decoration of whose graves gave birth to the day, are not receiving the attention they did at first, in many cemeteries save for the flag and wreath or handful of flowers they receive on this day, there is little evidence of care and the graves generally present a sadly neglected appearance. The ranks of the Grand Army are rapidly thinning out and before long, if public sentiment is not built up or strengthened in some way, this beautiful custom is in danger of dying out.

The prospect for flowers for this year's celebration is now very promising as although the season appeared late it is thought that in the central and western states the great Memorial day flower, the peony, will be in full crop, as well as most of the outside shrubbery, which does so much to help out at this time of extra demand. Easter was so late this year the bedding plant men are having a hard time to get their stock ready for the final clean up, which as a rule takes place by the thirtieth of May. House after house of geraniums are seen that are strong and bushy but devoid of flowers, but it is hoped that they will be in by that time. Roses are also great sellers for that day, and many growers aim to have the rambler classes in full flower at that time.

The florists' supply houses are kept busy at this time shipping out immortelles and all kinds of wreaths and material for the same in large quantities. Many florists do a large business in metal wreaths and designs, which are preferred by many to fresh flowers for the cemetery. Trade of this kind is mostly among citizens of foreign birth, as abroad the metal designs are much in vogue.

K.

#### Sweet Alyssum Drooping Leaves.

Our plants of sweet alyssum were planted from the propagating bench to flats and grew nicely and were then potted in 2½-inch pots. After this potting the leaves turned yellow and dropped off. Can you inform us as to the cause of this?

R. P.

If the plants grew nicely in the flats and then dropped their leaves after being potted, there is no question but that there must have been something the matter with the soil in which they were potted or in their subsequent treatment. Not knowing the nature of the soil and whether the plants were treated as they had previously been, it is very difficult to state the cause of the trouble. If the soil was sour or contained too much fresh manure, the leaves would be very apt to act as is described. We should advise repotting the plants in good soil and in so doing remove all the old soil possible without injuring them.

W.

WORCESTER, MASS.—Mrs. J. E. Hoyle, cut flower buyer for the Denholm & McKay Co., has severed her connection with the house and has left for New York where she will reside.

## THE PERENNIALS.

### The Best Twelve Herbaceous Plants.

A florist recently asked the names of the best twelve herbaceous plants to carry in stock for his trade, all to be iron-clad as to hardiness, not liable to become weedy or die out after a year or two. It seemed the easiest kind of a proposition to reply right off, but when it came to the elimination of such as the delphiniums, peonies, Iris Germanica, garden phlox, Canterbury bells and foxgloves, with which all are acquainted, it was at once apparent that it required some thought to decide what to put in, and more to know what to leave out of the best dozen. Doubtless there are others who are wondering what to recommend that is good, and it is proposed to give the names of those selected, not that these are final, for they may be improved upon without doubt according to the fancy, soil or climate, but all are good and cover the season outdoors from early till late, and are easy of increase.

To begin the season we would plant the Virginian cowslip, *Mertensia Virginica*, the beautiful sky blue flowers appear so early in the year it is a welcome sight, and if planted where they can seed themselves, the plants soon

and is one of the best known garden flowers. The roots are very brittle to handle, should be planted early in the year or later in the summer after they have begun to die down. This *dienentra* does not produce seeds, at least we have never observed them, but roots are very easily procured at a low rate in fall and must be planted at once.

Much the best of all the columbines is the Rocky Mountain one, *Aquilegia cerulea*, and a mass of it is hard to improve on in early summer. It is true blue and white and seeds early, but if other columbines grow in the vicinity the bees are sure to mix them, but as no other columbine flowers so early as this one, with the exception of *A. Canadensis*, not often cultivated in gardens, we can get the strain to come true by gathering the first seeds that ripen. In this way we managed to keep it true for many years, and even improve the colors. There is always a tendency with the *aquilegas* to die out, but seeds sown when ripe will germinate freely the following spring; not many will come earlier.

The old *fraxinella* or "gas plant" is universally liked, and it looks best when both colors are planted together, red and white, and on dull days or summer evenings the flower spikes may be made to blaze up as a torch, seemingly without injury to the plant or blossom. This is due to the exudation

WREATH OF MAGNOLIA LEAVES, CYCAS AND LILAC.

become numerous. It is very difficult to save the seeds, as they ripen in succession like *mignonette*, and soon scatter if ripe. It is well to plant among grass if possible, and is beautiful when mixed with the poet's *narcissus*.

Next we have the old-fashioned "Bleeding heart." It is always popular

of a resinous gas, and the remarkable part is that after the stem is cut from the plant there is no more gas. This should be treated as a peony, given as much space and fed as well, also increased by division, as seedlings take a long time to reach the flowering age we never yet had the patience to wait and count the years.

The white rocket, *Hesperis matronalis*, is one of the most useful of cut flowers, especially if the white one is kept true. The purple one is of poor color and easily pulled out. It is hardy, seeds freely of itself and is invaluable about the time of Memorial day to the florist.

We get very few new hardy plants nowadays, but it is hoped that of the many fine things recently discovered in China some may prove as good and as hardy as *Incarvillea Delavayi*. It has foliage like an *acanthus* and this remains handsome all summer, a very desirable trait in any border plant. The tall spikes of *gloxinia* like flowers last a long time, too, in full beauty. Seeds are freely produced and if sown at once when ripe there will be little roots the size of *freesia* bulbs formed before winter. These can be kept dry during the winter in a cellar, planted out in spring, and the next year all will be of flowering size, fit to stand the winter outside. There seems no question as to its hardiness, and I have asked many, but all agree. There are some improved forms now and we may see the flowers much improved in the future.

The *campanulas* are a large family, of which we will adopt one in *C. carpatica*, both blue and white, as it is much the best of the dwarf growing species, makes a good border plant and flowers freely for a long time. Seed grows well and stock can be increased in this way sown under glass.

*Papaver orientale* is most too well known to need description, but a garden is not complete without it. Great care must be taken in locating it in the border, for its strong color kills everything else in sight for the time being. The deep blood red form known as *P. bracteatum* is the best and can be increased by root cuttings put in sand as *bouvardias*. It does not come true from seed. The pink forms sent out many years ago do not seem to thrive here, and this is a pity, for they are very beautiful, the color of a *Bridesmaid* rose. The perennial poppies need transplanting early in the fall. They start so early in spring it is unwise to move them at that time.

For a yellow lupine-like plant we can't get along without *Thermopsis Caroliniana*. This is a discovery for which we have to thank Jackson Dawson, for though it was in cultivation, no one seemed to appreciate its value until he showed them. It is well to give the plant support by staking, or high winds will blow it over and the spikes all come crooked just as they are about to open. It may be increased easily by seeds or division.

The cardinal flower is never seen to advantage except when cultivated in the garden or naturalized in masses where it is moist. Then the color in late summer is something to behold. There is a tendency for this *lobelia* to act as a biennial at times, but it seeds itself so freely as to be practically perennial in duration.

A good sunflower that does not spread and become a nuisance will be found in *Helianthus mollis*, another of Mr. Dawson's finds. There is nothing weedy in its appearance or behavior and can be readily increased by division. It is a native of the Southwest and does not seem to make seed in the north, as it blooms late in summer.

The last and perhaps the best of all is *Veronica subsessilis* with rich dark

WREATH OF ROSES.

ultramarine blue flowers lasting a long time in beauty and a mass of color late in summer when flowers are scarce, especially blue ones. This *veronica* needs a rich soil and plenty of room to develop after it has been planted a year or so. The only way to propagate it is by division in spring or to take the young shoots off as they appear outside and root them in a cool place in the greenhouse. A large percentage will grow treated in this way, but the cuttings must be taken off low down so as to get a portion below the soil.

The foregoing list is not to be considered final, and is merely the opinion of the writer, who, in the beginning, did not realize how hard it would be to leave out so many good things for the sake of the few named above, but certain it is that all these are good and may safely be carried in stock with no unpleasant aftermath. E. O. ORPET.

BROOKLYN, N. Y.—Charles Link has opened a flower store at 120 North James street.

PHILADELPHIA, PA.—George Redles, secretary of the Germantown Horticultural Society, delivered a lecture on wild flowers in the library room of the Association hall May 9, and an exhibition of plants, flowers and vegetables was also held.

BOSTON, MASS.—Articles of incorporation have been filed by Thomas F. Galvin Inc., florist; the capital stock is \$300,000, with the following incorporators, Thomas F. Galvin, Jr., Thomas W. Streeter, Lafayette R. Chamberlain, John W. Worthington, and Charles C. Dunn.

#### The Yucca and the Indian.

The Indian was the first American botanist, and of all our redmen those of the arid regions of the great southwest have exhibited the most remarkable sagacity in exploiting the secrets of the wild plants with which they have come in contact. One of the United States Government investigators has recorded the fact that out of about one hundred and fifty known species of plants indigenous to the Moqui Reservation in northern Arizona—largely a desert reservation—these Indians have utilized in one way and another, about one hundred and forty.

The remorseless Indian policy of the government, which is de-Indianizing the Indian at a rapid rate, has already destroyed so much of aboriginal practice that one has to travel far indeed into the wool of the wild west to find Indians who depend nowadays to any extent on the native plants. Fortunately, however, there are some of this sort left—the most numerous being the Navajos whose great reservation lies across parts of northern Arizona and New Mexico. They live a sort of patriarchal, pastoral life, dwelling not in villages but each family separately from the others, moving about from place to place as fancy or need dictates and driving before them their bands of sheep, goats and horses, in which mainly their material wealth consists.

Into our Arizona camp one showery morning two Navajo shepherdesses strayed, and after enjoying our camp fire for a while, one of them tossed

something from her blanket into the blaze and scraped some ashes over it. Two or three more of the same things followed and were similarly buried in the hot ashes. Each was the size and shape of a large butternut, and greenish white in color. By and by she withdrew them, and removing the charred skin, ate them, with evident relish.

"What are you eating, sister?" asked Bob, our guide, in her native tongue.

And she told him hosh-kawn—the Navajo word for the fruit of the widely distributed *Yucca baccata*, or Spanish bayonet, of the southwest.

It was August, and we had passed hundreds of the fruiting plants in our travels without suspecting them of edibility; but that day we made a business of gathering a quantity of the fruit and at night had a hosh-kawn roast. Bob said they had roast apples "plum skinned"; but to my notion, the flavor was rather that of sweet potato. At any rate, we thought them good, and they inspired respect in us for Navajo cookery.

That, however, is only the beginning of the story of the yucca's usefulness; for in some measure, the yucca has, in its time, been to the desert Indian what the date palm has been to the Arab. Besides furnishing food (the fruit is not only eaten green, but by some Indians is cured for winter use), the plant has a fibre of much value as a textile material, and in pre-Columbian times this was largely used in the weaving of garments, remains of which have been abundantly found in the ancient cliff dwellings of the southwest. I have myself picked up in the debris about such places, pieces of well-woven cordage made of the yucca fibre, which also served in the manufacture of prehistoric sandals. This use of the yucca has now been abandoned, but the foliage still supplies an important basket material; and in the hands of an artist, very beautiful effects are obtained by combining in the design leaves which have been dried green with others which have first been bleached or browned by the weather. The narrow leaved yucca, *Y. angustifolia*, which is indigenous to much of the territory where *Y. baccata* grows, is often cut off just below the root crown, bunched together and dried to serve as whisks or brooms.

The greatest contemporary usefulness of the yucca, however, lies in its long, thick root. This is highly saponaceous, and is greatly prized both by Indians and Mexicans as a substitute for toilet soap. The roots are grubbed up, cut into handy lengths, and crushed with an axe or stone. Rubbed up in water they make a plentiful lather, which is exceedingly cleansing and leaves a pleasant feel to the skin. In the ceremonial washings attendant upon the religious rites of the Indians, the use of commercial soap would be sacrilege, only yucca suds being permitted. Amole is the name by which their soapy root is known throughout the southwest, and its value has not escaped the notice of the enterprising American soap maker, to judge from a brand of "amole soap" which I have seen in the shops of civilization.

Among the Navajos, the yucca seems to have some mystical import, and the plaited leaves are used as face masks in some of their religious ceremonies. A dance, known as the hosh-kawn

dance, is practiced among them—a night ceremony, in which the development of the yucca plant from the barren clump of winter leaves, through its flowering stage, to the time of fruitage, is dramatically represented.—C. F. Saunders, in the American Botanist.

#### The Newer Montbretias.

Everybody who gardens at all must have been acquainted at some time or another with the older forms of the montbretia, their slender sprays and long, more or less tubular-inclined blossoms, which, never expanding to their fullest possible extent, preferred, apparently that their light should remain, as it were, "under a bushel." Today, as for a year or two past, this is an impossible thing, since we are brought face to face with a quite new and modern race of these plants, which, having thrown off the old yoke of bondage, reveal their fullest merits to all whom it may concern. Incidentally, too, this new state of things has added a greater wealth of flower-beauty to our gardens than would at first appear, says a writer in *The Garden*, since instead of the more tubular blossoms of former days, the inclination of the flowers of the modern race is to expand laterally, thereby creating a spectacular

dispensable because of their color, warmth and distinguished bearing in the late summer and autumn garden.

It is in the garden where they appeal to one most strongly, and where the color of leaf and stem and blossom combine to create pictures of their infinite wealth of beauty and charm. It is in the garden, too, that the elegant grace and profuse flowering of these plants are seen to advantage, and where the value of the greater stature and vigor—conspicuous attributes of the modern montbretia—are also seen.

For much of the beauty and vigor of this vastly-improved race our gardens are indebted to Mr. Davison, Westwick, near Norwich, who for years past has interested himself in these plants. Close observation, too, has caused him to evolve a common-sense method of cultivation well suited to the requirements of the plants. For example, in place of the old method of leaving the plants to form clumps in the border, the whole of the stock is lifted each year so soon as this is deemed expedient after the arrival of early frosts. Subsequently the plants are cleaned, dried and rested in a frost-proof shed or similar place for the winter, very much on the same lines as the gladiolus is treated for commercial purposes. From out of this

WREATH OF MAGNOLIA LEAVES.

display of color of which a few years before we had not even dared to dream.

Thus the raiser of such forms, while developing and expanding the flower to its utmost limits, has also placed it on a much higher pedestal than it was before, and, having by the same mystic wand imparted to it a decorative value of its own, has rendered it among the indispensable flowers of the year—in-

very simple method of treatment are obtained the finest vigor of growth, freedom from disease, and the most abundant flowering I have ever seen, a method so simple, that it may be followed by all. Not only are the plants rested, but an opportunity is afforded for cleaning, manuring and otherwise preparing the ground for another season's crop, the soil meanwhile being

prevented from becoming bulb-sick. Added to this method of lifting is the isolation of the plant when transferred to the soil, for to the individualizing of the plant is traceable much of the vigor to which I have referred. It is precisely the same method of culture which permits of the planting of dry roots in March and April, and which give such excellent results. Among the finest varieties are King Edmund, Lady Hamilton, Lord Nelson, Westwick, Hereward and Prometheus, the last the giant of the race in stature, giving deep orange, crimson-eyed flowers four inches across.

## WATER GARDENS.

### Notes on Aquatics.

The unusual lateness of spring and the ever recurring cold waves have delayed operations in all branches of horticulture. Signs of life, however, are again apparent in plants, shrubs and some trees, showing in some cases disastrous results from the severe winter. In many cases it will not be possible to note results on the condition of water lilies as they will not be visible on account of deep water and cannot be examined as other plants can, but there is little danger of any hardy *Nymphaea* suffering from frost providing there has been water of greater depth than the unusually thick ice that has prevailed the last winter. It is quite possible that some of the European and Asiatic varieties may have been frozen with no ill effects being apparent. They will bear freezing to some slight extent. But no American variety will and as many of our choicest *Nymphaeas* are hybrids of American and European parentage, it is too risky to run any chances in wintering over. So when planting or constructing ponds see to it that there is a greater depth of water than any unusual thickness of ice that may form in the locality.

In some cases natural ponds or others with sloping banks have suffered through the heaving of the soil by continued freezing and the crumbling away by thawing out on the surface followed by heavy rains before the sub-soil was thawed. All necessary repairs should be pushed to completion, and preparations be made for planting or renewing of old plantations. As soon as stock is found to be growing it will be safe to transplant or thin out where necessary. Plants of such strong growing varieties as *Nymphaea chromatella* and others of the *Marliacea* group, also *N. Gladstoniana* and *tuberosa* in variety after two or three seasons, require thinning out otherwise the leaves become much crowded and will push out above the water surface, hiding the flowers from sight. The flowers, too, will be much below normal size and deficient in color. The foliage is also liable to attacks of red spider in hot, dry weather. To obtain large, attractive flowers the plants must not be crowded and where they are grown in tubs or large boxes it will be found necessary to dig up the plants, renew the soil and replant. When doing this work select the strongest crowns, planting three of four in a box four feet square and one foot or fifteen inches deep. Use good, turfy loam and thoroughly rotted cow or barnyard manure, one of the latter to two of the former

CROSS OF CARNATIONS AND ROSES.

and if the soil has been composted several months so much the better.

In planting new ponds for a permanency the bed should be moderately rich but not composed of soil as rich as recommended for tubs or boxes. The depth of water can vary from two to four feet. There is nothing gained by having a depth of four or more feet, but where natural ponds exist of such a depth and it is desirable to plant lilies in them without altering the depth, do not try to plant the lilies there at once. Select the variety for the purpose and plant in large seed or bulb pans in good soil and place these in a convenient spot where the water ranges from one to two feet deep, and when the plants are established they may be turned out of the pans, soil and roots compact and put in deep water. No great skill is needed in planting. When the plants are ready they may be conveyed to the spot, using a raft, punt or boat, and simply placed in the water. Their own weight will keep them in the desired position and in a very short time the leaves will reach the surface and new roots will anchor the plants firmly in an incredibly short time. The disadvantage of planting in deep water is that the water remains colder much longer than shallow water and the plants are liable to get a check and not start to grow at once, but by starting

the plants in the shallow water in pans this is averted and there is no danger of the plants being disturbed as they are held in position by their own weight which is far better than tying bricks or any other weight to the roots to keep them down. I see no earthly use in placing the roots in wire baskets as advocated by our brethren across the ocean fifty years ago and still adhered to. Where it is possible plant the rhizomes firmly in water about two feet deep. In deeper water have established plants in pans as above recommended.

As to varieties, plant as taste or fancy may dictate but in so doing the inexperienced may err in selection of varieties and may be led more by the prices of certain varieties, endeavoring to get the largest number for a limited amount of cash. In natural ponds, where there is ample space, plant in groups of from five to twenty-five strong crowns; these should be three feet apart and the clumps should be some distance apart, depending on the size of the pond. In large ponds groups of the native varieties may be included with European and hybrids, but in smaller ponds avoid any representatives of the *tuberosa* section as they are too rank in growth and would in a few seasons choke the less rampant growers. If such varieties as *Nym-*

phaea tuberosa Richardsonii, N. Gladstoniana, N. tuberosa rosea and N. tuberosa rubra are desired, plant only the one variety in a small pond. These and all such types may be included in a large pond or lake.

In smaller ponds where plants are planted in tubs or boxes omit all of the tuberosa type, selecting European types and hybrids, planting one or three crowns according to the size of the box or tub. The native variety *Nymphaea odorata* is a universal favorite and a tub or box of it may be included in the collection, also the Cape Cod pink pond lily. But the stronger growing varieties are best planted in the natural pond. I have met persons who disliked any colored water lily, especially a yellow one, but the Florida water lily is yellow and although it does not take kindly to the northern states it is very beautiful where it can be grown and it thrives well in the vicinity of New York City. It should be planted in a pond by itself. In some sections of the country it takes possession of the pond and by its own peculiar mode of growth and reproduction it becomes a pest, though in Florida it is now becoming very scarce and is being smothered out of existence by the obnoxious water hyacinths.

As in other classes of plants there have been changes and improvements in types, forms and colors and the progressive florist must keep abreast of the times or he may soon be considered a back number. Novelties come high sometimes, but when a novelty has received the stamp of approval from horticultural and national societies its popularity is assured and its cost is usually a secondary consideration. I would advise intending planters in making a selection to include the latest novelties. They are a great advance over other varieties and will be standard varieties in the near future.

WM. TRICKER.

### Roses in Cool Temperature.

ED AMERICAN FLORIST:

Would you please give me a list of roses that will grow in a house where the night temperature falls to 50°?

SUBSCRIBER.

State of Washington.

Replying to "Subscriber," in reference to a list of roses that can be grown at a night temperature of 50° in the state of Washington, will say that most any of the commercial varieties can be grown as cool as 50° at night, providing the day temperature does not exceed 75°. At the same time they will produce very few flowers, hardly enough to pay, for they would have to be watered sparingly. In order to handle forcing roses profitably we would suggest the installation of a small hot water boiler. A few coils would enable him to increase the temperature at night to 58° to 60°, and the fuel consumption would be slight. He could then grow any of the indoor commercial varieties, such as Killarney, White Killarney, Richmond, Bride, Bridesmaid, American Beauty, My Maryland, Kaiserin; in fact, almost any variety. If he does not care to install the heating plant he can try the pink and white Maman Cochets, as they are about the easiest handled in the cool temperature. The small hot water boiler will soon pay for itself as better varieties can be grown and the maximum amount of bloom can be cut if the temperature is increased from six to eight degrees.

E.

## GREENHOUSER'S OBSERVATIONS.

### Liquid Manure in Small Places.

When visiting large establishments, where everything possible in the way of labor saving contrivances have been installed, the owners of small places are very apt to remark that such and such things are "mighty useful," "good stunts" and others, but "no use for small growers." This is frequently remarked of the liquid manure systems that are now seen on all well equipped places. The owner of a small place cannot, of course, install the elaborate and expensive manure "cooking" plants that we see in the mammoth cut flower growing places. They would possibly cost more than his whole greenhouse plant is worth, and be out of place into the bargain. But because he cannot do this exactly is no reason why he should do nothing and go on mixing his manure water in a barrel and lading it out with a tin dipper or a flower pot. There are better ways than this.

The ever present risk of severe frost prevents many growers erecting tanks at a sufficient height to supply from by gravitation, but when this cannot be done a small gasoline engine costs little to install or maintain, while the running expense is merely nominal. The engine can also be used for other purposes, such as pumping water, running a dynamo for light or power, sawing or other work, when not in use for forcing the manure water to the faucets. In this case the manure water tank should be in a frost-proof shed in a position where the manure,

system and very dangerous. Wasteful because the whole system has to be emptied of water before the manure can be used and vice versa—dangerous to the health of employees who will drink from the water faucets. Then, when more than one house is supplied from the same system, it may be necessary to spray in one section while the manure water is being used in the other. There is always, too, the danger that a hose may be laying filled with water and ready for use for spraying as well as some water in the pipes. The grower will begin to spray, and before he is aware of it has squirted a few gallons of liquid manure on some tender foliage, or at all events where it is not wanted and may do great harm. No matter how small the place or how large, be sure and have separate piping systems for the liquid manure and the clear water.

Where the expense of building a tank and providing a manure water system is too great, there are several makes of pumps on the market that, attached to the ordinary water supply, create a suction that draws liquid manure from a tank and delivers a mixture of manure water and clear in equal proportions. We must admit we are not well acquainted with their use, but we have seen them used over quite large breadths of carnations with, apparently, good success and they are also useful for pot plant feeding. But in many cases a large concrete or cement tank, to hold 1,000 gallons of manure water, may be constructed in such a

SPRAY OF ROSES AND NEPHROLEPIS WHITMANII.

either natural or artificial, can be conveniently handled. In southern points where frost of sufficient severity has not to be feared, an elevated tank is all that is needed, the pipes being laid from this to the benches in exactly the same manner as those for clear water.

Here we would like to warn growers against using the clear water pipes for the dual purpose of supplying liquid manure and water. It is a wasteful

position that manure can be easily got to it and the water either pumped out or dipped. For small places this meets all requirements and is satisfactory all around. With the manure water at the proper strength, a good deal of watering can be done in a short time by cheap help, but more than ordinary care is needed to keep it right. And it is always better to err on the side of weakness rather than strength.

### Making a Market.

There is usually a demand for everything that can be grown at all of the principal holidays and special occasions throughout the year and at such times the retailer has no difficulty in disposing of all he can lay hands on in the way of cut flowers or plants and at good prices. But although he looks on these holidays as his harvest and thinks he could not do business without them, the high prices that prevail are by no means an unmixed good. Growers, anxious to participate in the good things while they are going, are often tempted to hold back stock with a view of a big lot to send in the day or two before Christmas, Easter or other special occasion. The customer has to pay a high price and finds the flowers do not last more than a day. This gives said customer a jolt that lands him as far away as possible from a flower store and he keeps away until he is forced to go there. Had he been able to purchase good flowers at a reasonable price he would probably become a regular customer and his flower bill at the end of a year would be far higher than it is.

As for us the rise in prices is caused by the natural law of supply and demand it is legitimate and a good thing for all concerned, but the endeavor to boost prices to a prohibitive figure is wrong in all counts. But this ground has been covered so many times that it is useless to go over it again. A far more profitable field for thought is how to make a market between these special occasions to take care of the every-day stock and prevent gluts. We are not now concerned with the big men in the retail trade. Judging by appearances and by the number of automobiles purchased they are well able to look after themselves. And in any case they are not likely to be influenced by the opinions of an outsider like "Greenhouser." But there is no doubt that many retailers, in the small towns more particularly, could, by persistently showing their patrons what they have at all seasons and letting them in on a good thing in the way of a bargain when flowers are plentiful, make a market as an outlet for a very much larger amount of stock than they do.

We know of several men who grow their own stock for retailing that will keep the flowers on the plants until they wilt rather than set a low price for a time or even cut them and show them in the windows. It seems to us the height of folly and waste to grow a plant or a supply of flowers for cutting and let them stay and rot in the greenhouses, when at least they would prove to the world at large that flowers could be had at the store were they cut and shown in that store. We also know of another stamp of man similarly situated who cuts everything and sends every plant to the store and at least exhibits it to the passers by even if he doesn't always sell it. And friends that is the man who is winning out and who is going to win out.

This latter class of man, if he has a lot of stock on hand and hears of a charity bazaar or some other such diversion of the society people in his town, sends a supply to be sold for "sweet charity" and he is careful to let the people know who has sent them too. Good business, not only for himself, but for the flower trade generally. There are certain people who like to pay high prices—by all means let them

and get all that is coming, but don't give the general public the idea that a man who keeps a flower store is next door to a highway robber. Show the man in the street that he can buy a bunch of violets for his wife or sweetheart without spending the whole of his day's pay for them, and that if he wants to stand a plant on his table or

We think we are well within the mark when we say that anyone with a spark of horticultural knowledge could successfully manage the propagation of a house of roses after reading "E.'s" notes and the paper should be preserved by anyone who has work of this kind in prospect and is not quite sure of his own skill. GREENHOUSER.

WREATH OF SWEET PEAS, LILY OF THE VALLEY AND FERNS.

in his window he can do so without having to take a mortgage on his furniture. The love of flowers is innate in every man and woman of ordinary intelligence and the sooner the florist shows the way to gratify this longing and this taste for the beautiful in life, without causing too great a drain on the pocketbook, the better for growers, retailers, customers and all concerned.

### Rose Propagating.

Gratuitous advice is seldom valued indeed that which has to be paid for is not always appreciated. We have all heard of the bibulous Scot who was advised by his doctor to quit his whiskey and demurred to paying for the doctor's advice on the ground that he was "not taking it." But we would like to advise any young grower who is interested in knowing how to do things properly. I read thoroughly the excellent article by "E." on page 53 of THE AMERICAN FLORIST, issue of February 4. For a long time we have read the instruction and readable articles by this careful teacher who, without being stilted or didactic, manages to compress into his writings a world of useful, practical advice that is invaluable to the inexperienced grower. Year after year he carefully and completely runs the gamut of the culture of our most popular flower in these pages, yet there is always some fresh point in his work, some new way of putting an old truth that relieves his writing from any taint of sameness.

### Cleveland Notes.

Spring fever and planting out had a restraining influence on the Cleveland florists, but over seventy-five couples lustily followed the strains of the Johnson orchestra until after midnight May 11, at the Chamber of Industry. This was the first dance given by the florists for a number of years and was a success in every way, other entertainments being participated in by those who did not care to trip the fantastic toe. Beautiful gowns were worn by the ladies, the hobble skirt figuring very prominently, while most of the men were in full dress. F. A. Friedly, the heart and pulse of the affair, in very humorous manner introduced floor manager Knobbe. About midnight the party marched downstairs to the banquet table where a seven course spread was enjoyed. The tables were very tastefully arranged by Mrs. Friedly and the members of her committee. The expressed wishes to repeat gatherings of this kind at Euclid beach this summer were many, as they help to bring about a better acquaintance among the trade.

Frank Danzer of Detroit passed through the city on returning from Ashtabula, and visited the florists.

A. Miller was a visitor with the trade and was fortunate to be in town and participate in the folly. A. M.

SAN ANTONIO, TEX.—The largest crowd in the history of the spring carnival, estimated at 150,000 people, witnessed the annual flower parade and battle of flowers on San Jacinto day.

**Elitch-Long Flower Show, Denver, Colo.**

A new and unique departure in the floral business was inaugurated in Denver, Colo., this year. The Elitch-Long Co., wholesalers and retailers, gave a flower show which attracted wide attention and enormous attendance, incidentally firmly establishing this five-year-old concern on the map of floriculture business. The Elitch-Long Co. owns and operates Elitch's Gardens, the leading amusement resort of the Rocky Mountain metropolis. The resort contains some sixteen acres, and for a score of years has been the storm center of Denver's best attractions in summer amusements. An all-star stock company is maintained in the big theater during the summer months, while every other diversion to be found in first class resorts is provided. Thousands of bedding plants are used each year in beautifying the grounds, and these have always been supplied from the company's greenhouses, which were originally installed for this purpose only. So many applications were received each year from admirers of flowers in the various gardens and landscape plots, that five years ago the management decided to enter the field as florists. Additions were accordingly built to their greenhouses and business was started in a small wholesale way. Success attended the venture from the first, and within two years the company was a formidable factor in the wholesale trade of that section. Then followed the establishment of a retail store in a central down-town location.

It is an old and true saying that daily newspapers will print stories dealing with new ideas and innovations, regardless of how much of an advertisement such stories may carry to the concern in which they originate. This rule held good in the case of the Elitch-Long Co.'s flower show, which was held April 9 and is herewith illustrated. It was staged in the theater inside the grounds, the entire parquet, orchestra pit and stage being utilized for the display. The whole interior of the theater was one solid bank of blooms, so artistically arranged that visitors in attendance on the show fairly gasped with surprise and admiration.

The event was held on a Sunday and it had been announced as free to all comers. On Saturday, the day before the show, each of the five Denver dailies sent photographers and special writers to the scene, and the following morning their pages teemed with pictures and descriptive stories. The result was that over 15,000 persons visited the display and carried away with them impressions of the most lasting sort, chief among them—from the company's standpoint—being the fact that the Elitch-Long concern was conducting an enormous floral business, and that their products were being admired by an appreciative public. The real advertising value of such impressions, as all dealers know, was inestimable. It was in every sense a clever business stroke and proves that any business of relative magnitude may be stimulated by an original idea along the lines of judicious advertising.

**HOLYOKE, MASS.**—George H. Sinclair has purchased the Collins farm in Smith's Ferry, comprising 41 acres.

**THE CARNATION.****Planting Out and Spring Work.**

With the beginning of May, the young stock is in its place in the field, and one period of great activity to the grower will have passed into history. But the history of the present season will include the fact that winter seems to have lingered in the lap of spring for a much longer time than usual for with snow on Palm Sunday, snow flurries on Easter Sunday, and frosty nights continued through the first week of May, there is but little time left for real spring weather before summer is due. These conditions will, however, have but little effect on the young carnations, provided that they have been given rational treatment in the houses in preparation for planting outdoors, this treatment including full sunshine and abundance of fresh air, both day and night, thus ensuring a stocky and short-jointed growth with a vigorous root system, and in brief, such a healthy, vigorous young plant as is absolutely required as a foundation for the flowering stock of next winter. It is but a short period in which these young plants are grown on, and this makes it the more necessary that one should have an early start in propagating, for the early rooted stock gives an opportunity for early topping, and by this means well-branched young plants are prepared by the time the weather permits of their being planted in the field.

will do much for the betterment of the crop. Then if the beds are laid out in convenient widths so that cultivating, or hoeing and weeding, and also topping may be done easily, much will be gained in the general result. The main thing about these simple operations of culture is to do them at the right time, that is, to hoe or cultivate often enough to keep the surface of the soil loose, to dispose of all weeds before they have a chance to crowd the plants or to rob them of moisture and nourishment, and to go over the beds as frequently as may be needed for topping. It is also a good practice to keep down either grass or weeds surrounding the carnation field, from the fact that on the surrounding vegetation is frequently developed a crop of insects that may attack the young carnations, this danger being especially present during dry seasons, when many weeds become infested with red spider and thrips. If one plants out clean stock, and keeps it free from infection so far as possible in the field, there is much less chance of having a long fight in the autumn to rid the plants of insects after the carnations are housed.

There is also needed frequent attention in the houses at this season, for there are several weeks more work before the old plants yet, and many flowers should yet be cut for Memorial day and the June weddings before the season ends. This means that plenty of water will be needed to keep the plants in a growing condition, for the beds are now, or should be, a mass of active roots, and the combination of

**CARNATIONS AT N. GREIVELDING'S, MERRILL, WIS.**

The Soil without Change Has Grown Carnations for Five Years.

That the ground should be well prepared for the reception of the young carnation plants has been so frequently mentioned that it would seem that everyone should know it, but for the benefit of the inexperienced, and it is for their benefit that these notes are written, it may be repeated that moderate manuring, preferably the season before the ground is to be used for carnations, then deep plowing, followed by thorough harrowing and pulverizing

sun and wind that is frequent at this season evaporates quantities of water every day. Any bare borders should be promptly given a mulching of old manure, to save them from drying out quite so rapidly, and a light shading syringed upon the glass will help greatly in keeping down the temperature on bright days, and also in saving or improving the color of the flowers. The majority of shades of pink and cerise fade more or less under the direct rays

THE ELITCH-LONG FLOWER SHOW, DENVER, COLO. APRIL 9, 1911.

Mrs. Mary Elitch-Long in the Aisle.

of the sun, and even scarlets become dull under the same influence, while all are likely to lose in size when exposed to the summer sun, and therefore a little shading is to be commended, but at the same time keeping in mind the fact that too heavy a shade will make both growth and flowers soft.

Syringing in order to dislodge those colonies of red spider that are liable to get a foothold among the thicket of growth at the base of the plants will be in order once or twice a week at this season, while spraying with nicotine solution will still be required to avoid injury to the crop by either thrips or aphids. Buds form with great rapidity at this season and disbudding must be attended to frequently, thus providing a useful occupation for the grower's spare hours, if he has any.

W. H. TAPLIN.

#### Growing Carnations in Old Soil.

The continual expense entailed upon a greenhouse establishment in renewing the soil every year is a great factor in the financial part of the business, and we frequently hear of those who are successfully growing their crops in soil that has remained in the houses for a number of years. Understanding that W. Greivelding of Merrill, Wis., was producing a first class quality of bloom in beds the soil of which had not been renewed for five years, he has furnished us with the methods of cultivation which he has adopted as well as an illustration of the carnations as they are seen growing in his houses.

The plants are grown in beds with sides 12 inches high and in order to

supply drainage, under some of the beds a ditch was dug which was filled with stone, but as the under-soil seems to drain the water well enough no difference was noted between these and the beds which were not so prepared. After the carnation plants are thrown out about July 1 the beds are cleared of all rubbish and then spaded over and left rough, just as the spading leaves it, for 10 days to dry out, when it is again spaded and allowed to stand another 10 days. It is then smoothed over and well watered, and as soon as it can be worked, an inch and a half or two inches of manure is spread and again spaded that the manure may be well mixed in, after which it is ready for planting. Mr. Greivelding uses no liquid manure but the plants are mulched with lime, hardwood ashes, sheep manure, bone, dried blood and a little sulphate of potash in rotation, beginning in February and given the mulch every two weeks, and sometimes in spring all the different fertilizers are incorporated in one mulch. That the plants do not take up all the fertilizers given is shown by the growth in the older beds, some of which have soil that has not been renewed for five years, for the plants in these beds are doing better than in the others which were started two years later. The first year the bed sometimes shows a green scum that comes upon the surface and a little of this will also appear the second year, but after that the beds are always clean and entirely clear of it. There are about 5,000 plants in the houses and as seen in the illustration have made a fine growth and are producing good flow-

ers. The following varieties are grown: Mayday, Mrs. C. W. Ward, Dorothy Gordon, Alma Ward, White Perfection, Enchantress, White Enchantress, Rose Pink Enchantress, Victory, O. P. Bassett and J. Whitcomb Riley and all are doing well except the last two. Chrysanthemums are also grown in the soil that has not been renewed for five years.

Mr. Greivelding is a native of the Grand Duchy of Luxembourg and came to America in 1892, going to La Crosse, Wis., and entered the employ of the Salzer Seed Co., where he worked for seven months and then started for himself at Sparta. Here he remained for five years and selling his place, moved to Merrill and built two houses. Three years later this place was sold for the erection of the \$125,000 court house and he started to build the place he now occupies, which contains about 12,000 square feet of glass, with the material on hand to build more. He is enthusiastic on carnation culture and has a number of very fine seedlings, one of which is an oddity in that it has a double calyx which cannot possibly split. This by cross-fertilization he now has in three colors. The flowers which he raises are all for home use, and he has adopted a plan in growing his carnations that is at least very novel. In disbudding a bud is left on the stem two or three inches below the terminal bud and then in case the orders are for funeral work the short stem flower is picked, or, as is sometimes the case the demand slackens, the top flower is removed and another chance to make a sale of the long stemmed flower is thereby obtained.

### The Carnation.

Paper read before the Morris County Gardeners and Florists' Society by Wm. E. Tricker, at Madison, N. J., March 8, 1911.

The carnation today is the most popular flower in existence, a serious rival to even that of the rose. It is surprising when one considers their various effects and the uses they occupy. It is a flower that is practically within the income of all classes. There is hardly any purpose to which they cannot be used: the dinner table, weddings, hospitals, presentations and also when we come to shuffle off this mortal coil.

Many of us look upon the carnation as a comparative new arrival, a flower that during the past two decades has run hard and gained practically the same, or even more, recognition than the rose. Many of us are apt to forget that the carnation has been in cultivation upwards of 2,000 years. Certainly the carnation, or gilly-flower, as it was then termed, would appear insignificant beside its progeny of today. Our greatest poet, Shakespeare, speaks of the carnation in one of his poems as the "Flower of the season." We read and learn from our one or two carnation pioneers that the American carnation originated about 60 years ago on Long Island, not gaining much headway until 1890, when John McGowan introduced Lizzie McGowan; Dörner, Mme. Diaz Albertini, Wm. Scott; Hill, Edna Craig, Helen Keller and Fred Dörner. One of our most successful originators is Peter Fisher, who introduced Mrs. T. W. Lawson, which was sold for \$30,000, and following afterwards with Enchantress, the only carnation that has stood the test of time with our growers, wholesalers and retailers of the present day. When I look back 22 years when Lizzie McGowan, Albertini, William Scott and Helen Keller were grown, a two inch flower was considered the limit, and many a grower would puff out his chest if he espied one just a shade larger. It is also quite amusing when I think how in many cases we used to let three, or even more, buds develop on one stem, picking each bud short stem, and in many cases just the calyx stuck on a toothpick. We would send them to the begging wholesalers and net more than we do now for our best flowers.

Today we have varieties such as Dorothy Gordon, the Enchantress family, White Perfection, Mrs. Patten, C. W. Ward, Mrs. T. W. Lawson, Pink Delight and Harlowarden. Some do one or two varieties well, while they fail in others, therefore we have some recommending one or two varieties, and others recommending others. Then with this year's distribution we have White House, the prince of whites, and Princess Charming, the queen of pinks. Regarding Princess Charming, the improved Enchantress, we go so far as to say that Enchantress will meet its Waterloo, before many more months have passed; never splits under various conditions of weather, and certainly this past winter has been a true test. We like it so well that we shall plant all the stock we can. Both Charming and White House are good shippers and well worthy of the recommendation they have borne. These varieties are certainly an improvement on previous introductions. Of this year's batch there is also Washington,

the improved Lawson, White Wonder, Gloriosa, and while speaking here on novelties, I would just like to mention the new variety called Wodenethe. It is going to take all before it next year. Most of you have heard of it. Now, compare Lizzie McGowan with this variety, and you will form a clearer idea of the strides in 20 years. It has been claimed by authorities the greatest carnation in existence. Just think,—we have cut several flowers,—I won't say all of them—just a shade under five inches across and three inches in depth, with a strong stem three to four feet long. This variety was scored 93 points by the New York Florists' Club committee, so you may be assured of its value. I wish you all could have seen it the day it was judged.

Now, talking about varieties, etc., is not growing them, and I prefer to grow them than write or talk about them, but as you have asked me to write these few notes, I feel somewhat indebted to you all, and to those who have not had the various experiences, as a few of our worthy members have, I may state it is no sinecure to grow successfully the carnation. While we do not profess to always have a lot of first class flowers at our greenhouse, we certainly make a specialty of having the young stock in a proper condition to ship to our customers all over the world. With just a few cultural notes it is hardly necessary to go into details. As you all know, the cutting bench should be filled with clean, close sand, thereby when the cuttings root they have plenty of sand

planted into the benches. From then on is a most critical time. A wet summer will invariably cause a lot of stem rot, which can be very much checked by blowing slacked lime with a sulphur bellows in between the plants. After planting they should be kept sprayed three or four times a day until properly established, keeping plenty of ventilation on but do not allow a direct draft.

As regards supports, some people prefer the round wire supports, which are very useful in private places, but where one has many to handle it is better to use the long wire, and thread them through crossways with string. There has always been a difference as regards to what temperature carnations should be kept. I find that all white carnations will stand more heat than colored ones. The temperature should never, on any occasion, be allowed to drop below 50° at night and 60° day temperature, and whites will take five degrees more. The benches should never be allowed to dry out. By so doing when you water them, it gives too great an impetus to the plants, thereby causing a considerable number of splits. I don't believe any person ever lived who can prevent splits. It can be helped somewhat by watching closely the temperature, but one cannot rule the weather, and you will always notice after a period of dull weather you get two or three bright days and 50 per cent of the flowers split.

As regards various pests, red spider is about the worst but this cannot very well be avoided in dull weather. One

WREATH OF CARNATIONS AND ROSES.

to cling to. The old idea of gritty sand is misleading. Then they should be potted up in 24-inch pots in beds or bench, and after being sufficiently established, they should be pinched back hard, and worked along in that condition until July, at which time they are

is afraid to syringe on account of getting rust, and if he don't syringe he will get filled up with spider. A good strong application of aphine will eradicate red spider. Fumigation should be resorted to in case of aphids. I find a little tobacco powder and red pepper

the best. As regards rust, the Aphine Mfg. Co. has a new solution that eradicates rust. I am glad to say that we are seldom affected with either of the two pests.

I would just like to mention here, from a shipper's point of view, how hard it is to please everybody. A lot of growers will invariably buy the cuttings out of the sand. They have them expressed to them, and perhaps on arrival they lay around a few hours, then they are taken and potted and very often placed in a bright house with no papers over them. If people will buy rooted cuttings, they must expect a certain amount of loss. One cannot guarantee, under the best of conditions, that they will be all right after their transfer to perhaps an entirely different continent. Speaking of this reminds me, we sent orders of 3,000 carnations to W. W. Wells, in England, and they were delayed. In addition to the ordinary voyage, ten days and we had word to say they were in fine condition on arrival and not one cutting lost. We had the same report from Germany. This is very encouraging, especially when others are shipped twenty miles and the consignee loses practically all of them. My advice when buying rooted cuttings is to pot them up in moist soil and place them in a north house for a week, afterwards they can be brought out in the sunshine, and you will find that your percentage of loss is very small.

#### Mothers' Day.

The increased demand for white flowers and especially white carnations on May 14, the day selected as Mothers' day, on which to commemorate the best mother that ever lived, one's own mother, is reported from all over the country, from large cities and small towns, whether preparatory work in advertising had been done or not. Miss Anna Jarvis of Philadelphia, the originator of the day, has always advocated the wearing of white carnations, which was her mother's favorite flower, but the demand has become so large that the supply of white carnations is inadequate, and the idea has been advanced which seems to be a very good one and easily adopted, that the white carnation be worn to commemorate the departed mother and that the colored carnations be worn to honor the living mother. Miss Jarvis solicits correspondence upon the observance of the day and would no doubt be willing to adopt and advocate the wearing of colored carnations to do homage to the living mother.

The following letters conclusively show what a little enterprise and advertising will do to advance the trade and how enthusiastically the public has responded to the beautiful sentiment embodied in Mothers' day.

#### MOTHERS' DAY IN CLEVELAND.

The florists of Cleveland are just recovering from the greatest surprise they have ever experienced—Mothers' day. Some of them expected much; they all received more. The Flower Club, an organization of Cleveland florists for advertising purposes, had charge of the advertising of Mothers' day. They had banners printed to hang on express, florists' delivery wagons, etc. Banners for street cars, cards to use in the store windows, they had liner advertisements in all the papers. They had the mayor issue a Mothers'

A BOXWOOD WREATH.

day proclamation, and the result of this kind of advertising was seen Saturday and Sunday when there was not near enough stock to go around. The main call was, of course, for carnations, with white away in the lead.

THE J. M. GASSEE CO.  
AT COLUMBUS, O.

Mothers' day trade was very good. All the white carnations in town were gone by four o'clock Saturday afternoon, and everything else in white by closing time, with a lively trade in colored flowers of all kinds. Let the good day continue and also work up a Fathers' day for colored carnations.

THE LIVINGSTON SEED CO.  
ANOTHER OHIO CITY.

Bellefontaine is a beautiful city with a population of 8,238. We inserted this advertisement in the two daily papers: "Wear a White Carnation in Honor of Your Mother Next Sunday. We have made arrangements with our growers so as to have enough white carnations to supply the demand. All customers served promptly Saturday and Sunday." And we also placed cards in our store window calling attention to Mothers' day. We sold on Saturday and Sunday 1,275 carnations, the largest sale of this flower ever made in Bellefontaine, and could have sold many more.

STELZIG FLORAL CO.

In Canton, O., Mothers' day was observed in many of the churches, the pastors taking for their texts portions

of the Scriptures referring to mothers and the day was generally observed in the city. The Brown Floral Co. distributed 4,000 carnations among the churches, hospitals, jails and old ladies' home on Saturday afternoon. In the hospitals the patients' rooms were decorated with these and in the churches they were presented to the mothers present.

The florists of Des Moines boomed Mothers' day by advertising in the city papers. The Iowa Seed Co. has a large advertisement with a cut of both white and colored carnations and the matter descriptive of the observance of the day. The Guthrie-Lorenz Co. and the Des Moines Seed Co. both inserted advertisements. All three suggested 'a white flower for mothers' memory, a bright flower for mothers living.'

Mothers' day trade in Grand Forks, N. D., was much larger than ever before, says E. O. Lovell. The supply of carnations did not begin to meet the demand, and other flowers were much in evidence, especially roses.

From Cheyenne, Wyo., C. H. Garwood writes that Mothers' day was well observed there. Seven of the churches bought flowers to give away as has been their custom each year in the past.

Penn the Florist, of Boston, placed a large advertisement in the daily papers with a cut of the mother and suggesting 'white flowers if mother has passed away; bright flowers if mother is still in the home.'

THE National Flower Show guarantors received checks last week in full payment of their contributions to the guarantee fund.

REPORTS from many sections indicate that Mothers' day has become a popular institution and an important factor in the flower business.

## Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue, as otherwise they may miss some of this high-grade work.

## New York Horticultural Society.

There will be an exhibition held by the New York Horticultural Society in the Museum building, New York Botanical Gardens, Bronx Park, New York, May 10-11. Premiums are offered for flowers of herbaceous plants, shrubs and trees, tulips, narcissus, gladiolus, campanulas, and wild flowers, and for plants of pelargoniums and campanulas. A premium list may be secured by addressing the secretary, Geo. V. Nash, Bronx Park, New York.

## National Council of Horticulture.

The sixth installment of the press service of the National Council of Horticulture includes "Vegetable Garden Hints," "Watering Plants," "Chrysanthemums Out-of-doors" and "How to Grow Asters." These articles are furnished, free of charge, by James E. Burdett, secretary, 1620 E. One Hundred and Fourth place, Chicago, to editors and the press. Florists and seedsmen should see that their local papers obtain and publish them, for they promote an interest in horticulture.

## Is the Hyacinth Poisonous?

A sharp controversy, in which the flower-loving public has become interested, was started by the publication, on April 16, in the Boston Journal, of the statement that City Forester J. Henry Sullivan of Boston had condemned the hyacinth as being poisonous and had stated that the plant tainted the surrounding soil. This assertion Mr. Sullivan now denies but it has caused the writing of articles and discussions upon this beautiful plant and its characteristics, some stating that the plant has poisonous properties while others as boldly assert that the bulbs can be handled without any danger, and that there is no chance of tainting the soil. Great care should be taken to set the public right in matters of this kind, for these erroneous statements often work injury to the business, and the hyacinth is one of our most beautiful spring flowers, a great attraction in our spring bedding, and very popular as a forced winter bulb.

## Live Issues.

From this on our rose-growing scribes will have to alter their modes of writing. Wallace R. Pierson in his essay before the American Rose Society at Boston laid stress on getting soil from low land, that had been covered some time with water. How things do change. We had been taught that soil from high land was the only safe soil, and that soil from lowland was a breeder of eel worms. We all know that the richest soil is that taken from land at the lowest point, as the rain and melted snow carries down the most of that which is put on the upland, which the lowland holds. Of course, Mr. Pierson referred to grafted stock.

The most of us remember the interesting letters of J. N. May and Robert Simpson in THE AMERICAN FLORIST some years ago on grafted versus own root roses. Those two giants wrote mighty interesting letters. Mr. Simpson, who gave us the art of the present day grafting system, is good for many years yet, and by the looks of Mr. May at the Boston Show he is one of the young old-timers. Since the Killarney

craze there are some growers going back to own roots plants. They claim they can get more blooms to the plant with better stems and longer flowers, but if grafted stock can be grown with such quality as shown by A. N. Pierson Co., of Cromwell, by all means plant it.

An editorial in Power, April 25, is interesting. In part it says: "In the production of power the cost of the fuel is in most cases the largest single item in the expense account, and any percentage of reduction in this means more than an equivalent made in any other way. There is more attention, intelligent and otherwise, being given to the boiler room of the modern power plant today than to any other one department. It, however, seems strange that men who use good business judgment in every other department of their business are so indifferent to the results obtained in the burning of fuel." The latter statement very aptly fits the average florist. I believe more coal is wasted in the florists' places in the production of steam than in any other business. As one big grower remarked to me last winter, "I am burning more coal than I ought, but I don't see where the leak is." That is about the average answer one can get. Mac.

## American Gladiolus Society.

**Good Assortment of Roses in lots of 500 at the rate of \$40.00 per 1000.**

## BASSETT & WASHBURN,

**Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Illinois.**

An attempted swindle upon one of the wholesale houses shows that something should be done to protect the dealers. An order was received by Zech & Mann for about \$100 worth of stock from a party in a distant city. Not knowing the customer and being somewhat suspicious, Mr. Zech shipped but a portion of the order, about \$30 worth, being forwarded C. O. D. Upon arrival the express agent telegraphed that the shipment was refused, and Mr. Zech then ordered the goods returned, resulting in an almost total loss. The purchaser evidently supposed that Zech & Mann would order the goods sold by the express company and then buy them in at his own price. This is an old but clever trick and the party should be shown up and the dealers protected from such a swindler.

Bassett & Washburn enjoyed a brisk Mothers' day trade, their large cut of carnations being sold at an early hour. The plants at the greenhouses are in splendid condition, with the Killarney roses just coming into crop. Mr. Washburn was greatly pleased to receive this week a check from the managers of the National Flower Show for the guarantee advanced by the firm.

The Chicago Carnation Co. is filling a large number of orders for a fancy grade of gladioli, carnations and sweet peas. Manager Pyfer has secured the services of three crack bowlers to represent his firm during the summer season of the Florist Club bowling league.

The Batavia Greenhouse Co. is doing a good business at their store at 30 East Randolph street, of which O. Johnson is the manager. H. Wenberg, the junior member of this concern, looks after the growing end of the business.

Dwight L. Harris, vice-president and general manager of the Pulverized

## ORCHIDS

**::A Specialty::**

A fine stock of Cattleyas, Gardenias, Dendrobiums, Assorted Orchids, Valley, Violets, Beauties, and all fancy flowers always on hand. Decorative stock and supplies of all kinds.

**Send for Price List.**

**162 N. Wabash Avenue,  
CHICAGO.**

*Mention the American Florist when writing*

Manure Co., says that May has been a banner month with them this year. The sales up to May 15 have already exceeded those of the entire month of May in 1910.

Wm. Graft left on May 11 for Columbus, O., after a few days' stay in the city. In anticipation of a brisk Mothers' day trade, he placed orders with several of the local wholesale houses for 10,000 carnations.

Hoerber Bros. are again in full crop for the holiday and are cutting heavily in roses and carnations. A splendid

grade of "Butterfly" sweet peas has been a leader here this week.

The Geo. M. Garland Co. will furnish the iron work for a new house that Nic. Zweifel, the well known grower of North Milwaukee, Wis., will erect this season.

Wm. Scrogs of the Madison Floral Co., corner of Madison and Clark streets, returned Thursday, May 11, from St. Joseph, Mo.

E. H. Hunt's hustling traveling representative, A. L. Longren, returned recently from a very successful trip.

# GOOD STOCK

And Plenty of It

## FOR DECORATION DAY

In all our long experience we have never had our stock in better condition for Memorial Day than this year. The whole of our great plant, comprising over 2,000,000 square feet of glass, is in full crop with the best of **Beauties, Carnations and Roses.** No other firm has the same facilities for growth and shipment. Send your orders to the

## Largest Rose Growers in the World

And be sure of stock for this important date.

Send to us, now, for Decoration Day, at any time—advance orders or rush orders—and you will get the stock you want if it is to be had in Chicago. For years we've had the reputation of filling orders when others fail.

## KENNICOTT BROS. CO., 165 N. Wabash Ave., CHICAGO

B. J. Maynard, formerly eastern representative for the Geo. M. Garland Co., is now making his headquarters at the main office in Des Plaines where the firm's factory is located. His family is making their home here, having recently moved from Cleveland, O.

John Kruchten is supplying his customers with an exceptionally fine grade of "Butterfly" sweet peas and Killarney roses. He is looking forward to a brisk Memorial day trade and has arranged to handle large consignments of white and pink peonies.

Several parties have been looking over the Chicago Rose Co.'s greenhouses at Libertyville with an intention of purchasing, but as yet no sale has been made. The proprietor on account of ill health is offering the place for sale at a sacrifice.

Paul Blome & Co., the North Clark street florists, had an unusually busy

day May 13. A beautifully arranged casket cover of white roses and lavender sweet peas was delivered on that day to the Harper residence on the north side.

H. C. Blewitt has finally decided to build and has placed an order with the Geo. M. Garland Co. for an iron frame house 34x150 feet. The new house will be devoted to the growing of sweet peas, Mr. Blewitt's specialty.

Frank Felke of Wilmette is shipping some splendid "Butterfly" sweet peas into this market. Mr. Felke has had a good call for bedding plants lately and filled many orders for salvias, alysums and geraniums.

Frank Ayers, the popular young store man at Chas. W. McKellar's, is planning on making a cruise from here to Canadian waters. The trip will be made in the staunch and speedy gasoline launch, Nan.

Nic Miller had the misfortune of dislocating his shoulder Saturday, May 13. He fell off a step ladder while making repairs at his home in Wilmette.

Frederick Pollworth, representing the C. C. Pollworth Co., of Milwaukee, Wis., has been drumming up the box trade among the local florists.

Weiland & Risch evidently know how to grow Killarney roses, for a large supply can be seen at the store in almost perfect condition.

Mrs. Wm. F. Schofield, who has been seriously ill at the Passavant hospital, is improving and an early recovery is hoped for.

John J. Burke, formerly of St. Louis, and G. C. Stanger of Pittsburg, are now in the employ of the Alpha Floral Co.

H. E. Smith, with Frank B. Smith's Sons of Danville, Ill., was a welcome visitor this week.

# J. B. Deamud Co.

Wholesale Florists, Long Distance 'Phone, 160 N. Wabash Ave., CHICAGO.  
Central 3155.

# High Grade Stock for Decoration Day

Our specials this week are **Peonies, Gladioli, Carnations, Valley, Sweet Peas** and **Roses**, in the latter we have all grades, medium, long and short, but are especially strong on the short which are so well adapted to Decoration Day purposes. When placing your order for cut flowers do not forget to include greens, we can also fix you up on these as we have a large supply. We have all other popular stocks, so don't hesitate to order everything you want.

## Our Goods Are Right

So are our prices. But this is not all. We take the same care with the smallest order as well the largest and are prepared to fill either or both. We are filling both—and filling them right—that is why we have such a good shipping trade, and it makes no difference where our stock goes we have no complaints. Its fine quality, the care taken in packing and shipping just at the right time, insures its safe arrival and in the best possible condition. Repeat orders prove this, and while we are anxious to secure new customers, the approval of our old ones is even more appreciated. We give personal attention to all orders. Let us get better acquainted.

Vaughan & Sperry had a very busy week, the demand for stock for Mother's Day being exceedingly heavy. This firm evidently expects to do a big business in peonies for Memorial Day for they have agreed to handle 150,000 blooms of all the leading varieties.

N. J. Wietor is planning on spending his vacation this summer in the wilds of Wisconsin where the fishing is good. John Sinner will probably accompany him on the trip as these two gentlemen have been in the habit of spending their vacations together for years.

The Florists' Club bowling league did not open its summer season on May 9 as they intended owing to the absence of several of the players. The season opened, however, on Tuesday evening, May 16, with a large number of bowlers present.

### Albany, N. Y.

At the May meeting of the Albany Florists' Club one of the officers and regular supporters of the organization was not present, Patrick Hyde, the treasurer. Not all of the members present knew that Mr. Hyde was on his honeymoon, but such was the fact. He surprised his friends by getting married on April 30 in St. Augustine's Church, New York. The bride was Miss Margaret Elizabeth McAuliffe of that city. Upon their return from a short wedding trip Mr. and Mrs. Hyde will reside at 488 Hudson avenue. At the meeting a list was circulated quietly, and the rolls of long green paper collected were handed over to President F. A. Danker, who will act as a committee of one to give Mr. Hyde a pleasant surprise in behalf of the members of the club. Six applications received at the April meeting were acted upon favorably, and after a short business session the rest of the evening was passed socially. The entertainment committee, with Louis Schaefer in charge, had provided a lunch with cigars, pipes and tobacco, and the well known local comedienne, Dennis F. McCarthy, entertained the members with songs and humorous selections. An informal discussion of the annual outing was held by the officers following the meeting, and the consensus of view was that a family excursion down the river in August would be desirable. The subject will, however, be acted upon later.

### NOTES.

Although just how or just whom he displeased does not appear, announcement is made that Patrick Hyde has been dismissed from the service of the state as gardener by John Bowe, superintendent of public buildings, for neglect of duty. He was stationed at

the executive mansion. Oh, no! Hyde is not a Republican, but just a poor ordinary Democrat, who sacrificed himself as the aldermanic candidate for his party in the eighteenth ward a year ago last fall and was buried under a Republican majority of about 600 by James R. Watt, his opponent. When Bowe assumed office he appointed Hyde as gardener, but now he has taken his scalp and does not care to go into details. "Hyde certainly has been well rewarded for his services to the party," observed an indignant Democrat today.

### Cleveland.

#### STEADY MARKET.

The market is steady with stock about equal to a healthy demand. Prices are a little higher than a week ago. Carnations are becoming smaller in size, and the big crop being off at present, they have not been over abundant. Roses of all kinds have been plentiful, with the possible exception of white, in these the Kaiserin Augusta Victoria has, as yet, played no important part, but in a few weeks now they will be quite plentiful. Orchids will be on sale again at the wholesale houses beginning this week and continuing through June, and American Beauty roses will be a feature all summer. Outdoor stock is beginning to come in from all sides. Sweet peas and pansies are plentiful. Smilax is in good demand, and so is Asparagus plumosus, long sprays, which are quite plentiful. Fancy and southern dagger ferns are on the market. Baby gladioli, snapdragon, iris, daisies and Canterbury bells are part of the daily receipts. Stock for funeral work is plentiful.

### NOTES.

The Flower Club advertised Mothers' day in Cleveland with excellent results,

which most retailers appreciated. We hope, from now on, this club will have the hearty cooperation of the retail trade, as every retailer, no matter where located in the city, desires his proportion of increased sales. Memorial day is the next important flower day and the Flower Club will advertise this also.

C. F. B.

### Brampton, Ont.

Throwing out and replanting is the order of the day, and with the needs of "Mothers' day" to be catered for, all the greenhouses here are as busy as can be.

### NOTES.

An interesting case was heard at the Assize Court here this week, in which an ex-water commissioner with the assistance of a disgruntled ratepayer endeavored to bolster up a complaint against the Dale estate and the present water commissioners for alleged arrears in rates. The judge was not slow in discerning a certain modicum of spite in the affair, the ratepayer proved himself quite out of touch with the facts, and the prosecution failed lamentably in consequence.

Richard Jennings is adding considerably to his glass area, and Wm. Fendley and W. Calvert are also putting up new houses this spring, the latter having acquired another four acres of land adjoining his property, for market garden purposes.

E. H. Dale and Richard Jennings have just purchased new automobiles, and we are glad to be able to report no calamities so far.

W. G. P.

PHILADELPHIA, PA.—The Main Line Flower Show will be held at the Cricket Club Casino, May 27. Cups for competition have been offered by prominent people and cups for flowers cultivated by children under 15 years of age.

### New London, Conn.

The New London Horticultural Society was organized a year ago last winter, the preliminary steps having been undertaken by the Business Men's Association. Its purpose as stated in its constitution is: "For the mutual improvement of its members and the dissemination of horticultural knowledge by the reading and discussion of essays, the holding of exhibitions, and any other means the society may think proper to adopt for the advancement of horticulture in all its branches, and particularly for the beautifying of the city's streets, parks, and public places by horticultural agencies."

Our attempt has been to make it a universal town movement rather than an association of specialists. From the start we have had the generous support of the proprietors of a number of large summer estates and of their superintendents. We solved the problem of reaching practically everybody by holding afternoon open air meetings. Everyone was invited whether members of the society or not, and to bring flowers, the prizes being awarded to amateurs only. Florists and professional gardeners liberally assisted by contributing and arranging flowers for decoration. The first of these shows was held in the house and on the grounds of a fine company near our summer suburb. A professor from our State Agricultural College was procured to deliver a lecture, the beautiful estates adjacent were opened to the public, and a company of children, under the direction of the Playground Society, gave a May pole dance on one of the lawns. The affair was well advertised through the newspapers and by large posters, the day was perfect, the idea somewhat novel, and the result was a great success. It was a thoroughly democratic gathering, all classes being present and all supremely happy. Another equally successful gathering, with an even greater profusion of flowers was held on another estate later in the season, and in the fall a final exhibition was given in the town hall.

We have now just completed a spring interchange, the idea having been suggested at one of the meetings last year. In addition to newspaper announcements, circular letters and cards were sent out. When the returns came in, an expressman was employed to call for the donations and their delivery; these were taken to the grounds of a member and there arranged for distribution. This interchange has greatly extended acquaintance, interest and kindly feeling, so that we are anticipating a highly successful season for 1911. A notice and return postal card was sent to the

members and others to contribute to the spring interchange.

The enterprise required some money, and a lot of work particularly on the part of superintendents and gardeners, but it was most cheerfully given. They feel compensated in the success of their efforts and the appreciation of the public has gained of the dignity of their calling. We hope our experiment will be repeated in other communities. JOHN HUMPHREY, Sec'y.

### Anderson, Ind.

The monthly meeting of the State Florists' Association of Indiana was held here May 2, the visiting members being the guests of Stuart & Haugh, the well known florists of this city, who proved their ability as hosts seldom found and never forgotten. After a trip of inspection through the above place, where everything looked fine, the members, of whom there were between 40 and 50, went to the auditorium in the new Carnegie library, stopping en route to visit the greenhouses of Williams & Matthews, another enterprising floral establishment in this city.

The meeting was called to order by President Geo. Gause, of Richmond; A. F. J. Baur, secretary, and Homer Wiegand, treasurer, also being present. The usual routine of business was transacted, during which Myer Heller extended the association an invitation to hold a meeting at some future time in New Castle. Lack of time only prevented a visit to the paper box factory of the Sefton Manufacturing Co., located here, and no doubt many points of interest had to be set aside to allow time for the banquet given to the visitors at Stafford's restaurant by Stuart & Haugh. Seated at one long table, handsomely decorated with carnations and spirea, the guests enjoyed a feast that in quality and abundance is rarely if ever surpassed at an occasion of this kind. After various toasts to the good of the association, and the charming manner with which the hosts provided for all, the May meeting closed and the visitors left Anderson with many thanks to Stuart & Haugh.

Following is a partial list of those present: J. S. Stuart, J. A. E. Haugh, Ralph Meek, E. M. Hyatt, J. E. Stuart, C. H. Williams, Anderson; Geo. R. Gause, J. E. Jones, Jno. A. Evans, Joseph Hill, Richmond; F. S. Smith, Carl Leonard, Lew Elder, Wm. Johnson, E. A. Nelson, H. L. Weigand, A. Rieman, Henry Rodenbeck, R. S. Ludlow, Ed. Temperly, C. G. Pahud, H. D. Schilling, Albert G. Pittet, Herman G. Piel, A. F. J. Baur, Alfred Pahud, Fred Hukreide, Wm. Langstaff, H. W. Riegan, Mrs. Radebough, Miss Clara Barnes, Indianapolis; Myer Heller, New Castle; H. Young, Cumberland; Ira Clark, Greensburg; H. A. Maxims,

### St. Louis.

WARMER WEATHER.

The weather is considerably warmer and every one is busy planting out stock. Mothers' day was the cause of quite an advance in the price of white carnations. Cut flowers are very plentiful. American Beauty roses are in good supply but the quality is poor. Sweet peas are very plentiful and peonies are coming in. There is a large quantity of Cape jasmines and the prices are low.

### NOTES.

The Florists' Club met May 10 and in the absence of President Cannon, Frank Weber presided. The attendance was small. The committee on anniversary reported that a banquet will be held in June to celebrate the 25th anniversary of the club. F. C. Weber reported that arrangements to entertain the Association of Nurserymen were nearly completed.

The Mullanphy Floral Co. on Mothers' day advised wearing white carnations for the departed mothers and colored flowers for the living. They report the idea worked well.

The Eggeling Floral Co. have been cutting white chrysanthemums all the spring, the last being cut the past week. Their Enchantress carnations are very fine.

Many florists state that more sales would have been made on Mothers' day if the price of carnations had not been increased.

F. W. Bruenig is cutting some very fine rose pink peonies and some fancy carnations.

The Paris Floral Co. report large sales of all varieties of carnations, May 13.

W. F.

### Utica, N. Y.

President Baker was elected for the sixth term.

A resolution of condolence to the bereaved families of the teachers killed and injured in the recent wreck at Martin's Creek, N. J., was adopted and a discussion of Arbor day and Mothers' day trade was participated in by the members present. After the meeting refreshments were served.

A BACKWARD SPRING.

There has been very little change the past week in the markets, carnations are not quite so numerous, still there is enough to go around with some left over. The backward condition of the spring leads many to believe that flowers for Memorial day will be scarce. The condition in some parts of New England as regards weather is getting serious. We have had very little rain and shrubs which would have been used for Memorial day will be late on account of the great drouth. Forest fires are raging in every part of the state, and these, besides destroying valuable timber, incidentally destroy the natural watersheds. Should the dry spell continue it may lead to serious consequences. Many of the rose growers are somewhat off crop, but the quality of the flowers coming in is very good. The Richmond and Killarney from the Exeter Greenhouses, Exeter, N. H., are very fine; the Killarneys especially show high culture. The bulbous stock continues to arrive, and most of it is very fine, but there seems to be a limit to the sales of such stock and leave a margin of profit. Mothers' day was observed in Boston and surrounding towns very extensively. The retailers report a good trade and a great increase over that of last year. All of us have pleasant memories of our mother and the example set by Miss Jarvis will, we hope, increase each year so that everyone, old and young, will honor the best and truest friend they ever had. At the funeral of a prominent business man in Natick, we noted an extra fine bunch of White Killarney roses. The flowers were so perfect and so nicely arranged that we made inquiry and found that it came from Galvin's and had been sent on a telegraph order received by them from Pittsburg, Pa. There has been quite a number of deaths in and around Boston, and the quality of the flowers being used is advancing each year. Everyone is preparing and looking forward to Memorial day. Bedding stock is selling very well, there being a good demand for it, and the quality, especially of the geraniums, is very good.

NOTES.

Some of the retailers are advertising in the newspapers wreaths made of leaves and natural waxed flowers, stating they will last in good condition for two months. They are certainly attractive, but whether this is a step forward or backward we don't know, but it will be watched with interest.

Welch Bros. say that orders for Memorial day are coming in fast. Up to the present writing their orders are coming in earlier and in far greater quantities than in any year of their business.

Wm. Nicholson of Framingham will have a house of feverfew just right for Memorial day. This is a tricky crop to handle, but he has landed in luck in having it just right.

The Waban Rose Conservatories have an unusually fine grade of Killarney roses.

H. M. Robinson & Co. say business is satisfactory.

Wm. Penn has returned from the hospital.

Cincinnati.

MARKET OVERSTOCKED.

The market is long on everything; in fact even stock such as sweet peas, which at the last writing was cleaning up almost faster than it arrived, is now easily sufficient to meet all requirements. Peonies, iris and heavy cuts of outdoor lily of the valley are added to the steady supply of other stock constantly on hand. The prices for Mothers' day held up nicely until just before the close, when they broke sharply. A very large amount of blooms was used for this day. Many of the local buyers began to purchase heavily for this business on Friday. White carnations were, of course, the leader. For the past fortnight there has been a very heavy crop of roses of all kinds coming into the wholesale houses and, as a result, buyers have been able to get many bargains in this line. American Beauties were way in over-supply. More of them, especially choice ones, were offered and at lower prices than at any time this season. The summer-like weather brings in the Mrs. Tafts better every day and they are a valuable asset to the rose market. Carnations are in steady supply and are selling at about the same prices they brought before the Mothers' day boom. More Easter lilies and callas are offered than the demand requires. Last week offerings in orchids

more than met requirements. The supply of sweet peas, marguerites and the like is sufficient. Some very fine snapdragons can be had. The offerings in green goods are ample.

NOTES.

The bedding plant men are now having their inning. The season did not open until the middle of last week, when ideal summer weather came upon us suddenly. Everyone clamored for bedding stock, all at one time, and as a result the plantmen had one tremendous rush. They had to hustle some to get out their orders.

The florists who have stands in the market made a handsome cleanup on Saturday. Everything worth while in cut flowers, and a larger part of the plants taken there, were disposed of before closing. The day was eminently satisfactory to all.

Martin Alexander, representing Lion & Co., New York, was a recent visitor.

II.

## New York.

## ROSES OVER-PLentiful.

The market is still under pressure from the large supply of roses, the cut of which shows no diminution; carnations are not so plentiful in proportion. The demand for everything is light except as on Saturday there was a call for white carnations. At the same time other colors of good quality found buyers, but the better price favored white. Of the roses, American Beauty still has the preference, the small roses being much too plentiful to realize anything like a decent average. Lily of the valley meets with slow sale although the quality is finer than usual. Only the very best cuttleys are selling—inferior quality find no favor whatever. To make the situation worse, the market is weighted with out-door lilac and lily of the valley, the former is off in size and keeping qualities and is not likely to last long. Harrisii lilies are plentiful and good. Smilax and adamantum are wanted in limited quantity though asparagus cleans up well.

Alfred H. Langjahr has leased the store at 130 West Twenty-eighth street for a term of six years instead of Frederick J. Langjahr as reported in our last week's issue.

## Philadelphia.

## MOTHERS' DAY A GREAT SUCCESS.

The feature of the week was reserved for the wind-up, when the demand for white carnations for Mothers' day overshadowed everything else. Other flowers felt the increase in business and prices were a trifle firmer all around, but the white carnation was the flower and the way the prices galloped was trying to buyers. There was nothing less than \$4, \$5 and \$6 was asked for anything worth while and some of the fancy stock was sold at \$8. Everything good, bad and indifferent was cleaned up, and when the white were all gone, Enchantress entered the race and all these were soon gathered up and still the demand was not satisfied. The feature after the wonderful demand was the quality of the stock offered. About half of it was not fit for sale. It is natural for everyone to get all they can for what they have to sell, but putting out carnations that should have seen the market from a week to ten days before and charging what would have been an excessive price for the best, is nothing short of robbery. Mothers' day and the custom of wearing a white carnation or other white flower in honor of mother is a beautiful thought, but if the public are to be made to pay exorbitant prices for the flowers they will not willingly celebrate it in this manner. At the prices carnations brought in this market last week there was no money for the retailer, as 10c is a very high price for a single flower, and yet it leaves no margin over cost when the waste is considered, and when so many flowers prove worthless from being kept so long on the plants as they were this year. Some of the wise ones drew their supply from the New York market where the Mothers' day sentiment had not yet taken hold and were able to get fine flowers at a little advance over ordinary rates for the season. Aside from this feature Mothers' day was a great success, the demand being much greater than for last season. Now is the time when the trade should get together and give Miss Jarvis a helping hand. The feature of flowers for Mother's grave should be encouraged. Think of the great amount of business this would bring if this feature was only observed by a comparative few of those who were able to order flowers for this purpose. Let the growers who have been benefited by the higher prices communicate with their commission men and let these

latter get together and help encourage and spread the gospel of Mothers' day. A slight move was made in this city when a few of the wide-awake men interested themselves in getting out a window card. Some three thousand of these were printed and distributed in this and surrounding cities and towns where they were placed in windows and other public places and no doubt helped considerably to make a better and larger observance of the day. Preparations are now on for Memorial day; immortelle designs and wreaths of all kinds are being made up so as to be ready for the last day. While the season has been considered late, peonies are seen in bud and it is thought that these and other outside flowers will be found in abundance in good time for May 30.

## NOTES.

Charles Trepel, who has jumped into fame as a large buyer for his departments in Loeser's, Gimbel's and Bloomingdale's department stores in New York and Brooklyn, is said to be making arrangements to open a department in Gimbel's in this city. He is reported to have done a business last Easter in the three stores in Greater New York of over \$75,000. Such a buyer in this market will stir things up a bit and if the other stores take it up in anything like the same spirit there will have to be more retail buyers discovered or some stores will go out of business.

Stewart Miller, of the Reid force, who has been down with pleuro-pneumonia, is, we are glad to say, now better and on the road to recovery. K.

## Buffalo.

## FINE, SPRING WEATHER.

Seasonable weather with rains that came in the night and each morning bright and cheerful has been our good luck the past week. The plantsman, the landscape gardener and the most important to the general florist, the man with the small lawn that wants it to look good and also the little flowerbed in the rear of his property, has had every opportunity to do his work. So Buffalo has been very favorably looked out for and all are satisfied. The past week has been quite active with a plentiful supply of stock. Spring flowers are in profusion, also in great demand. Society was quite active the past week with wedding receptions and conventions. The latter being in the majority, especially in the schools and academies, which had several conventions last week. The graduate and the prospective were both lavish in floral decorations. One wedding the past week was in many respects original for its design and the arrangement of the flowers, and in which the florist had his own way. Pink was the predominating color and the artistic arrangement of the Killarney roses, which were almost exclusively used, was very attractive. Stafford was the florist. The bride's bouquet was an entirely new arrangement as to shape, being made up of lily of the valley and orchids with a shower of the small white orchid but entirely different from the usual bouquet. It was arranged by Anderson.

## NOTES.

Palmer, Anderson & Stroh have had very attractive windows the past week.

The new board of officers of the Florists' Club are certainly negligent, if I must say so, in getting the club together. From March 8 until May 15 is rather long and to say the least the new officers are giving everyone the opportunity to say that they lack the hustle that their predecessors of the past three years have had. Wake up, boys; summer will soon be here.

Buffalo has lost one, Rochester has gained one, that is, in population. George Kramer, who has been with S. A. Anderson for the past three months, has returned to Rochester. We will miss him but we can see his "Bark" if we cannot hear him. His time in Buffalo, we hope, was as pleasant to him as it was to us. George, look out for the contingent that may come to Conesus Lake this summer. EISON.

## Nassau County Horticultural Society.

The regular monthly meeting of the above society was held in Pembroke hall May 10, President Trepess occupying the chair and there was a good attendance. Messrs. Holloway, Gray and Robinson were appointed judges and their decisions were as follows: For the society's prize, outdoor flowering shrub, A. McKenzie first with Persica Sanguinea; Lettuce, J. W. Everett, first; certificates of culture were awarded to J. McDonald for exhibition vase of sweet peas and J. W. Everett for cucumbers and asparagus. Stump & Walter prize for six varieties of tulips, six of each, A. McKenzie, first; E. Westlake, second. The schedule for the show on the night of the June meeting was read and approved and Messrs. Duthie, Johnstone and Marshall were appointed judges for that night.

The question box was found to contain quite a few questions which were answered very satisfactorily. S. Trepess exhibited some pieces of peach grafted on plum wood for the members to examine and decide as to whether the two were united or not, as it is claimed they will not unite properly, various comments were made but it was hard to say definitely whether they had or not and not show where the graft had been made. H. Cliffe, superintendent of "Mandon," gave a very interesting talk on "The Cultivation of Grapes Under Glass," for which he was very heartily thanked.

E. WESTLAKE, Sec'y.

DAYTON, O.—At a meeting of the Florists' Club held May 1 at the J. F. Young establishment H. H. Ritter, the retiring president, was presented with a cane and made acknowledgment of the neat gift.

Don't forget that we are the growers and shippers of Ipomoea Noctiflora, the pure white Moonvine with flowers as big as saucers, very fragrant and the earliest Moonvine in existence, for which we have a world-wide reputation for the past twenty-five years; grows 50 feet and over in one season; over 25,000 are shipped every spring all over America south, north, west and east, Mexico and Cuba; 2½ in. pots. \$5.00 per 100; 3 in. \$8.00 per 100; 4 in. \$12.00 per 100.

25 to 100 rates.

Cash with order, please.

All plants must travel at purchaser's risk.

# GODFREY ASCHMANN,

Wholesale Grower and Importer of Fotted Plants.

1012 W. Ontario St., PHILADELPHIA, PA.

THE LEEDLE FLORAL COMPANY  
SPRINGFIELD, OHIO

# Dreer's High Grade Hardy Perennial Phloxes

These are not dug from the field, but are one-year-old, field-grown plants which were dug early in the season, cut back, potted up into three-inch pots, and are now well established, with a good ball of soil, and will give a wealth of bloom this season.

## STANDARD COLLECTION OF CHOICE HARDY PHLOX

Price for any of the varieties listed below, \$5.00 per 100, \$40.00 per 1000.

HARDY PHLOX, MRS. JENKINS.

**La Mahdi** (Tall.) Deep reddish-violet, with darker eye.  
**Louise Abheima** (Dwarf.) Very large dwarf, pure white, of fine form.  
**Mme. Paul Dutrie** (Tall.) A delicate lilac rose, reminding one of some of the beautiful soft pink Orchids.  
**Mozart** (Tall.) Ground color white, suffused salmon; aniline-red eye.  
**Mrs. Jenkins** (Tall.) The best tall early white for massing.  
**Obergartner Wittig** (Medium.) Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.  
**Pantheon** (Tall.) Bright carmine rose.  
**Prosper Heuri** (Dwarf.) Pure white, with large decided eye of rosy magenta.  
**Pacha** (Dwarf.) Deep rose pink, suffused with sofferino-red and carmine-purple eye.  
**R. P. Struthers** (Tall.) Rosy carmine, with claret-red eye, fine.  
**Sunshine** (Dwarf.) Large, aniline-red with crimson-red eye and light halo.  
**Selma** (Tall.) Large flower, pale rose mauve, with claret-red eye.  
**Siebold** (Tall.) Bright vermilion-red, overlaid with orange scarlet; crimson-red eye.

**Albion** (Medium.) One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.  
**Antonia Mercie** (Medium.) Light ground color, upper half of petal deeply suffused bluish blue; large white halo.  
**Bacchante** (Tall.) Tyrian rose with crimson-carmine eye.  
**Bernanger** (Dwarf.) Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.  
**Bridesmaid** (Tall.) White, with large crimson-carmine centre.  
**Belle Alliance** (Medium.) White, with large pure red eye.  
**Clara Benz** (Dwarf.) Lovely carmine rose, with darker eye.  
**Colibri** (Tall.) White, with crimson-carmine centre; very late.  
**Consul H. Trost** (Medium.) Pure red, with bright French-purple eye.  
**Champs Elysees** (Dwarf.) A very bright rosy magenta.  
**Caran d'Ache** (Medium.) Geranium-red, with old rose shadings and white eye; very effective.  
**De Miribel** (Medium.) White, suffused with bright rosy scarlet, red eye.  
**Edmond Rostand** (Medium.) Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.  
**Eugene Danzavillier** (Tall.) Lilac, shading white towards the edges; large white centre.  
**Edmond Boissier** (Dwarf.) Bright reddish-violet, with large white halo.  
**Eclairer** (Tall.) Brilliant rosy magenta, with large lighter halo.  
**General Giovaninelli** (Dwarf.) Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.  
**General von Heutz** (Medium.) Scarlet, with rose shadings and crimson-red eye.  
**Hermine** (Dwarf.) The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.  
**Helena Vaccresco** (Dwarf.) Very large-flowering dwarf, white.  
**H. O. Wijers** (Tall.) White, with bright crimson-carmine eye.  
**Henry Murger** (Tall.) White, crimson-carmine centre.  
**Henry Marcel** (Medium.) Pure red, with bright salmon shading.  
**Henry Boyer** (Medium.) Tyrian rose, with lighter shadings.  
**Jules Cambon** (Medium.) Brilliant reddish-purple, with exceptionally large, pure white centre.  
**Jeanne d'Arc** (Tall.) A good standard late white.  
**Louis Blanc** (Tall.) Reddish-violet, with purple shadings and darker eye.  
**La Vague** (Medium.) Pure mauve, with aniline-red eye.

**Sarabande** (Medium.) Reddish-violet, with lighter shadings.  
**Von Goethe** (Tall.) Tyrian rose, suffused with carmine lake and carmine-red eye.  
**Von Hochberg** (Tall.) The ideal crimson Phlox.  
**Vesuvius** (Medium.) One of our own seedlings; pure red with bright purple eye; a dazzling color.  
**Von Lassburg** (Medium.) The purest white in cultivation, individual flowers larger than any other white.

## THREE FINE NEW HARDY PHLOX

Price of the New Varieties:

\$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

**Elizabeth Campbell.** Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.  
**Frau Anton Buchner.** The finest white variety yet introduced, having the largest truss and individual flower, of dwarf habit.  
**Rosenberg.** Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

# Saves Your Printed Matter and Postage.

**T**HE American Florist Company's Directory saves many times its price to every one who catalogues or circularizes even a small part of the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor. Contains 570 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

## The Seed Trade.

### American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.  
Annual convention, Hotel Rock mere, Marblehead, Mass. June 20-22, 1911.

NEW YORK.—Chas. Loechner has taken Oscar Haase into partnership, and under the style of Loechner & Co. will do a general import and export business at 11 Warren street.

CINCINNATI, OHIO.—J. Chas. McCullough reports the best season for some years. He deposes the shipment of large lots of low grade (Buffalo) mixed grass seed into the Cincinnati market.

WISCONSIN pea growers have in their usual acreage. They are working back west from Lake Michigan, away from the Sturgeon Bay section, there being too many "farmer stocks" abroad in that locality.

It is stated at New York that freight rates between Japanese and American ports have been advanced 10 cents per hundred pounds. The steamship commissioners at the Japanese ports have appointed a sworn official to weigh and record all cases of bulbs leaving there.

VISITED CHICAGO: Jesse E. Northrup and daughter, Minneapolis, Minn., returning from Atlantic City, N. J.; John J. Van Waveren, representing L. Van Waveren & Co., Hillegom, Holland; Frank H. Henry, of Henry & Lee, New York, en route to the Pacific coast; G. C. Eldering, of W. J. Eldering & Son, Overveen, Holland.

A NEW and important feature of the programme of the American Seed Trade Association at the next annual meeting, to be held at Marblehead, Mass., June 20-22, will be telegraphic crop reports from all of the seed-growing sections of the United States. These reports will be strictly private and confidential to members of the association.

CHICAGO.—Prices on the board of trade May 17, for grass seed were noted as follows: Timothy, \$10.50 to \$12 per 100 pounds; white clover, from \$22 to \$30.—Department stores of this city are pushing low-grade mixed lawn grass seed; four cars of the Buffalo low-grade lawn seed are said to have been placed on this market, much in 10-cent stores.

### Standards of Germination and Purity.

As a guide in determining whether the germination is good or poor the United States Department of Agriculture has compiled a table of standards, showing what percentage of the different seeds should grow. These figures are, for the principal farm seeds: Bluegrass 45-50 per cent, celery 60-65, alsike and white clover 75-80, onion 80-85, alfalfa, crimson and red clover, sweet corn, meadow fescue, millet, timothy, and tomato 85-90, barley, beans, buckwheat, cabbage, field corn, oats, and wheat 90-95, peas 93-98, and beet, because of multiple seeds in a seed ball, 150. As to purity: Bluegrass may show 10 per cent of foreign material and still be considered a good sample, alsike and white clover 5 per cent, alfalfa, celery, crimson clover, timothy and tomato 2 per cent, but all others on the above list are below standard if they show more than 1 per cent of other seeds or refuse.—Geneva (N. Y.) Exp. Stn. Bulletin.

### Hyacinths for Forcing.

Hyacinths for forcing are not a natural product as many suppose. The bulbs of certain varieties are given special treatment to insure early flowering. The bulbs are dug about two weeks before they are ripe and placed in a room which is heated by steam to a temperature of 70°, Fahrenheit, where they remain three weeks and are then moved to a cooler room. When the bulbs are brought inside, the new flowering buds have set and the application of heat continues the development of the buds, bringing them to a point from which they readily develop flowering specimens. It is of great importance that the prepared bulbs are planted or potted early, at least before October, if required to bloom at Christmas.

All varieties of hyacinths are not adapted to this preparatory treatment and in those that are suitable bulbs 16-18 centimeters in circumference give the best results. This is the size of the bulbs after they have gone through the heating process, when they are at least two centimeters smaller than before they were subjected to the heat, being good sized bulbs at the outset.

The varieties which give best results under this treatment are L'Innocence, single white, General Pellissier, single red, and Potgieter, light blue. Grand Maitre, single blue, and Gertrude, single rose, have not been a

success as prepared bulbs thus far, but with further experiments the growers may produce bulbs of these and other varieties suitable for early forcing.

### American Seed Trade Association.

The annual convention of the American Seed Trade Association will be held at Marblehead, Mass., June 20-22, 1911. The Hotel Rock-mere has been selected as headquarters. This is one of the best hotels on the famous north shore of Massachusetts, occupying a beautiful location which commands a view of one of the finest and most interesting harbors on the Atlantic coast. On one side of the deep waters and bold rocky coast of this harbor are the beautiful summer homes; and on the other the old colonial fort, and the old town of Marblehead with its ancient churches, its hip-roofed houses with brass door knockers and little old fashioned gardens; its winding, twisting streets, and its ancient and historic landmarks, making it one of the most interesting places on the New England coast. This makes a vivid and contrasting picture of the old and the new, and nearly every room in the Rock-mere commands this beautiful view. Marblehead is only 17 miles from Boston and trains leave the North station every hour. Tickets can be purchased direct to Marblehead and baggage checked through.

It is thought by some of the officers of the association that this, the twenty-ninth annual convention, will be the largest ever held. Extra efforts are being made for an unusually good programme, and there will be plenty of amusement, with special entertainment provided for the ladies.

E. L. PAGE, President.

### A Colored Freesia.

C. Van Tubergen, Haarlem, sends us flowers of a variety of Freesia which he calls Conquest, and which he describes as the best he has raised up to the present. The plants grow tall and strong, are wonderfully free-flowing, and the flowers have a white tube with magenta-colored segments or lip. The color is more pronounced than in any freesia we have seen. This variety has been obtained by intercrossing the best of what are known as the Tubergeni freesias.—Gardeners' Chronicle.

THE seed business in the west continues brisk notwithstanding the hot weather.

SALT LAKE CITY, UTAH.—Horace Cheesman of Vaughan's Seed Store, Chicago, is calling on the trade here.

FORMOSA lily bulbs, it is said, will be harvested somewhat earlier than usual this season, Japanese buyers and dealers starting May 15 for the island region in which they are produced.

FRANK H. HENRY and wife and daughter, of New York, left Chicago May 16 for San Francisco, where they will meet Robt. Fulton, of L. Boehmer & Co., Yokohama, Japan, who has been recuperating at a sanitarium in the mountains near San Diego. If Mr. Fulton's health does not permit him to make the regular trip to Japan at this time, Mr. Henry will go in his place, sailing May 24.

## THE BOOK OF GLADIOLUS

The first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating, storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, \$1.25.

440 So. Dearborn St.  
CHICAGO.

## SEVEN TOP TURNIP

Originally introduced by us from South Carolina in 1850 and annually grown for over sixty years under the zero winter temperature of Bloomsdale Farms, the **Landreth's strain of Seven Top** has obtained by this northern culture, a hardiness not approached by southern-grown seed. All inferences would point that way, while thousands of experiments have conclusively proven it beyond a shadow of doubt; consequently one pound of **Landreth's Seven Top** will, in the dead of winter produce more greens than can be cut from three times the more delicate southern-grown Seven Top.

Write us how much you want, and we will name you a price.

## Lilium Harrisii

**T**HERE are conditions, and they occur not infrequently, under which all lily bulbs fail to make good flowering plants. There may be, probably are more difficulties attending the growing of *Lilium Harrisii* bulbs than most forcing varieties and yet those who do them well have found the early blooms very profitable. In many parts of the south where this bulb has been grown over a longer season and without the overforcing sometimes imposed on the plants, *Harrisii* has given most satisfactory returns. We are contracting subject to crop conditions a select strain of

S. W. Severance, 539 Illinois Life Building,  
Louisville, Ky., Secretary; M. L. Rustenik,  
Cleveland, O., Treasurer.  
Annual meeting at Boston, Mass., 1911.

### Prices of Indoor Fruits and Vegetables.

New York, May 13.—Mushrooms, 45 cents per pound; cucumbers, 60 cents to \$1.50 per doz.; tomatoes, 10 to 20 cents per pound; grapes, \$2 per pound; lettuce, \$1.25 to \$1.75 per strap.

Chicago, May 15.—Mushrooms, 20 cents per pound; cucumbers, \$1.00 to \$1.75 for two dozen; lettuce, 25 cents per pound; radishes, 40 cents to 50 cents per dozen bunches.

### Pruning and Training Tomatoes

In the growing of early tomatoes at the Illinois Agricultural Experiment Station the influence of pruning and training upon the early ripening and yield were studied carefully in the experiments, the following methods being employed: pruned to single stems and topped after setting three clusters of fruit, pruned to single stems not topped, pruned to single stems early in the season and then allowed to branch, pruned to two stems, pruned to three stems, tied to stakes not pruned, neither staked nor pruned. The plants pruned to single stems sometimes ripened their first specimen earlier than unpruned plants, but in other cases the reverse was true, but in every instance the plants pruned to single stems produced low yields much lower than those from plants less severely pruned or left unpruned. The proportion of the crop which was marketable was much greater from the plants which were staked than from those unstaked, owing to the rotting of the fruit in contact with the ground in wet weather, and the injury by sunburning of the fruits unprotected by the foliage in hot weather, but the loss from these causes varies according to the differences from rainfall and the intensity of heat.

Pruning is often recommended as a means of increasing the size of tomatoes, but this was found to have but little effect upon the size of the fruit, and in only one case did the plants pruned to single stems produce the largest fruit, but pruning to single stems reduced the foliage to such an extent that the fruit was badly exposed and sunburning and cracking of the fruit followed. Whether or not tomatoes should be staked and tied or lie naturally upon the ground seems to depend upon local conditions. In localities where tomatoes are subject to rot and sun-scall it is a decided advantage to have them upon stakes, and another factor is the difference in cost of the stakes in different localities.

JOPLIN, Mo.—The park board has distributed about 1,500 trees to its citizens and the erection of a greenhouse is contemplated by the board for the raising of plants and small shrubbery.

EL PASO, TEX.—J. B. Watson has induced the Connell farm to plant four acres to peonies, sweet peas, Shasta daisies and other flowers and will have these products for sale at his store.

### Davenport, Ia.

The cut flower trade has fallen off greatly during the past week and there is plenty of everything to meet all demands. Mothers' day, May 14, created quite a demand for white flowers, and all the white flowers the growers had were ordered several days in advance, the calls from the various churches being greater this year than last. This day could be worked into a permanent thing if the florists throughout the country would encourage it while they have that opportunity. Plant business has opened with a rush and every one connected with that line is up and hustling these days. No doubt this is going to be a banner year in the plant business, if the opening rush is any indication.

### CLUB MEETING.

In spite of the fact that every florist is nearly worked to death, a goodly number turned out at the regular monthly meet which was held at the home of Henry Pauli, Davenport, and no one who attended regretted it, for a very interesting and entertaining meeting was held. "Roses" was the evening's topic, with the possibilities of Mothers' day as a side issue. John T. Temple remarked that owing to the fact that white flowers are always hard to obtain, it would be a fine thing for the florist to educate the public into using white flowers for the departed mothers and bright flowers for mothers who were living, thereby distributing the demand among the several colors, and urging all members of the club in getting their home papers to take up the idea. One new member was elected to membership, after which the club was treated to a fine supper and a social hour enjoyed. The next meeting will be in the nature of the sixth annual strawberry feast at Pres. Theo. Ewoldt's home, Floral Hill Gardens, some time in the latter part of June.

T. E.

### Connecticut Horticultural Society.

On the evening of April 28, the date on which our schedule called for an exhibition of hardy primroses, owing to the unusual lateness of the season we transferred our thoughts to the amaryllis, and had a splendid exhibition of potted flowers in full bloom of the hybrid varieties by President Huss from the Goodwin greenhouses. He also showed potted plants of *Spiraea Queen Alexandra* and a most beautiful bush plant of azalea with a mass of light red blooms, about 4½ feet in diameter, and rivaling, according to John Gerard, some of the best specimens shown at the National Flower Show. The *Bougainvillea Sanderiana*, with its gaudy red bracts and magnificent bloom, was also contained in the collection. Mr. Huss and his able assistant, Francis Roulier, both related many facts concerning the culture and characteristics of these species of plants, and President Huss was heartily applauded and thanked for his instructive paper on the amaryllis. J.

A. Weber also staged two fine heads of May King lettuce and two pots of Marshall strawberry in bearing, rich with aroma and tempting as anything ever set before a king. William A. Kinne, of New Britain, showed a fine white orchid of the *Dendrobium* species.

The judges, Howard A. Pinney, John Gerard and T. B. Brown, made awards as follows: Diploma to J. F. Huss for each of the azalea and amaryllis displays, honorable mention for the *Bougainvillea*; certificate of merit to J. A. Weber for the strawberries and lettuce, and a certificate of merit to W. A. Kinne for the orchid.

On October 23 we are promised a treat in the form of a lecture in Hartford by J. K. M. L. Farquhar, of Boston, on "Japanese Gardens."

GEORGE W. SMITH, Sec'y.

ROCHESTER, N. Y.—At the meeting of the Rochester Florists' Association, held May 8, C. B. Ogsten delivered an address on "The Growing of Flowers in the South."

NORTH GROSVENORDALE, CONN.—George J. Gurgins, who has been with C. S. Andem the last three years, has accepted a position as manager of a large greenhouse on Long Island, N. Y.

TO THE TRADE

## HENRY METTE, Quedlinburg, Germany.

GROWER and EXPORTER on the VERY LARGEST SCALE of all CHOICE VEGETABLE, FLOWER and FARM SEEDS. (Established 1874.)

**Specialties:** Beans, Beets, Cabbages, Carrots, Kohl Rabi, Leek, Lettuce, Onions, Peas, Radishes, Spinach, Turnips, Swedes, Asters, Balsams, Begonias, Carnations, Cinerarias, Gloxinias, Larkspur, Nasturtiums, Pansies, Petunias, Primulas, Scabious, Stocks, Verbenas, Zinnias, etc. Catalogue free on application.

**HENRY METTE'S TRIUMPH OF THE GIANT PANSIES** (mixed), the most perfect and most beautiful in the world, \$5.00 per oz., \$1.50 per ¼ oz., 75c per 1-16 oz., postage paid. Cash with order.

All seeds offered are grown under my personal supervision on my own vast grounds, and are warranted true to name, of strongest growth, finest stocks and best quality.

I ALSO GROW LARGELY SEEDS ON CONTRACT.

# The Grandest Fern of the Age Nephrolepis Roosevelt

## Important Special Notice PRICE ADVANCE

The heavy demand from those who have seen Nephrolepis Roosevelt growing on our place and scarcity of stock compels us to advance the price on all orders dated after June first to the following. 2 1-4 inch pots, 50c each; \$4.50 per dozen; \$35.00 per 100; \$300.00 per 1000.

It is our belief the price of Nephrolepis Roosevelt for 1911 will be maintained during the season of 1912.

Nephrolepis Roosevelt is a sport from Nephrolepis Bostoniensis, but a wonderful improvement over the parent variety. The fronds of Roosevelt are from a third to one-half wider than Boston and beautifully tapered from base to tip. Each pinna is distinctly undulated, giving the whole plant a decided wavy effect, which attracts the eye instantly. Nephrolepis Roosevelt will make more young plants, produce a third more fronds, has more graceful drooping habit and finish to a larger and finer plant in small pots than any other fern on the market. Our stock is positively free from that vicious little white scale which is causing fern growers so much trouble.

Orders received to June first will be booked at the following prices: 2 1-4-inch pots, 40c each; \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000. Twenty-five plants at hundred rate; 250 plants at thousand rate.

**GOOD & REESE CO.,**

LONGEST ROSE GROWERS  
IN THE WORLD.

**Springfield, Ohio.**

### A GRAND NEW CARNATION

## Bright Spot

Outclasses everything heretofore grown in the pink dark class.

Won first honors in the 100 class for the best dark pink at the A.C.S. meeting, Pittsburg, January, 1910, also at the Chicago Flower Show, November, 1909. It is a pure bright dark pink of even shade, size 3 1/4 inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.  
Price: Per 100 \$12.00; per 1000 \$100.00; per 5000 \$400.00. 25 at 100; 75 at 1000 rates. Place your order now to be in on early deliveries.

## The Nursery Trade

### American Association of Nurserymen

W. F. Stark, Louisiana, Mo., President;  
E. S. Welch, Shepardsburg, Ia., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Thirty-sixth annual convention to be held  
at St. Louis, Mo., June 14-16, 1911.

S. A. DE GRAAFF, senior member of the firm of de Graaff Bros., Ltd., Leiden, Holland, died at that place April 25, age 71 years.

### American Association of Nurserymen.

The interest in the great convention of this organization to be held in St. Louis, June 14-16, is on the steady increase. Any member who has not yet made arrangements for representation in the badge book should attend to the matter at once, so as to ensure registration.

The programme as has already been announced, is one of exceptional merit and will appear in the badge book, as will also the arrangements of the entertainment committee. The book will be mailed to members in advance of the convention. The secretary will provide a badge of unique design and beauty, and these will be handed to members on their arrival at convention headquarters, the Southern Hotel. In regard to railroad arrangements, excursion fares and tourists rates will be available at Californian and North Pacific coast points, and members should at once visit their local ticket agent for particulars. Those living in the near west, and the southern, middle and eastern states, should also consult their ticket agents immediately.

JOHN HALL, Sec'y.

### Gypsy and Brown Tail Moths.

The Department of Agriculture has issued Bulletin No. 453, entitled "Danger of General Spread of the Gypsy and Brown Tail Moth Through Imported Stock" which calls attention to the infestation of stock coming largely from northern France, with the nests of the brown-tail and occasional egg masses of the gypsy moth, and issues a general warning to all users of such imported plant stock, namely, to nurserymen, fruit raisers and purchasers of ornamentals for city or park planting, to keep all such imported stock under strict watch to see that these

pests do not develop. Early in 1909 it was discovered that nests of the brown-tail moth were being introduced into this country on imported European nursery stock by the New York state inspector, and information was secured concerning nearly 800 shipments, divided among 35 states, and in shipments to 15 of these states nests of the brown-tail moth were found. In 1910 291 different shipments were found to be infected which were distributed in the following states: Colorado, Connecticut, Georgia, Illinois, Indiana, Kansas, Louisiana, Michigan, Montana, New Jersey, New York, Ohio and Virginia. In the 1909 shipments beside the foregoing states infected shipments were found in Iowa, Kentucky, Maryland, Massachusetts, Missouri, Nebraska, North Carolina and Pennsylvania.

The inspection of this stock under the present law is far from adequate to prevent the spread of the dangerous insects, and in some instances is undoubtedly indifferent or worthless, and the danger of importations is proven in the enormous cost in New England in combating these insects. Massachusetts has spent millions and the National Government is now appropriating \$300,000 a year to prevent their spread to other states. The enactment of an adequate inspection and quarantine law should be passed at the earliest moment, for at the present time, with strict inspection and quarantine laws in all the continental countries of Europe, the United States has become a dumping ground for material which could not be sold in Europe, and which is poorly packed and often diseased and insect-infected. Much of this stock is imported by our department stores in our larger cities and unscrupulous nurserymen.

A description of these two insects and their work with illustrations of their nests, the caterpillars and moths, is printed in the Bulletin. The brown-tail moth is very deleterious to health, the hairs of the caterpillar causing a very troublesome rash, and these breathed into the lungs may cause inflammation and become productive of tuberculosis. All the government assistants in New England have been seriously poisoned, and two had to give up work and go to the southwest to recover from pulmonary troubles superinduced by the hairs of the brown-tail moths, and the death of one man employed was due to severe internal poisoning contracted in field work against larvae.

## The Sensational New Cut Flower

# Dahlia Dorothy Peacock

## Representing the Highest Development in Dahlias

Flower larger, finer form, better color and every way far superior to the celebrated English Dahlia, Mrs. Gladstone. Does better in America than Gladstone in England,

## Beautiful, Pure Pink

Long stems, hardy, free bloomer, full to the center. Send for catalogue. Cut shows we know how to propagate, as well as the vigor of this new Dahlia.

## Peacock Dahlia Farms

P. O.: Berlin, N. J. Williamstown Junction, N. J.

CARNATION DOROTHY PEACOCK.

Notice the heavy vigor of plant, and eye at base of young tubers.

## POEHLMANN BROS. CO.

Morton Grove, Ill.

## Indianapolis.

## BEDDING SEASON OPENED.

We are having the finest weather imaginable for the bedding season, which is now in its full glory. Carnations for the past week or two have been a little scarce. The supply for Mothers' day was exhausted early and late buyers were compelled to take roses as substitutes. Cut flowers will be plentiful for Decoration day.

## NOTES.

Roepke & Riemann Co.'s horse ran away this week and tore one of the front wheels off their large plant wagon besides crippling himself severely.

A. Pittet is in the market for another horse. He says the two which he now has are too small for his work.

## New Gold Medal Roses

For 1911 and '12

Write for descriptive catalogue, free on application, to

## HUGH DICKSON

Royal Nurseries,

BELFAST, IRELAND

## Coleus

Big batch of rooted cuttings ready June 5th.

Golden Bedder, Verschafeltti and mixed standard sorts, at \$5.00 per 1000. The old stock plants shipped without soil of the above at \$1.25 per 100. Good enough for bedding, but not a fancy plant.

Giant-leaved cuttings only, at \$1.00 per 100.

## Perennial Phlox

Fifteen varieties, all of them good ones, mixed, rooted cuttings at \$1.25 per 100, by mail; \$1.00 per 100 by express, any quantity.

ALBERT M. HERR,

## Geraniums

Rooted cuttings of Nutt, Ricard and Poite' vine, at \$10.00 per 100. Delivered any time now to Oct. 20th.

## SPRENGERI

4-inch pot stock, \$5.00 per 100.

## SMILAX

Ready June 15th. The kind that it will pay you to buy, at \$12.50 per 1000.

## LIME

An extra fine grade for florists' use, at \$4.50 per half ton. Try a half ton and learn how good it is.

Lancaster, Pa.

## CARNATIONS

Ready for planting in the field; order at once Lawson Enchantress at \$1.50 per 100; Admiration and Scarlet Glow at \$2.50 per 100; Alvina, Victory and Winona at \$1.75 per 100.

ALBERT M. HERR, LANCASTER, PA.

A. W. Brandt has bought a new open wagon and horse for greenhouse work. He has also employed an additional driver.

Will Roepke will have his new house ready for occupancy about the first of June.

Al Reinken has bought a new Studebaker wagon.

A. W. B.

## Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

## Morehead Steam Traps

1 The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

1 It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

1 The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

1 By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

**HARDY CARNATIONS.**

The new hardy ever-blooming CARNATION "CRIMSON KING." Everybody has asked for a carnation that would live out the garden during the winter. We have pleasure in offering this new plant, as it will fill all the bill. It is absolutely hardy, standing over the Canadian winters in the yard. It blooms all summer long, never a day that you cannot cut blossoms. By putting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give more satisfaction as the Hardy Carnation "CRIMSON KING." 2 1/2-in. pots, per doz., \$1.25; \$2 per 100; \$8; per 1,000, \$75. 2 1/2-in. plants sold at 100 rates; 250 plants at 1,000 rates. Our New Trade List of everything you need now ready, mailed on application. Write today. THE GOOD & REESE CO., The Largest Rose Growers in the World, Springfield, Ohio.

or Summer Deliveries.

## Pinger Coal Co.

Phone Harrison 6823.  
Old Colony Bldg., Chicago.

The Chicago Coal Market.

It is reported that Illinois lump coal has been selling in Chicago for about \$1 a ton f. o. b. the mines and that West Virginia, Ohio and Indiana mine run can be had for about 90 cents a ton f. o. b. mines. This drop, of course, is out of the ordinary and is not expected to last more than a few days.

From reliable sources we find that Pocahontas No. 3 mine run will average about \$1.10 f. o. b. mines until August, taking an average jump to about \$1.25 f. o. b. mines in September.

Other grades of coal will be about as follows:

|                                  | Present<br>Delivery | September<br>Delivery. |
|----------------------------------|---------------------|------------------------|

Toronto.

PLENTY OF STOCK.

Business up to the last week has been elegant with a decided increase over former years, but lately there has been a shortening up in the demand and stock in most every variety is plentiful. In roses, American Beauties are short in crop, but the other varieties are plentiful. Richmond, of good color with stems four feet long, are most desirable in red, while the two Killarneys with their good quality can easily supply the demand in pink and white. Carnations, though not in heavy crop, are still plentiful enough to meet demands, the stock in most places is fine, though an occasional place is found where the shading has been neglected, and the flowers have faded. Snapdragons, gladioli, lilies, sweet peas and numerous flowering shrubs all help to give the stores a truly floral effect. Mothers' day created an extra demand from the out-of-town florists and the growers were not slow in taking advantage to get an extra cent each on carnations (which seems a poor policy at this season). The demand locally was, however, little better than any other Saturday.

NOTES.

The Georgetown Floral Co. have sold their plant to the A. E. Moore Floral Co., the latter company being composed of A. E. Moore, Sam. Kirke, James Trimbee and Donald McIntyre. Mr. Moore will look after the sale of the goods while the other three members, all growers, are to produce the stock.

R. Jennings of Brampton was a visitor, stock is still in very good shape and additional glass is going up so that the increased supply may be met. An automobile has been added

## A Bunch of Bills or One--Which?

**B**ILLS for your greenhouse materials—bills for your heating, bills for your ventilation, bills, bills, bills, and after that more bills; each one covering a separate lot of material you bought from a dozen different concerns, each doing business in a different way. A different letter to each one when each thing is wrong. 'Bother, bother, and still more bother! But the worst of all, when your house is finished it is patchy! Things made by the different concerns were not made for each other and they look it.

How much better to build the Hitchings' way by making one blanket contract that covers everything. You get one bill—pay one bill—all your correspondence is with one firm—all adjustments are with the same people. An easy, pleasant way of doing business. And—you actually save money—real money. Want proofs? Then write us.

J. H. Dunlop, who was ill so long, has returned from a trip east. Although not fully recovered, he is getting along splendidly.

The splendid weather lately has put the ground in fine shape for planting and many carnations are being hurried to the fields, the plants are in

fine shape and many of the better ones are being grown indoors for early blooms.

The tulip beds in the city parks are at present a blaze of color and are much admired by the many visitors.

Former Park Commissioner John Chambers has been appointed superintendent of the Government Grounds. H. G. D.

SEA CLIFF, N. Y., May 8, 1911.

"I take pleasure in telling you that after having tried Aphine according to your directions I have personally found Aphine better for black aphid on violets and 'mums than the Hydro-Cyanide Gas, being less dangerous for the plants, as well as for the operator, and doing the same work with equal efficiency. I have not tried Fungine myself, but followed its use day after day at one of my customer's carnation and rose houses. The gardener agrees with me, and all the greenhouse men, that Fungine is a grand preventive, as well as the best destroyer of mildew and carnation rust, if applied properly. It does all it is recommended to do. We cannot do without it in rose houses."

T. H. POLBOS.

### VOLCANO GREENHOUSES.

NEVADA, MO., May 9th, 1911.

"We received the Aphine you sent us and it is everything you recommended it to be. I am glad we now have something that we can mix just as directions call for to get the proper results."

E. D. PIERCE, MGR.

KIRKWOOD, MO., May 1st, 1911.

"We have tested the Aphine you sent us and the results were very satisfactory. We used Aphine according to directions for black aphid and had all aphid killed on first application. . . . We have full faith in Aphine."

F. W. UDE & SON.

### For Sale by Seedsmen.

## The Mastin Junior Sprayer

MADE IN BRASS ONLY

The Mastin Junior Sprayer

We furnish this machine with an Atomizer Attachment if preferred to the Sprayer Attachment; or with both Attachments when so desired.

Designed for use by Florists, Plantsmen, Poultrymen and others who constantly need a good Sprayer; also especially adapted for Conservatory, Garden and Household purposes. Is well made, very durable and most dependable.

Sold through Seedsmen and Dealers in Florists' and Poultry Supplies.

## The Mastin Automatic Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your Dealer about our Extension Hose, Extension Rods, The Mastin White-Wash Nozzle for Bordeaux Mixture, and Mastin's Fast Lock Hose Coupler.

**J. G. MASTIN CO.**

3124 W. LAKE STREET, CHICAGO, ILL.

Mention the American Florist when writing

**Nikoteen** The most effective and economical material there is for spraying plants and blooms.  
**Nikoteen** Is skillfully extracted from leaf tobacco and carefully refined: it is clean and easy to apply.  
**Nikoteen** does the work when vaporized either in pans, on pipes or over a flame. Full Pint Bottles, \$1.50.

## Nikoteen Aphis Punk

Specially prepared for fumigating closed houses. It vaporizes the Nicotine evenly and without waste. Nothing keeps a house free from Aphis so cheaply.

Price \$6.50 per case of 12 paraffined boxes  
All Seedsmen.

## Garman's Antipest

INSECTICIDE AND FUNGICIDE  
For the Garden, Orchard and Greenhouse  
Non-poisonous and harmless to vegetation.

Kills Green Fly, Aphides, Bark Lice, Thrips, Mealy Bug, Red Spider, Scale, Wire Worms, Ants and Slugs.

This is the Grower's Friend. Handy use, cheap and effective, mixes readily in water. Destroys all insect pests and keeps down mildew. Circulars on application. \$1.50 per gallon. Also in quarts, half gallons and in bulk.

**PERFECTION CHEMICAL CO.,**

FLUSHING, N. Y.

## The Fifth "Time and Money" Talk on our Pipe Frame House.

FIRST and foremost, it has a complete Iron Frame, and calling it the Pipe Frame House came about this way. The wooden house didn't meet the demands of the growers for a light and enduring house and some of them failed to see the value of our Sectional Iron Frame house as a permanent investment; so we simply struck a happy medium and made a house that actually has a complete iron frame; one made with guaranteed wrought iron posts on the sides and gables, and in place of the iron rafters running from eave to ridge as in our sectional iron frame houses, we use a Pipe and clamp Frame with the Giant Arch as the main point of strength.

In every other way this Pipe Frame House has identically the same framing as our everlasting Sectional Iron Frame Construction. You see, then, that our name Pipe Frame is merely a term to distinguish it from our other houses, and does mean that the entire frame is strictly pipe. That Giant Arch, for instance, is a tower of strength by itself, and ties the house together, holds the roof up and keeps the roof down. For saving time in erection, lightness and endurance this Pipe Frame is the only second our Iron Frame construction ever had.

Suppose we were to give you a list covering some of the important parts that actually are iron in our Pipe Frame House, then you could see how greatly it differs from any other concern—very well, we will, but next week for that list.

## SUGGESTIONS FOR PLANT GROWERS.

### Stock Plants.

It makes no difference how busy the grower is there is one thing that he should always keep in mind and that is the next season. As the stock is sold it is always the case that the best is picked out and the poorest left, and especially is this the case when much of the trade comes to the greenhouse and selects their own purchases. It is utter folly to think that one can continue from year to year to reserve only the poorest of his stock and not have the quality deteriorate. When there is a scarcity of stock from which young plants are to be propagated the next season, or with varieties for which there will be a great demand and there is danger that the stock on hand will be well sold out, it is best to select a number of good strong plants and set them aside and mark them sold, or get them into their summer locations before the buyers get them picked over and the very ones that should be reserved for stock plants sold. This is especially the case with geraniums for a good, strong, well-branched young plant will produce three times as many cuttings in the fall as a weak single stem plant and furnish good, strong, healthy plants for another year. It is also a good plan to keep all the buds and flowers cut off of these for two reasons, first, it increases the strength and growth of the stock, and second, not bearing any flowers they are not attractive to the buyers. There are many other plants beside the geraniums to which this practice is applicable, extra fine double petunias, double lobelias, in fact, any stock of which plants must be saved for next season's propagation.

### Poinsettias.

The propagation of poinsettias should now be carried on as fast as the cuttings can be obtained, and these should be growing very rapidly on the stock plants. When the cutting has reached a length of two inches it should be cut off from the old plant with the heel and trimmed of all the foliage except the very small leaves at the top. These soft shoots are very tender and will need to be shaded for the first few days in the propagating bed, and if placed

in a bench where there is no bottom heat and shaded, are far too cool to make any progress toward either rooting or growth. In a mild hotbed where they can be kept quite close and moist and at the same time shaded they will root very readily. Where they are not grown in quantities enough to go to this trouble we have had very good success without bottom heat by keeping them covered with a bell glass or by placing panes of glass upright on the edges of the propagating bench and also over the top, resting on the upright panes, but this is by no means as sure as the bench with bottom heat. The cuttings should be potted as soon as rooted in 2½-inch pots and they will have to be handled carefully as the roots are very brittle and break off easily. Do not take many out of the bench at a time for the roots are very soft and succulent and if allowed to lie on the potting bench too long will dry up and shrivel and the plant will die.

### Gardenias.

The young stock rooted in late winter will now be fine plants in small pots and will need to be shifted to 4-inch pots right away. Pot firmly in a good loamy compost with a generous allowance of well-decayed cow manure and coarse sand and keep the plants growing freely. If any extra long growths start out they should be pinched back, for they should be kept short and stocky and become well branched. In many cases the natural breaks which the plants make by setting buds, which should be removed as soon as they form, is sufficient, but if this does not happen the growths should be nipped off. The benches where they are to be grown should be prepared in early summer, and the plants set out early enough so that the roots will fill the soil before cool weather, when it will be necessary to keep them on the dry side. It is not necessary that the benches should be too deep, four to five inches of soil if properly compounded is plenty and there is less danger of its becoming soggy and sour during the winter, which is one of the worst features in growing these plants. All the buds should be pinched out until September on plants which are to be bloomed during the winter season.

**Marguerites for Winter.**

The plants intended for winter blooming should be selected and grown on for that purpose. Some growers plant them out in the field, lifting them during the latter part of August, but they will require a great deal of attention if grown in this manner and are apt to be neglected. The most successful growers grow them in pots all summer. They should be now shifted in 4-inch pots and plunged in a cold frame, where they will never suffer for lack of water. The buds should be removed continually as fast as they appear, that the strength of the plant may all go to the growth, and should not be allowed to become badly pot-bound. As soon as the roots begin to work through the bottom of the pot into the soil beneath, they should be shifted into a size larger, even if it is necessary to pot them into the six-inch size before September. At that time they should be placed in their blooming pots, either nine or ten-inch pots, and brought into the houses before the cool fall nights come or the growth may be checked.

**Crotons.**

The young stock of crotons should be kept in a good, light, sunny position to insure finely-colored plants for setting out, and above all things delay putting the crotons outside until all danger of frost or too cool nights is over. The plants are adapted to nice warm locations and make a very rich-looking bed on a lawn or grass border. After the bedding season there may be plants that will make good young stock, or some of the older plants will need trimming into shape, and it is now a good time to insert the cuttings in the propagating bench and grow the plants on for the winter or another season. To successfully root the croton cuttings there must be a bottom heat of at least 80° to 90°, and if there is no fire heat, a mild hotbed may be made up where these and several other plants may be successfully rooted during the summer. Be sure and keep the crotons well sponged and free from scales which quickly infest these plants.

**Diseased Geraniums.**

ED. AMERICAN FLORIST:

I forward you samples of diseased S. A. Nutt geranium leaves. The leaves spot, turn brown and finally dry up. Can you tell me the cause of the trouble? What is the best remedy?  
Indiana. H. H. T.

The geraniums are affected by a bacterial disease, for which no remedy is known. Certain varieties are much more subject to the disease than others, and it is advisable to discard extra sensitive sorts, and to grow the geraniums in houses that are properly ventilated, as the disease requires for entrance into the plant moist conditions with water persisting on the leaves for a considerable time.

ERWIN F. SMITH.

MINNEAPOLIS, MINN. — Theodore Wirth, superintendent of parks, delivered a lecture before the Y. M. C. A., May 10, on "Vacant Lots and Home Gardening," illustrated with pictures, showing how unimproved back lots may be made attractive by decorative shrubs, flowers and hedges.

**THE RETAIL TRADE**

Conducted by Robt. Kliff, Philadelphia, Pa.

**Easter Basket of Lilies.**

The basket of lilies which we illustrate was one of the beautiful features of the Easter display of Mrs. Ella Grant Wilson, 6402 Euclid avenue, Cleveland, O. The store was filled with beautiful plants and flowers and the window was especially attractive, being filled with well grown plants of lilies and ferns. Through the lily plants was woven a broad white ribbon on which was inscribed, "Consider the Lilies."

**May Flowers in the Chicago Stores.**

With the abundance of stock upon the market the retail stores are full of beautiful flowers and the windows are made particularly handsome and attractive with the displays of cut flowers and plants. The season past has been, in most cases, very satisfactory, the stores reporting an exceptionally fine Christmas trade and an unequalled Easter business. With the exception of a few weeks when roses were short in supply, and the unusual scarcity of American Beauty roses during late March and early April, there has been plenty of stock obtainable to successfully supply all the demands, and the stock has generally been of superb quality. This has all tended to make the business good and profitable and in a great measure accounts for the successful season. Just now, as is usual at this season, there is a lull in the business, and preparations and expectations for Memorial day and the June weddings and graduations are occupying the attention of all. Those that deal in bedding plants are busy getting the stock ready. The late season has held this branch of the business back considerably, but when it does start it will come with a rush and keep things humming for a short time.

To enumerate the stock seen at the different stores at this season would

simply be repetition, for with the large amount of stock being produced by the growers every one is bountifully supplied with the same goods. But of the stock it can be said that the roses are exceptionally fine and still lead the market both in supply and demand. American Beauty is still the leading rose and holds the high position which it has maintained for many years. Killarney and White Killarney have rapidly forged to the front and are displacing the Bridesmaid and Bride. Mrs. Jardine is very well thought of by many, and the beautiful stock which it has been possible to obtain has been a feature in the window displays this spring. My Maryland is now showing up well and as a summer rose is bound to take the place of the Killarney, and Kaiserin Augusta Victoria is beginning to show up well. Richmond is the leader in reds, and although Rhea Reid has some strong advocates, yet the former has obtained the hold upon the public and is hard to replace, for it has the color that is most desired. In carnations Enchantress has the call, but Dorothy Gordon is receiving a great deal of attention, and the colored varieties have had a good demand all winter. Orchids are growing in popularity and are being bought more freely. Just at present there is neither an overabundance or any great variety, but the cattleyas are the greater favorites and there is enough in the market to meet the demand. Violets are now about done, some few bunches being seen, but the violet seems to be losing its popularity, whether the much improved quality of the sweet pea has caused this or whether the buyers have tired of the perishable violet is not apparent, but the uses of sweet peas and orchids for personal adornment is greatly on the increase and has certainly had its effect upon the violet. The sweet peas are now beautiful and in large supply, and these arranged with appropriate green or with a few sprays of lily of the valley are the popular corsages of the day.

EASTER BASKET OF LILIES.

Arranged by Mrs. Ella Grant Wilson, Cleveland, O.

TWO GOOD MEMORIAL DAY WREATHS.

The bulb season is done, there being some outside flowers to be seen, and the poet's narcissus seems to have the best call. Lily of the valley has had a good call all the year and is still in good demand. The fine grade of antirrhinum has had a good sale all the season and some very handsome sprays are now on the market, both in colors and white, a bright pink that is especially well grown being very popular. The Spanish iris is seen in large quantities and makes a beautiful display. Lilies are in plenty and the large vases seen in the stores are very decorative and this flower is especially fine in funeral work. The gladioli are a beautiful spring addition to the flowers of this month and the lighter colors are very showy and liberally displayed.

The demand for flowers for funerals has been very good and some very elaborate designs are being arranged by all the stores and many beautiful pieces are to be seen. While there is nothing particularly novel or new, yet the designers by new combinations are continually adding novelty to this class of work. The great call seems to be for wreaths and sprays, which are always in demand. Some very nice examples of this class of work are to be seen at the stores, and this having an arrangement on display is a splendid way to not only educate the buyers but also, at times when flowers are low in price, to display them in a manner that will be remembered by the customers.

SPRINGFIELD, O.—The matter of competing for the prize for a new rose, offered by the Panama-California exposition, was taken up by the Florists' Club, and several local rose growers may enter the competition.

DANVILLE, PA.—J. J. Curran is fast getting the Castle Grove greenhouses in fine condition. The rose houses are being replanted and preparations for the carnations and other crops in progress. He has got fairly settled, and likes the location and prospects.

## CHRYSANTHEMUMS

### Preparations for Planting.

It is time that the grower of chrysanthemums should be planning the culture of the crop for the fall season. While many delay the planting in the benches until early in July, yet it is far easier to grow a fine bloom on stock planted in June than upon that placed in the benches as late as July. Especially is this so of those varieties that grow slowly and are short in height, and those that require the taking of the bud in August in order to procure the best flower. The early varieties will have to be planted the first week in June that the best results may be attained; Golden Glow and Smith's Advance are better planted even earlier than this date. These varieties can be had in bloom in August and through September, and the bud must be taken in July to finish the bloom as early as that date and the plant must have become well established in the soil before the bud sets in order to have a well finished bloom. It can then be easily understood that the plants must be benched early. The different varieties containing blood of Glory of the Pacific, Polly Rose, Pacific Supreme and Glory of the Pacific itself should be planted early, for they are all rather short-jointed in their habit of growth and as they mature their blooms in early October will have to be given time to make good growth before September. While these varieties will not require that the bud be taken as early as the first two mentioned, for with the pinks the early crown bud is very apt to be light colored, yet with late planting a second quality bloom is always the result. So it is much preferable to plant all the early-blooming varieties as soon as possible, that they may become well established and well rooted through the soil before the buds form, when it will be time to begin to feed them, either with a mulch or liquid manure.

The compost pile should have already been made, but if not, should be made up at once. This should be composed of two-thirds sod and one-third cow manure, and if the sod is coarse, it should be chopped or broken up. When composting the pile it is better to make it up in layers of eight inches of soil and four inches of manure and sprinkle bone-meal on top of the soil in each layer, about a four-inch pot full to 20 square feet. This should be turned and mixed before it is placed in the benches. Clean the benches out thoroughly and remove any rotten boards that will harbor sowbugs, for these little pests are very fond of white chrysanthemums and will eat off the petals of a half-blown flower and ruin it, and give the benches a good coating of whitewash. The benches should be at least six inches deep that they may hold five inches of soil after it has fully settled down. Where there are ample provisions for watering with liquid manure the benches may be filled with the compost and are ready for planting, but where these facilities are not, it is well to place an inch or inch and a half of half decayed manure on the bottom of the bench, filling up with the compost. The chrysanthemum is a great feeder and will need plenty of nourishment when the buds are forming and expanding.

If there is not stock enough of the later varieties the cuttings should be propagated at once; of the earlier varieties it would be better to buy the young stock than attempt to root it after June 1. The cuttings root easily at this time but will require plenty of water, the sand being kept well saturated and the bed sprinkled often. They will need to be shaded the first week after being placed in the propagating bench, and it is much better to have shades arranged so that there will be a small air space over the tops of the cuttings and not have papers laid on them, as is so often seen, for this is very apt to cause the cuttings to damp off. Allow no drafts to blow

across the bench or the cuttings will wilt, and even if they come up and root a recurrence of this for a few times will cause the young stock to harden up, and they will never make good plants.

Keep the stock free from aphids, the plants should be frequently fumigated or sprayed with an insecticide. If the black aphids once gets a good hold on a bench of chrysanthemums they are very difficult to dislodge, and will be troublesome all the year and may cause heavy fumigation after the blooms begin to open, which will have a deleterious effect on the color of the bloom, and after the bloom begins to open they are almost impossible to eradicate. It is necessary to keep these insects down in the early stages of growth.

The demand for sprays of chrysanthemum flowers has increased the last few years, both for pompons and singles, and every grower should have a few of these in his collection. They can be grown with six to ten sprays on a plant if planted in the benches, and will give a very fine assortment. To the grower having a retail trade the old white anemone, Garza, is particularly useful and these should also be grown to sprays and not disbudded as is often seen. While it makes a very good specimen bloom, yet it is not large, and it makes a very beautiful and graceful spray that is well adapted to all kinds of floral work.

Where there is a demand for the small pot plants they should now be in three or four-inch pots and have been pinched back so as to have at least three or four good branches. These can be planted out in the field or grown on in pots in the frames. They demand constant watching and kept well pinched back until the middle of July or first of August. If planted in the ground they should be potted in their blooming pots by September 1, for the buds begin to set by the middle of that month, and the roots should not be disturbed after this or the buds are very apt to blast.

#### New Turf Plough.

We have had submitted to our notice by Boulton & Paul, Lim., Norwich, a new machine for cutting turf that appears to be not less remarkable for its usefulness than for its novelty in construction. This turf plough is the outcome of much thought and practical experience, and is the invention of H. J. Muntz, of Hungerford. We are informed that with it an acre of turf can be easily cut in two hours; and it is a point of great practical importance that it will not only cut the turf at a uniform width, but slices it off in a manner that is practically impossible by hand. So accurate is the cutting that the thickness of the turf does not vary an eighth of an inch, which we need hardly say effects a material reduction in the labor of relaying. The plough is manufactured by Boulton & Paul, and will be found of much value on estates, in parks and to golf clubs and landscape gardeners. The illustration so admirably portrays the plough as to render detailed description unnecessary. It should, however, be mentioned that, as in the case of so many other inventions of merit, the mechanism has the advantage of simplicity. --Gardeners' Magazine.

## THE CARNATION.

### Carnations.

A paper read by C. H. Janzen, Berlin, Ont., at the thirteenth annual convention of the Canadian Horticultural Association, August 10-11.

At this season carnation growers are making preparations to house the field-grown plants. We will take it for granted that the new soil to fill the benches is already on the premises and in good condition ready to wheel in. After the old soil has been removed from the benches see that the houses have a thorough cleaning, especially under raised benches, if these are used, as rubbish will accumulate, despite all efforts to the contrary. Use the hose to wash out all loose soil from between the cracks of the wooden benches and the tiles where brick and tile benches are used. Give the wooden

New Turf Plough.

benches a good coat of hot whitewash on the sides and bottom, well rubbed in. On the brick and tile benches and also on the solid brick beds give the face brick a good coat of whitewash on the inner side and sprinkle a light coat of air-slacked lime over the bottom of the beds before refilling. Fill the benches level full and firm well along the edges. Before beginning to plant mark the beds both ways. For shading we use a light mud wash sprayed on the outside of the glass. This stays on long enough and is easily removed if necessary before a rain comes to wash it off.

#### LIFTING AND PLANTING.

When ready to lift the plants from the field choose a dull quiet day if at all possible as the plants suffer least then from exposure. Select only the best and most shapely plants for benching as a poor plant takes too long to round into shape for the winter season. In digging we use a four-tined fork and find this tool to be the best for that purpose, as the plants lift with a nice ball of soil attached if the ground is not too dry. Have plenty of flats handy to place the plants in as fast as dug and when a load of plants is ready send it along to the planters. Do not rub off too much of the soil that clings to the roots as a plant with all or nearly all of the soil removed takes a great deal longer to become established in its new

quarters than one with a nice ball of earth attached.

Do not plant too deeply and leave a small depression around each plant. Give each plant a good watering as soon as planted and keep plenty of moisture in the house by spraying until the plants have taken hold when the spraying can be reduced. After the plants have started to grow nicely the surface of the beds should be leveled down and all diseased and dry foliage removed. Keep up the stirring of the soil as often as needed as it kills the small weeds and helps to keep the soil sweet. Give all the ventilation possible day and night but avoid draughts and watch the watering of the soil. Rather have a good heavy watering when necessary than constant light spraying.

#### SUPPORTS.

Whatever style of support used get it in place as soon as the plants are well started as the new growth must be kept upright to produce straight stems later. From this on it is a matter of daily attention to watering, ventilating and the innumerable little details that make for success in carnation culture. When the nights become cool enough to require fire heat do not shut down the ventilators tight and try to make the heat in the house carry through until morning, but rather put on a line of pipe or two and leave a good generous crack of air on. We cannot get too much fresh air in a carnation house.

#### PROPAGATING.

About December 1 we take our first batch of cuttings. Give the propagating bench a good coat of hot whitewash and fill it level full of sharp tereed and pounded down before placing in the cuttings. In pulling the cuttings select only the strongest from flowering stems. When putting the cuttings in the sand do not put them down more than three-quarters of an inch, with rows about an inch and a half apart and the cuttings not too close in the rows. Water them in well and keep well shaded and sprayed for about two weeks after which time they will not require so much water. As soon as the cuttings are rooted we plant them out on benches the same as the parent stock but a great deal closer—about 4x4 inches. Shade them slightly if the weather is sunny, avoiding draughts and give them a good watering as soon as planted. The young stock once established should not have a high temperature but rather one several degrees lower than the flowering plants receive.

In topping the young stock we pull the tops out clean when the plants have grown enough to show the joints between the foliage. Go over the stock as often as necessary, at least once a week. Keep the young plants clean of weeds and the soil stirred occasionally. When the weather becomes settled in the spring and all danger of frost is over plant the young stock out into the field. This should be plowed and manured during the fall and again plowed early in the spring. When ready to plant out plow and harrow well as much ground as is required for one day's planting as this prevents the entire field from drying out before planting begins. There are different methods of planting in the field but the method which enables one

FIELD OF LILIUM HARRISH AT STEPHENS BROS., BERMUDA, APRIL, 1911.

to get the stock planted out in the least time is the one to use. After the stock is all planted keep the wheel hoe going to keep the weeds from getting ahead and also to supply moisture to the plants. In dry weather such as we have had this summer it is of decided advantage to the plants. When pinching back the plants in the field go over them quite often and pinch back the longest growths but not more clean sand which should be well watered one or two at a time. If the topping is carefully done the plants will not flower before warm weather comes in the spring.

#### INDOOR CULTURE.

Those who have not tried indoor cultivation of carnations should try a bench or two next spring and see the advantage of this method especially as regards Enchantress and its sports. Of course this method of cultivation entails a great deal more labor and close attention during the rush of spring and early summer work, but the results we think more than repay the extra labor. About May 1 we bench our earliest propagated stock taking only the best and strongest plants. These lift with a good ball of soil attached if the bench has been well soaked before digging. We do not use any shading on these, only what has been sprayed on the glass to hold the color of the bloom on the old plants. These plants are handled exactly like those lifted from the field and when they are well established we stir the soil on the beds at least once a week. This is absolutely necessary as otherwise a green scum would soon form from the constant spraying and watering that is required to keep down the temperature during June and July.

Before putting up the supports we rub in a good generous sprinkling of bone meal, as it is much easier applied at this time. Cultural methods from now on are the same as for the field grown stock. A careful record of the bloom cut from both field and indoor cultivation will show a decided gain for the indoor stock.

#### Bermuda and the Lilies.

Read by Arthur T. Boddington before the New York Florists' Club, May 8, 1911.

The Bermuda islands lie in the Atlantic ocean about eight hundred miles from New York, about in the same latitude as South Carolina. Bermuda has been described as Heaven, but it is necessary to go through Hades to get there. This is on account of the rather rough sea trip, especially in the winter time. The gulf stream which is about a hundred miles wide is crossed diagonally, and while the current runs only at the rate of about a mile an hour, if the wind is opposing the direction of the current this frequently kicks up a nasty sea. The steamships that run down there while they are good boats, and are operated under most careful management, are only about half the size of the average European steamer; consequently the motion is felt severely by passengers with delicate stomachs. However, the trip is not always rough, frequently it is very smooth and pleasant especially in the month of May which is one of the most interesting months in the year from the point of view of the florist. No florist could select a better place for a short vacation. The steamship fares are reasonable.

We left New York on April 5, arriving there on Friday morning, April

7. The lilies were just coming into bloom hardly any being expanded but the buds were white. The growers have been very busy in the onion and potato business this year and they were a little behind with the dis-budding of the lilies. A great deal of care is necessary to produce good bulbs. No weeds can be allowed to grow up more than an inch or two high. If the weeds are allowed to get large, when they are pulled out they disturb the surface roots of the lily, which will always result in serious injury and failure when the bulb is grown next year. It is a practice among the Bermuda growers to disbud the lilies just as the buds are whitening. This is done that the plants may be strengthened and that all the nutriment may go to form as large a bulb as possible. Fortunately for me the weather which had been rather cool became suddenly warm and by Sunday, April 9 (Palm Sunday), the fields were a sight to behold. On the next Monday the photographs which I have here tonight were taken. These were some of the best fields at Columbia Farm, Longbird, Smith's Island and at Westmeath. The lilies shown in these photographs were growing strongly and for the most part showed perfect health. When examining them closely however, there seemed to be about 10 per cent of stunted and deformed plants, all of which are being dug out by the more careful growers. Upon my pointing these plants out to R. H. James he told me they were not removed before, for the reason that in digging out these rogues an equal number of good plants would be destroyed and that the plants that were

deformed and stunted were really not diseased plants but bulbs which had been injured in digging the previous year or in the process of planting. Mr. James informed me that they handled lily bulbs as if they were eggs and that rough handling in digging, or by the seedsmen, or by the florists when the bulbs are being potted is one of the most frequent causes of the stunted and deformed plants. To convince me that his theory was correct, Mr. James had a number of these deformed plants dug up in my presence. He demonstrated to me that the bulbs showing these deformities were smaller than when they were planted and that they could never even by accident get packed in the cases as salable bulbs for the reason that they would not be big enough to grade as even 5-7 inch bulbs. The bulbs of these deformed plants or as our friend, Louis Schmutz calls them "Kyoudles" were all afflicted with a partial rotting of the root base. Mr. James who has had thirty years' experience in growing bulbs in Bermuda, tells me that to drop a bulb out of the hand onto even the soft ground will frequently produce an injury sufficient to cause this disease of the root base. There apparently seems to be nothing contagious in this disease. The other disease that seems to be afflicting the lilies in Bermuda is what is known as Ward's disease. The symptoms of this disease are as follows. The plant starts to grow healthily until it gets up a few inches high when it develops yellowish brown streaks and spots in the foliage and finally peters out to nothing or produces a deformed flower. This disease has been almost eradicated, though here and there a plant was to be seen afflicted with it. About the only remedy for this disease is to dig up the bulb and see that it is destroyed, though spraying with arsenate of lead and fungicides is a preventive measure. The percentage of this Ward's disease however was very small. Liliun Jamesii were looking very fine at Mr. James' Long Bird Farm. This lily is almost disease proof. It has extra fine foliage, and flowers under Bermuda conditions one week to ten days later than Liliun Harrisii. The bloom is slightly shorter and not so large as Liliun Harrisii but it is a robust type and well worth growing. Furthermore, this lot had been thoroughly rogued and were true to name.

A point in favor of the Bermuda lilies as grown at Smith's Island, Longbird and at Westmeath, is the fact that these growers have eliminated all hybrid types. I do not think that in the pure Harrisii grown on these establishments there could be seen more than one hybrid in a hundred bulbs. These hybrids were plain to be seen by the fact that they were only beginning to turn down their buds whereas the true Harrisii were in full bloom. The method of roguing is as follows. The men go through the fields with paint brushes and daub the foliage of all plants that are to be discarded such as hybrids, Ward's disease plants and "Kyoudles." It cannot be done in April as it would cause too much injury to the good stock. Liliun Harrisii is particularly sensitive to any disturbance of its surface roots.

I have been doing my very best to urge the Bermuda growers to still further improve their stock and to endeavor to get Liliun Harrisii back to where it was twenty-five years ago. This is being done by careful and painstaking methods. There is no doubt in my mind that the progressive florist of the United States would gladly pay 50 per cent more for Liliun Harrisii bulbs than the present price if the stock could be improved still further. The great trouble has been that plants afflicted with Ward's disease will produce just as handsome and fine looking bulbs as the healthy plants do. Further, a crop of lily bulbs may be well grown and be absolutely ruined by rough handling in digging, in packing, or in the hands of the bulb dealer, or even in the hands of the florists.

I think that the Bermuda methods of selling lily bulbs have been entirely wrong or perhaps I should say the methods of the American bulb dealer in buying them. Under conditions as they have been, the man that grew good lily bulbs in Bermuda and looked after them carefully got no more for his product than the grower that was careless. I often think that the selling of lily bulbs should be a good deal like the cigar business. It is pretty hard to tell what a cigar is until you smoke it and for that reason the cigar manufacturer sells his goods under a brand. He takes every care that no cigars go into a box bearing his brand unless he can be proud of them and they will uphold the reputation of the brand he spent his money to establish.

many small patches which were looking badly, but on the whole both Liliun Harrisii and Liliun Jamesii are showing much improvement in spite of a rather cold, dry and unfavorable growing season. I think that any florist that buys Bermuda bulbs from dealers that are earnestly trying to encourage the Bermudians by paying him liberally for well grown stock will get his money's worth this season. Due to the painstaking care of such men as R. H. James of St. George's, W. H. Conyers of Hamilton, the vigor of Liliun Harrisii is coming back. It only remains for the bulb dealers to give these gentlemen proper support.

As regards the shipping of lily flowers, this pernicious practice was going on to a limited extent and was being carried on mainly by people who do not grow bulbs. Quite a floral business is being done in Hamilton now in sweet peas, iris flowers, roses, etc., and last but not least, cut lilies. The large hotels were entirely filled up most of the winter with American visitors and we cannot blame the Bermuda florist for taking advantage of the situation, so long as he does not cut flowers from bulbs which he afterwards intends to ship up to his American brother florist to grow. To me, Liliun Harrisii is the grandest and noblest of the Easter lilies. Furthermore, a well grown plant of 5-7 inch Liliun Harrisii will produce about as many flowers as a 7-9 inch Japanese Giganteum and for this reason I contend that Liliun Harrisii are not any more expensive. I hope within the next few years to see Liliun

CRABWE ORIENTALIS.

From the Gardeners' Magazine, April 1, 1911.—See Page 940.

This same condition should apply to lily bulbs and the man that grows the extra fine article should be suitably recompensed for the trouble and care he has gone to. There are some stocks of lily bulbs on the Island of Bermuda which are very cheap at the price they are sold for and there are other stocks which are dear at any price, but the bulbs when they come to New York next July and August will all look about the same. I have spoken only of the good fields which I saw. I saw

Harrisii come back and take its rightful place among the commercial lilies grown by the florists of the United States. This, however, can only be accomplished by the greatest care on the part of the Bermuda growers, and by the establishing of brands, so that when a florist in the United States buys a case of bulbs of a brand with a high reputation, he can depend on getting nine hundred good plants out of a thousand bulbs with proper care and attention on his part.

A HOUSE OF FINE CYPRIPEDIUMS.

## ORCHID NOTES.

### A House of Cypripediums.

The illustration herewith shows what a fine display can be made in a house where there are a large number of flowering cypripediums. The effect would have been better if a few ferns had been associated with the cypripediums, but they had not been arranged with a view to general effect, but as a means of comparing the different species and hybrids therein contained.

### The Cattleya Fly.

#### ATTACKING FLOWER SHEATHS.

Growers of cattleyas will do well to notice particularly the warning given in the AMERICAN FLORIST, September 17, page 380, against the pernicious cattleya fly. The advice tendered then is perfectly sound and our reason for calling attention to it again is not to advise anything further as a cure, but to warn growers to look, not only at the young growths, but also at the forming sheaths and flowers. Quite recently we have had much the worst attack of fly to deal with we have ever experienced. Not only were the young shoots badly affected, but the flower sheaths on *C. labiata* had been visited by the female fly in the earlier stages and were abnormally swollen inside.

The owner of these plants had been congratulated upon the very fine flower sheaths and it was by no means a

pleasant duty to point out to him that the seemingly fine flower buds were, in reality, the work of this dreaded pest. On cutting open one of the sheaths the swelling was found on the apex of the bulb and in this were seven or eight fully developed flies almost ready to escape into the house and continue their depredations. Not only one, but many were found similarly affected, so the danger is a very real one where the adult fly, which is about the size of the ordinary house fly, is allowed to remain in the houses. In this case they were so numerous that they could be killed on the glass with the hands, a pretty bad state of affairs, but one that is liable to occur anywhere if the oft-repeated advice as to fumigating and removing affected growths is disregarded. H. R. R.

### New Vandas Caerulea.

Two new varieties of *Vanda caerulea* were shown before the Royal Horticultural Society this season. The one shown by Sander & Son, November 22, and awarded a first-class certificate, presented a striking difference from the forms of this species hitherto exhibited according to the Gardeners' Chronicle. Instead of the flowers being tinged with blue, the tips and margins of the petals are tinged with magenta pink, while the lip is of a deep shade of magenta.

The other, *Vanda caerulea* Bluebeard, exhibited by Lieut.-Col. Sir G. Holford (H. Alexander, grower), Westonbirt,

Gloucester, December 6, and given an award of merit, is a beautiful large flowered variety, states the Gardeners' Magazine. The flowers are shapely as well as large and the color is a clear rich blue with some paler markings between the veins while the lip is intense violet blue.

### Cattleya Buds Rotting.

ED. AMERICAN FLORIST:

The plants of *Cattleya labiata* make fine strong sheaths, but after the buds push up an inch or more, they stand still and rot. The sheaths, of which I send sample, remain in an apparently healthy condition. Can you advise me as to the cause of the trouble? G. B.

A very severe check of some kind has been given the plants of *Cattleya labiata* at the critical stage of bud formation. Without knowing anything of the conditions under which the plants have been grown, it is impossible to say what caused the check. Over-watering in a cold, over-moist atmosphere, with lack of sufficient sunlight, is very apt to cause "spot" in cattleyas and the sheath enclosed shows this spot in a very malignant form. The general health of the plants being impaired, they give way in the most sensitive parts, this being, in "G. B.'s" case, the forming buds. Judging again by the appearance of the sheath, which is all we have to go upon, we should say that the roots are in very bad condition, probably through over-watering, and are not, in conse-

quence, properly sustaining the plants. There is no specific cure for such conditions as these. The plants have to be properly treated and gradually brought back to a healthy state, when all such trouble will cease. "G. B." should pay proper attention to the atmospheric conditions of the house in which the plants are growing, and, if they are in bad order at the root, report them at once, allowing abundant drainage, removing all sour or decayed peat and moss and using only the best peat very firmly placed. Plants after this disturbance require a little nursing or convalescent treatment—a closer atmosphere with slightly more heat and shade and less root moisture than healthy plants require until they are again re-established and growing freely. H. R. R.

### Moss for Orchids.

ED. AMERICAN FLORIST:

I enclose you a sample of moss in which I have potted orchids, using charcoal with it. It has turned mouldy all the way through. Will you inform me whether it will have any bad effect upon the plant? B. B.

The sample sent by B. B. is not moss but the roots of some fern, probably an osmunda, with some particles of half-decayed leaves of trees, and judging by the sample sent, the original mass has been pulled to pieces before using. Fern root should not be pulled apart to this extent, but chopped in pieces of suitable size to fit the situation, for we can't put it together again as well or as firm as before, and this is partly the reason for the growth of fungus mentioned, and the fact that the root fibre is dead.

It is best to obtain newly-gathered material in chunks and cut it up as needed for use; if, however, it has to be bought, use in small pieces and press as firmly as possible. A well-potted cattleya in a reasonable-sized pot can be lifted up by the bulbs. Firm potting precludes the possibility of too much water being held in suspension by the material, this being the cause of more than half the ills the plants are heir to under cultivation in greenhouses.

There should be no fungus growth ever, except on the surface of the material; this is inevitable, does no harm and is easily washed off the first time water is applied. Newly-potted plants need little moisture, especially at this time of year; a spraying over the surface of the material when dry is all that is necessary until root action has commenced. E. O. ORPET.

### Crambe Orientalis.

SEE ILLUSTRATION, PAGE 938.

The genus to which the much-appreciated sea-kale belongs includes several species that are sufficiently attractive to justify their being utilized for beautifying the flower garden and pleasure grounds, and prominent among them is the one herewith illustrated. It has large, deeply lacinated leaves, and elegant, much-branched flower stems, which rise to a height of six or seven feet and bear myriads of fine white flowers. The effect it is capable of producing when grown under conditions favorable to the full development of leafage and flowers is so well shown in the accompanying illustration that there is

no occasion to refer otherwise than briefly to its usefulness for enhancing the attractions of the pleasure grounds, and especially those parts that are maintained in a semi-wild state. The Eastern kale is highly effective when arranged in a bold group, as at Kew, but in private gardens, where it is desirable that the whole of the beds should be more or less attractive throughout the summer months, the preferable course is to arrange it in groups of moderate size in mixed borders, and thus avoid any appreciable gaps after the plants

The Late Lacy Young

have yielded their flora tribute. As in the case of the sea-kale, this stately species should have a liberally enriched and deeply stirred soil, and plants that have occupied their positions for some time should annually have a rich top-dressing in the course of the winter or early in the spring. *C. cordifolia* is also highly ornamental, and well deserving of cultivation; *C. orientalis*, Jacq. is now referred to as *C. pinnatifida*, and, as in the case of the last-named, is well worth growing where space is available for hardy herbaceous plants of robust habit. When occupying beds, *C. orientalis* may have daffodils and gladioli associated with them for prolonging the attractions of the beds.—The Gardeners' Magazine.

### Little-Known Annuals Worth Growing.

With an ever-increasing demand for flowers of bright colors and long stems, so that they may be cut and used for indoor decoration, there is a danger that some of the more unpretentious-looking hardy and half-hardy annuals suitable for growing in our gardens during the summer may be entirely overlooked. It is true that many of the lesser-known annuals can never, on their merits alone, demand the same amount of space in our gardens that is devoted to their more de-

served popular brethren; but at the same time we ought not to go to the other extreme and allow them to drop out of cultivation altogether. Many of them possess a quiet, old-world charm that appeals strongly to those with artistic tastes, states a correspondent in *The Garden*, and it is proposed to draw attention to some at least of those annuals which are seldom met with outside seed trial-grounds or cottage gardens.

It is strange indeed that certain flowers, although possessing equal, if not superior, qualities to those so largely in vogue, never seem to become popular with the general public. As an example of this we need only mention the charming little Swan River daisy (*Brachycome iberidifolia*), an annual that will thrive without much attention if given a sunny position and well-drained soil that is not too clayey. Its dainty little blue or white cineraria-like flowers, supported on slender green stems, are beautiful in the extreme, yet for some reason or other it has never become popular. *Leptosphon hybridus* is a dwarf annual that reminds one when in flower of the charming little creeping sandwort (*Arenaria balearica*), except that its dainty star-like flowers, poised gracefully on slender stems, embrace a wide range of rich colors. As an edging in a sunny position this annual is beautiful in the extreme, yet it is seldom seen in private gardens. Seeds ought to be sown where the plants are to flower.

In *Schizopetalon Walkeri* we get an annual of unique aspect, caused primarily by its feathery-like petals arranged in the form of a cross. It appears to appreciate rather light soil, and although not particularly showy, emits a delightful fragrance when moistened with the evening dew. This reminds us of the insignificant-looking night-scented stock, which, though grown more widely perhaps than most of the other kinds mentioned, is not grown half enough. It is true that during the daytime its foot-high stems present a rather gaunt appearance; but if it can be given a station in an inconspicuous spot near to the dwelling house, its fragrance in the evening, when its pale lilac petals unfold, will more than repay us for giving it room.

Those who are interested in the curious aspect of plant-life might well endeavor to grow *Martynia* fragrans. It is true that this little-known annual is not one of the easiest to grow, and demands to be raised in pots in the greenhouse and planted out in rather sandy soil with a sunny position in June; but when the plants do get established and the purplish flowers are followed by the large, hooked fruits, admirably adapted for distribution by animals, the owner will be compensated for any trouble that this plant may have given. An annual with gorgeous-colored flowers that also demands sandy soil and a hot situation is the fleshy-leaved *Portulaca grandiflora*. Unlike the *martynia*, however, the seeds may be sown outdoors where the plants are to flower, providing the sowing is postponed until the first week in May; if sown earlier and bad weather supervenes, the seedlings will often die off wholesale.

In *Phacelia campanularia* we have a dwarf annual with deep blue, bell-shaped flowers. It needs an open posi-

tion by do well. If at all enroached upon by other stronger-growing plants, it becomes weak and presents a most dejected appearance; but if sown thinly and the seedlings are early thinned so that each one has room to develop its natural character, there are few annuals that can claim to possess greater charm. There are many other annuals that are mostly neglected, but which might well find a place in those gardens where little-known or out-of-garden plants are appreciated, such, for instance, as *Cacalia coccinea*, *Calandrinia grandiflora*, *Erysimum perovskianum*, *Eutoca viscidula*, *Gilia dichotoma*, *Layia elegans* and *Leptosyne Stillmanii*; but lack of space forbids detailed mention of these. The subject of these lesser-known annuals is, however, one that ought not to be lost sight of at this season, when seeds are being ordered for subsequent sowing. If room can be found for only a few of those mentioned above, they will give additional interest to the garden during the summer and autumn months.

#### Old Italian Gardens.

The old gardens of Italy were the subject of a highly interesting lecture given by Joseph Cheal the other evening before the members of the Brighton Horticultural Society. In the course of his lecture Mr. Cheal stated that the love of gardening in Italy may be traced to an early period in the history of the country, and it may be assumed the Roman generals brought home glowing accounts of the gardens they had seen in eastern countries. It was probable that these accounts stimulated the imagination of Lucullus and induced him to make the fine garden at Naples described by Pompey, and thus become the pioneer of the grand style of gardening that became so popular at a later date. Emperor Hadrian also did much to stimulate a taste for the higher branches of architecture and horticulture, but during the comparatively long period over which the decline of the Roman Empire extended there was a material decrease in the taste for the stately style of gardening. Towards the end of the fourteenth century there was a considerable revival in the taste for gardening, and, during the Renaissance, dignitaries of the church and wealthy senators and merchants appear to have vied with each other in the building of houses and the construction of gardens. Certainly the arts of the architect, the sculptor, and the landscape gardener were employed in the creation of the magnificent gardens of the period. The style that found favor was more or less formal, and the gardens were embellished with terraces and parterres, fountains, and cascades, temples and cascades, and avenues and pergolas in great variety. The climate favored the development of a wealth of trees, shrubs, and flowering plants, and these in their luxuriant growth afforded a succession of delightful pictures, and filled the air with grateful perfumes. The shady walks, avenues, and grottoes provided cool retreats during the heat of spring and summer, and the rippling of the cascades, the splashing of the fountains, and the song of birds greatly enhanced the charms of these gardens. Many of the more noteworthy gardens were described and the lecture was throughout illustrated with excellent

slides. Need it be said that the audience greatly appreciated the intellectual feast provided them, or that Mr. Cheal was heartily thanked for his lecture?—*The Gardeners' Magazine*.

#### Young Spring with Watering Can.

Young Spring, reminded of forgotten duties, took up the watering can with serious intent Saturday, kept steadfastly to her task Sunday, and went to bed with dripping elbows, tired but content. Only a spring rain can smile as did that of Sunday—a buxom lass, Young Spring, with her wet skirts girdled up, splashing about with bare feet, smiling as she filled her water bucket, laughing as she doused it down on the dripping face of all outdoors.

A lot of lazy elemental forces sat around and clapped their hands loudly from time to time in admiration of the perfection of her work and she scolded

The Late Fred R. Mathison.

the folk foolish enough to get in the way of the drenchings intended for her grass, which needed them, and stood on tiptoe to get them. On each blade sat a water sprite with a brush and palette and sang as he painted with green.

The hired man carried the sprinkling can yesterday and he plainly was surly, but the watering done Sunday was by Young Spring herself.—*Chicago Tribune*.

#### Yonkers Horticultural Society.

A well attended meeting of the society was held in Wiggen's Hall, Yonkers, N. Y., May 19. Business relating to the spring show was discussed, and it was decided to hold the exhibition in Hollywood Inn, Wednesday, June 14. A good schedule has been drawn up, and the members of neighboring societies are cordially invited to compete. Darwin tulips were finely shown by S. Untermyer, of Greystone, H. Turner, superintendent, and were awarded a certificate of merit, the judges adding that they had never before seen so fine an exhibit of that section of the tulip family. Members are looking forward to a good time at the clam bake to be held at Rye very soon.

H. M. B.

## OBITUARY.

#### Fred R. Mathison.

Fred R. Mathison, one of the best known growers in the vicinity of Boston, died at his home in Waltham after a long suffering illness of kidney trouble May 21, aged 70 years 7 mos.

Mr. Mathison was one of the older growers of Boston, coming to the city some 13 years ago from England. He first attracted attention as a grower when he took charge of the establishment of C. J. Power of South Framingham. He then entered in partnership with the late William Edgar and John G. Forbes, purchasing a greenhouse plant in Dorchester. This firm lasted but a short time, Messrs. Mathison and Edgar withdrawing, and he then built a fine range of greenhouses at Clematis Brook, Waltham, Mass. The roses grown in these houses became renowned, being of extra fine grade, the equal of any brought to the city. This establishment he conducted until 1897 when he leased it to two of his employees and retired from active business, until two or three years ago, when he again took charge conducting the greenhouses. Clear-headed, observant and industrious he acquired a competency and won the respect of his associates by generous and companionable traits. He was a prominent member of that fraternity of Boston gardeners known as the "Old Guard," most of whom have passed away. In his life in his home he won the confidence of his neighbors and fellow citizens, serving as alderman in his city. He was always ready to assist the work of horticulture, being an active member of the trade organizations and societies. He was state vice-president of the S. A. F. in 1900 and served on the board of directors of that society in 1902, 1903 and 1904, and took a great interest in the early work of the Boston Gardeners' and Florists' Club. He was twice married, his first wife died March 8, 1905, a few years after they had celebrated the silver anniversary of their wedding. The second wife survives him.

The funeral was held at his late residence, Beaver street, Waltham, Tuesday, May 23. The interment being at Mount Peake cemetery.

#### Lacy Young.

Lacy Young, connected with J. B. Deamud under the firm name of the Deamud & Young Fern Co., died at his home in Thompsonville, Mich., May 16, after an illness of several months, aged 39 years.

For the last 10 years he had been connected with the firm, packing and shipping ferns in Thompsonville and other Michigan points, until the illness, which at times was fraught with great suffering, caused him to relinquish labors. He was one of the best known and popular young men of the section, of a quiet and friendly nature and ever ready with a helping hand for every worthy project.

The funeral services were held at his home May 16, and the interment at Fremont, Mich., May 17, which were attended by his fellow members of the I. O. O. F. and Maccabees.

LYNN, MASS.—A very peculiar suit has been brought against W. B. Newhall, a florist at 52 Atlantic avenue, by one F. M. Rodgers, claiming \$200 for services rendered in saving the lives of the defendant and his friends, who were upon an unmanageable power boat in a heavy storm.

THE art souvenir of the Park Floral Co., descriptive mainly of this firm's new home at 1643 Broadway, Denver, Colo., is indeed a thing of beauty in the form of an illustrated booklet in color and monochrome.

## Personal.

Prof. Frank A. Waugh, of Amherst, Mass., visited Chicago May 18, enroute to Winnipeg, Man., where he is interested in the new landscape work on the grounds of the agricultural college.

Harry A. Barnard, who is well known in the American trade as the representative of Stuart, Low & Co., Bush Hill Park, Enfield, Eng., celebrated his jubilee with that firm last month. "Half centuries seem slow to those who have not tried them; but for all of us, the shuttle flies more and more swiftly, as the years are woven into the cloth of human destiny."

## Society of American Florists.

### COMMITTEE ON SCHOOL GARDENS.

The school garden committee has issued the following letter: Are you doing any school gardening? This subject is one to interest every boy and girl; the value in a home garden from an economical standpoint is such that thrift, where now goes waste, would add here a little and there a little to home comforts and income, in this great country of ours, that would aggregate millions of dollars, gathered from waste spots and odd corners, beside bringing health and strength to growing children. The suggestion of this work and its inception in school districts throughout our country, and our country goes where the flag goes, would help thrift and comfort to many a rising family. Kindly advise us what your school district is doing.

BENJAMIN HAMMOND, Chairman.

## Horticultural School for Women.

For the increasing number of women who wish to be able to combine their occupation with their home life, for those who are looking for newer, wider fields of remunerative activity, and for those who desire to live in the country and have an occupation, but do not want to invest capital nor enter an industry without special knowledge and training, the Pennsylvania School of Horticulture for Women has been established that they may be instructed in the fundamental principles of horticulture. Schools for gardening have been established in England and continental European countries and have a recognized position in the educational world. Many women are now turning their attention to horticulture and gardening and this school offers practical training in these branches.

The school is located upon a farm of 71 acres at Ambler, Montgomery Co., Pa., about 18 miles from Philadelphia, the property having a high location and the land is all under cultivation, there being apple and pear orchards, nut trees, seven acres of asparagus, two acres of strawberries in bearing condition. The courses cover two years and include beside the growing and marketing of vegetables, flowers and fruit, bee-keeping, poultry-raising and methods of business, scientific work in botany, chemistry, geology and entomology as far as they are directly applicable to gardening, thus offering theoretical instruction combined with much practical work in garden and orchard.

## Yearbook of Agriculture.

We are in receipt of the yearbook of the United States Department of Agriculture for 1910 which, in addition to the customary reports of bureau chiefs, contains many interesting papers by experts, of which the following are likely to interest some of our readers: "Nitrogen-Gathering Plants," by Karl F. Kellerman; "Progress in Saving Forest Waste," by William L. Hall; "Bituminous Dust Preventives and Road Binders," by Prevost Hubbard; "Increased Yields of Corn From Hybrid Seed," by G. N. Collins; "The Utilization of Crop Plants in Paper Making," by Charles J. Brand; "Co-operation in the Handling and Marketing of Fruit," by G. Harold Powell; "Promising New Fruits," by William A. Taylor; "The Precooling of Fruit," by A. V. Stubenrauch and S. J. Dennis; "Camphor Cultivation in the United States," by S. C. Hood and R. H. True.

## American Peony Society.

The annual meeting and exhibition of the American Peony Society will be held at Horticultural Hall, Philadelphia, Pa., June 14-15, in conjunction with the exhibit of the Pennsylvania Horticultural Society. Following is the schedule of premiums:

### COMMERCIAL CLASSES.

Class 1. Largest and best collection of named varieties, one flower of each, two prizes, \$25, \$15. Offered by American Peony Society.

Class 2. Best fifty blooms, one variety, named, white, two prizes, \$10, \$5. Offered by B. H. Farr, Reading, Pa.

Class 3. Best fifty blooms, one variety, named, dark pink or rose, two prizes, \$10, \$5. Offered by Andorra Nurseries, Chestnut Hill, Pa.

Class 4. Best fifty blooms, one variety, named, flesh or salmon-pink, two prizes, \$10, \$5. Offered by Cottage Gardens Co., Queens, N. Y.

Class 5. Best fifty blooms, one variety, named, crimson, two prizes, \$10, \$5. Offered by Thos. Meehan & Sons, Germantown, Pa.

### AMATEUR CLASSES

Open to amateurs and private gardeners only.

Class 6. Largest and best collection of not less than twenty-five varieties, named, one of each variety, two prizes, \$15, \$10. Offered by T. A. Havemeyer.

Class 7. Best collection of not less than twelve varieties, named, one of each variety, open only to exhibitors not residing within 100 miles of Philadelphia, two prizes, \$10, \$5. Offered by Henry A. Dreer, Inc., Philadelphia.

Class 8. Best collection of white varieties, named, one bloom each, two prizes, \$6, \$4. Offered by W. Atlee Burpee Co., Philadelphia.

Class 9. Best collection of dark pink or rose varieties, named, one bloom of each, two prizes, \$6, \$4. Offered by Robt. Scott & Sons, Sharon Hill, Pa.

Class 10. Best collection of salmon and flesh-pink varieties, named, one bloom of each, two prizes, \$6, \$4. Offered by Thos. Meehan & Sons, Germantown, Pa.

Class 11. Best collection tricolor varieties, named, one bloom each, two prizes, \$6, \$4. Offered by Peter Henderson Co., New York.

Class 12. Best collection crimson varieties, named, one bloom each, two prizes, \$6, \$4. Offered by Geo. H. Peterson, Fairlawn, N. J.

Class 13. Best six blooms of any one variety, named, two prizes, \$6, \$4. Offered by W. W. Kline, Reading, Pa.

### OPEN CLASSES

Class 14. Best six blooms of Duchesse de Nemours, \$250. Offered by F. H. Wild Floral Co., Sarcoise, Mo.

Class 15. Best vase of twenty-five pink blooms of one variety, \$5.00. Offered by Henry F. Michell Co., Philadelphia.

Class 16. Best twelve pink varieties, six blooms each, \$10.00. Offered by S. G. Harris, Tarrytown, N. Y.

Class 17. Best collection of Japanese varieties, one bloom each, \$5.00. Offered by Henry F. Michell Co., Philadelphia.

Class 18. Best new American seedling peony, not in commerce previous to 1908, name of originator to be given, \$10.00. Offered by Andorra Nurseries, Chestnut Hill, Pa.

NEW CASTLE, IND.—P. J. Lynch, head of the Heller Bros. Co., has recently purchased nine acres of land on which will be erected two greenhouses 35x500 feet. In addition to the greenhouses, buildings for business purposes and dwellings for the employees will be erected.

## Meetings Next Week.

Albany, N. Y., June 1, 8 p. m.—Albany Florists' Club, 71-73 State street.  
 Chicago, June 1, 8 p. m.—Chicago Florists' Club, in connection with the Milwaukee Florists' Club, Milwaukee, Wis.  
 Lake Forest, Ill., May 31, 8 p. m.—Horticultural Society of Lake Forest, Council Chamber, City Hall.  
 Lake Geneva, Wis., June 3, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.  
 Lenox, Mass., June 3.—Lenox Horticultural Society.  
 Milwaukee, Wis., June 1, 8 p. m.—Milwaukee Florists' Club and Chicago Florists' Club.  
 Pasadena, Calif., June 2, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.  
 San Francisco, Calif., June 3.—Pacific Coast Horticultural Society.  
 Utica, N. Y., June 1, 8 p. m.—Utica Florists' Club, Genesee hall, Onondia square.

## Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

**Situation Wanted**—As working foreman, by a first class grower of cut flowers and potted plants, single, German, strictly sober, can handle help, etc. Key 453, care American Florist.

**Situation Wanted**—Young lady wishes to secure a situation as cashier or saleslady in a florist store in Chicago. For further particulars address Key 448, care American Florist.

**Situation Wanted**—Neat appearing young lady wishes to secure a situation as saleslady in a Chicago flower store. Experienced. State wages when writing. Key 449, care American Florist.

**Help Wanted**—Two good growers wanted at once. Germans preferred. FISHER, BROS., 614 Dempster St., Evanston, Ill.

**Help Wanted**—Position open for a good truck gardener; \$15.00 per week; German preferred. Address Box 182, Waterloo, Iowa.

**Help Wanted**—Good grower of pot plants at once; state wages wanted. Address N. K. WELTER, 708 Wesley Ave., Evanston, Ill.

**Help Wanted**—Young men, experienced at growing vegetables, and small fruit; private place; state wages. Address P. G. PEARSON, R. K. No. 1, Moline, Ill.

**Help Wanted**—Five live salesmen acquainted with the Florist, Nursery and Seed trade. Must have first class references. Apply by letter only, stating qualifications in first communication. Address Key 451, care American Florist.

#### RECORD-BREAKING WARM WEATHER.

Four successive hot days last week with the thermometer flitting with the ninety-degree point, breaking all May records for this city, to be followed by rainy, muggy weather, accompanied by thunder storms, have made the life of the growers as well as the wholesalers a week of trials and hard work. The thermometer went many degrees higher here than at more southern points and everything in bud pushed into bloom and kept all hands busy at the greenhouses cutting stock and the storemen on the jump trying to handle the heavy receipts and endeavoring to find a place to put it. Such warm weather is sure to have a deleterious effect upon the stock and during the heated spell the quality of both roses and carnations, as well as all kinds of stock, fell off greatly, and many of the flowers would keep in good condition but a short time, which made it very hard for the shippers to send out satisfactory stock. The roses lost color rapidly and the carnations grew small and all lacked the necessary substance, but with the change in the weather conditions that has followed, better stock in greatly reduced shipments is expected. Added to the large receipts of inside stock, outside flowers have been shipped to the stores in great quantities and peonies, iris, lilacs and other cut shrubs filled the counters at the several stores. The roses fairly swamped the market last week, large quantities of American Beauty, Killarney and Richmond being received of both long and short stems, and it was simply impossible to dispose of them all. Brides and Bridesmaid were also in large receipt, and all showed the effects of the summer weather. My Maryland and Kaiserin

## ORCHIDS

### ::A Specialty::

A fine stock of Cattleyas, Gardenias, Dendrobiums, Assorted Orchids, Valley, Violets, Beauties, and all fancy flowers always on hand. Decorative stock and supplies of all kinds.

Send for Price List.

**CHAS. W. McKELLAR**  
162 N. Wabash Avenue,  
**CHICAGO.**

Augusta Victoria were also forwarded in large quantities, but these varieties did not suffer in quality as much as the others during the warm weather. Carnations felt the effects of the weather very badly and many of the blooms were very soft and the size fell off greatly, while the color in many cases was very light. The quality of the sweet peas also was far below what has been coming into the market. These three, roses, carnations and sweet peas seemed to feel the warm weather more than the other stock and with the cooler weather this

week a change for the better in the quality is assured. The gladiolus are very fine and elegant America Augusta and Mrs. Francis King are on sale and fine bunches of the Colvillei varieties. Cattleyas are in good supply and some elegant spikes are seen in the market. Peonies are in great supply and some very fine stock is to be had; the officialis varieties are of good size and color and some very beautiful Festiva Maxima have been offered on the market. Bulb stock is about finished, Spanish Iris, Narcissus Poeticus and the double form, alba

**CHICAGO.**

pleno odorata, and a few late tulips are all that are left of this class of flowers. The indications for a fine Memorial day trade are good, the advance orders are large and it looks as if there would be plenty of stock.

### NOTES.

P. Swanson, who far many years has been conducting a large mushroom farm at Forty-seventh street and Tolman avenue, is about to leave for Los Angeles, Calif. He is taking his family with him, as he intends to locate there permanently. Sickness in the family is the reason given. He has sold the residence and turned over the management of the farm to his brother, W. Swanson.

J. R. Friedman has severed his connection with the Woodlawn Floral Shop, East Sixty-third street, and will now devote his time to the newspaper business. His many friends wish him much success in his new undertaking.

Foehmann Bros. Co. is supplying their customers with an extra fancy grade of cattleyas and lily of the valley. The White Killarney and Richmond roses that this firm is cutting are of good quality.

Bassett & Washburn are on with a large crop of White Killarney and other varieties of roses. This firm's home-grown peonies will be in crop for Memorial day for the first time in many years.

John Goode is acting as foreman at the Hoerber Bros. greenhouses at Des Plaines and if he can grow roses as successfully as he does carnations, his employers will have no cause to complain.

J. A. Budlong is now cutting a limited quantity of Mrs. Francis King, America and Augusta gladiolus. It is expected that the supply of these flowers will be much larger next week.

H. A. Fisher of Kalamazoo, Mich., was seen in the local market this
